PART I.

GENERAL REPORT.

REPORT OF THE SUPERINTENDENT OF EDUCATION. 1916-1917.

EDUCATION OFFICE,
VICTORIA, B.C., December, 1917.

To the Honourable J. D. MacLean, M.D., C.M.,
Minister of Education.

SIR,—I beg to submit the Forty-sixth Annual Report of the Public Schools of British Columbia for the school-year ending June 30th, 1917.

The total enrolment in all the schools was 65,118. The number of boys was 32,480, and of girls 32,638. The grand total actual daily attendance made by all the pupils enrolled was 10,045,594. The average actual daily attendance was 52,577. The percentage of regular attendance was 80.74. The total number of teachers employed was 2,124. Of this number, 166 were employed in the high schools, 854 in the city graded schools, 506 in the rural municipality schools, and 598 in the rural and assisted schools.

HIGH SCHOOLS.

The enrolment in the high schools during the year was 4,841. Of this number, 2,074 were boys and 2,767 were girls.

The number of divisions, the total enrolment, the average actual daily attendance, and the percentage of regular attendance in each high school are shown in the following table:—

High Schools.	No. of Divisions.	Total Enrolment.	Average Actual Daily Attendance.	Percentage of Regular Attendance.
Agassiz	1	18	13.45	74.72
Armstrong	2	50	40.24	80.48

EXPENDITURE FOR EDUCATION.

The expenditure for education proper during the year was:—

Per capita grant to city municipality school districts	$ 471,689 30
do rural municipality school districts	307,872 00
do rural school districts	106,778 50
Salaries of teachers in assisted schools	283,517 60
do Esquimalt & Nanaimo Railway Belt	66,968 05
Education Office	24,385 16
Free text-books	64,967 48
Inspection of schools	41,690 57
Provincial Normal Schools	42,946 56
Education of deaf, dumb, and blind	13,715 65
Agricultural and Industrial Education	35,117 18
Manual-training equipment	5,028 27
Grants to school libraries	300 78
Conveying children to Central School	568 68
Grant to Reading Camp Association	300 00
	$1,465,845 78
Less fees for teachers' certificates	2,440 00
	$1,463,405 78

The cost of construction of new school-houses, furniture, repairs, and improvements generally to school property for the year was $136,719.11. The total cost to the Provincial Government for all purposes of education during 1916-17 was:—

Education proper	$1,463,405 78
Department of Works	136,719 11
	$1,600,124 89

In addition to this amount, the incorporated cities, rural municipality and other school districts spent the following sums over and above the *per capita* grants received from the Treasury:—

CITIES OF THE FIRST CLASS.

New Westminster	$ 67,520 51
Vancouver	498,055 04
Victoria	158,276 24

CITIES OF THE SECOND CLASS.

Chilliwack	13,160 00
Cranbrook	11,905 36
Fernie	19,531 19
Grand Forks	11,547 24
Kamloops	14,967 25
Carried forward	$ 794,962 83

CITIES OF THE SECOND CLASS—*Concluded.*

Brought forward	$ 794,962 83
Kelowna	12,641 00
Ladysmith	6,222 90
Nanaimo	18,660 04
Nelson	26,340 99
Prince Rupert	17,201 77
Revelstoke	15,355 15
Rossland	16,910 07
Vancouver, North	24,694 21
Vernon	18,717 15

CITIES OF THE THIRD CLASS.

Alberni	934 28
Armstrong	4,861 61
Courtenay	1,974 91
Cumberland	2,745 20
Duncan	5,180 06

OTHER SCHOOL DISTRICTS.

Rural districts and assisted schools	137,281 04
	$1,637,539 08
Amount expended by the Provincial Government	1,600,124 89
Grant total cost of education	$3,237,663 97

The grand total cost of education for the year 1915-16 was $3,216,349.96.

The cost to the Government of education proper in the several electoral districts was:—

Alberni	$ 22,919 95
Atlin	7,772 70
Cariboo	15,167 15
Chilliwack	38,034 40
Columbia	16,108 45
Comox	50,509 55
Cowichan	18,963 75
Cranbrook	18,876 20
Delta	35,572 60
Dewdney	35,289 40
Esquimalt	18,236 95
Fernie	30,809 15
Fort George	22,775 95
Grand Forks	15,146 40
Greenwood	9,777 85
(The) Islands	13,521 95
Kamloops	51,175 75
Kaslo	18,347 60
Lillooet	12,403 25
Nanaimo	32,880 00
Nelson	12,046 65
Newcastle	22,569 55
New Westminster	32,468 35
North Okanagan	40,324 90
North Vancouver	35,416 65
Omineca	7,130 00
Prince Rupert	28,722 95
Revelstoke	21,966 50
Richmond	48,478 25
Rossland	10,693 30
Saanich	33,090 95
Similkameen	23,941 35
Slocan	23,590 95
South Okanagan	24,939 50
South Vancouver	84,295 60
Trail	30,571 65
Vancouver City	176,191 00
Victoria City	72,680 00
Yale	23,418 35
	$1,236,825 45

The following table shows the cost to the Provincial Government of each pupil on enrolment and on average daily attendance during the past ten years:—

Year.	Cost of each Pupil on Enrolment.	Cost of each Pupil on Average Actual Daily Attendance.
1907-08	$13 94	$20 02
1908-09	14 70	21 01
1909-10	15 36	21 78
1910-11	15 86	22 25

* Half-year.
† Including only those in which a school was in operation during the year.
‡ The consolidation of school districts by the formation of rural municipality districts reduced the number from 257 in 1905-06 to 167 in 1906-07.
§ Including assisted schools with defined boundaries.

The following statement shows the average salary paid to the teachers during the year under each of the four classes of certificates:—

Certificate.	Average Salary paid.	
	Male Teachers.	Female Teachers.
Academic	$1,587 60	$1,075 92
First Class	1,454 28	936 60
Second Class	1,175 76	856 56
Third Class	957 00	827 52

The average salary paid to the teachers of the Province (male and female) was $1,002.96.

The following is a list in tabular form of the number of teachers employed during 1916-17 in the various electoral districts of the Province; the number of male and female teachers is also shown as well as the class of certificate held:—

	Academic.	First Class.	Second Class.	Third Class.	Tempo-rary.	Special.	Male.	Female.	Total.

INSPECTORS' REPORTS.

HIGH SCHOOLS.

VICTORIA, B.C., July 2nd, 1917.

Alexander Robinson, Esq.,
Superintendent of Education, Victoria, B.C.

SIR,—I beg to submit herewith the following report on the high-school work of the Province for the school-year ending June 30th, 1917:—

Amid the ebb and flow incidental to all school-work the fact that we are making progress stands prominent. The increase in the number of teachers and pupils, the increased attention that is being given to the agricultural and commercial courses, and the opening of a technical class are some of the evidences of progress. Forty-one high schools, with 166 divisions, and sixteen superior schools were in operation during the year, employing in all 196 teachers. When we consider that the number of high-school teachers increased by twenty-two during the past year and by twenty-six during the year 1915-16, we get a fair idea of the recent advance in the magnitude of the work. During the year new superior schools were established at Ashcroft and Chemainus, and the one-room schools at Cumberland, Matsqui, and Trail became graded high schools. I feel strongly that the importance of the work of inspection and the continued increase in the number of high-school teachers demand more attention than it is possible for one man to give. A good deal of the high-school inspector's time is taken up in connection with the terminal examinations, and it is obviously impossible for him to make two visits of inspection to each division in the Province. Last year I was able to make 226 inspections.

My first year of inspection has impressed upon me strongly the need for better accommodation for the high-school pupils in many of the smaller centres. I am almost afraid to venture on any forecast regarding the happy day when the teachers and pupils of some centres shall have such accommodation as they richly deserve. It is surely reasonable to expect that a high school which has reached the dignity of two divisions is important enough to deserve a separate building. Districts cannot expect the best results if they consider their high school simply as an adjunct of the public school. The following high schools have very inadequate accommodation: Cranbrook, Grand Forks, Fernie, Nanaimo, Rossland, Trail, and Vernon. In each of these cities the present trustees are fully alive to the necessity for a change, but are handicapped financially. However, it is almost a certainty that at least three of the districts mentioned above will this year obtain the accommodation which is so much needed.

During the past year a large addition to the Nelson High School was completed, giving this important centre a building of which it is deservedly proud.

There is an ever-increasing demand for an extension in the work of our high schools, so that the varied needs of different communities may be better served, and so that the pupils, to whom the observational, manual, and scientific subjects rather than those subjects which train the memory and powers of analysis and discrimination appeal, may not be lost to our schools. It is possible that in the past educators may have been too much concerned with the problem of making the boys and girls of all communities fit the same courses, but are now realizing that the courses might with profit be varied to suit the needs of the boys and girls of different communities. The experience of the past has been that unless care is taken when changes are being made the pendulum is apt to swing too far. In my opinion the educational authorities of this Province are dealing with this question in a very sane manner.

The Education Department two years ago recognized that the work of the rural high schools should be extended so as to better serve the agricultural communities by which they are surrounded, and accordingly established an agricultural course in the Chilliwack High School. The progress along this line has been encouraging. During the past year the high or superior schools at Chilliwack, Armstrong, Belmont, Cloverdale, and Vernon have been conducting agricultural classes under trained specialists. The work is meeting with favour. The growth will be in proportion to the need that is felt among the rural population for such service. The probability is that next year the number of high schools giving agricultural courses will be at least doubled. This course should attract the farm-boy into the high school, will offer pupils

definite instruction in agricultural science, and will give the prospective teachers throughout their High School Course a practical knowledge of agriculture which is essential to the greatest success in any rural school.

Commercial courses are now being given by seven of our high schools. Business men are continually bearing testimony to the excellence of the work being done in these classes. At the beginning of the last school-year a new class was established in the Point Grey High School, while at least three other high schools are making preparation for beginning instruction in commercial work next year.

The King Edward High School, Vancouver, established a technical class for boys at the beginning of the year. This is the first class of its kind in connection with the high schools of the Province and is proving a success. In addition to the mental training received, the technical subjects are preparing the boys for any one of many different trades by giving them a nervous system capable of co-ordinate efforts and a widely applicable skill of hand and eye. The probability is that the same school will next year provide an advanced course in household arts.

The high schools of the Province are now offering the following courses: Non-professional training of teachers; matriculation to University; commercial; agricultural; manual training; domestic science; technical.

For years to come the most important work of our high schools will be the business of providing a non-professional training for the future teachers of our elementary and high schools. When looked at in this light, how important it is that the methods employed by our high-school teachers should be of the best! No matter how excellent a professional course teachers receive at our Normal Schools, there is a grave danger that they will present the different subjects to their classes in much the same manner as these subjects were presented by their high-school teachers. The nature of the preparation and training our young people receive in the high schools must, therefore, always seriously engage the attention of the educational authorities.

I shall refer to some of the outstanding defects I have noted in the presentation of different subjects.

In science the text-book is too much in evidence. In too many schools the suggested experimental work is not done at all or is performed by the teacher before the class; hence the pupils get little or no training in seeing correctly, in manipulating the apparatus deftly, and in drawing the right inferences from the testimony of their senses. It is indispensable to success in scientific work that the subject be taught in the most concrete manner possible—that is, with ample experimental work done by the pupil himself, that he be taught to draw only the legitimate inferences, and that he himself describe his own observations. Nearly all our high schools are deficient in the matter of laboratory accommodation and equipment, but in a number of cases where these have been supplied the teachers do not make use of them.

There are not many good teachers of botany in the high schools. Pupils should be taught to get a first-hand knowledge of plants by visiting them as often as possible and by making collections of the best specimens. The limited number of technical terms needed should be taught when the class see the need for such terms. The contrast between the apathy and listlessness of a class in this subject under a poor teacher and the enthusiasm and earnestness displayed where the teacher is a master of the subject is most apparent.

Geometry is made too much of a memory subject.

Conversational work in French does not receive sufficient attention.

Sight translation is a most invaluable form of exercise in the teaching of foreign languages, yet is used but little. It shows the teacher just what progress is being made in acquiring a facility of translation, and at the same time emphasizes for the benefit of both teacher and pupil the weakness of harmful methods.

In a large number of schools arithmetic and drawing are not receiving the attention their importance deserves. I am firmly convinced that it will be necessary for the Department to either give papers in these subjects at the end of the first year or extend the course to two years.

Strathcona Trust prizes were awarded to the following: First, Division 1, Oak Bay High School, Mr. H. P. Hope, B.A.; second, Division 2, Armstrong High School, Miss I. Tompkins, M.A.; third, Division 2, Nanaimo High School, Miss B. Macdonald, B.A.

It is only fair to state that Division 2 of the Kamloops High School, under Mr. T. R. Hall, B.A., is worthy of special mention. This division came within one point of tying for third place.

In addition to the above, fifteen or twenty additional divisions are doing creditable work, but in the majority of our high schools the showing in this subject is most disappointing. About sixty of the teachers engaged during the year were without Strathcona Trust certificates. The majority of these taught in the Interior and have had no opportunity to qualify. The indications are that these teachers would avail themselves of the opportunity, were one afforded, to secure the full qualification.

I have been deeply impressed with the need for much greater attention to the physical welfare of the pupils. The boys and girls of many of the smaller high schools take absolutely no part in playground sports. A proper blending of formal physical exercises and organized playground sports seems to me the ideal system, but it is most unfair to the pupils when both are lacking. The development of the mind and the development of the body are both important and cannot well be dissociated. In the larger high schools the most satisfactory plan is the appointment of physical instructors who are capable of directing all the physical activities of the school and can devote all their time to this work. The Victoria High School has adopted this plan with most satisfactory results. Occasionally a teacher complains that he has no time to devote to this subject. I am firmly convinced that a few minutes spent each day in physical drill would so brighten and stimulate the classes that there would result a real economy in time and labour; instead of adding to the present burdens this would really lighten them.

During the past two years the Department has given no examinations on the work of the Preliminary Course, Junior Grade. Last year, 1,476 pupils sat at the Departmental Examinations, and 1,086 were successful, a percentage of 73.57, which is practically the same as the percentage for the previous year, when the number of successful candidates was 974, or 73.95 per cent. The above figures do not include pupils who wrote the University Matriculation Examination. Had two or three of our larger schools accomplished even average results the percentage this year would have been in the vicinity of 80. The disastrous showing made by these two or three schools should give the principals and teachers pause. This showing is due only in part to the presence of a few weak teachers. There are weak teachers, and principals and trustees should realize that they cannot afford to keep them any longer; but when almost 50 per cent. of the pupils fail when a reasonable test is given, unless we are willing to admit that fully a third of the teachers are incompetent, we must look elsewhere for a contributory cause. When we consider the excellent results obtained in the recent examination by many of the smaller high schools, in spite of poor accommodation and inexperienced teachers, and contrast it with the most disappointing showing of some of the larger ones, it should lead the latter to seriously take stock.

I believe that the majority of the teachers of the larger schools taught just as well as their fellows of the smaller as far as the mere presentation of subject-matter is concerned, but the great difference lay in the attitude of the pupils towards their work. It is impossible for the principal and teachers to shirk their responsibility for the attitude of the pupils, and they with the parents should realize the necessity for instilling into the children's minds the idea that school-work should hold first place. While the methods by which subjects may be taught are very important, yet the methods by which the pupils may be stimulated are still more important. The vigorous activity of the pupil is an essential feature of all good education. An ambitious, earnest boy with poor teaching will learn more than an indifferent boy with good teaching. I believe in a teacher presenting lessons clearly, carefully, and patiently, and being ever ready to direct and lend a helping hand; but we should not make the mistake of doing everything *for* the pupil. Let us rather see that much is done *by* the pupil. As pupils grow with their own conquests, it is more important that pupils should be taught to study on their own account rather than that they should expect others to spare them the necessity.

It has been a great pleasure to me to meet the teachers and trustees and to discuss school problems with them. It would be impossible to find a more earnest, conscientious body of men and women. While I have had considerable experience in teaching high-school subjects, yet I feel that my first year in the work of inspection has been a valuable one for myself. The work in many class-rooms has been a source of inspiration. I trust that my visits have been a help to at least a few.

I have, etc.,
J. B. DELONG,
Inspector of High Schools.

INSPECTORATE No. 1.

VICTORIA, B.C., October 25th, 1917.

Alexander Robinson, Esq.,
Superintendent of Education, Victoria, B.C.

SIR,—I beg to submit the following report on the schools of Inspectorate No. 1 for the school-year ending June 30th, 1917:—

As in the two preceding years, the district comprised the City of Victoria, the Rural Municipalities of Esquimalt, Oak Bay, and Saanich, and the northern portion of Saanich Peninsula.

The number of teachers engaged in each of these school districts was as follows:—

Victoria	121
Esquimalt	14
Oak Bay	12
Saanich	42
Rural	6
Total	195

Many of the teachers within the city were young and inexperienced, the policy of the Board during the last three years being to fill vacancies as they have occurred with young women direct from the Normal School; and as a great number of vacancies have arisen during this period, caused in part through the younger men enlisting for war service and in part to the much lower salaries paid by the city as compared with those paid to teachers in other parts of the Province, the standing of the schools has fallen away to a very considerable extent. The standing of the schools has been further affected through a spirit of discontent among many of the remaining teachers on account of salaries, and, unless the Board changes its attitude and adopts a more liberal policy with regard to salaries, there will be a further exodus of teachers from the city.

Five years ago the Board adopted the recommendations of its Municipal Inspector, which may be stated briefly as follows:—

(1.) The class not to exceed thirty-five scholars.

(2.) A salary schedule with annual increases for length of service and creditable work.

(3.). Teachers of experience and ability to receive preference in filling vacancies.

The effect of such a policy was soon noticeable in the schools, particularly in the lower divisions; the retardation of pupils which I had reported upon about that time began to disappear, and, with few exceptions, pupils received their grading at the proper intervals. But the full effect of that policy is just reaching the senior divisions of the schools. The following table will show the growth in numbers completing the Public School Course:—

Year.	Average Attendance.	Entrance Examination Passes.	Ratio of Passes to Attendance.
1912	3,208	133	1 passed in 24
1913	3,764	150	1 „ 25
1914	4,159	287	1 „ 14.5
1915	4,221	231	1 „ 18
1916	3,980	253	1 „ 15.5
1917	4,082	325	1 „ 12.5

While in 1913 only 1 child in every 25 in attendance at the city schools completed the Public School Course, 1 in 12.5 succeeded in doing so in 1917; and when it is realized that the highest possible pass is about 1 in 7 pupils, inasmuch as our Course of Study requires about seven years to complete, the effect upon the schools of the adoption of the Inspector's recommendations will be more fully appreciated.

But soon after the outbreak of war the Board was stampeded from its position; all salaries were reduced 10 per cent., annual increments were stopped, and appointments to the staff were made at $50 a month. This change of policy is affecting the Junior and Intermediate Grades to

the greatest extent so far, but its effect upon the whole school will become more and more marked. As the ratepayer is charged only $2.75 on every 1,000 assessed valuation of his property for the current expenses of the schools, he cannot have saved over 15 cents on each $1,000 of his property's valuation by the changed policy of the Board, but this 15 cents marks the difference between an efficient and an inefficient service.

The Rural Municipality Boards, I am pleased to be able to state, have been more careful in the selection of teachers for the filling of vacancies, and these schools are continuing to show greater strength. Particularly so is this the case with respect to the Saanich schools, where, through the influence of Parent-Teachers' Associations and Women's Institutes, the parents are demanding the best instructors for their children and right conditions at the school-houses.

There was a slight increase in the number of school-gardens last year, but owing to the backward spring and the dry summer they were not, in many instances, as successful as the teachers had hoped.

The Saanich Teachers' Institute held its regular monthly meetings, all of which were well attended.

I have, etc.,
W. H. M. MAY,
Inspector of Schools.

INSPECTORATE No. 3.

VANCOUVER, B.C., August 1st, 1917.

Alexander Robinson, Esq.,
Superintendent of Education, Victoria, B.C.

SIR,—I beg to submit the following report on the public schools of that part of Inspectorate No. 3 which formed my district for the school-year ended June 30th, 1917:—

This inspectorate comprises the City of Vancouver and the Rural Municipalities of Burnaby, Delta, Point Grey, and Richmond. It was until recently in charge of three Inspectors. In the public schools of the five districts that it embraces 414 teachers were employed and 17,028 pupils enrolled. My duties from the beginning of the school-year till the end of February were confined to the schools of Point Grey and the following eight in Vancouver: Roberts, Strathcona, Mount Pleasant, Florence Nightingale, Central, Grandview, Macdonald, and Franklin. In March the staff of Inspectors was reduced to two and a reapportionment of the schools became necessary. The Model, Simon Fraser, General Gordon, Charles Dickens, and the Livingstone Schools, as well as those of Richmond Municipality, were added to the number which had previously been assigned me.

Building operations were limited during the year to such work as was urgently needed. In a few districts the existing schools did not fully meet the demands for additional accommodation and temporary buildings had to be erected. Towards the end of the year preparations were made by the School Board of Point Grey to increase the class-room accommodation at Magee. A modern two-room school-house is now under construction there, which, with the rooms available in the High School building, will, it is expected, meet the requirements of the locality for the next year or two. The schools at Eburne and Shaughnessy are filled to their capacity and extensions to them will soon become necessary.

A great deal of renovating work in the way of painting and general repairs was done throughout the inspectorate. In Vancouver the ventilating and heating systems in several schools were changed and improved.

School-gardens were in operation at the Grandview School, Vancouver; the Kerrisdale School, Point Grey; and the Bridgeport, Steveston, English, Lulu, and Mitchell Schools in Richmond Municipality. In Point Grey two classes of the Queen Mary School carried on home-gardens under the direction of their teachers. Where these outdoor activities are properly directed, they are proving an attractive as well as a valuable feature of school studies. As a rule, the localities which take up this work also show much interest in the matter of general school-ground improvement.

Conditions existed in many class-rooms during the fall term which were decidedly unfavourable to good work. Vancouver, with a view to economy, reopened the schools in August with fewer teachers than it had the previous term. There was an unexpectedly large increase in enrolment, and this, together with the reduction in the staff, led to overcrowding in many rooms and made successful teaching difficult. It soon became evident that the saving effected was secured at the expense of efficiency. At the beginning of the spring term, in order to relieve the congestion and to provide for new pupils about to be enrolled for the first time, many additions were made to the staff. But at that time it was difficult to get well-qualified teachers for all the positions to be filled. As a result many "beginners" had to be appointed, and, though all were earnest and zealous, some of them at the outset were unable to do good or even fair work.

Enlistment for military service has taken away from the school-rooms many of the best male teachers. Nearly all the young men of the profession have secured leave of absence and have joined Canada's forces overseas. The withdrawal from class-room work of these teachers, all of whom had been in charge of Senior Grade pupils, is a distinct loss to the schools.

In spite of the difficulties under which many schools were conducted, the progress made along all lines of school effort has been most encouraging. The great majority of the teachers are enthusiastic, industrious, and capable, and show due appreciation of their responsibilities. They not only present lessons well and teach their pupils how to study and gain knowledge, but they also aim to give them a sound and wholesome view of life and to establish right ideals and suitable habits. The incidents of school-life and the rounds of daily tasks enable them to impress on the children the importance of self-control, consideration for others, honesty, system, thoroughness, and close application to work. In the lessons on history and literature they are able by numerous examples to emphasize the value of courage, patriotism, public spirit, and, in fact, of all the qualities which make for good citizenship.

On the other hand, some teachers have not done well. Their work, even when viewed in the most sympathetic way, cannot be regarded as satisfactory. Some of them are weak in control, others are careless, and a few lack the "will to labour." It is rare to find a school of eight or more divisions which has not on its staff at least one teacher who does not possess the necessary aptitude for the teaching service.

It is desirable that greater discretion be used in assigning home lessons. I believe that for a large proportion of the children in the upper classes the home-work is altogether too heavy. Pupils while in the Junior Grade prepare all their lessons in the class-room; but when the Intermediate and the Senior Grades are reached new subjects are added. All the lessons can no longer be assigned and presented by the teachers and prepared by the pupils within the regular school-hours. Some home preparation becomes necessary at this stage. But a large number of teachers are unreasonable in their demands. They give too many lessons and assign tasks that are unsuitable and unprofitable. Their pupils have to prepare nearly all their lessons at home. Consequently very little time is left for recreation or play. There is a danger under these conditions that many of the children are getting their education at the expense of their health. It is perhaps not surprising that parents protest against the practice and demand that such tasks be greatly reduced or be abolished altogether.

Problems in arithmetic and exercises in analysis and parsing, though favourite assignments, are most unsuitable for home-work. They are simply tests of the pupils' knowledge and can be conducted profitably only in the class-rooms. Since much of the work given in this way is beyond the comprehension of the slower pupils, it is small wonder that some of the written exercises handed in each morning to the teacher have been done with the assistance of others or copied from the exercise-books of class-mates. Drawing maps at home is also of doubtful value. The children mechanically fill in places and physical features, rarely noticing positions or relationships. The sketching of memory maps in the class-rooms and the filling-in of blank maps are much better exercises and are much more likely to impress locations on the minds of the pupils. Of the value of home-work there is no doubt. If wisely assigned, it will lead to habits of study and concentration. I am of the opinion, however, that the time devoted to it should not, even in the case of Entrance pupils, exceed one hour and a half each evening. Home studies should, almost entirely, take the form of review-work, or of getting information or illustrations about topics to be taken up later for study in the school-room.

The importance of giving careful attention to the physical development of the pupils is very generally recognized. Teachers realize more than ever that good work in the class-room or out of it is possible only to persons who are enjoying good health. The schools are aiming at developing health and vigour of body as well as intellectual habits and sound character. Physical training, hygienic teaching, and medical inspection form a very necessary and important part of the work of our schools. The rooms in which exercises in physical training do not form a feature of class-room instruction are few indeed. Through lessons in hygiene the value of sunlight, fresh air, exercise, wholesome food, and adequate rest is emphasized. This work, if combined with close attention to school ventilation and heating, must tend to the better physical and mental development of the children who attend the schools of this Province.

Prizes for excellence in physical training were this year awarded as follows:—

Division I. of the inspectorate—

Miss E. C. Matheson, 5th Division, Strathcona School.

Miss Florence Mulloy, 2nd Division, Eburne School.

Mrs. J. M. H. Harding, 4th Division, Lord Roberts School.

Division II.—

Miss E. L. Roberts, 5th Division, Model School.

Miss Agnes Spencer, 3rd Division, Model School.

Miss A. M. Stiven, 4th Division, Lord Tennyson School.

In closing, I wish to express my appreciation of the support that was so generally given me by teachers and School Boards during the eleven years I served as Inspector of Schools. The earnestness of the teachers and their devotion to duty, as well as the willingness of School Boards to co-operate in all matters that tended to the improvement of the teaching service, were always sources of encouragement and assistance to me in carrying out my duties.

I have, etc.,

J. D. GILLIS,

Inspector of Schools.

VANCOUVER, B.C., August 1st, 1917.

Alexander Robinson, Esq.,

Superintendent of Education, Victoria, B.C.

SIR,—I beg to submit the following report on the public schools of that portion of Inspectorate No. 3 which formed my district for the school-year ending June 30th, 1917:—

Until the end of February my duties were confined to the schools of Burnaby, Delta, and the following seven in Vancouver: Aberdeen, Dawson, Hastings, Kitsilano, Lord Nelson, Laura Secord, and Seymour. From March 1st to the end of the school-year the list of city schools was increased by the addition of the Alexandra, Bayview, Beaconsfield, Children's Aid, Fairview, Henry Hudson, Cecil Rhodes, Tennyson, and the School for the Blind.

The equipment of most of the schools is fairly complete. The Burnaby schools are amply provided with all necessary supplies. The trustees and the Secretary deserve commendation for the systematic manner in which they have attended to such matters. The teachers of this municipality are working under conditions so favourable in this respect that none of them can justly blame the Board for poor or indifferent work or any loss of time occurring during school-hours. In the smaller municipality of Delta the handling of supplies is not so well organized. The Board was always willing to fill any orders sent in by the teachers. However, greater promptitude on the part of the trustees in dealing with such matters would increase the teachers' efficiency. In a city the size of Vancouver the providing of suitable and adequate supplies is a matter of great importance, involving the expenditure of nearly $15,000 annually. Since the Board has agreed to provide certain articles, any failure on its part to fulfil this important duty is a great inconvenience to the teachers, and frequently causes a loss of valuable time to both pupils and teachers. As the supplies are of a non-perishable nature and unaffected by the fitful fancies of fashion, the quantities purchased by the Board, twice during the year, should arrive in good time and be large enough to provide for all requirements of the next five months. This will necessitate, on the part of the Secretary, an early compiling of the estimates sent in

by the various principals; the Board also must pass the order promptly, as wholesale merchants, and possibly the manufacturer, will require some time, especially during the war, to fill the order.

Unless estimates for supplies are compiled in the office from a standard schedule, ability on the part of each principal to estimate fairly accurately the requirements of his school is necessary for the successful working of any scheme for providing such supplies. If the principals are excessive in their estimates, the Board by following such suggestions would tie up an unnecessary amount of money in idle stock. However, a reasonable reserve of all the articles supplied should be on hand at the central office.

When the supplies reach the various schools the principals and their assistants have duties to perform. A subdivision to each class-room is necessary. This should be done as soon as possible, so that the principal will not have a series of interruptions throughout the term. Then begin the duties of the individual teacher, which require frequent attention and close observation if the pupils are to form habits that will prevent the wasting of valuable time. Several details have been neglected when, during the early part of a term, we find a lesson in spelling or writing delayed, a teacher and forty pupils idly waiting while a boy goes to the stock-room for a supply of pens, or while a girl trips off to an adjoining room and interrupts a teacher with forty other pupils in order that two or three empty ink-wells may be replenished. Is not this suggestive of the foolish virgins? Before leaving this subject, I wish to state that, as far as the great majority of principals and teachers are concerned, this paragraph might have been omitted; but to the few—principals and teachers—may its suggestions be helpful.

In the Municipalities of Burnaby and Delta the work of the schools during the year just past was carried on under conditions comparing favourably with those of the preceding year; but in Vancouver City such was not the case. In Burnaby sixty-seven candidates wrote on the Entrance Examination, forty-five of whom were successful. The number of pupils in the Senior Grade classes is steadily increasing. During the school-year 1917-18 the principals of the two largest schools, for the first time, will be in a position to devote their whole time to Entrance pupils. Of the twenty pupils from the Delta schools who wrote on the same examination, fifteen were successful. In one school where there was material for three or four successful candidates, none wrote, as the year's work was disorganized during the first term by a teacher who was inexperienced and weak in discipline. The ratepayers of Delta will never secure results commensurate with the amount expended for education until they adopt, in the fullest possible measure, a scheme to consolidate their schools. The Vancouver School Board, although warned that evil results would inevitably follow such a course, was constrained, during the short period of acute financial depression, to adopt a most stringent policy of retrenchment. A temporary reduction of salaries was enforced; the supervisor of primary work was sent back to the class-room; and with a shortage of twenty teachers the school-work was carried on for months, while teachers struggled with impossible burdens in overcrowded class-rooms, where proper classification was impossible. Difficulties were intensified by an unexpected increase of pupils in several localities. Fortunately, what some had looked upon as a deep and wide valley of despair proved in a short time to be but a narrow vale of difficulty; and before Christmas had arrived it was generally conceded that efficiency was more desirable than a penny-wise but pound-foolish policy. Salaries were readjusted upward; Miss Trembath resumed her former position as supervisor of primary work, in which capacity she has for years rendered valuable service; and a sufficient number of extra teachers was added to the staff, so that overcrowded class-rooms and faulty classification were no longer necessary. For those who wish to criticize the general condition of the schools, it would be well to remember that the ground lost during those trying months, when conditions were so unfavourable, cannot be regained as speedily as it was lost.

During the year the school-garden movement made some advancement in this division of Inspectorate No. 3. Twenty-four gardens were conducted in accordance with the plans submitted to the Department. They were distributed as follows: Burnaby, 12; Delta, 7; and the sixteen city schools, 5. In Burnaby some of the gardens were not a success. The teachers and pupils did their part faithfully, but the trustees failed to supply sufficient quantities of fertilizing material. When this is neglected, I consider that teachers would be justified in declining to undertake this phase of school-work.

Although there was much that was disappointing, many were the encouraging features of the year's work. It was a pleasure to confer with a Municipal Inspector, capable and energetic, conscientious and fearless; to discuss methods and outline work with supervisors, zealous and

effective in the pursuit of duty; and to mingle with so many principals and teachers, faithful, sympathetic, yet efficient in the performance of their daily tasks. The tone and standing in a number of class-rooms were excellent and the general average in this respect fairly satisfactory, but the general efficiency would be greatly increased if the Boards would make bold to replace the few weak or indifferent teachers by thoroughly competent ones. A policy of patient waiting, continued too long with such cases, is a source of weakness, and inflicts grave injustice upon innocent children.

The prizes awarded under the conditions of the Strathcona Trust for competition in physical training were won by Miss Alice R. Rines, 4th Division, Lord Nelson School, Vancouver; Miss Margaret A. Gray, 1st Division, Kingsway East School, Burnaby; and Mrs. Stella Bermingham, 4th Division, Laura Secord School, Vancouver.

I have, etc.,
J. T. POLLOCK,
Inspector of Schools.

INSPECTORATE No. 4.

VICTORIA, B.C., October 26th, 1917.

Alexander Robinson, Esq.,
Superintendent of Education, Victoria, B.C.

SIR,—I beg to submit the following report on the public schools of Inspectorate No. 4 for the school-year ending June 30th, 1917:—

The boundaries of this inspectorate coincide with the bounds of the Municipality of South Vancouver. Although a rural municipality, city conditions apply to the majority of its fourteen public schools. In this regard the inspectorate has been well served by the two attendance officers who have been in the employ of the Board for several years. Prompt and continuous attendance at school is a recognized factor in any large school system. Working in conjunction with these officers, the principals are able to report excellent percentages of attendance, in most cases well over the 90-per-cent. mark. I am pleased to be able to report that the previous high average attendance has been well maintained for the year under review.

For the smooth working-out of the thousand-and-one details of any school system an efficient secretarial department is necessary. It is essential that supplies be promptly forwarded to the schools; that notices of meetings and other routine matters be carefully attended to; that substitute teachers be quickly provided in case of illness of the regular incumbent, etc. And it is also necessary, in order that the best results be obtained, that the secretary's department be in sympathy with the teachers and able to appreciate and understand their trials and difficulties. In this respect the municipality has of late been particularly fortunate. And I wish here to give due appreciation of the helpful counsel and courteous consideration accorded me in my many visits to the Board offices.

There are schools, and schools. All have tone, a character, an air, which very soon delights or oppresses the visitor as he moves from room to room, listening to the teaching and conversing with the members of the staff. Needless to say, the young children are easily affected by this tonal quality in the school and soon react to its influence. The underlying elements of what may be said to produce a good or healthy tone in a school have provided a fascinating study throughout the year. Undoubtedly the lines of influence reach back through teachers to the principal, and through the principal to the School Board. For some time the municipality has been the fortunate possessor of a wideawake, progressive Board of School Trustees. Its members have not been backward in reprimanding indifferent work on the part of the teaching staff, and in like measure they have been quick to promote promising teachers to higher positions at a good rate of pay. It has been my endeavour to keep the Board closely in touch with the school situation, neither covering up defects nor condoning faults. And I believe that a School Board actively in touch with the school problems is a great power in the toning-up of its school system.

It is true that a principal wields a marked and immediate influence over his school, and that the really strong principal stamps his school with his individuality. Does the staff arrive on time? Are reports promptly handed in? Are the time-tables followed? Are there frequent and well-planned staff meetings? Is discipline maintained? And many more such questions come

hurrying for an answer. It has been my good fortune to be the Inspector in a district where the principals are alive to this side of the school activities. Regular and well-planned meetings of the principals have been held throughout the year. Topics of general interest have been discussed and a solidarity and clarity of purpose engendered. Each has given of his best.

Added to this there has been throughout the year loyal, intelligent support from the teachers at large. The classes were in most instances well graded, properly taught, and making good progress.

It is then gratifying to note that a larger number of Entrance candidates presented themselves for examination in June. When it is understood that the public-school pupils enrolled do not now reach by several hundred the high-water mark of 1913, the statement is all the more praiseworthy. Over 90 per cent. of those writing received certificates permitting them to enter high school. The outlook for 1918 is equally promising.

Although I have at some length pointed out the underlying principles to which these results may be attributed, there remain numerous avenues along which improvement may be secured. One of these is the immediate organization of a library in each school in this inspectorate. This is a move I have earnestly desired, but so far little has been accomplished. It is true that the Board has replenished and increased the Supplementary Readers. This was a wise and much-needed step in advance. But the school library *per se* is as yet conspicuous by its absence.

A large sectional book-case adorns (if an empty one may be said to adorn) the office-room of each school. A set of the "Book of Knowledge" was several years ago purchased for each school, and although these volumes are replete with good pictures, I have yet to see one of these books used before a class, either to illustrate a point or by reference encourage in the pupils the desire for further information. The fact is that the pupils of this inspectorate have not acquired the reading habit. What a world of information, of beauty, joy, and sunshine awaits them in between the covers of our best literature.

What is vitally needed are fairy-tales for the Junior Grade and a good assortment of child verse; travel and adventure for the Intermediate Grades, with more poetry; and a well-graded set of history and geography readers for the Senior Grade, together with good stories and a wide range of our best poetry. It is quite in order to insist on the practical in education; on the training of the powers of observation; the cultivation of the powers of analysis and synthesis; to watch the appeal to the motor impulse and play instinct in children; and the other present-day tendencies *ad infinitum*. But there is something more to be desired than mere mental alertness; there is the building-up of a sturdy, clean character in the school-children, a character which will not go to pieces when the great hour strikes. Contact with the present provides one side of this character-building; acquaintance with the best in our race history provides the perspective that lends balance and clarity to this present.

We are at great pains to fit each child of the public school with the power to read, yet we are going only part of the way when we fail to provide suitable material for the complete and satisfying exercise of that power. There is an aching void in every healthy child for the folk-lore of the race, and no literature provides a wider range or better assortment of such stories than the literature of our mother-tongue. Although these points here enumerated are common knowledge, the press of other factors has pushed them somewhat to one side.

I have, etc.,

V. L. Denton,

Inspector of Schools.

INSPECTORATE No. 5.

Vancouver, B.C., August 28th, 1917.

Alexander Robinson, Esq.,
Superintendent of Education, Victoria, B.C.

Sir,—I beg to submit the following report on the public schools of Inspectorate No. 5 for the school-year ending June 30th, 1917:—

This inspectorate comprised the Cities of North Vancouver, Port Moody, and Port Coquitlam; the Rural Municipalities of West Vancouver, North Vancouver, Coquitlam, Pitt Meadows, Maple Ridge, Mission (and four adjacent rural schools), Matsqui, and Sumas; the rural school at

Abbotsford; and the schools on the Mainland and adjacent islands from Burrard Inlet to Smith Sound, and on the eastern coast of Vancouver Island north of Campbell River.

During the year the schools at Gambier Island, Half Moon Bay, Kingcome Inlet, and Strandby were closed; while new schools were established at Heydon Bay, Mill Brook Cove, Shaw Cove, Silver Hill, Skookumchuck, Squirrel Cove, Sunnyside No. 2, and Westview; additional divisions were opened in graded schools in North Vancouver and West Vancouver Rural Municipalities and Powell River, and in two of the schools in North Vancouver City. At the close of the year 174 divisions were open, seventy-one of which were in ungraded schools. It is to be regretted that twenty-six of these ungraded schools were in rural municipalities.

I was transferred to this inspectorate at the beginning of March, 1917; it is therefore impossible for me to report fully regarding the activities of its schools for the whole year. In those schools visited the majority of the teachers were capable and conscientious. Usually the lessons were logically planned and carefully taught. The younger teachers, however, did not always appreciate the importance of careful planning and checking of seat-work. A few of them were unable to make out a workable time-table for an ungraded school. But where the progress was unsatisfactory it was seldom the fault of the teacher. More often it was due to irregular attendance of the pupil or to improper lighting, heating, and ventilation of the school-house. In localities where consolidation of schools is practicable, teachers are wasting time over classes containing only a few pupils. In the smaller schools scattered along the Coast and on the islands a serious defect was the lack of interest shown by the parents and trustees; in many cases the voters do not take the trouble to attend the annual meeting and to elect suitable persons to be trustees. Though the teachers' expenses have increased greatly during the past three years, their salaries have not, except in rare instances, been raised, and in some cases they have even been reduced; in buying teaching ability, as in buying anything else, a School Board obtains about as much as it is willing to pay for.

The prizes for physical training were awarded as follows:—

First—Miss M. N. S. Johnston, Division 2, Port Moody.

Second—Miss E. M. McAdam, Division 7, Queen Mary School, North Vancouver City.

Third—Miss F. A. Wilkinson, Division 4, Queen Mary School, North Vancouver City.

I have, etc.,

LESLIE J. BRUCE,

Inspector of Schools.

INSPECTORATE No. 6.

NEW WESTMINSTER, B.C., September 1st, 1917.

Alexander Robinson, Esq.,
Superintendent of Education, Victoria, B.C.

SIR,—I have the honour to submit the following report on the schools of Inspectorate No. 6 for the school-year ending June 30th, 1917:—

As stated in my last report, Inspectorate No. 6 embraces the schools within five municipal school districts—viz., the City Districts of New Westminster and Chilliwack and the Rural Municipal Districts of Chilliwack, Langley, and Surrey—as well as the assisted schools at Barnston Island and Cultus Lake.

During the year under review 135 rooms were in operation, two less than the year before. At the end of last term two rooms were closed, one at Tynehead, in the Municipality of Surrey, and one at Belmont, in the Municipality of Langley. The 135 teachers within the inspectorate were apportioned as follows: New Westminster City, 55; Chilliwack City, 9; Chilliwack Rural Municipality, 25; Langley Municipality, 20; Surrey Municipality, 24; Barnston Island, 1; Cultus Lake, 1.

No new buildings have been erected during the year within this district, but a considerable effort has been made to improve school property. The offer of the Department to bear part of the cost of improving school-grounds has resulted in much being accomplished in this connection. The Langley Board has made a particularly good start by way of improving the school-grounds under its care. The trim appearance of the Belmont School property in the Municipality of Langley is an excellent example of what can be effected by a little effort. Money spent in the

improvement of school property, both grounds and buildings, is money well spent. The children of a district spend a good part of their early years in and about their school and unconsciously are influenced by their environment. Neat, tidy school buildings and grounds teach their own silent lessons.

With very few exceptions, the teachers within this inspectorate worked faithfully throughout the year, although with varying degrees of success. Failure to obtain good results was due in almost all cases to the lack of natural ability to teach and control, rather than to any want of interest and enthusiasm for the work. There is a great deal of truth in the old adage, "Teachers are born, not made." Unless the individual has a natural aptitude for teaching, his work at the best is mediocre. The opening-up of many of the professions and occupations to women, as a result of the present war, will give the high-school graduate a greater choice of work, and those not adapted to teaching will be less likely to enter the profession.

Results in the various subjects of the Public School Course varied largely with the individual teacher. Speaking very generally, however, the work observed in both history and composition in the Intermediate Grade was not very satisfactory. It seems to me that the teaching of history in the Intermediate Grade at the present time is rather indefinite, and that much better results would be obtained if a simple well-written history reader were placed in the hands of the pupils. A well-written history reader in the hands of the children would not only serve as a basis for the work in history, but would be a great aid in the teaching of composition. The children would read and unconsciously adopt the carefully selected words and forms of their history-book. The introduction of the new British Columbia reading series is having a good effect on the teaching of oral reading in the schools, particularly from the standpoint of expression. The books, more especially the First and Second Readers, are being well received by the teachers, and there is every indication that better results in this subject can be looked for because of the bringing-in of this new reading series.

The employment of such a large number of young and inexperienced teachers within this inspectorate is not in the best interests of the schools. In the rural municipality schools alone, about one-third of the teachers who began work in August, 1916, were without experience. The rural schools of the Lower Fraser seem to be a training-ground for young teachers, and while such a condition continues little improvement can be looked for in the general standing of these schools. The third-class certificated teachers, too, who have spent but a couple of years in high school, and who have possibly taken the Preliminary Normal Course only, are finding their way in ever-increasing numbers into the schools of this district.

Although several of the schools did particularly well at the recent High School Entrance Examination, the percentage of successful pupils for the whole inspectorate was fair only. Out of the 315 candidates who presented themselves for examination, 201 succeeded in obtaining High School Entrance certificates. In a number of the rural municipality schools the pass-list was decidedly poor. In my opinion far too many of the children who attempt the Entrance Examination are quite unprepared, and many of our teachers seem to show very poor judgment in encouraging children who have not been well grounded in the public-school subjects, and who are quite incapable of doing high-school work, to present themselves for examination.

A progressive step, educationally, was made during the year in the organization of Teachers' Associations in the Chilliwack and Langley Districts for the purpose, mainly, of increasing teaching efficiency. A number of very helpful meetings have already been held, and there is every indication that better teaching in these districts will result because of the getting-together of the teachers.

It was a pleasure at the close of last term to recommend two of the principals for prizes in connection with the teaching of the Physical Drill Course. Mr. W. T. Fennell, Principal of the Herbert Spencer School, and Miss J. F. Rowan, Principal of the Lord Kelvin School, won first and third prizes, respectively. The winning of these prizes by successful principals refutes the oft-heard statement that the busiest teacher in the school, the principal, has no time to devote to the physical training of his pupils. Mr. W. H. Gray, Vice-Principal of the John Robson School, won second place in the physical-drill competition.

I have, etc.,

G. H. Gower,

Inspector of Schools.

INSPECTORATE No. 7.

KAMLOOPS, B.C., October 27th, 1917.

Alexander Robinson, Esq.,
Superintendent of Education, Victoria, B.C.

SIR,—I have the honour to submit for your consideration the following report on the public schools in Inspectorate No. 7 for the school-year ending June 30th, 1917:—

This inspectorate includes all the schools in the Electoral Districts of Yale, Lillooet, Kamloops, Cariboo as far north as Soda Creek, North Okanagan south to Salmon River, and Fort George along the Canadian Northern Railway to Yellowhead Pass.

A summary of the schools, municipal, rural, and assisted, is as follows:—

District.	No. of Schools.	No. of Teachers.
Cities	6	21
Municipalities	9	12
Rural and assisted	100	108
Totals	115	141

During the year assisted schools were opened at the following places: Adams Lake, Anderson Creek, Barriere Power House, Big Bar Mountain, Boston Bar, Canim Lake, Chase Creek Lower, Lac du Bois, Pinantan, Robin's Range, Round Top, Watmore, and White Lake.

Assisted schools have been recommended for Cahilty, Chinook Cove, Savona Road, Springhouse, and Vavenby.

The schools at Big Bar, Model Farms, North Thompson West, and Wheeler Mountain were closed during the year, as these districts were not able to keep up the required attendance.

High School Entrance Examinations were held on June 25th, 26th, and 27th at fourteen centres. One hundred and forty-two candidates presented themselves for examination; of these, eighty-three were successful, a percentage of 58.45. More detailed results are as follows:—Cities: Kamloops, 88 per cent.; Merritt, 77 per cent.; Salmon Arm, 77 per cent. Municipalities: Kent, 56 per cent.; Salmon Arm, 40 per cent. Rural and assisted, 46 per cent. The Governor-General's medals, donated for competition at this examination, were awarded to Grace Austin, of Kamloops, and Leslie W. McKay, of Agassiz.

Physical exercise finds its place on the time-table in all schools, and in general it is carried on in a systematic manner. The prizes for proficiency in this subject were awarded as follows:—

First—Mr. W. E. Graham, Division 4, Kamloops.
Second—Miss F. E. Mercer, Division 2, Hope.
Third—Miss Charlotte Hayes, Division 2, Notch Hill.

The introduction of school-gardens does not meet with the support that it should in this inspectorate. Few new ones have been started. The continuation of the summer school classes in rural science this year should be an incentive for more of the teachers to take up the work.

School-ground improvement has shown little progress. Unfenced, partly cleared, and partly graded playgrounds are found in too many communities. The school trustees have been trying to retrench in every way possible, and I find little money being spent on the school-grounds or in repairing the buildings.

Penmanship and neatness of written exercises show improvement in the majority of the schools. A low standard on the part of the teachers and want of proper supervision are responsible for the slovenly, careless exercise-books that are found in some school-rooms.

Composition is still backward in too many schools. The reproduction of stories, reading lessons, oral history, etc., is too often a method of keeping the scholars occupied rather than a means of improvement. Sufficient care is not taken by the teachers with the mechanism of composition. The use of capitals, ordinary punctuation-marks, sentence-structure, and paragraphing must be understood and practised by the student.

Oral history in the Intermediate Grade is not producing the desired results in the ungraded schools, especially in those where first- and second-year Third Reader classes are to be found.

The teachers find difficulty in giving sufficient time to the subject when all classes are represented. Some of them are not familiar enough with the subject to give interesting, instructive lessons.

Written reproduction is not supervised or corrected, and the pupil goes on to another historical character without any real knowledge of the one he has been studying. The student passes on with a disconnected, unrelated mass of information that gives him no real foundation to build upon in the Senior Grade. I do not infer that this is the result in all ungraded schools, but it is true in too many of them.

The other subjects on the Course of Study are being handled in the majority of schools in a careful, painstaking way. I seldom find teachers who are deliberately trying to shirk. They are sometimes confronted with unfair criticism on the part of the uninformed, and receive poor support from the parents and trustees. They live in remote and sparsely settled sections of the Province, and are in many cases poorly provided with the equipment necessary for class-room work. In the face of adverse conditions they are giving the schools honest, faithful service.

The loyalty of our teachers in answering the call of the Mother-land is very noticeable throughout this inspectorate. Out of the 141 teachers employed there are but nine males, and of these five are beyond military age. The lady teachers have endeavoured to do their share by assisting in Red Cross work in the community, by raising funds for hospitals and relief, and by encouraging the increased production of food.

In conclusion, I beg to thank you, the trustees, and the teachers throughout the inspectorate for the courtesy and kindness extended to me in carrying out my duties throughout this year.

I have, etc.,

JOHN MARTIN,

Inspector of Schools.

INSPECTORATE No. 8.

VERNON, B.C., October 20th, 1917.

Alexander Robinson, Esq.,
Superintendent of Education, Victoria, B.C.

SIR,—I beg to submit the following report on the public schools of Inspectorate No. 8 for the school-year 1916-17:—

The number of teachers employed in this district, which comprises the Okanagan and Similkameen Valleys, shows a slight increase over that of last year, sixty-four being engaged in the city and municipality schools and sixty in those of the rural districts. In addition to these, special instructors in manual training, domestic science, and elementary rural science are employed at Armstrong, Vernon, Kelowna, and Penticton.

During the year new rooms were opened at Kelowna, Penticton, and Princeton; new schools at East Princeton, Trout Creek (Summerland Municipality), and Meadow Valley; while others are to be in operation after the summer holidays at Osoyoos, Grandview Bench, Mountain View (Spallumcheen Municipality), together with a new room to be opened at Armstrong. Modern and excellent two-room schools were erected by the Government at Mara, Oyama, and Okanagan Mission; a new school at Trout Creek (Summerland); and a two-room addition, with modern heating and sanitary equipment, is in course of completion at Princeton.

In an inspectorate such as this, consisting largely of rural areas, an Inspector's best services to the community and to the cause of education lie in the assistance he is able to render to the rural schools. Teachers in the larger graded schools of the urban and rural municipalities usually have the advantage of an experienced principal's advice and co-operation; with the rural-school teachers the case is very different, and apart from the Inspector's visits they have to depend upon occasional conferences with their fellow-teachers in the neighbourhood and upon the support of the school trustees and of others interested in education. Under the circumstances it is surprising that so much, rather than so little, is accomplished; but it becomes increasingly apparent that, in the more settled areas where the population is not too sparsely scattered, the problem of the hour is that of consolidating the schools.

Even with the recently lowered minimum of attendance, schools have to be closed for lack of sufficient pupils, with definite loss to the children and to the country; for the pioneer is thereby discouraged, the very man whose services are essential if the remote and potentially

productive areas are to be opened up. In some cases transportation to the nearest school would meet the difficulty and would prove cheaper than maintaining a separate school, a solution impossible at present owing to the requirement that any consolidated school must provide at least two teachers. Moreover, although consolidation demands the existence of a large school district, a premium is at present placed upon the establishment of small ones; for in the larger area the trustees are not empowered to provide transportation, nor can they claim Provincial aid to that end, even though the grant of such financial assistance prove cheaper to the Government than the maintenance of separate schools within the district. A very real benefit would be conferred upon some of these rural communities by extending and rendering more elastic the conditions under which consolidation can be effected.

Although the public schools cannot be regarded as responsible for definite vocational training, there is an unmistakable tendency towards the establishment of a closer connection between school-work and the activities of the outside world; recognition of this principle is evidenced by the efforts of various Trustee Boards towards providing materials and equipment for hand-work of all kinds, and by the introduction in the graded schools of Enderby, Armstrong, Vernon, Kelowna, and Penticton of courses of instruction in the manual arts, domestic science, and practical rural science; indications point to a further and wider extension of this movement.

The requirements of the Strathcona Trust have been complied with in regard to regular physical instruction in the schools, the awards this year going to the following schools and divisions:—

First—Kelowna School, 1st Division (Mr. James Gordon).
Second—Penticton School, 3rd Division (Miss I. R. Hartinger).
Third—Mabel Lake School (Miss D. Magowen).

The work done in the schools has for the most part been entirely satisfactory, the results accomplished—judging from any reasonable standard—being quite up to that of other years; the teachers are sympathetic and earnest, capable, and ready to adopt any suggestion making for a higher standard of efficiency. The shadow of the war nevertheless rests over the land; not more than a dozen men were teaching in this inspectorate, and most of these are ineligible for military service. Among those who have given their lives for the cause of humanity none stood higher in the esteem of children, teachers, or the general public than Mr. T. Rankine, late principal of the Armstrong School; his splendid sacrifice for his country was but the logical sequel to a noble and unselfish career to which all who knew him love to bear witness. As the schools and teachers follow the even tenor of their way, far remote from strife and bloodshed, there appears to be some danger lest the world tragedy now being enacted be forgotten or ignored. By its issue (to all the schools) of the "Children's War History" and of suitable war pamphlets, in particular that dealing with the "Scrap of Paper," the Department has clearly indicated its attitude in the matter. In this fourth year of the war its events are fast becoming history, and as the children grow up in this war-time environment they should, according to their capacity, be led to understand the meaning of the mighty struggle, and to worthily appreciate that spirit of self-sacrifice which has prompted those noble deeds of heroism which are of daily occurrence, and which have too often involved the loss of loved ones. This responsibility rests upon all who are engaged in the work of education; in the honourable discharge of it we are no less paying a debt to Canada than to those whose sacrifices throw into the shade anything that we at home may be called upon to suffer or endure.

I have, etc.,
ARTHUR ANSTEY,
Inspector of Schools.

INSPECTORATE No. 9.

Revelstoke, B.C., October 26th, 1917.

Alexander Robinson, Esq.,
Superintendent of Education, Victoria, B.C.

Sir,—I beg to submit herewith the following report on the public schools of Inspectorate No. 9 for the school-year ending June 30th, 1917:—

During the year assisted schools were opened at Blueberry Creek, on the Lower Columbia, about six miles south of Castlegar; at Coltern, between Eholt and Phoenix; and at Parson, in the Upper Columbia Valley, about twenty-three miles south of Golden. A school for Doukhobors was opened at Glade, on the Lower Kootenay, about ten miles east of Castlegar, and a second division was opened in the Doukhobor school at Brilliant. In the Trail School District, where there has been a very large increase in the school population during the past year, three new divisions were opened in the Central School and a one-room ward school was established on Smelter Hill. The assisted schools at Galena, Ingram Mountain, and Rogers Pass were not operated during 1916-17 owing to the lack of a sufficient number of pupils to keep up the required attendance. There were in all eighty-five schools in operation in this inspectorate during the year, with a total staff of 143 teachers, an increase over last year of two schools and seven teachers. Of these, nine were city schools with a total staff of sixty-two teachers, two were graded rural schools with a total staff of six teachers, and the remaining seventy-four were ungraded rural schools and assisted schools, one of the latter consisting of two divisions. (In connection with the Doukhobor schools referred to above, it may be of interest to note that since midsummer a new school has been opened for the community children at Krestova, in the Slocan Valley, and another in the Pass Creek Settlement, a few miles from East Robson, while a second division has been opened at Glade. Arrangements are now under way for the establishment of a school solely for Doukhobors on the community property near Grand Forks, and it is hoped to have the opening of this school take place at an early date.)

Taking all the circumstances into consideration, the teachers are maintaining fairly well the standard of good work noted in previous reports. Entrance Examinations were held at eleven centres in June last, when 226 candidates from the public schools presented themselves. Of these, 152 were successful, a percentage of 67. It is gratifying to note that two of the five medals distributed among the successful candidates from rural schools were obtained by pupils from this inspectorate, one being awarded to a pupil of the Trout Lake School and another to a pupil of the Christina Lake School.

The voluntary contributions by pupils and teachers to the various patriotic funds have been well maintained and total a very considerable sum. Any teachers who are in a position to contribute regularly to one or more of these funds but have not yet done so should lose no time in "signing up," and should then see that their payments as promised are promptly met. The children, too, should be encouraged to continue and extend their praiseworthy efforts in this direction.

In many of the rural and assisted schools the problem of keeping the children supplied with pencils, exercise-books, etc., is a source of considerable anxiety to the teacher, as such supplies are expensive and sometimes difficult to secure, while without these materials the best work cannot be demanded. In these same schools the problem of efficient janitor service is one which the trustees have in too many instances failed to solve. Recently, however, both difficulties have been overcome in a few schools by a little sensible co-operation, the pupils doing the janitor-work in turn under the supervision of the teacher, and the trustees using the money thus saved to purchase the needed supplies. In times like these, when "economy" and "co-operation" are watchwords in the campaign for national thrift, it would seem that some such plan as this is worthy of being more widely adopted.

To take up a slightly different phase of the financial question it may be pointed out that in a number of school districts the practice of voting an assessment much beyond the actual requirements of the district is being followed in order that the advance of 75 per cent. for which provision is made in section 80A of the "School Act" may cover all the expenditure really necessary during the year for which the tax is levied. This seems to me a very dangerous

practice, and I think the ratepayers of the various districts would be well advised to avoid any such doubtful procedure in connection with their assessments for school purposes.

I have, etc.,

A. E. MILLER,

Inspector of Schools.

INSPECTORATE No. 10.

NELSON, B.C., October 26th, 1917.

Alexander Robinson, Esq.,
Superintendent of Education, Victoria, B.C.

SIR,—I have the honour to submit the following report upon the public schools of Inspectorate No. 10 for the school-year ending June 30th, 1917:—

The Gray Creek School has remained closed during the year, and the Mirror Lake, Morrissey, and Crowsnest schools have been closed on account of their inability to maintain the legal minimum attendance. A new school has been established at Wanklyn, and another authorized, though not yet opened, at the Florence Mine. There have thus been in operation during the year eighty-three schools, employing 157 teachers.

A number of old and inconvenient buildings have been replaced by new Government schools. A new two-room building has been erected at Silverton, and another has been authorized at New Denver. New one-room buildings are in course of erection at Corbin, Bull River, Baynes Lake, and Slocan Junction.

The Fernie School Board are in urgent need of additional suitable accommodation for their Public School and High School classes, three of which are at present housed in makeshift quarters—such as church basement and school corridor—whilst no rooms are available for Manual Training and Domestic Science classes. The Nelson School Board appointed efficient manual-training and domestic-science teachers at the beginning of the school-year. In January, however, under some slight pressure from the City Council, they consented to abandon again these newly reopened classes. Public opinion, fortunately, came to the rescue, and the trustees reconsidered their reconsideration, deciding eventually to maintain these departments, in which good work, educational as well as practical, has been done throughout the year.

With special reference to the country schools, the question is continually being raised—and cannot be answered by a blank affirmative—whether the public is receiving an adequate return for the expenditure on education. A reference to last year's Annual Report, page 15, shows that the sum paid towards the salaries of teachers in country schools, $426,330, is nearly one-third of the total sum expended by the Government on education proper. Two ways there are, I believe, which would operate: (*a*) To lessen the proportionate expenditure; (*b*) to secure a greater proportionate return from the expenditure now made on country schools. There is, in the first place, the method—provided for by section 95 of the "School Act" and recommended by the Department of Education—the method of consolidating the schools of adjacent rural school districts in a central graded school. This method, which has made considerable progress in certain other Provinces and in the United States, has peculiar difficulties to overcome in this Province owing to the nature of the terrain, in addition to the ever-present jealousies of the country population. To overcome these difficulties it may be necessary to remove the decision from local influences and place it in the hands of the Council of Public Instruction, and perhaps, also, to increase the proportion of the grant in aid of transportation. But, even when the consolidation of such schools has been carried out to the full, there will still remain a large number of schools—and these the least efficient of all—which, owing to isolation and other insurmountable obstacles, cannot be brought within the scope of this measure. The maintenance of a large number of small schools with a separate teacher for some six to nineteen children—and there are some 380 such schools—is an exceedingly expensive and equally inefficient arrangement. It would result in a great economy, and in a vast increase in the efficiency of education and in the welfare both of the child and the State, if the Government were to close such schools and were to collect the children now attending them at a suitable number of central boarding-schools, paying all the expenses of such children to and fro and while at such boarding-schools. The great improvement in the education, training, habits, physical welfare, and mental and moral

outlook of the children would, I believe, soon overcome preliminary objections and establish such schools firmly in the public favour.

I turn now to a criticism in some detail of the teaching of one or two of the fundamental school studies.

Reading.—In this subject I find teachers usually confining their questions to the literal meaning of the words and expressions used. Some of the more thorough proceed to allusions and to historical and geographical references. Very few illuminate and impress the thought by relating it directly to the intimate personal experience, observation, and surroundings of the child, or by inviting the child's own judgment upon the matters concerned. Few teachers question for the *feeling*, or, if they do so, question further with the object of associating such feeling and the manner of reading in the child's consciousness; though this is essential, for, in order that expression may correspond with feeling, that feeling must be not only known, it must be *felt*. While some teachers touch on the moral significance of the lesson, few relate it in a really intimate and gripping way to the sphere of the child's own conduct; though to do so is, alike from the view-point of the child and the State, supremely important,

When it comes to the actual oral reading of a passage, I find teachers trying to secure expression by such methods as, "Listen to me," or "Tell it to me." These methods have some value, but that they are not sufficient is shown by the state of reading in the public schools; the first method quoted tends to produce a parrot-like style; the second, a colloquial style. Such methods are, in fact, merely *expedients;* they are not intelligent, for reading should be neither imitative nor colloquial; and—this is their great defect—they are not psychological, they do not *teach*, they do not put the child to the test, they do not call upon it to use its own powers. Emphasis and phrasing must be taught systematically, by illustration and question, from the start, or even the fullest preparation, such as has been indicated above, will not produce good readers.

Writing.—This is a subject the teaching of which in the public schools is admittedly unsatisfactory, chiefly, I believe, because of a failure to grasp and carry out in all its implications the method indicated by the Department of Education in the issue of Writing-pads 1 and 2. Form, whether of a word or of a letter, is so manifestly, always and everywhere, the *result of movement* that one can but wonder to find teachers who fail to realize it. The teaching of reading and of number call for the early recognition and making of form, and, in order that the teaching of these subjects should not be held up, form must be made by a movement so simple and so natural to the young child, so fitted to the actual physiological development of brain and muscle already reached, that the movement itself may require the least possible attention from the child. This movement, indicated by the Department in the issue of the large pads as the one to be used, is known as the "free-arm movement." The children, generally, employ this movement in writing on the blackboard and the writing-pads; but when they are required to copy form, either letters or figures, at their seats, instead of being required to use the movement indicated and already known and employed by them on board and pad, *they are allowed to drop their arms on the desks, thereby making the "free-arm movement" impossible* and forcing them into use of finger and wrist—the foundation of those bad habits, on the imperfect overcoming of which so much time and energy are subsequently lost. It is of first importance, if the children are to develop easily into good writers, that these bad habits should not be formed and that the "free-arm movement" should be maintained in their seat-work. The reason for the failure to maintain the "free-arm movement" in their seat-work is to be found, I believe, in the small size of the writing material, such as scribblers, provided for the children's use. *The movement and the material do not accord;* and, since the movement offers no alternative and the material does, the material ought to be changed. In other words, the children should be provided for their seat-work with large blank pads—similar to those issued by the Department—and on these pads all their seat-work, both letter and figure, should be made, the size being gradually reduced until they are about half-way through the Second Primer. In default of such pads, the scribblers should be opened at the middle and the double page used. The children should not be expected, and must not be allowed to attempt, to make small-size form at first; if they are, their arms will inevitably fall on the desks, the free movement will be lost, and the bad habits immediately appear.

But the "free-arm movement," though the only physiologically suitable movement for young children, is not adequate to the demands of the higher grades. For the work of these grades a

more difficult movement, known as the "muscular movement," has to be acquired. This movement, takes time to teach, demands for its mastery concentration and practice on the part of the child, and should not, therefore, be used for the making of form until it has become largely automatic. Such facility should be approached before the No. 1 Copy-book is introduced; that is, by the time the child is about half-way through the Second Primer. To secure this facility a "muscular-movement" drill should be introduced after the child has been, say, a month at school, and practised daily. This drill should be for *position and movement only;* no form should be allowed or attempted until the position and movement have become well established and automatic. *Then* the form (which has been learned by the "free-arm movement") and the muscular movement (which has been learned independently) can be brought together, and the children are able to continue their form-making by this movement, unburdened by the bad habits which otherwise delay and distract both themselves and their teachers.

Space will not allow detailed criticism of other subjects, but I wish to touch, in passing, on:—

History.—History is too often presented merely as a school study; it is not presented to the children as *their* story, the story of their fathers; the story that tells them how they came to be what they are, and how and why they came to be where they are; how their independence was conquered abroad, and their liberty established at home; a story not yet finished, and in the making of which each of them has a part to play for good or ill.

Grammar.—This is another subject which is too often divorced from life, whereas it should provide an exploring expedition through the realms of language, a succession of discoveries, which other people have made before, and which the children are now going to make on their own account, of the origin of language and of the way in which it has gradually become customary to group, to vary, and to arrange the "parts of speech" of which language is composed, in order that their meaning may be clearly understood.

Physical Drill.—Although it is well known that physical drill is compulsory in this Province, some teachers and some trustees affect to treat the carrying-out of the regulation in this matter as subject to their own discretion, and ignore the benefit to be derived by the children from the *regular* use of these exercises. The commonest defects noticed are:—

(1.) Too short a time is allotted to the drill, with the result that some kinds of exercises are squeezed out altogether and a one-sided development is produced.

(2.) The order in which the exercises should be taken, as indicated in the tables, is seldom observed.

(3.) Each exercise is not repeated often enough to make it of value.

(4.) Insufficient care is given to the details of position and of the execution of movements.

The text as a whole is not studied by teachers. If a representative from each of the eight groups in a table is included in the day's drill, as should be done in order to secure an all-round development, and the requisite "easy" intervals are allowed, it will be found that fifteen minutes a day is none too much time to do the work in properly. A truer sense of the real value of this subject and better results in its teaching might be secured if Entrance pupils were required to pass in it, as they now are in manual training and domestic science, where such subjects are taught.

The Fernie Public School has done the best work in this, as in other directions, during the year.

The Flag.—The flag and what it stands for are too often forgotten. The regulations regarding its hoisting and lowering are often ignored. There should be at least one annual lesson on the flag, preferably near Empire Day; and the suggestions regarding the hoisting of the flag on the first day of each term should be zealously carried out by the teachers concerned.

The suggestions and criticisms made in this report must not be taken as overlooking much good work that is being done in many cases, particularly in the larger city schools; they are made only in the hope of assisting in and encouraging the continuous improvement for which we all ought to strive.

I have, etc.,

ALEX. J. DOVE,

Inspector of Schools.

INSPECTORATE No. 11.

Prince Rupert, B.C., October 19th, 1917.

Alexander Robinson, Esq.,
Superintendent of Education, Victoria, B.C.

Sir,—I have the honour to submit the following report in respect of the public schools of Inspectorate No. 11 for the school-year ending June 30th, 1917:—

The boundaries of this district remain unchanged from last year; included within it are the Electoral Districts of Atlin, Prince Rupert, Omineca, Fort George, and the northern portion of Cariboo. It is almost wholly in the pioneer stage of existence, and necessarily has an isolated population; hence much of my time has been taken up with organization-work. The tremendous distances covered—over 20,000 miles in all—coupled with infrequent and irregular means of transportation, rendered a satisfactory supervision of schools quite impossible. All schools in the district, save Ootsa Lake, Chief Lake, Barkerville, and Kitimat, were inspected once during the year, and forty-two received a second visit.

Schools were opened for the first time at Alice Arm, Osland, Kitimat, Pacific, Houston, Nechako, Cariboo, Giscome, Sisters Creek, Hilborn, Glencoe, and two additional divisions at Granby Bay; schools have also been authorized and will be in operation during the approaching school-year at Castle Rock, Swanson Bay, Hartley, Central Pouce Coupe, and Tatalaska Lake. Ocean Falls, Queen Charlotte City, and Haysport, which had been closed for some time, were reopened; while Skidegate, Engen, and Newlands were closed. Smithers, Ocean Falls, and Granby Bay were raised to the status of regularly organized districts; Masset and Queen Charlotte City were reduced to assisted schools. In all, sixty schools, employing eighty-one teachers, were in operation; these consisted of the City Districts of Prince George and Prince Rupert and fifty-eight rural and assisted schools.

Despite pioneer conditions, involving lack of funds and a consequent utter dearth in many schools of the simplest necessities, the class-room work on the whole has been gratifying. In a few instances lack of energy or latent inefficiency in the teacher has been responsible for inferior results; a similar condition has resulted, in two or three other cases, from local quarrels. The great proportion of teachers in the ungraded schools have been faithful and energetic and, in many cases, reasonably efficient; the results which they have secured will compare favourably with those obtained in urban districts, where, as a rule, less difficult working conditions are encountered. This is evidenced to some extent at least by the results of the recent High School Entrance Examination; at this examination eighty-nine candidates presented themselves and sixty-one were successful, an average of 68 per cent.; of these, forty-six were from rural and assisted schools and thirty-seven were successful, an average of 80 per cent. Candidates were sent up from eighteen rural and assisted schools, and from twelve of these—Cariboo, Soda Creek, Mapes, Vanderhoof, Endako, Smithers, New Hazelton, Fort George, Copper City, Granby Bay, Stewart, Port Simpson—there were no failures.

The most serious problem from an educational standpoint in Northern British Columbia is the question of single families and small communities in isolated localities. Many cases exist where one or two families with a few children have settled on land miles from the nearest neighbour, and where, under present conditions, these children are growing to manhood and womanhood in comparative if not absolute ignorance. Their parents are quite unable for financial reasons to send them outside to be educated, and in the majority of instances it will be years before ten children—the minimum requirement for an assisted school—are in residence. The reduction this year of the average attendance required from eight to six has been of some value in keeping small schools open, but has no bearing on the question of establishing new ones. The simplest solution would be a reduction in the number of pupils required, but it is distinctly open to question if the additional expenditure would be justified. Another suggestion is the establishment at a central point of a residence school in which all children thus situated might be received; while open to certain obvious objections, this plan would combine a maximum of efficiency with a comparatively reasonable expenditure. The ultimate solution of the question will lie undoubtedly in a revised system of land-settlement, but for some years to come this can hardly be expected. Incidentally it would be well for parents thus situated to realize that they

have obligations to their children, and that a large share of the responsibility for providing a reasonable education rests primarily with themselves and not with the Department of Education.

I have, etc.,
A. R. LORD,
Inspector of Schools.

REPORT OF MUNICIPAL INSPECTORS.

VANCOUVER SCHOOLS.

VANCOUVER, B.C., October 19th, 1917.

Alexander Robinson, Esq.,
Superintendent of Education, Victoria, B.C.

SIR,—I have the honour to submit the following report on the Vancouver public schools for the school-year ending June 30th, 1917:—

SCHOOL ACCOMMODATION.

A year ago it was generally supposed there would be no increase in the school population of the city during the school-year 1916-17. Consequently no plans were made by the Vancouver School Board for any increase in the school accommodation. The unexpected, however, happened. The school population increased 723 during the year, and the largest increases were in districts having no vacant class-rooms to accommodate more children.

In the Dawson District four temporary class-rooms and a manual-training room were required, and were provided at comparatively small cost. Two rooms—one originally intended for a domestic-science kitchen and the other for a lecture-room—were changed into two class-rooms. Two more class-rooms and a manual-training room were fitted up in the hitherto uncompleted portion of the school auditorium. These alterations served a twofold purpose. They furnished needed class-room accommodation and improved the general appearance of the school.

In the Lord Roberts District the principal's office and a small house, hitherto used as a residence by the janitor, had to be converted into class-rooms; while accommodation for another class was secured by utilizing a portion of the auditorium.

These increases in school accommodation are of a temporary character and by no means satisfactory. Plans should therefore be made at once to provide permanent and adequate accommodation for the increasing school population in these two important districts.

In all other parts of the city the school accommodation has been found sufficient for an increased attendance of children in the graded schools.

Two of the three high schools, Britannia and King Edward, have been using every available room, and that with large classes; while King George High School at the close of the year had only one vacant room in a sixteen-room building. In the light of these facts and in the expectation of Vancouver's high-school population continuing to increase in the future as it has in the past, the necessity for immediate and extensive increased high-school accommodation is apparent.

TEACHING STAFF.

A number of changes took place in the teaching staffs of both the high and the graded schools during the year. In most of these cases experienced teachers resigned or left on leave of absence, and their places were filled by inexperienced or comparatively inexperienced teachers—the best that could be secured for the small salaries offered. These changes naturally militated against success in the schools.

A more serious change, however, than that caused by exchange of teachers took place. A reduction of twenty-four was made in the teaching staff when schools were reorganized at the beginning of the year. This reduction would have proved a serious matter even if the school population had not increased, but with an increasing school attendance many classes soon became much too large and the pupils suffered. In October there were twenty-nine classes in the city with an enrolment of fifty or more. The mistake that had been made in reducing the teaching staff was then apparent, but it was too late to apply a remedy. Suitable teachers could not be secured and the unsatisfactory conditions had to continue till schools were again reorganized in January.

HONOUR ROLL.

More regrettable than any other change in our teaching staff has been that caused by the withdrawal of a number of young men to join the Overseas Forces. The first two years of the Great War drew heavily on our teaching staff.

During the past year the following volunteered: Messrs. C. B. Crowe and Chester W. McNeil, both of Simon Fraser School; F. C. Boyes, of Livingstone School; J. L. Watson, of Kitsilano School; F. Fairey, of King Edward High School; and C. C. Chute, Principal of Hastings School.

In the going forward of these young men our schools have suffered a distinct loss.

SUPERVISION.

Never since I entered upon my present duties as Municipal Inspector did the work in the Vancouver schools need careful supervision as much as it did during the past year, and never did it receive so little. In order to economize, the services of the supervisors of manual training, domestic science, and primary work were dispensed with at the beginning of the school-year.

There were very few changes in the manual-training and domestic-science staffs during the year and the work had been well organized. The teachers in these departments were therefore able to carry on their work fairly well.

With the primary work, however, it was quite different. Classes larger than usual and taught by an unusually large number of young, inexperienced teachers greatly increased the amount of supervision required of the principals in the rooms of their assistants. Instead of having more time for this, as they should have had, they had really less, for the urgent work of supervising the teaching in the primary grades also fell to their lot. It was only to be expected, therefore, that the loss sustained by the schools in dispensing with the services of the supervisor of primary work should be early and deeply felt. Before the close of the first term the principals appointed a deputation to wait upon the Board to urge the reappointment of the supervisor. Their request was granted, the supervisor being reinstated in January.

Besides the reduction in the staff of supervisors referred to above, the reduction of the staff of Provincial Inspectors from three to two also deprived teachers of valuable assistance.

Under such conditions I should have spent more time than usual in the class-rooms. I found, however, it was quite impossible to do so. The reduction of the staff of supervisors increased my office-work so as to leave me less time than formerly for inspection of schools. My office-work was also materially increased by the Board's dispensing with the services of the director of night-schools, thus leaving the organizing of them for the past year entirely in my hands.

NIGHT-SCHOOLS.

The work in the night-schools, in the main, was very satisfactory. The Board made no appropriation for teachers' salaries and consequently no Government grant was received. It was decided, therefore, to try the experiment of making the classes self-supporting as far as tuition was concerned, the trustees undertaking to defray the expense of lighting, heating, and paying the janitors.

The experiment was a success. Thirty classes were organized, with an enrolment in October of 1,102. The fees collected were sufficient to pay the teachers, and the attendance for the session was very good. One weakness, however, was apparent—some of the classes, where individual instruction was necessary, were too large. In such cases I would recommend that the Government allow a grant to pay an assistant teacher if the Education Department favour the continuance of such classes.

The success of the night-schools for the past year may be attributed chiefly to the fact that we were fortunate in having a staff of seventeen experienced and successful teachers, all of whom had previously taught in our night-schools. The head teachers in the various departments did most of the work of organizing their classes; while all teachers, by close attention to business, made my work as general director comparatively light and very agreeable.

GARDENING.

The three school-gardens at Dawson, Fairview, and Grandview Schools were carefully managed during the year, and a new garden was made for the first time at the Tennyson

School. This last garden, worked up out of a well-trodden portion of the playground, was a wonderful success—a source of pride to people of the district and of delight to teachers and pupils.

The home-garden movement has never been more successfully managed than during the past year. Much credit is due to the many teachers who have interested themselves in the garden-plots of their pupils, and thereby encouraged them in their good work.

School Music.

Music in our schools is gradually improving. Never was this more evident than on the evening of May 25th last, when a chorus of about 1,500 school-children delighted with their sweet melodies an audience of over 4,000 citizens in the Arena. To the teachers, as well as to the supervisor of music in our schools, much credit is due for their painstaking efforts to increase the quality and quantity of music in Vancouver.

Cadet-work.

Lieutenant A. C. Bundy, with his staff of twenty-one cadet instructors, has, in spite of adverse conditions, managed to do a good year's work in military drill and rifle shooting. To the members of corps, for whom no uniforms could be obtained owing to the financial depression, much credit is due for the showing they made on inspection-day. They demonstrated that uniforms, even if desirable, are not absolutely essential to success. This is worth knowing when boys are many and dollars few, as at present.

Athletics.

The interest hitherto taken in school athletics was well maintained during 1916-17. A large number of our teachers gave a great amount of time to encourage school sports. Nearly every school in the city had a team or teams in one or other of the leagues. Many closely contested games of football, boys' basket-ball, girls' basket-ball, and baseball took place between neighbouring schools. The spirit manifested by the pupils in these was invariably good, even when facing defeat. As in former years, a number of public-spirited citizens encouraged this form of school activity by offering valuable trophies to be competed for.

Medical Inspection.

Medical inspection was conducted along the same lines as in previous years. In fact, the work was extended and the staff increased by the appointment of a fifth nurse for full time, and a second assistant medical officer for three forenoons per week. An attendant was also appointed for the dental clinic. This released one of the school nurses from duty there in the forenoons to devote her full time to inspection in the schools.

Dental Clinic.

The work in the dental clinic was also considerably extended during the year. Dr. J. M. Jones continued to render valuable service in the forenoons of all teaching-days; and, at the beginning of the second term, the Board, recognizing the importance of dental work, appointed Dr. R. L. Pallen as assistant to Dr. Jones.

Special Classes.

The School for the Blind, opened in May, 1916, was continued throughout the year with an enrolment of six. Several inquiries, however, have been made by parents outside of Vancouver wishing to send one or more pupils to the school.

The attendance in the School for the Deaf, opened with eight pupils in 1915, increased to thirteen, necessitating the appointment of a second teacher. Judging from the number of inquiries by people interested in this school, it is evident the staff will need to be increased in the near future. In fact, the number of older pupils available would seem to indicate that greatly extended facilities for teaching the deaf are urgently needed in this Province.

No extension was made in work for the mentally defective pupils of the city, though the needs of these are not yet entirely met. The apparatus required for manual work in the present school has been added to, however, much to the satisfaction of the teachers and the older pupils.

New School Activities.

Much thought was given during the year to the question of establishing a retiring allowance for teachers. While it cannot be said the question is settled one way or another, the investigation

of the year seems to indicate there is little likelihood of the Vancouver teaching staff, as at present constituted, working out a satisfactory retiring allowance scheme.

Very gratifying results followed the efforts put forth to open an Information and Employment Bureau in connection with the schools. In the month of June many of the principals filed in my office cards giving very full particulars regarding pupils from fourteen to seventeen years of age whose circumstances made it impossible for them to continue in school. At the same time employers of labour in the city were circularized to the effect that they might be able to obtain suitable helpers by applying to the School Board offices.

In July and August suitable positions were secured for a number of young people, and several employers expressed their appreciation of the valuable assistance the Bureau had rendered them free of all charge.

While the work done thus far has been limited, it has been quite enough to indicate the great possibilities of the Bureau for the future. Its work is certain to increase and will have a salutary effect upon boys and girls, especially upon those seeking employment on leaving school.

GENERAL OBSERVATIONS.

As indicated above, conditions have been far from satisfactory, in a number of important particulars, in our schools during the year now under review. The teachers and officials, however, have, for the most part, done good work, putting forth greater effort in the face of greater difficulties. The outlook, too, for the future is brighter, and one is justified in going forward as a cheerful optimist.

I have, etc.,
J. S. GORDON,
Municipal Inspector of Schools.

VICTORIA SCHOOLS.

VICTORIA, B.C., November 16th, 1917.

Alexander Robinson, Esq.,
Superintendent of Education, Victoria, B.C.

SIR,—I have the honour to make the following report on the condition and progress of the Victoria City schools for the year 1916-17:—

ATTENDANCE.

The school attendance from October, 1916, to October, 1917, is shown in the following table:—

	Attendance.	Divisions.	
1916—			
October	5,096	140	
November	5,039	140	
December	4,915	140	
1917—			
January	5,184	143	1 extra, Boys' Central. 1 „ Burnside. 1 „ Sir James Douglas.
February	5,151	143	
March	5,012	144	1 „ Girls' Central.
April	4,913	145	1 „ Margaret Jenkins.
May	5,006	146	1 „ King's Road.
June	4,874	146	
August	..	..	
September	5,186	151	3 „ High. 3 „ Margaret Jenkins. 1 „ South Park. 2 less. Sir James Douglas.
October	5,224	150	Pembroke School closed.

The above table shows an increase of 128 in the attendance in October, 1917, over the attendance in the same month of 1916.

Divisions.

In the column showing the number of divisions it will be noted that this year there is an increase of ten over the number in December of last year. This was due partly to additional teachers being attached to certain schools which showed overcrowding; partly to increased attendance, especially at the High School; and partly to the reorganization of the Margaret Jenkins and the Sir James Douglas Schools, to which I shall allude in another part of this report.

While some rooms are still overcrowded, the Victoria schools are now in a more satisfactory condition as regards the number of pupils per teacher than they were last year.

Changes in Schools.

For a long time the Sir James Douglas School laboured under the disadvantage of being unable to accommodate, without overcrowding, the large and growing population of the Moss Street District. Attempts were made to divert some of the pupils to the Margaret Jenkins School by changing the boundaries, but it was found to be impossible to make any improvement, worth while, unless pupils were drawn from that part of the district lying on the side of the Sir James Douglas School remote from the Margaret Jenkins School. To do that would have placed the Sir James Douglas School out of its own district, and pupils would have had to pass it in order to reach a more distant school, which would have created much discontent. The plan finally adopted was to create the Margaret Jenkins School a boys' school and the Sir James Douglas School a girls' school, as far as the Intermediate and Senior Grades were concerned, the Junior Divisions remaining mixed classes, with the former boundaries. The boys in the upper grades of the Sir James Douglas District were thus compelled to go farther to reach their new school than they had been accustomed to go, and parents very naturally viewed the change with disapproval. But, when it was pointed out to them that the alternative was the building of a new wing to the Sir James Douglas School, they perceived that it was impossible at the present time to secure funds for that purpose and generally acquiesced in the proposal. The schools as reorganized have now been in operation for two months, the result being satisfactory. It was found necessary, however, to create optional districts, near the boundaries separating the Sir James Douglas District and the South Park and Central School Districts, within which pupils might be considered as residents, for school purposes, of any one of these districts.

An efficient principal has been selected for the Margaret Jenkins School in the person of Mr. W. H. Gee, a teacher of long experience, who had previously filled the position of first assistant in the Victoria West School very satisfactorily.

The Pembroke Street School, attached to the Children's Aid Home, was discontinued at the end of September. That school, as you are aware, was commenced for the purpose of educating the boys of the Home, and, till it was closed, did excellent work under the able direction of Miss Bernardine O'Keiffe, who had a keen interest in her work, which was rewarded not only by the progress of her pupils in the class-room, but also by the success of many of them after leaving the Home. The addition of a number of girls belonging to the Day Nursery, however, and the necessity, if the school were maintained, of coeducating them with the boys, led the Board of School Trustees to discontinue the school, especially as it was always an open question whether it was not advisable that the inmates of the Home should mix as much as possible with other children rather than that they should lose their self-respect by isolation.

Playgrounds and Sports.

The advantage of having organized sports in connection with each school has been long appreciated by the Board. They accordingly have done their best to make and keep up adequate playgrounds, and to erect goal-posts and other fixtures necessary for games. Some of the schools, however, are not sufficiently provided with suitable places for sports; but that matter is occupying, at present, the attention of the Buildings and Grounds Committee.

Formerly, balls, hockey-sticks, baseball-clubs, etc., used to be provided out of a fund placed at the disposal of the schools by the Board of Trustees. The necessity for economy, however, which arose two years ago, caused the Board to discontinue their grant, with the result that, while the schools still continued to have games, the loss of the grant crippled them considerably. Many of the boys were unable, owing to the financial condition of their parents, to subscribe to the sports funds of their respective schools, while, in some schools, the boys who were able to subscribe looked on the footballs with proprietary interest and considered that they had a better

right than the other boys to use them. Some of the schools, also, were unable to provide any footballs or materials for playing other games.

To remedy the consequent falling-off of interest in sports in the schools, a meeting of representatives of the staffs of the schools was lately held in the office of the Board, at which a resolution was passed praying the Board to make provision in their estimates for 1918 for a small grant to aid the teachers in supplying the materials necessary for school games, and thus revive the interest in sports and friendly rivalry among the schools which is always conducive to healthy school spirit.

SCHOOL-GARDENS.

In some of the Victoria schools, notably the George Jay, the Oaklands, the Burnside, and the Kingston Street Schools, school-gardens have received much attention. If there is in any quarter a doubt as to the value of including gardening in the curriculum, a visit to any one of those schools would convince the most sceptical. The educational as well as the practical importance of the training received by the children in the school-gardens can hardly be over-estimated, and it is to be hoped that at an early date all the schools in Victoria will offer their pupils opportunities for such training equal to those enjoyed by the boys and girls of the above-mentioned schools.

HIGH SCHOOL.

The regular work of the High School is reported on to the Department in detail by the Inspector of High Schools, and is therefore only alluded to here. On the whole, it is as satisfactory as can be expected, considering the loss sustained by the staff in consequence of the resignations of many of its most experienced members. Teachers who were largely instrumental in raising the High School of Victoria to a very elevated position among similar institutions in Canada have now left Victoria to continue their educational work in other places. The names of Messrs. Willis, Russell, Putnam, Elliott, Yates, Wood, Richardson, and Misses Burris and Whelen, lost to the roll of Victoria teachers, speak more eloquently than any words of mine can of the change that is now apparent in the High School staff. I do not mean by those remarks to disparage the work or ability of the new teachers. But they would be the first to acknowledge the difficulty of filling the places of their distinguished predecessors. It is to be hoped that the financial circumstances of the city will justify the Board of School Trustees in dealing with salaries in a more generous spirit than heretofore, so as to avoid further loss to the already weakened staff of the High School.

Since my last report a class in agriculture was opened in the High School last September under the tuition of Mr. H. E. Hallwright, B.Sc.A., with an enrolment of thirty-one. The popularity of the class and the enthusiasm of the Victoria pupils is indicated by the fact that they have taken the initiative of inviting the co-operation of those high schools in the Province that have agricultural instruction in forming a High School Agricultural Club. Such an association, by bringing together the students of agriculture from all sections of British Columbia, seems to be highly desirable as tending to advertise and render popular this very important branch of high-school education.

NIGHT-SCHOOL.

Last year I reported the attendance at the night-school for the month ended October 31st, 1916, to be 588. On October 31st, 1917, the enrolment was 545—a falling-off of forty-three students. The decrease is no doubt due to the large number of young men who have either joined Canada's Overseas Forces or are engaged in occupations bearing upon the prosecution of the war. It is satisfactory, however, to note that women are showing by their attendance that they are alive to the necessity of preparing themselves for positions they may be called on to fill owing to new conditions arising out of shortage of male labour.

The Commercial classes are unprecedentedly large, and the number of students in the French class indicates its continued popularity. A new class in salesmanship has been opened, and is satisfactory both on account of the ability with which it is conducted and the interest manifested in the subject by the men and women attending it. The other classes keep up their numbers and are satisfactory; but I regret to have to report that classes in such important subjects as drawing (light and shade, colour), chemistry, and advertising had to be closed owing to insufficient attendance.

Cadet Corps.

The Victoria Schools Cadet Corps shows this year a large increase of attendance, due largely to the enthusiasm with which Captain Ian St. Clair, physical director of the schools, inspires the boys. The corps, however, is greatly handicapped for want of uniforms.

There is a prospect of the affiliation of the High School Cadet Corps with either the 50th Gordon Highlanders of Canada or the 5th Regiment of Garrison Artillery. Should such affiliation take place, the corps will undoubtedly benefit both in popularity and efficiency.

Singing.

The progress of singing in the public schools during last term may be best understood, perhaps, from the following extracts from the report of Messrs. Kent and Sehl, who were so good as to give up much of their valuable time and to lend their great musical knowledge to the School Board in judging the school-singing competitions for the Paterson shields:—

"Among the senior classes there was shown this year an improvement under the headings of expression, enunciation, and two-part singing, which we look upon as highly commendable, although, on the other hand, there is a marked falling-off under the important heading of pitch. . . .

"In the junior classes we are pleased indeed to report a very decided improvement under enunciation, tone quality, and time and attack, also a small improvement in pitch. Under the latter heading the juniors are certainly to be congratulated, as two of their classes secured full marks for maintaining the pitch throughout the three numbers sung. . . ."

It has always seemed to me to be a matter of regret that singing is not taught in the High School, especially since many of its students who intend to become teachers will have to teach the subject in the class-room. A movement is, however, now on foot to remedy this defect.

Salaries.

The matter of salaries has been during the past school-year a source of discontent for the staff and of anxiety for the School Board. Many of our best teachers have left Victoria to accept better-paid positions elsewhere, and I fear there are still more who would follow them if they were not confined to this city by family or other ties.

The experienced teacher is being replaced by young, untried graduates of the Normal School, who, however skilful as instructors and brilliant as scholars they may be—and I am glad to say there are many such on our staff—cannot be expected to have the same influence with and control over their pupils that a few more years of experience will give them. I have alluded above to the teachers who have left the High School. Others, who could be ill spared, have for financial reasons resigned from the public-schools staff. And I repeat my suggestion that, unless some relief in the matter of salaries is given them, and that soon, many others will seek that financial security that they think they are denied in this city.

The Board of Trustees, however, aware that the limit beyond which efficiency is menaced had been reached, have this month restored to the teachers half of the 10 per cent. reduction made in 1915; and they intend to make an attempt before the end of November to equalize the salaries, so that there will no longer be the discrepancy that now exists between the pay of teachers doing equal work and having the same record for efficiency. When that is done and the remaining 5 per cent. restored, it is to be expected that Victoria will recover its former strong position of popularity among the teachers of the Province.

I have, etc.,

Edward B. Paul,

Municipal Inspector of Schools.

PROVINCIAL NORMAL SCHOOLS.

VANCOUVER PROVINCIAL NORMAL SCHOOL.

VANCOUVER, B.C., July 18th, 1917.

Alexander Robinson, Esq.,
Superintendent of Education, Victoria, B.C.

SIR,—I beg to forward herewith reports for the thirty-second and thirty-third sessions of the Vancouver Provincial Normal School, extending from August, 1916, to May, 1917.

Our summer session commenced on August 21st, 1916, with 280 students enrolled, namely: Advanced, 40; preliminary, 240; and at its close there were granted 207 diplomas, namely: Advanced, 31; preliminary, 177; 32 other students will be given diplomas as soon as they become more proficient in the practical side of our work.

Two of our staff, Messrs. Murphy and Spouse, left for active service, and two other teachers were required in their places. Miss C. McNiven, B.A., was appointed, and Mr. MacLean was transferred from the Victoria Normal School. A rearrangement of our work was thus rendered necessary, which was apportioned as follows: Principal—Psychology, pedagogy, school law, and arithmetic. Mr. H. H. MacKenzie—English and registration. Mr. W. P. Weston—Art subjects and writing. Mr. H. B. MacLean—Nature-study and hygiene, arithmetic. Miss C. McNiven—History and geography. Miss L. A. Burpee—Junior Grade subjects. Miss E. M. Coney—Singing and voice-culture. Sergeant-Major Instructor Wallace—Physical drill.

Our winter session commenced on January 15th, 1917, with 226 students enrolled, namely: Advanced, 186; preliminary, 40; and at its close 195 diplomas were granted, namely: Advanced, 168; preliminary, 27; 5 other students will be given diplomas as soon as they become more proficient in the practical side of our work.

In addition to the usual school-work, the students have engaged in many other activities. Evening classes have been held in first aid and home-nursing, the instruction having been given gratuitously by medical men in the city under the auspices of the St. John Ambulance Association, and the majority of the students in these classes obtained diplomas from that association.

A "Red Cross" society was held every Thursday afternoon after school under the supervision of our ladies, and parcels—158 in all—have been sent to the boys of our school now at the front. Numerous letters of thanks and appreciation for this remembrance have been received from France.

A literary society was held fortnightly, and all the work of arrangement was carried on by the students themselves under the direction of the Students' Council.

Athletics, basket-ball, tennis, and football have all received their share of attention.

I would like to state here that all such activities are voluntary and must only be taken up after school-hours, although they are of such a nature as to be of great ultimate value in the future training of children.

A roll of honour has been made of the names of our students who have enlisted in their Empire's service. This list now contains sixty-one names. There are no doubt several other students who were not reported to me. Eight have given up their lives in the service of their country.

All of our work has been greatly assisted by the kind co-operation of the Municipal Inspector, J. S. Gordon, Esq., and especially of the staff of each of the two schools used for the practice-work of our students.

I have, etc.,

WILLIAM BURNS,
Principal.

VICTORIA PROVINCIAL NORMAL SCHOOL.

VICTORIA, B.C., October 27th, 1917.

Alexander Robinson, Esq.,
Superintendent of Education, Victoria, B.C.

SIR,—I have the honour to submit the following report of the work done in the Provincial Normal School at Victoria during the school-year ending June 30th, 1917:—

During the fourth session, which opened on August 21st, 1916, and closed on December 23rd, 1916, there was an enrolment of seventy-seven students. Eighteen of these were taking the Advanced Course and fifty-nine the Preliminary Course. At the close of the session all of the advanced students completed the work successfully. Of the preliminary students, two withdrew during the session, one failed to do satisfactory work, and fifty-six were awarded diplomas. When the fifth session opened on January 15th, 1917, there were in attendance sixty-one students and one entered later in the term. Fifty of these took the Advanced Course and twelve the Preliminary Course. So faithfully did these students devote themselves to their work that we were able to award sixty-two diplomas when the session closed on May 23rd.

By comparison it may be easily seen that the number of students attending during the year 1916-17 was less than attended during the previous school-year. This difference was largely due to the fact that the City of Victoria contributed to the teaching profession slightly less than 50 per cent. of the number it provided the previous year. The number attending from other parts of the Province was much larger comparatively, and provided representatives from Armstrong, Ashcroft, Chilliwack, Coal Creek, Comox, Creston, Cumberland, Duncan, Errington, Fruitvale, Keremeos Centre, Ladysmith, Nelson, Prince George, Prince Rupert, Quesnel, Salmon Arm, Sidney, Stave Falls, Summerland, and Ucluelet.

In August, 1916, our staff was reduced in number. Mr. H. B. MacLean was transferred to the Provincial Normal School at Vancouver. This necessitated a reapportionment of the subjects among the members of the staff, as follows: The Principal—English literature, English grammar, arithmetic, language, reading, psychology, history of education, and physical drill. Mr. D. M. Robinson, First Assistant—History, geography, class management, school law, and physical drill. Mr. Harry Dunnell, Drawing Master and Technical Instructor—Drawing, manual training (including paper-folding, modelling, and woodwork), writing, nature-study (including school-gardening), and physical drill. Miss Lexa Denne—Household science (including cookery, home-nursing, and sewing), hygiene, first aid to the injured, and gymnasium classes. Miss Ida Morris, L.R.A.M.—Music (including singing and choral work), elocution, and voice production. When it is remembered that in addition to class instruction in the above-mentioned subjects each instructor gave individual assistance to the students for their teaching lessons, it is obvious that the burden is not light. Especially is this evident if the amount of individual assistance required is computed from the following statement of practical teaching done by the students. Each student of the class graduating in December taught about *sixty* lessons and each student of the class graduating in May taught at least *forty* lessons in the training-schools.

In addition to the Model School, we were again able to use the Boys' Central, the North Ward, and the Bank Street School for teacher-training purposes. I regret to report that the teachers in these three schools are still permitted to do this extra work without remuneration. That the teachers in Victoria who do this extra work should receive nothing for it while those in Vancouver are paid an extra allowance is obviously unjust. May I again most respectfully repeat the suggestion made in my last year's report, that it would assist materially if the Government would pay from the Provincial Treasury for the extra services rendered by teachers in *all* schools used for teacher-training. Not only would this establish a definite relation between these schools and the Provincial Normal School, but it would remove the unpleasant thought that the necessary assistance rendered by these teachers in the provision of future teachers for this Province was accepted gratuitously. In the meantime I wish to express to the principals of these schools, Mr. J. A. Cunningham, Mr. J. M. Campbell, and Miss A. M. Paterson, and their assistants, my sincere appreciation of the splendid service so generously given.

In concluding this review of the year's work, it is pleasant to recall that the sterner stress of work was supplemented and relieved by the weekly meetings of the Literary Society, the activities of the Athletic Association, the provision of field comforts and constant knitting for

our soldiers, the simple social functions, and the yearly concert in aid of the Red Cross. I am again privileged to state that out of the very small number of male students attending this year two enlisted for overseas service.

I have, etc.,
D. L. MACLAURIN,
Principal.

ELEMENTARY AGRICULTURAL EDUCATION.

REPORT OF THE DIRECTOR.

Victoria, B.C., December 31st, 1917.

Alexander Robinson, Esq.,
Superintendent of Education, Victoria, B.C.

Sir,—I have the honour to submit the following report dealing with elementary agricultural education for the year ending December 31st, 1917:—

During the year substantial progress has been made in each department of the work as already organized—viz., rural science in public schools, agriculture in high schools, and the improvement of school-grounds. In addition to these usual lines of work, a special effort was made to increase production as a patriotic enterprise. A special report dealing with the results of this campaign will be issued as soon as all of the remittances have come to hand.

Rural Science.

The work in rural science, which includes nature-study, school-gardening, and such elementary agricultural studies as are usually conducted in the public school, is receiving more attention throughout the Province than ever before. There is still, however, great need for a better understanding of the important place this work can be made to fill in the education of children. Our teachers are not being properly and adequately prepared to teach this subject effectively and to give it its full value and relationship in the training of the child in school. It is a subject which can never be bound down to the usual routine methods of the class-room. It is a subject which more than any other demands activity on the part of the pupils rather than mere receptivity. Unfortunately, most teachers fall into the error—all too common in the teaching of all subjects—of stressing the informational side of the subject, thinking rather of the number of facts which the pupil can reproduce than of the added power which has come to him as a result of the study. This personal power is the direct result of the daily exercise of the child's faculties in observing, relating, and expressing, and it will manifest itself in a growing mental alertness and a keener sense-perception, which adds much to his ability and usefulness along other lines. Moreover, in the study of his natural environment the child is coming more and more to understand and appreciate the things and also the forces around him with which he will have to do during his whole life. No amount of gratuitous information about nature, no matter how thoroughly "drilled into him," could ever produce these results. Finally, ability to understand and appreciate nature means also ability to control and develop nature, and this is the fundamental idea underlying all development in the science and practice of agriculture.

Preparation of Teachers.

Our teachers, poorly prepared as most of them are in this subject, are struggling along with some measure of success. Some of them have had marked success, first of all, in training themselves, and it need hardly be said that they are sure to be equally successful in training their pupils. We must look to the high schools of the Province to give to those students who are to be our public-school teachers a fair working knowledge of the experimental and biological sciences, and we must also look to our Provincial University to provide the opportunity and the facilities whereby our high-school teachers can more fully prepare themselves to teach these subjects. Finally, we must look to our Normal Schools to provide adequate means for the training of all our young teachers in methods in rural science. In this connection I wish to point out the desirability of having on the staff of each Normal School a specialist in science and agriculture who is at the same time thoroughly qualified to give instruction in the pedagogics of the subject. Such instructors, if supplied with the proper facilities for teaching the subject and given sufficient time in which to conduct such a course, would revolutionize the teaching of nature-study and elementary agriculture in this Province.

As a subject of instruction rural science is intrinsically interesting. When properly handled it is enjoyed alike by teacher and pupils. Any failure on the part of the teacher to arouse and maintain interest in this subject cannot, therefore, be traced to the character of the subject itself, but is most likely due to the teacher's lack of preparatory training. Rural science is not any easy subject, even to the well-trained and experienced teacher. It calls for much preparation, as well as resourcefulness, on the part of any teacher who would hope to get the best results, but those who have tried and whose efforts have been attended with success invariably state that the good effects resulting in their schools more than counterbalance the extra effort put forth in the teaching of the subject. They also state that the subject of nature-study or rural science is not only invaluable on its own account, but that it gives vitality and added meaning and effectiveness to the teaching of other school subjects. Those teachers who have taken the summer course in rural science are doing much better work in the teaching of that subject, and it is to be hoped that a much larger number will take advantage of these courses in future.

SCHOOL-GARDENS.

The organization and use of the school-garden is coming to be understood and appreciated more than ever before. Its relationship to general education, on the one hand, and to agriculture, on the other, is steadily improving. It is the common meeting-ground for nature-study and agriculture—subjects which cannot be taught so well by any other method—but its influence on child life and character makes it of much greater importance than merely a first-class teaching device. Some of the outstanding values of the school-garden are well stated in the following paragraph from the pen of one of the most capable authors and instructors in nature-study and school-gardening, Miss Jean Patterson, of the Illinois State Normal School:—

"The school-garden seems to supply a natural demand, irrespective of locality. It has a definite mission to fulfil in the city, as well as in the village and rural school. While its purposes may differ in different schools, its value as a factor in education is rarely questioned. It is worth while, not only because of its practical bearings, but because it is very valuable on its educative and esthetic side. . . . Indeed, if the full purpose of the garden-work is carried out, it means more than the training of the hand in doing its part of the work successfully and skilfully. It means a training of the eye to see things as they are, a training of the mind to think logically and independently, to draw truthful conclusions, and to recognize the dignity of this work."

As is to be expected, not all teachers are equally successful in organizing and conducting school-gardens. Teachers' view-points differ widely with reference to this subject, as do also their methods of conducting the work. Some devote too much attention merely to the industrial side of it. To help the children to make and maintain a good garden is their chief concern, forgetting that the broad educational use which they make of the garden in the daily round of studies and of child-experience is the more important consideration. Occasionally, the work has been carried on in such a perfunctory manner as to lead to carelessness, and even disaffection, on the part of the pupils. The most serious error of all, perhaps—one which I am glad to say is seldom met with in this Province—is the tendency to exploit child-labour in the school-garden in order to make a good showing so far as external appearances go. I have seen boys of their own free will spend much time out of school-hours sifting the soil of their plots in order to render it finer and, as they thought, more productive, and even going so far as to sweep all the garden-walks so as to give their gardens a more trim and tidy appearance, but that kind of exercise was the natural outcome of boyish interest and enthusiasm, and as such is commendable when not overdone. If it can always be borne in mind that the child is everything and that the garden is valuable only in so far as it is an agency to be used for his benefit, we will have gardens at once valuable and beautiful. Such gardens may not "pay" in the sense that some school trustees and parents would have them pay—merely as an economic undertaking; but they will pay as a valuable means towards the development of better boys and girls—better mentally and morally and stronger physically.

DIFFICULTIES.

The difficulties and drawbacks that had to be faced in connection with school-gardening this past year have been rather more serious than usual, and in many localities the gardens themselves were not so good as in former years. An unusually late spring followed by an exceptionally dry

summer proved disastrous to many gardens that under ordinary weather conditions are very good. Even more serious, however, than the summer drought in some gardens was the lack of cultivation during the months of July and August, when the schools are closed. The great scarcity of labour which existed throughout the whole Province this past season made it next to impossible in some districts to get any person to work in the school-gardens. Even the school-boys themselves were able to earn good wages with farmers and fruit-growers. In some cases failure on the part of the school trustees in the matter of securing the services of a caretaker would appear to be the real cause of the difficulty. Lack of funds is seldom the cause of this failure to secure adequate supervision of gardens during the summer holidays. It is expected of School Boards that they will provide a minimum of 50 per cent. of the amount of the departmental grant towards the maintenance of school-gardens. Only in a few cases has this been done, and in a number of cases where the gardens fared worst during the past summer the School Boards did not even take advantage of the whole of the departmental grant. These difficulties, though real, are by no means insurmountable. It is largely a matter of interest and appreciation of values, first on the part of the School Board, and then on the part of the teachers. Not until we have a more general appreciation of the place and value of the school-garden in child-education will we be able to make the work completely successful.

Then there is the question of the extra time and energy required to conduct school-gardening. Many teachers look with favour upon the work itself and are appreciative of its value as a part of school-work, but they complain of their inability to carry on this work and at the same time accomplish all that they find to be necessary in the other regular school studies. This is particularly true of teachers who are preparing candidates for Entrance Examinations. So common is this complaint that I have frequently suggested to these teachers that Senior Fourth Reader or Entrance pupils be encouraged to undertake one or two special gardening or agricultural problems at home, so that they would not be called upon to use any of the regular class periods in school-gardening classes. If boys and girls have had instruction in and through school-gardening in the primary and intermediate grades, they should be in a position to derive real profit from the carrying-out of an independent home project in elementary agriculture.

School Credits for Home and School Gardening.

There is a growing feeling amongst trustees as well as teachers that, as school-gardening properly conducted makes some considerable demand upon the time and energy of both teachers and pupils, it should have more official recognition in the way of school credits. This cannot be considered as an unreasonable request, especially under present conditions, when so much stress is laid upon the Entrance Examination and the status of the teacher is, unfortunately, so largely determined by the percentage of successful candidates coming from his classes. It is held that the giving of reasonable credits to pupils taking up school and home gardening would do much to maintain interest in the work throughout the year, and would greatly aid in meeting the summer-vacation difficulty. The system of school credits commonly followed in American schools applies mostly to work done by pupils out of school-hours, and by arrangement can be applied to any or all school subjects. It is probably best, however, when applied to such practicums as the raising of farm or garden crops or the rearing of live stock. The evidence is usually more tangible in these cases and the results more easily checked up by the teacher. If, say, 50 per cent. of the pupils' standing in nature-study and elementary agriculture were based upon their year's work in school and home gardening, or other approved home projects of an agricultural character, I am strongly of the opinion that teachers would accomplish more and better work with their classes. They would feel that adequate recognition was being made in this way for the extra work which these agricultural studies entail. This will be true at least until such times as the subject of elementary agriculture is made compulsory in our schools.

Home-gardens.

Many of the boys and girls who are enrolled in school-gardening also do good work in home-gardening. In other cases where conditions at school make it impracticable to establish school-gardens, the teachers give instruction to the pupils which the latter carry out in gardens at their respective homes. In districts where the children do not leave home for a long period in the summer-time these home-gardens are usually very successful. The spirit of competition is usually introduced, the garden-plots are judged twice during the season, and prizes are frequently offered, either by the School Board or by interested men and women of the district. This is a

part of the work which is capable of great development, and during these times of much-needed food production can be made of great value economically as well as educationally. We look to the teachers in our high and public schools to encourage this home-garden production work during the coming year. There are but few schools in the Province where something cannot be done by the larger pupils, if only the teachers and school trustees will give the work proper direction and support. Ways and means of securing the widespread adoption of this kind of home-work in practical elementary agriculture are now under consideration. As already referred to, some well-regulated system of school credits for home-work of this kind would doubtless encourage both teachers and students to undertake it and carry it through to success.

SCHOOL FAIRS.

As boys and girls who go in for home-gardening or other home projects in agriculture seldom see the results of each other's work at the individual homes, it is desirable that samples of the best produce grown by each pupil should be assembled in the autumn, and that this be made the occasion for a suitable celebration. This exhibition of produce may be included in the annual exhibition held under the auspices of the local agricultural society, or it may be held purely as a school function. The winners are usually determined by judging the results of the season's work, as well as the quality of the produce exhibited. For instance, it is recommended that 100 points be allowed for the organization and care of the garden as determined by two field scores or examinations of the gardens by the teacher or by other competent judges. In the case of poultry, rabbits, or live stock, this score would be determined by the condition of the animals at the time of the judge's visit, the system of feeding and care followed, etc. One hundred points are also allowed on records and business statement as kept by the pupil throughout the season, and, finally, 100 points are allowed on the quality and arrangement of exhibits at the school fair or exhibition.

The following report submitted by Mr. J. C. Readey, B.S.A., District Supervisor of Agricultural Instruction for Chilliwack City and Municipality, shows what can be done by energy and good organization in making a school fair not only an interesting and enjoyable event in the community, but also a valuable stimulus to teachers and pupils in helping them to maintain a high standard of work in the schools:—

CHILLIWACK, B.C., December 31st, 1917.

J. W. Gibson, Esq.,
Director of Elementary Agricultural Education,
Victoria, B.C.

SIR,—I beg to submit herewith my report on the school fair held under my supervision at Chilliwack on October 13th, 1917.

Owing to the fact that the Chilliwack Agricultural Association had cancelled their annual fair for 1917, it was necessary, in order to keep faith with the teachers and pupils of the city and municipality, to hold the annual competitions between the various school-gardens on a separate occasion. The exhibits from the school-gardens were not thought sufficient attraction to warrant the expectation of a large number of visitors, and it was decided, with the concurrence of the two School Boards, to add a special prize-list providing for competitions in manual training, domestic science, and literature as well.

The regular prize-list amounted to $50, and provided prizes for the best exhibits selected by the pupils from their own school-gardens. These were competed for by the one-room schools, two-room schools, and schools with three or more rooms, respectively. The special list provided prizes for bird-houses, feed-hoppers, corn, oats, eggs, biscuits, garden-plans, painting, and English composition, as well as competions in grading potatoes and judging mangels. The special prizes totalled $150, and consisted of cash and goods donated by the citizens of the city and district.

There were 343 entries. A unique feature of the fair was the exhibit of all the produce grown in the school-gardens. This exhibit comprised 7 tons of potatoes, 11½ tons of carrots, and 2 tons of onions, a total of 20½ tons. This produce was sold locally, and the balance of the proceeds, after paying expenses, was contributed to a fund opened by your Department for contributions by the school-children of the Province for patriotic purposes. No admission fee was charged.

The following is a summary of the financial statement:—

Receipts, including proceeds from sale of garden produce and cash donations	$607 85
Disbursements, including prizes, advertising, labour, rental	306 90
Balance to Patriotism and Production Fund	$300 95

The school fair has been a success, and I beg to recommend your approval of its continuance next season.

Respectfully submitted.

J. C. READEY,
District Supervisor of Agricultural Instruction.

A very successful school fair was held at West Summerland under the direction of Mr. C. W. Lees, B.A., Principal of the public school, assisted by the teachers and school trustees. In the afternoon a sale of the produce raised by the pupils at their homes was held, refreshments served, and a number of interesting and novel contests put on, such as hat-trimming for boys and apple-box making for girls. A number of school choruses were given by the pupils during the afternoon. In the evening a public meeting was held, which was well attended both by adults and children of the district. At this meeting I gave a talk on school-grounds improvement and school-gardening, illustrated with lantern-slides. As a result of the sale and other special features the neat sum of $140 was realized for the Patriotism and Production Fund.

Other schools making exhibits at school fairs or other exhibitions and which have been reported as very successful are the following: Cowichan, Parksville, North Vesuvius, Galiano, Denman Island, Fauquier, Happy Valley, Lazo, Port Clements, Victoria City, Grand Forks City, Cranbrook City, Point Grey Municipality, Saanich Municipality.

In Richmond Municipality Mr. Henry Bayley has done some valuable work in connection with school and home gardening. He has always favoured agricultural experimentation and research problems of a suitable character for the older pupils, as his school is in the centre of an exceptionally fine farming district. Obviously, such lines of agricultural experimentation are more applicable to rural school-gardens than to those established in cities, where the children have no knowledge of the every-day methods of cultivation. Referring to his school fair, Mr. Bayley reported as follows:—

"We had a most successful meeting on October 5th. The farmers and others who were present represented a large district. The results of the experiment with oats exceeded my expectations. The best selected plant in our exhibition last year yielded 1,065 well-formed and healthy grains. The children selected the heaviest of these grains, and I divided these into three parts—A, B, C. Part A was planted in our school-garden; parts B and C were given to two pupils for a home-garden experiment. The school-garden oat-plot measured 3 feet 10 inches by 5 feet and yielded 6¼ lb. of grain, which is at the rate of 8,877 lb. or 261 bushels to the acre. This is nearly a ton to the acre more than the same oat yielded in our school-garden plot trial last year. One of the girls planted a plot 5 x 8 feet in her home-garden, using part B of the seed. This plot yielded 8 lb. or at the rate of 8,712 lb. per acre, a result approaching that obtained in the school-garden. The third home plot, in charge of one of the boys, was not carried through owing to an accident in the early stage of growth. Our visitors were very much interested in these experiments with the Leader oats, and I think we plainly proved to them the value of selected seed and hence the advantage to them of selecting their own seed. In our experiment we planted the grains 3 inches apart in rows which were also 3 inches apart, and I suggested that it would be a good experiment to plant a larger area in a like manner to see if this thinner sowing would yield better results than the thicker sowing usually practised. One of the farmers offered to try this out next year, and we have furnished him a large share of our selected seed to do it with.

"The exhibits of seedling potatoes were much appreciated. We had seedlings of 1916 and 1917. A professional horticulturist of good standing on the Coast who saw them advised us to try out at least three of our 1917 seedlings. As a matter of fact, all of the varieties will be tried out next year when they arrive at their full maturity. Two of the children's mothers cooked specimens of three of the varieties and pronounced the flavour excellent. Our exhibit next year should be still more interesting, when 1916, 1917, and 1918 seedlings may be exhibited. One of our visitors inspecting exhibit of potato-seeds and seed-potatoes made up his mind to do a little on his own account in raising potatoes from seed.

"Another exhibit was made up of seeds produced from the selected roots of last year. These included parsnip, beet, onion, carrot, and turnip seeds—all good, healthy seed which in our experiments have germinated splendidly. We also obtained two excellent varieties of bean-seed. We also had an exhibit of field roots selected from the pupils' plots, which were much appreciated."

There are scores of teachers in this Province who have just as much time for this work as Mr. Bayley has, and who might well emulate his example in the coming year.

Mr. Harry Charlesworth, Principal of the George Jay School, Victoria, which, by the way, is one of the first schools in the Province to take up school-gardening, has this year added home-

gardening to school-gardening, his own Fourth Reader pupils taking home-gardening. He reports as follows:—

"In accordance with instructions from the Department of Education, the work this year was carried on with a view to assisting the 'Increased Production' campaign. Each of the pupils took up as much land as possible, either in their own home-gardens or by taking city vacant lots. The growing of potatoes and other vegetables was the main work undertaken and splendid success resulted. The City Council Increased Production Committee offered six prizes open to school-children of Victoria, and of these, all except the third were won by pupils of this school with their home-gardens. The first prize was $15 cash, and the sixth $4 in cash, the other prizes being $10, $8, and $6 in cash. The quantity and quality of the vegetables raised were both very satisfactory, and the parents of the scholars testified to the material assistance in the 'cost of living' brought about by these home-grown products. The value of co-operation was illustrated by three of the pupils, who obtained two vacant lots and shared the expenses of ploughing, seed, etc., each obtaining an excellent return on his investment.

"In visiting the gardens, a noticeable feature was that in almost all cases where scholars had undertaken home-garden work those living alongside had followed the example set by the children, and had cultivated their lots also. One man, who had cultivated his land for the first time, admitted that he had done so because he felt ashamed to leave it lying idle when the scholars were busy next door, and said: 'If youngsters can do so well, there is no excuse for grown-ups to neglect cultivation.'"

The George Jay School is the only public school in the Province which has a greenhouse. Many schools operate hot-beds and cold-frames, but for cities, especially, a school greenhouse has a great value from the economic as well as from the educational standpoint. The following report by Mr. Charlesworth on the plant-house work at this school is more convincing than any argument which I could make in its support:—

"During the autumn and winter cuttings were propagated and in the early spring the seeds were sown for bedding out. Vegetable plants, including cabbage, cauliflower, onions, tomatoes, and brussels sprouts, numbering altogether 1,002 plants, were supplied to five Victoria school-gardens. Flowers for transplanting into school-garden borders, comprising some 2,498 plants of fourteen of the best varieties for school-garden use, were also supplied to these school-gardens from the greenhouse. In addition to this, 4,141 bedding plants for the beautifying of fifteen of the city school-grounds were supplied from our greenhouse. Some 1,500 wallflowers were used in our own school borders, making altogether 9,141 plants produced for our own and other city schools from this one greenhouse. After all the bedding plants and vegetable plants had been removed, the entire plant-house was set with tomato-plants. The proceeds from the sale of the tomatoes, which amounted to $26.90, was contributed to the Red Cross Fund. Some of the tomatoes were made into pickles by the girls in the domestic-science classes and sold, as was also part of the produce from the school-garden. The total amount contributed to the Red Cross Fund from these sources was $37.90."

In the special report which will shortly be prepared full details will be furnished with reference to the contributions and methods adopted in raising the money under the "Patriotism and Production" campaign. A report on the Belgian Children's Relief Fund will also be included in this supplementary report.

SCHOOL-GARDENS IN BRITISH COLUMBIA, 1917.

	Cities.	Rural Municipalities.	Rural and Assisted.	Total.
Number of schools taking up school-gardening (officially enrolled)	29	85	57	171
Number of teachers and divisions in the above schools taking the gardening-work	72	144	63	279
Number of pupils in gardening (all grades)	2,848	3,314	1,177	7,339

In addition to the above, there are a number of schools scattered through the Province where a good deal of attention is given to the cultivation of flower-plots and borders about the buildings and grounds. As we have no definite record of these, it is impossible to make an estimate as to

Interior view of the school greenhouse at the George Jay School, Victoria, where thousands of plants were propagated for the Victoria schools.

A corner in the high school agricultural grounds, Chilliwack, B.C. The crops harvested from these trial plots were exceptionally fine.

Students of the high school agricultural classes at Chilliwack, B.C. The experimental grounds are furnished with a greenhouse where an important part of the experimental work is carried on.

the number of them. Although not officially recognized and reported on, there can be no doubt as to the value of even the smallest efforts of this kind in the schools.

HOME-GARDENS IN BRITISH COLUMBIA, 1917.

	Cities.	Rural Municipalities.	Rural and Assisted.	Total.
Number of schools taking up home-gardening (officially enrolled)	1	5	13	19
Number of teachers and divisions in the above schools taking the home-gardening work	1	5	13	19
Number of pupils in home-gardening (all grades) ..	30	72	148	250

NOTE.—For some years in the City of Vancouver a great many children's home-gardens have been successfully conducted, mostly under the patronage and direction of the Local Council of Women. These home-gardens the Department has had no direct connection with, although many teachers in the Vancouver schools have done a good deal to assist in the work.

Of the 298 teachers who have conducted school or home gardening this year, 88 have already taken the summer course in rural science and 210 have had no such special course. It is a matter of regret that out of the 401 teachers who took summer courses in rural science, only 88 have this year taken up school or home gardening. Whilst it is true that many of these teachers are located in schools where it is not possible to conduct school-gardening, and a number of others have left the teaching profession, yet the fact remains that too large a percentage of teachers holding special rural-science qualifications in this Province have apparently failed to take any active part in the teaching of this subject as it should be taught.

It is also worthy of note that of the 298 teachers who started school and home gardening last spring, 100 either left the teaching profession or took other schools after the summer holidays. This frequent changing of teachers is one of the most serious drawbacks to the progress of all lines of school-work in this Province. It is probably most injurious in the case of school and home gardening, as the incoming teacher has missed the best part of the gardening season, and, being concerned with the organization of all branches of school-work immediately following promotion examinations and being new to the school itself, cannot be expected to accomplish good work.

AGRICULTURE IN HIGH SCHOOLS.

Commencing in August of this year, three additional district supervisors were appointed, as follows: W. J. Austin, B.S.A., at Vernon and Kelowna; S. H. Hopkins, B.S.A., at Duncan and North and South Cowichan; and H. E. Hallwright, B.S.A., at Victoria and Saanich. Enderby joined in with Armstrong, under supervision of J. E. Britton, B.S.A., in place of Vernon, which last year was associated with Armstrong. Following is a list of the high schools where agriculture is now being taught, with the enrolment by classes in each:—

School.	Instructor.	No. in First-Year Agriculture.	No. in Second-Year Agriculture.	Total.
Armstrong	J. E. Britton	9	16	25
Chilliwack	J. C. Readey	16	13	29
Cloverdale	E. L. Small	4	5	9
Duncan	S. H. Hopkins	26	...	26
Enderby	J. E. Britton	19	...	19
Kelowna	W. J. Austin	20	...	20
Murrayville	E. L. Small	14	11	25
Vernon	W. J. Austin	24	10	34
Victoria	H. E. Hallwright	30	...	30
Total number of students		162	55	217

From the start, girls as well as boys have taken this course, and, speaking generally, have done quite as good work as the boys. It is especially desirable that all of the students who aim at securing teachers' certificates should take the course in agriculture in those high and superior schools where it is given, as it is bound to be of great value to them in the teaching of rural

science later on. Those students who complete the two-year course in agriculture in the high school and who obtain the necessary professional standing in methods in rural science when obtaining their second-class certificates from the Normal Schools will be granted their diplomas in rural science without attending the special summer courses in that subject. Thus the value of the study of agriculture in the high schools will soon be made manifest in the public schools by those teachers who take up that study in connection with their high-school course. It will be of the greatest importance to this Province, from the industrial as well as from the educational standpoint, if, as soon as circumstances will permit, such a course can be offered in every high school.

It is a matter of regret that more definite steps have not as yet been taken to give special training to capable young men in our own Province such as would fit them for positions as district supervisors and instructors in agriculture. Suitable men with the necessary academic and professional training for this work are very scarce at the present time. Other Provinces as well as British Columbia are finding the need of such specially qualified men. This is a matter which might be considered by the Provincial Government in conjunction with the Provincial University.

The course of study as adopted is giving fair satisfaction. Some slight changes have been recommended by the district instructors, and no doubt a number of beneficial changes will be made from time to time as experience may warrant. We have aimed at making the course suitable to the Province and as practical as possible. It is also more broadly educational than might appear at first sight. It is bound to link up in close relationship with the other science studies in the curriculum, and would no doubt be still better if preceded by a preliminary course in biology and general science. At the present time our instructors are doing all they can to supply this scientific approach to the various branches of agriculture as they reach them during the first year.

The modern scientific method of teaching is followed in so far as equipment and facilities generally will permit. It takes some time and money to establish a proper working laboratory class-room for the teaching of agriculture as it should be taught. Such a laboratory, however, has the great advantage of being available for the teaching of other science subjects. From the start we adopted the policy of getting the most essential parts of the equipment first, and then adding further supplies and apparatus as the need arose. This plan, whilst it has somewhat hampered the instructors in carrying on certain parts of the work, has made it easier for the School Boards, who agree to meet all of the expenses outside of the salary of the instructor, which is paid by the Department. The proper preparation, fertilizing, and in some cases irrigating of the necessary ground for the outside experimental work also requires a good deal of time and extra labour, so that the first year's expense is somewhat greater than that of succeeding years.

One cannot help feeling, however, that when the study of agriculture in secondary schools has received the attention which it deserves, and which it must certainly receive in future if we would escape national bankruptcy and a gradual extermination of the race, not *one* scantily furnished class-room with its half-acre of experimental grounds will be provided, but a well-equipped building of several rooms properly fitted up, each for its special line of instruction. Such an agricultural high school as this would be located in grounds 30 or 40 acres in extent and fully equipped with outbuildings, live stock, and everything that can help in the training of young people for a successful and contented life in the country. Where we now ask for hundreds we will then require thousands, but the prosperity of the country would presently be estimated in tens and hundreds of thousands. As yet we have made but a small beginning, but one which we are hoping may not only become valuable in itself, but that will also demonstrate the possibilities of something very much better.

EXTENSION OR CONTINUATION CLASSES.

The great scarcity of young men throughout this Province, due to the large number who have gone overseas, has made it difficult for our district supervisors to organize winter classes to the extent which we had hoped. Although these part-time classes are open to young men from fifteen years of age upwards, but few have as yet found it possible to attend. Under ordinary circumstances we believe that this would be different. In some cases the classes are being held in the evening, twice a week, with fair results. In Saanich a number of young women applied

for admission to these classes and are following the course of instruction in a most satisfactory manner. If, as seems to be inevitable, the women of our country are to take up certain lines of farming and fruit-growing, they should be granted just such an opportunity as I have referred to for gaining all possible assistance in the way of special instruction in those lines of agricultural work which they may hope to undertake.

School-grounds Improvement.

Since this work was started less than three years ago no less than sixty-five school-grounds have been planned and improved. Trees and ornamental shrubs to the number of 5,832 have been sent out from the Essondale Nursery for use in the beautifying of these grounds. In most cases the work is being advanced from year to year and is being appreciated more and more by the parents and trustees. Plans of the grounds have been carefully prepared, and each year will bring the grounds nearer to the requirements indicated in these plans. Officials of the Supervising Architect's office in the Public Works Department have been so good as to prepare these plans. The excellent service which these gentlemen have rendered is greatly appreciated. Following is a list of the schools receiving departmental grants on account of grounds improvement:—

Cities.—Courtenay Public School; Cranbrook Central School; Grand Forks Central School; Kelowna Central School; New Westminster—Duke of Connaught High School, F. W. Howay School, Lord Lister School, Richard McBride School, John Robson School, Herbert Spencer School; Port Coquitlam Central School; Revelstoke High School; Vancouver, North—Lonsdale School.

Municipalities.—Burnaby—Edmonds Street School, Gilmore Avenue School, Hamilton Road School, Howard Avenue School, Inman Avenue School, Kingsway East School, Kingsway West School, Nelson Avenue School, Riverway East School, Schou Street School, Second Street School, Sperling Avenue School; Chilliwack—Cheam School, Sardis School; Cowichan, North—Chemainus School, Somenos Station School; Delta—Boundary Bay School, Ladner High School; Esquimalt—Lampson Street School; Langley—Aldergrove School, Belmont School, Langley School, Langley West School, Langley Prairie School, Milner School, Otter School; Maple Ridge—Hammond School, Haney School, Maple Ridge School, Alexander Robinson School; Matsqui—Matsqui School; Mission—Mission High and Public School; Peachland School; Penticton—High School, Ellis School, Poplar Grove School; Point Grey—Queen Mary School; Surrey—Cloverdale School; Vancouver, South—Lord Selkirk School.

Rural and Assisted Schools.—Anarchist Mountain, Arrowhead, Beaver Creek, Bench, Box Lake, Chase, Deer Park, Nakusp, Naramata, Parksville, Renata, Rutland, Wynndel.

This movement to improve the school-grounds of the Province for purposes of education and recreation is steadily growing. A number of teachers and School Boards are doing good work on their own account. As children become more interested in the growing of things in gardens and develop a certain skill and ability along this line, they are only too willing to turn this ability to account in helping to improve the school-grounds. Such work is bound to be advantageous from every standpoint.

Special School Courses in Fruit-packing.

Owing to the shortage of labour which existed in many parts of the Province, and especially in the large fruit-growing districts, it was deemed advisable to provide special winter courses in fruit-packing for boys and girls in the high schools and advanced grades of the public schools in these districts. It was decided at a conference between officials of the Departments of Agriculture and Education that the Department of Education would bear all expenses in connection with the courses, and that the Department of Agriculture would arrange for the instructors and their itinerary. All details as to places and dates were arranged by the Provincial Horticulturist in consultation with myself.

Following is a list of the places where these special courses were conducted, and the number of students taking the course at each place: Coldstream, 16 pupils; Creston, 32 pupils; Duncan, 52 pupils; Grand Forks, 30 pupils; Haney, 27 pupils; Harrop, 9 pupils; Kelowna, 69 pupils; Keremeos, 11 pupils; Maple Ridge, 28 pupils; Nakusp, 33 pupils; Nelson, 18 pupils; Peachland, 20 pupils; Penticton, 88 pupils; Salmon Arm, 47 pupils; Summerland, 59 pupils; Vernon, 79 pupils; making a total of 618 pupils.

The universal testimony of the instructors was that the boys and girls showed very good ability and took a keen interest in the course. The records of efficiency under test as submitted to me by the instructors were very gratifying indeed. From the reports and recommendations received from various reliable sources I would strongly recommend that these courses be arranged for again this winter and early spring.

At some of the fall fairs small cash prizes were offered for the most perfectly packed box of apples, to be competed for by boys and girls who had taken the special course in 1917. Very few of the boys and girls, however, entered the competitions, but with better organization I am of the opinion that next year will see a much larger response from those who have attended the course in fruit-packing.

We realized, of course, that this training, whilst desirable from almost every standpoint, would naturally tend to reduce the attendance in the high schools during the busy months of fruit picking and packing. This proved to be true; nevertheless, it appeared that the circumstances justified this action on the part of the students. Those who attended the winter courses were a little more competent in the handling of fruit than they otherwise would have been, and their earning capacity was correspondingly increased. During September and October certain high schools in fruit districts were very poorly attended, as I myself was able to observe. It is also true that many of the boys and girls from the high schools were placed in a most difficult position. Their services were greatly needed by the fruit-growers, yet they realized that the loss of two months meant a serious handicap in their high-school year should they decide to return. Some, I am told, would not return, but would pick up other jobs in the town or neighbourhood. This is such a regrettable circumstance that I venture to suggest that for high-school students in these districts a part-time school be conducted. It could be so arranged that they would have, say, three hours' regular class-work every day, including Saturdays, and work in the orchards and packing-houses about six or seven hours. If some such arrangement could be made during the rush season in fruit districts it would be of advantage to students and fruit-growers alike. If an arrangement of this kind could be made to apply to all classes and students in those high schools, the teachers also might be in a position to lend much-needed aid to the fruit-growers of their respective districts. Many teachers did excellent work last summer and autumn in so far as their time would permit, and it is to be hoped that all teachers, both male and female, will enlist in the noble army of food-producers and food-savers in this serious crisis of labour shortage and consequent food shortage which now confronts us. What I have suggested in the case of high schools might also be made applicable to the Senior Grade of the public schools. To meet such a crisis as we are now confronted with all the available man-power of the Province, including school-children and school-teachers, should immediately be mobilized in such a manner as will best meet that crisis. It is a question whether in any case it is advisable to close the schools altogether. A part-time system running through the busy months and possibly through a part of the long summer vacation would seem to meet the situation in a better way.

I have, etc.,

J. W. GIBSON,

Director of Elementary Agricultural Education.

SUMMER SCHOOL FOR TEACHERS.

Victoria, B.C., December 31st, 1917.

Alexander Robinson, Esq.,
Superintendent of Education, Victoria, B.C.

Sir,—I beg to submit herewith a report on the summer school for teachers held in Victoria from July 3rd to August 3rd, 1917.

As at previous summer schools held here, the courses were open to all teachers in the Province holding permanent certificates. Normal School graduates who received second-class certificates in June of the present year were given the opportunity of applying for admission to the summer school, but, partly owing to the fact that a very short time elapsed between the closing of the Normal Schools and the opening of the summer school, very few Normal graduates made application. If in future the summer school should open a little later, as has been suggested, we would in all probability have a larger number of Normal graduates in attendance.

Last year, on account of the great stress and financial depression that existed everywhere, it was thought advisable to omit the summer school altogether. This year it was found possible to hold the school only by limiting the attendance and reducing the expenses in every possible way. Whilst all teachers attending the school received free tuition and transportation, as in former years, no allowance was made towards the living expenses of the teachers who attended. This may have accounted in part for the reduced attendance of teachers, which totalled 245, as compared with 513 in 1914 and 690 in 1915. This falling-off in numbers, however, was also partly due to the delay in sending out the summer-school announcements, occasioned by the fact that the Legislature was convened a little later than usual, and, consequently, the consideration of the departmental estimates was somewhat delayed.

In point of organization and quality of instruction given the school was even more successful than in former years, when the very large classes rendered efficient work more difficult. The teachers who attended displayed great earnestness throughout the course. The daily class-period, although not unduly long—lasting only from 9 a.m. to 3 p.m. for regular classes, with an hour's intermission at noon—was, nevertheless, fully occupied. The amount of work covered by the various classes during the term was somewhat of a surprise to those who had the opportunity of observing it. The system adopted here of confining the summer students to single courses made it possible for them each to accomplish more and better work in the single course chosen than if two or three courses were being carried during the term.

Arrangements were made to bring all of the students together at least once a week in an evening meeting. These meetings, held on Friday evenings, were open to the public and were well attended. The programme varied somewhat from week to week. On Friday evening, July 6th, Dr. F. F. Wesbrook, President of the University of British Columbia, delivered a lecture on "Co-ordination in Education." On the evening of July 13th Rev. Ernest Thomas, assisted by Mrs. Thomas, gave a lecture-recital on Tennyson's "Idylls of the King," which was thoroughly enjoyed by all present. On July 20th Dr. J. S. Plaskett, Director of the new Astronomical Observatory, gave an illustrated lecture on "A Trip Through Space," which was greatly appreciated; and on July 27th the students in the Music class, under the direction of Miss E. M. Coney, Music Mistress of the Provincial Normal School, Vancouver, presented a mixed programme of music and elocution. Another evening was occupied with a series of short addresses and several musical selections provided by the "Life Conservation League" of Victoria.

Class excursions, which combined recreation with instruction, were held at frequent intervals during the course. One of the most delightful of these was an afternoon spent in the beautiful grounds and gardens of Mrs. R. P. Butchart at Brentwood. The members of the staff and the entire student-body were delightfully entertained by Mrs. Butchart during the afternoon and evening. A large percentage of the students also visited the new observatory on the invitation of Dr. Plaskett, who explained the working of the huge telescope recently installed. A most

enjoyable evening was spent by upwards of a hundred of the students who attended a musicale at the Victoria Conservatory of Music specially arranged for their benefit by Mrs. Macdonald Fahey.

It is, indeed, impossible in the space of this report to enumerate all of the courtesies which were extended to the summer students during the term by numerous citizens of Victoria City and District. This spirit of helpful co-operation so plainly manifested by sympathetic and public-spirited men and women of our capital city has done much already and is destined to do more in future to render the summer school more attractive to visiting teachers. The action of the Victoria School Board in once more giving to the Department the use of the High School is greatly appreciated. The excellent accommodation thus provided has always been an important factor in the successful operation of the school.

At the close of the school an exhibition of work done by the student-teachers was held in the High School. The building was thrown open to the public, and after an interesting hour had been spent in examining the exhibits provided by the various classes a formal closing took place in the large assembly-hall. Addresses were delivered by the Hon. J. D. MacLean, Minister of Education, and Dr. Alexander Robinson, Superintendent of Education, in which the highest commendation of the good work accomplished during the short period of the summer school was expressed.

Following are the courses of instruction, with the number of students in attendance in each:—

(1.) Rural Science (Elementary Agriculture, Nature-study, School-gardening, and Forestry):
- (*a.*) Preliminary or First-year Course 42
- (*b.*) Advanced or Second-year Course 28

(2.) Art:
- (*a.*) Preliminary Course 70
- (*b.*) Advanced Course 14

(3.) Manual Training:
- (*a.*) Manual Arts (Primary and Intermediate) 20
- (*b.*) Wood and Metal Work (for men only) 19

(4.) Household Economics:
- (*a.*) Preliminary Course 28
- (*b.*) Advanced Course 5

(5.) Vocal Music and Elocution 19

DETAILS OF COURSES.

(1.) RURAL SCIENCE.

PRELIMINARY OR FIRST-YEAR COURSE.

Organization and Methods in Rural Science:

(Instructor: J. W. Gibson, M.A., Director of Elementary Agricultural Education.)

A course of lectures and demonstrations dealing with such topics as the place and value of nature-study and elementary agriculture in the Public School Course; the relationship of school and home gardening to nature-study and agriculture; correlation of rural science with other school subjects; special methods in rural science; class management, equipment, reference literature, etc.

School-gardening:

(Instructor: H. B. MacLean, Provincial Normal School, Vancouver.)

Garden plans suitable for various types of school and home gardens; garden tools and equipment; planting and care of garden plots—each student will receive practical instruction in making and managing a garden; garden varieties suitable for school and home planting; garden records and diaries; garden exhibits.

Soil Studies:

(Instructor: J. C. Readey, B.S.A., District Supervisor of Agricultural Instruction, Chilliwack.)

Studies conducted in the field and laboratory dealing with the origin, formation, and classification of soils; physical analysis; water and air in the soil; effects of tillage and humus; agricultural implements and their special uses.

Field Husbandry:

(Instructors: J. C. Readey, B.S.A.; E. L. Small, B.S.A., District Supervisor of Agricultural Instruction, Cloverdale.)

Systems of cropping and rotation; most important cereals and fodder grasses; special crops in relation to soil and climate; improvement of farm seeds; purity and vitality tests; the "Seed Control Act."

Animal Husbandry and Dairying:

(Instructors: J. A. McLean, B.S.A., Professor of Animal Husbandry, University of British Columbia; T. A. F. Wiancko, Dairy Instructor, Victoria.)

The live-stock industry in its relation to agriculture with special reference to British Columbia; a study of the different types of horses, cattle, sheep, and swine, with relation to their utility; a study of the characteristics of the more important breeds (particular effort will be made to acquaint students with animal form and as much judging as possible will be practised); the keeping of milk records; milk separation and milk testing; animal health.

Horticulture:

(Instructors: F. M. Clement, B.S.A., Professor of Horticulture, University of British Columbia; J. E. Britton, B.S.A., District Supervisor of Agricultral Instruction, Armstrong.)

Fruit-growing in British Columbia; its history and development; nursery stock, planting, cultivation, and general care of the orchard and small-fruit plantation; the home vegetable-garden; the market-garden; the elements of landscape-gardening as applied to home decoration; methods of plant propagation.

Poultry-keeping:

(Instructor: H. E. Upton, Poultry Instructor, Victoria.)

Popular breeds—their origin and characteristics; breeding for eggs and for meat production; incubation and brooding; housing and general equipment; diseases of poultry and treatment.

Plant-study:

(Instructors: J. W. Eastham, B.Sc., Plant Pathologist, Vancouver; A. H. Hutchinson, M.A., Ph.D., Professor of Botany, University of British Columbia.

Characters of living things; plant structures in relation to the part taken by each in carrying on life processes; collecting, pressing, and mounting of plant specimens; elementary studies in systematic botany and the use of botanical keys; some common plant-diseases with methods of controlling them.

Bird-study:

(Instructor: W. B. Anderson, Esq., Victoria.)

Methods followed in the study of birds; museum studies in the identification of birds; nesting and life-habits of the birds of the district; the economic relationships of birds.

Entomology:

(Instructor: R. C. Treherne, B.S.A., Entomologist for the Dominion Government.)

Position of insects in the animal kingdom; elementary anatomy; functions of parts; development, growth, and metamorphosis; methods for the collecting and preservation of insects; simple classification and identification; field-study; principles of control for injurious insects of farm and garden.

ADVANCED OR SECOND-YEAR COURSE.

Group A.

Organization and Methods in Rural Science:

(Instructor: J. W. Gibson, M.A., Director of Elementary Agricultural Education.)

Methods in rural science continued; class conferences in rural-science problems; organizations for rural progress; school-improvement work; the planting and care of school-grounds.

School-gardening and Special Floriculture:

(Instructors: H. B. MacLean; J. E. Britton, B.S.A.)

Special problems in school and home gardening; experimental work; garden studies and garden management continued; garden competitions, exhibitions, and judging.

Soil-fertility:

(Instructor: P. A. Boving, B.A., Professor of Agronomy, University of British Columbia.)

The soil and plant-food; manure, lime, and fertilizers; drainage and irrigation; bacteria and inoculation; conservation of soil-fertility.

Group B.

Field Husbandry and Farm Management:

(Instructors: J. C. Readey, B.S.A.; E. L. Small, B.S.A.)

A further study of the common cereal and fodder crops; intensive or specialized farming as determined by soil, climatic conditions, markets, etc.; farm equipment—machinery, buildings, live stock, etc.—in relation to the size of the farm; farm planning; farm records and accounts.

Live Stock—Feeding, Care, and Management.

(Instructor: Professor J. A. McLean.)

A study of feeds and their constituents; the feeding, housing, care, and management of dairy cattle, horses, sheep, and swine; combating disease among farm animals.

Group C.

Horticulture and Floriculture:

(Instructor: Professor F. M. Clement.)

A continuation of the work of the first year. Special emphasis will be laid on the principles underlying various horticultural practices, cultivation, pruning, fertilization, and spraying for the control of insects and plant-diseases; landscape-gardening and floriculture as applied to school decoration and to rural and suburban homes.

Poultry-keeping:

(Instructor: J. R. Terry, Chief Poultry Instructor, Victoria.)

Feeds and feeding; demonstration in killing and plucking; incubation and brooding (continued); egg-judging; visits to poultry-ranches, poulterers, egg-laying contests; preparing fowls for exhibition (by H. D. Reid, President of British Columbia Poultry Association).

Bee-keeping:

(Instructor: F. Dundas Todd, Inspector of Apiaries, Victoria.)

Life-history of the honey-bee; the value of bees in the production of seed and fruit; the bee-keeper's equipment; swarming, hiving, feeding, and winter care of bees; bee-diseases and remedial measures.

Group D.

Plant-study:

(Instructors: J. W. Eastham; Professor Hutchinson.)

A continuation of the Preliminary Course, proceeding from a consideration of general biology to an observational study of plants in relation to environment and experimental work dealing with the growth and work of root, stem, and leaf; systematic botany continued; the nature and work of bacteria; plant-diseases and methods of controlling them.

Entomology:

(Instructors: R. C. Treherne, B.S.A.; E. H. Blackmore, Esq., Victoria.)

Study of representative insects of common families, their life-histories and habits; practical, identification of insects; artificial control—insecticides and methods of manufacture; natural control; value of parasitism, predaceous insects, etc.; field-study of insect species; practical methods of collecting and preservation.

SPECIAL LECTURES ON AGRICULTURAL TOPICS.

"The Country Life Problem," a series of five lectures by Professor L. S. Klinck, Dean of the Faculty of Agriculture, University of British Columbia.

(In the consideration of this question special attention was devoted to a study of the economic, social, and educational aspects of the subject.)

"Animal Disease and Public Health," by W. T. McDonald, B.S.A., M.S.A., Live Stock Commissioner, Victoria.

"The Growing of Bulbs and Garden Seeds," two lectures by L. Stevenson, B.S.A., M.S., Superintendent, Dominion Experimental Farm, Sidney, B.C.

"Parasitism amongst Insects," by J. D. Tothill, Dominion Department of Agriculture, Fredericton, N.B.

Certificates:

Teachers who completed satisfactorily the Preliminary or First-year Course received an interim certificate in rural science. Those who took the Advanced or Second-year Course and obtained satisfactory standing in all practical and written tests received a diploma in rural science.

(2.) ART COURSE.

(*a.*) PRELIMINARY. (*b.*) ADVANCED.

(*a.*) PRELIMINARY COURSE.

(Staff of Instructors: W. P. Weston, Art Teacher; James G. Sinclair, Art Teacher; Spencer P. Judge, Art Teacher.)

Object Drawing:

With pencil, charcoal, pen, brush; principles of construction; relation of construction to memory drawing; methods of teaching; tests; light and shade; tone studies; blackboard drawing.

Nature Drawing:

With pencil, pen, brush; construction of plant forms, leaves, flowers, and natural-history specimens; blackboard drawing.

Design:

Geometrical construction in patterns; decorative motifs; principles of design; naturalistic and conventional styles; colour; colour harmonies; the appreciation of good form; development of taste; blackboard drawing.

(*b.*) ADVANCED COURSE.

This course was open to those students who obtained a first-class certificate in the Preliminary Course of 1914 or 1915, or who could satisfy the authorities that they possessed the necessary ability to profit by the instruction. The course was of particular value to high-school teachers.

(Instructors: John Kyle, A.R.C.A., Art Master; J. Macmillan, Art Teacher.)

Drawing and Painting from Objects:

Flowering plants; natural-history specimens; study of light and shade, tone, colour, and composition; blackboard drawing.

Design:

Decorative motifs; principles of design; naturalistic and conventional styles; suitability of design to purpose; colour harmonies from nature; historic styles.

Applied Design:

Designing objects to be made in wood and metal; decoration of same by stains, gesso; metal repoussé, embroidery, applique, leather-work.

Certificate:

Practical and theoretical tests were conducted during the session and at the close a certificate was awarded showing the standing of each student who completed the course.

(3.) MANUAL TRAINING.

(*a.*) MANUAL ARTS, PRIMARY AND INTERMEDIATE. (*b.*) WOOD AND METAL WORK FOR SCHOOL-TEACHERS AND CERTIFICATED MANUAL INSTRUCTORS.

(*a.*) MANUAL ARTS, PRIMARY AND INTERMEDIATE GRADE HAND-WORK.

(Instructor: William H. Binns, Supervisor of Manual Training, Victoria.)

Pedagogics:

The child and the work; organization and equipment; lesson plans and methods of presentation; Manual of School Law on primary and intermediate grade work.

Drawing:

Sketching the various views of objects made—top, front, end, perspective view; lettering; the use of ruler, set-squares, compasses, simple draughting exercises; lessons in design as applied to the construction of models; suitability of design to purpose; discussion on good taste and form; blackboard practice.

Applied Work:

PAPER FOLDING AND CUTTING:

Process.—To illustrate arithmetical and geometrical truths.

Design.—Colour harmonies and contrasts.

Projects.—Square, oblong, triangle, etc.

MAT-WEAVING.

THIN CARDBOARD-WORK.

Process.—Use of ruler, drawing patterns, cutting out, decorative design, folding, and pasting.

Projects.—Trays, boxes, booklets for school-work, mounts, book-marks, desk-blotters.

HEAVIER CARDBOARD-WORK.

Process.—More accurate drawing; working-out of development patterns, use of ruler, compass, and set-squares; calculations.

Projects.—Book-covers, simple portfolios, envelopes and files, booklets, desk-pads, boxes, section booklets and their sewing.

CLAY OR PLASTICENE MODELLING:

Process.—Acquaintance with material; study of type forms and models; relation to drawing; correlation to school-work, such as nature-study, geography, etc.

Projects.—Fruits, vegetables flowers, and common objects; their relation to type-models.

Certificate:

Tests were conducted as the work proceeded and a certificate awarded to those students who successfully completed the course.

(*b.*) WOOD AND METAL WORK.

(Instructors: A. S. Hamilton, Manual Training Instructor; A. W. Jones, Manual Training Instructor; H. Dunnell, Manual Training Instructor and Art Teacher; S. Northrop, Supervisor of Manual Training, Vancouver.)

Manual-training instructors holding positions with temporary certificates had an opportunity at this class to qualify for certificates of a permanent character. Instructors already holding permanent certificates were permitted to attend and give their time to special subjects, such as wood-turning and metal repoussé.

Pedagogics of Manual Training:

The history, theory, and methods of educational hand-work; lectures given each day; written tests each week.

Cardboard Modelling:

A course will be carried out suitable to intermediate-grade classes, and preparatory to woodwork.

Woodwork:

DRAWING AND DESIGN:

(*a.*) Plans, elevations, and sections.
(*b.*) Translations of isometric views into orthographic plans and sections to scale, and vice versa.
(*c.*) Designing models and exercises suitable for elementary schools.

BENCH-WORK:

To design and execute in suitable material exercises or models involving the use of the tools detailed in the Manual of School Law.

Copper and Brass Repousse:

Processes.—Bending, filing, sawing, riveting, planishing, polishing, raising repoussé, etc.
Projects.—Paper-knife, blotter-corners, hat-pin, watch-fob, tray, book-ends, napkin-rings, frame, box, hinges, lamp-shade.

Mathematics:

Calculating time and cost of production; use of school-room methods in the workshop.

Written Work:

(*a.*) To answer questions on the construction and methods of using and sharpening any of the ordinary wood-working tools.
(*b.*) To understand the general conditions of the growth of timber, its preparation for market, the particular uses and sources of supply of materials used in British Columbia; to recognize specimens, tree pests, diseases, etc.

Certificate:

A first-class certificate was granted to candidates who attended the class regularly and passed first-class in the final examination in drawing, designing, bench-work, and written work. Seventy-five per cent. of the available marks in each subject were necessary to entitle the candidate to a first-class certificate, and 50 per cent. to a certificate of the second class. After the holder of a first-class certificate has satisfactorily conducted a manual-training centre for one school-year, and had his certificate endorsed by the Inspector of Manual Training, a permanent British Columbia certificate will then be awarded.

(4.) HOUSEHOLD ECONOMICS.

(*a.*) PRELIMINARY. (*b.*) ADVANCED.

(Instructors: Mrs. M. Arkley Martin, Supervisor of Domestic Science, South Vancouver; Miss A. B. Juniper, Supervisor of Domestic Science, Victoria; Miss A. Boorman, Supervisor of Sewing, Victoria.)

This course was arranged specially for teachers who work in districts where there is no special domestic-science instructor, and who desire to be able to instruct their pupils in the duties of the home-maker. The lessons in cookery, sewing, hygiene, and home-nursing were such as might be introduced in the ordinary class-room of a school.

(*a.*) PRELIMINARY COURSE (FIRST-YEAR COURSE).

Home-nursing and Hygiene:

Personal hygiene.
The invalid's room—location, ventilation, furnishing, temperature, bed-making, etc.
Treatment of common ailments.
Emergencies.

Sanitary Science:

Heating, lighting, and ventilation of a home.
Water-supply—disposal of waste.
Methods of living.
Infection and disinfection.

Cookery:

FOODS—THEORY:

Food and its effect on man; food principles; food accessories.
A study of carbohydrates; digestion and absorption.
A study of fats; the fuel value of foods.
A study of proteins, mineral matters, and acids; the preservation of foods.
Menus and balanced meals.
Food values and their cost.

PRACTICE:

Kitchen equipment.
Measurement of ingredients.
Cleaning and care of utensils.
Economical marketing.
The preparation, cooking, and serving of meals.
Beverages, milk, fruit, cereals, eggs, vegetables, cheese, soups.
Legumes, bread, leavening agents, meats, fish, pastry, and cakes.
Lunch-box for a child.
Invalid cookery.
The kitchen-garden.

Needlework:

PRACTICAL:

Hand and work drills.
Stitches—plain and sample embroidery.
Seams—hems, gathering, and putting-on of bands.
Buttons and button-holes, tapes, etc.
Patching and darning.
Set of garments draughted and cut to scale.
Set of garments made up by hand.

THEORETICAL:

Talks on sewing equipment.
Talks on household textiles.
Talks on suitable material for undergarments.
Talks on suitable material for outer and children's garments.
Comparison of ready-made and home-made garments.
Suggested courses for different grades.
Suggested courses for rural schools.
Suggested course in needlework for boys, following the lines of the "Boy Scouts."

(*b.*) ADVANCED COURSE (SECOND-YEAR COURSE).

For those students who obtained approved standing at the summer school of 1914 or 1915, or those who could satisfy the authorities that they possessed the necessary ability to profit by the instruction.

Home-nursing and Hygiene:

Personal hygiene.
Bandaging—practical instruction.
Recognition and emergency treatment of common accidents of the home, school-room, street, and playground; artificial respiration.

Summer School for Teachers held at the Victoria High School, July, 1917.

Rural Science classes in garden practice at the Victoria Summer School for Teachers, 1917.

Outline of course of instruction that might be given in public school.
Public-health system and "Public Health Act" in British Columbia.
Medical inspection in city and rural schools.

Sanitary Science:

Sites for a home; construction of a home.
Heating, lighting, and ventilation in the home.
Water supplies; plumbing; disposal of waste.
Sanitary control of foods; food adulteration.
Sanitary methods of living; infection and disinfection.

Cookery:

Study of recipes as to types and variations.
Experimental work with food materials and processes.
Applications of principles of dietetics in preparation of meals.
Table-setting and serving.

Needlework:

PRACTICAL:

Two hours' review or test covering first year's work.
Students given choice of suggested courses for the grades, one of these to be done by hand.
Sewing-machine lessons.
Taking of measurements.
Use of commercial patterns.
Draughting, cutting out, and making by machine one or two simple outer garments.
One or two specimens of household linen, either full size or to scale.

THEORETICAL:

Written test covering first year's work.
(*a.*) Household textiles, different kinds, choice, cost, durability, etc.
(*b.*) Introduction of the sewing-machine and the consequent development of the clothing industries.
(*c.*) Discussion and comparison of materials for outer garments.
(*d.*) Art in its relation to dress as to form and colour.
(*e.*) History of dress.
(*f.*) Justifiable proportion of income for dress allowance.
(*g.*) Methodical shopping and encouraging of home industries.

Millinery:

Making of buckram, net, and wire shapes.
Preparing trimming; making and trimming simple hats and bonnets.
Making of flowers and accessories.

Laundry:

White cottons and linens.
Ironing of white cottons and table-linen.
Washing of woollens and coloured cottons.
Ironing of woollens and coloured cottons.
Washing, stiffening, and finishing of laces and fine muslins.

Business Methods in House Administration:

House administration and division of labour; paid help in the house.
Home-made *versus* manufactured products.
Personal and household accounts; proportional division of income.
Economical marketing.
Banking and insurance as applied to the house.

House-furnishing:

Suggestions as to the choice of furniture.
Floor and wall coverings.
Draperies, etc.
Ethics and civics from a woman's standpoint.

Certificate:

Practical and theoretical tests were conducted as the work proceeded and at the close of the session a certificate was awarded to each student who had successfully completed the course.

(5.) VOCAL MUSIC AND ELOCUTION.

(Instructor: Miss E. M. Coney, Music Mistress, Provincial Normal School, Vancouver.)

VOCAL MUSIC.

Section I.

Voice-culture for Children:

1. The voice—its use and preservation.
2. Breathing and breathing rules and exercises.
3. Vowels and consonants—their treatment.
4. Rhythm, expression, interpretation, phrasing.
5. Singing out of tune—its cause and cure.
6. Breaking of the voice—signs and treatment.
7. Simple vocal exercises for daily practice, for the attainment of agility and evenness of tone.
8. General remarks; soft singing—loose throat, head voice.

Section II.

Sight-singing and Ear-training:

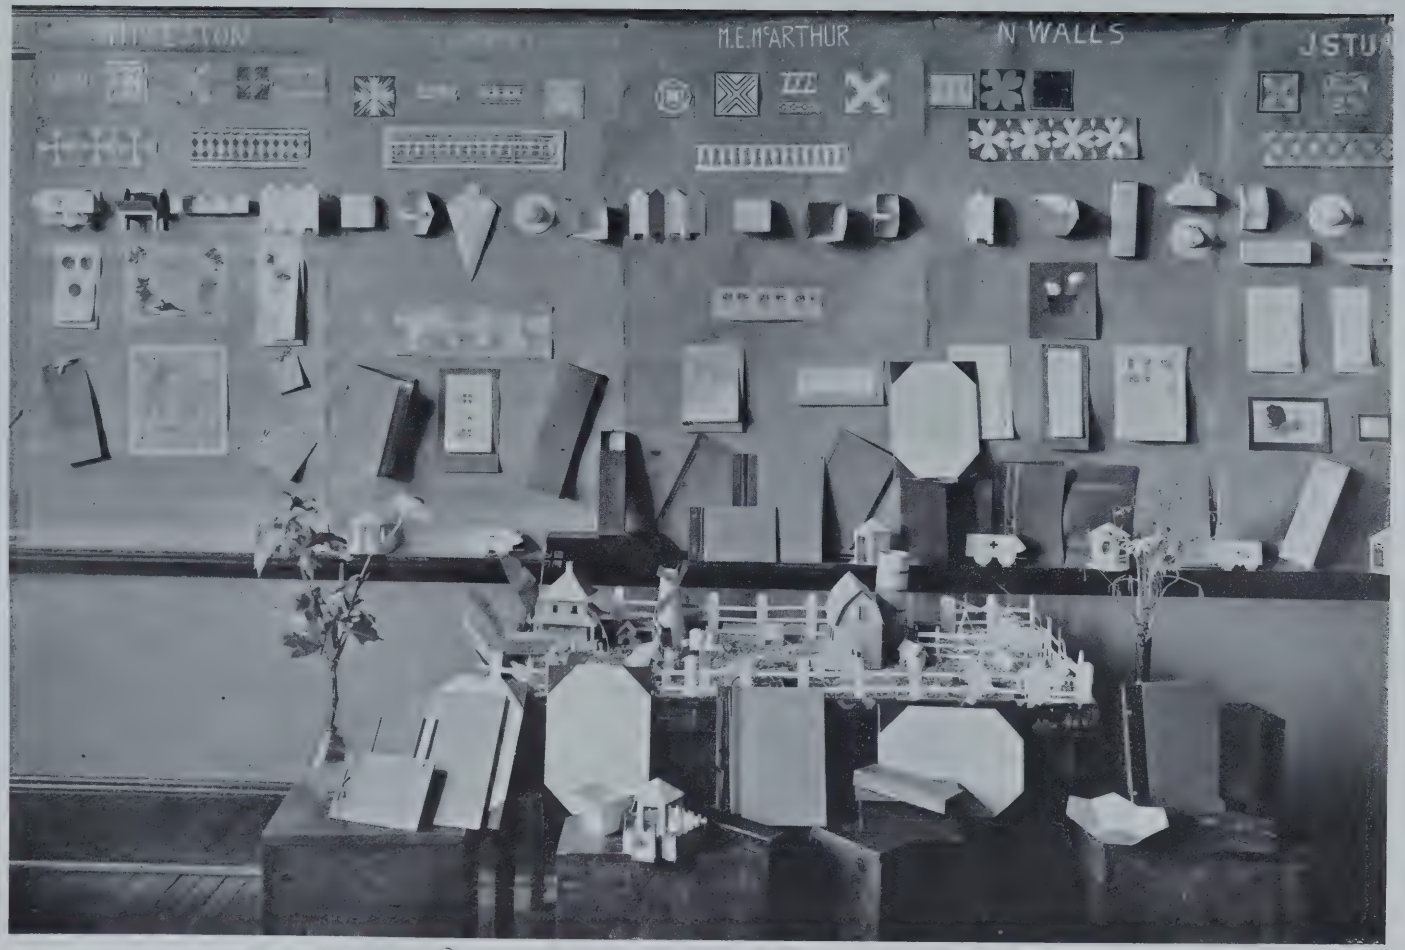
1. Knowledge and use of modulator and stave.
2. The "Doh," "Soh," and "Fah" Chords, including leaps, to syllables and lah.
3. Position of syllables on stave in Key C.
4. The various time signatures, with simple two-part, three-part, four-part, and compound six-part time.
5. Time-names, including the whole note, half-note, quarter, eighth, sixteenth, dotted quarter, and dotted eighth.
6. Formation of scale.
7. Staff Modulator Drill in all keys to syllables and alternatives to sol-faing, with key signatures.
8. Transition.
9. Chordal practice—Minor and Major Chords.
10. Ear-training in time and tune.

Section III.

Suggested Work for the Various Grades:

SENIOR AND INTERMEDIATE:

1. Voice-culture.
2. Tune—Modulator Drill.
3. Time.
4. Time and tune, including "study" songs.
5. Ear-training.
6. Theory.
7. Songs—unison and two-part.
8. Chordal training.



Scheme of work in Manual Arts, Victoria Summer School for Teachers, 1917.

Studying farm crops at first hand at the Victoria Summer School for Teachers.

A beautiful corner in the large grounds of Mrs. R. P. Butchart, Todd Inlet, where the students of the Summer School were delightfully entertained.

PRIMARY:

Rhythmic games for children.

1. Imitation exercises without music.
2. Games without music.
3. Old English games and Swedish games with song-singing.
4. Various marches and steps.

ELOCUTION.

1. The elements of elocution.
2. The voice as a musical instrument.
3. The breath.
4. Breathing and gesture exercises.
5. Nose-breathing.
6. Breath-pauses and throat-rests.
7. The breath-sounds of speech.
8. Phonation.
9. The vocal consonants.
10. The vowels.
11. Resonance.
12. Voice-production exercises.
13. Registers.
14. Flexibility.
15. Distinctness.
16. Selections for declamation.

Certificate:

At the close of the session a certificate was awarded to each student who had successfully completed the course.

Books required:

1. The School Teacher's Music Guide, by L. C. Venables.
2. Fifty Steps in Sight-singing, by Arthur Somervell.
3. Rhythmic Games and Dances for Children, by Mrs. F. Kirk.
4. Hasluck's Elements of Elocution and Gesture.

SPECIAL COURSE IN "FIRST AID TO THE INJURED" AND "HOME-NURSING."

Arrangements were made with the Canadian Branch of the St. John Ambulance Association for the giving of a special course in "First Aid to the Injured" and also one in "Home-nursing." Four large classes were formed, two in "First Aid," under Dr. M. Raynor, and two in "Home-nursing," one under Dr. W. J. Tomalin and the other under Nurse Grimmer, City School Nurse for Victoria. Three of the classes were held in the afternoons from 3 to 5, and the fourth in the evening from 7.30 to 10 o'clock. Each course called for a minimum of five two-hour periods, but in every case the instructors were able to arrange for six and in some instances seven periods. The Department met the expenses of instruction and examination, which was approximately $1 per student. Each student paid $1 to cover the cost of text-book and materials used in the course. A certificate was issued in the usual way to each student who completed the course and passed the required practical and written examinations. Following is a list of the successful candidates:—

First Aid to the Injured (Dr. Raynor).

Bell, Elizabeth M.
Bromley, Mrs. Mercy G.
Chute, Nellie V.
Drummond, Mrs. Jean S.
Finland, Edna.
Forrest, Sadie J.
Little, Helen E.
Spencer, Theodora.
Stone, Sylvia L.
Warren, Emily.
Armstrong, Francis A.
Bassett, Ivor.
Cameron, Ralph K.
Freman, Binney S.
Griffiths, Stanley J.
Harris, Henry.
Lowther, David H.
Morrison, Norman.
Moore, Samuel.
Muir, John N.
Mullin, Isador.
Summers, Gilbert S.
Sykes, William A.
Towell, Seymour.
Welch, John O.
Williams, John.

Home-nursing (Miss Grimmer).

Agar, Annie.
Anderson, Mary H.
Bell, Elizabeth M.
Bertrand, Clemence.
Bruce, E. Maude.
Clower, Gladys.
Hume, Ruby.
Hutchison, Mrs. B.
Nicholles, Clara.
Oliver, Dorothy A.
Opie, Alice M.

Home-nursing (Dr. Tomalin).

Bromley, Mrs. M. G.
Deane, Mrs. Jessie.
Doherty, Eva M.
Finland, Sadie L.
Hall, Amy V.
Johnson, Margaret.
Mercer, Ellen.
Mouat, Jessie.
McColl, Mrs. B.
MacGregor, Jean H.
McLennan, Annie.
Nowlan, Lena.
Nyman, Annie E.
Pim, Laura M.
Porter, Jessie.
Robertson, Mary.
Taylor, Mary E.
Tompkins, Ida.
Weismiller, Ethel M.
Wood, Ina V.

SCHOOL GAMES.

An attempt was made to interest the student-teachers in the practice of school games. As no regular course in physical training was offered, it was hoped that the majority of the students would avail themselves of the opportunity of learning a number of good school games, and also derive a certain amount of benefit and wholesome recreation from the practice of these games. Whilst a fair number of students did take part in these games, the majority found the time so fully occupied with the regular work of the course and the extra courses in First Aid and Home-nursing that they could not attend the practice hours for school games. It is to be hoped that a more satisfactory arrangement can be made in future to meet the needs of the students with reference to this particular part of their training.

In concluding this report, I wish to bear testimony to the splendid spirit of sympathy and co-operation which existed, not only amongst the instructors, but also amongst the student-teachers themselves. The majority of the instructors who were with us in this work in the 1917 summer school have been with us since the school was first organized, in 1914. The wide knowledge of his subject which each instructor has so clearly shown from year to year, coupled with an all-absorbing desire to make these summer courses successful, has made the management of the school a pleasure and not a mere task. I wish also to make special mention in closing of the invaluable services rendered throughout by my colleague, Mr. John Kyle, who was associated with me in the management of the school. To him and to Miss Edna Appleby, of this Department, who acted as secretary of the summer school, much credit is due for the success which attended the management of each day's work during the five weeks of the summer school.

The following are the names of the teachers who attended the summer session of 1917:—

RURAL SCIENCE COURSE.

(a.) Preliminary.

Agar, Ruth E.
Bertrand, Clemence.
Blacklock, Marion.
Bonsall, Marjorie.
Brockman, Mrs. Annie.
Bruce, E. Maude.
Cameron, Ralph K.
Cook, Dora L.
Davies, Tom L.
Debney, Dorothy F. L.
Denton, Churchill De B.
Devereaux, Gladys M.
Drader, Cecil R.
Finland, Edna E.
Freeman, Binney S.
Gray, Margaret A.
Harris, Henry.
Harris, Opie.
Heaps, Elsie F.
Herd, Isabella J.
Marriage, Frederick T.
Martin, May.
McIntosh, D. Howard.
McKenzie, Jessie M.
McKinlay, Margaret.
McManus, Glenna H.
McNeill, Chester W.
Opie, Alice M.
Paterson, Margaret B.
Richards, George E.
Scott, Margaret M.
Sisson, Richard E.
Smith, Edna M.
Smith, Hazel M.
Skelding, Cecil H.
Slater, John C.
Spencer, Theodora.
Sykes, William A.
Todd, Arthur A.
Towell, Albert S.
Wily, Mona L.
Webber, Joseph.

(b.) Advanced.

Anderson, Mary H.
Bassett, Ivor.
Bossi, Olga L.
Brett, Kathleen J.
Brundrett, Mary E.
Clarke, Theo. V.
Drummond, Mrs. Jean S.
Forsyth, Robert B.
Griffiths, Amy.
Griffiths, Stanley J.
Hutchison, Mrs. B.
Johnson, Margaret A.
Lowther, David H.
Masterton, Robert B.
Miller, Elizabeth J.
Mitchell, Morley W.
Morrison, Norman.
Murray, Paul.
Macdonald, John V.
Oliver, Dorothy A.
Porter, Jessie.
Richards, Jennie M.
Summers, Gilbert S.
Tallander, Louise J.
Tupper, James F.
Welch, John O.
Williams, John.
Wolfenden, Lena.

ART COURSE.

(a.) Preliminary.

Agar, Annie J.
Aird, Olive M.
Aldred, H. Helen.
Armstrong, Francis A.
Barton, Jessie I.
Beattie, Mrs. Anne.
Bell, Elizabeth.
Bissett, Marguerite.
Boyer, Alonzo B.
Brannick, Erroll H.
Briand, Annie.
Brundrett, Lyla I.
Cass, Eileen V.
Codd, Mrs. Sara.
Cook, Freida L.
Creeden, Elsie.
Crocker, Nellie F.
Doherty, Eva M.
Eason, Josephine B.
Forrester, Jeanie D.
Fraser, Florence J.
German, Clementina.
Girling, Richard H.
Glass, John C.
Hall, Florence E.
Hallowes, Katherine B.
Hardwick, Margaret S.
Hope, Jessie G.
Hume, Rubie M.
Irvine, Barbara E.
Irwin, Joseph.
Keatley, Sara E.
King, John.
Kittleson, Hilda.
Landells, Robert.
Lawrence, F. Kathleen.
Lettice, Edith.
Lingle, Nettie C.
Love, Mrs. Kate E.
Magee, Edna L.
Maxwell, Alexander M.
Mercer, Ellen A.
Milne, Frances R.
Moore, Francis W.
Moore, Samuel.
Morriss, May.
Muir, John N.
Mullin, Isadore M.
MacDonald, Rachel.
Macfie, Mabel T.
McIntyre, Gertrude.
MacKenzie, Margaret A.
Macleod, Belle.
Nesbitt, Dorothea.
Rowan, Bessie E.
Sargent, Beatrice H.
Sewell, Eunice A.
Sparkes, Edward.
Spragge, Phoebe.
Steeves, Greta.
Stone, Sylvia L.
Terhune, Lily M.
Thom, Elizabeth.
Tingley, A. Laura.
Traves, Myrtle L.
Warner, Mrs. Charlotte H.
Warner, Percy E.
Warren, Emily.
Williams, Myrtle E.
Wright, Gertrude C.

(b.) Advanced.

Brynjolfson, Bina H.
Calder, Thomas H.
Chute, Nellie V.
Gladstone, Margaret I.
Gulland, Emily P.
Hall, Amy V.
Hanna, Mavis V.
Huntley, Irene A.
Jenns, Ivy J.
Likeman, James.
Matheson, Vinnie J.
May, Grace J.
Stuart, Nellie M.
Wille, Annabelle E.

MANUAL TRAINING COURSE.

(a.) Manual Arts.

Bell, Ralph K.
Binney, Katherine.
Brett, Grace B.
Burns, Flora H.
Dicken, Isabel.
Dunnett, Jean E.
Monkley, Sadie B.
McArthur, Marjory E.
McKenna, Anthony J.
McLennan, Annie.
Noble, Alice L.
Nyman, Anna E.
Pim, Laura M.
Porter, Bessie B.
Preston, Margery.
Rumbely, Canterbury M.
Stewart, Ruth O.
Stiff, Louisa M.
Stuart, Jennie.
Walls, Nina.

(b.) Wood and Metal Work.

Bennett, John W.
Campbell, Archibald.
Cross, Norman Y.
Daniels, Edward G.
Green, James A.
Harris, Frederick J.
Illingworth, Charles.
Jones, Alexander W.
Marrion, Arthur H.
Michelmore, Arthur J.
Morris, Frank G.
Parker, Jacob W.
Plenderleith, William A.
Roberts, George.
Snider, William S.
Shockley, Richard H.
Smith, Alexander.
Vinall, Horace.
White, Edward M.

HOUSEHOLD ECONOMICS COURSE.

(a.) Preliminary.

Blake, Olive M.
Brash, Dorcas.
Bromley, Mrs. M. G.
Brown, Mary E.
Burnham, Lillian M.
Clower, Gladys B.
Deane, Mrs. Jessie.
Dynes, Stella E.
Ferguson, Ethel M.
Finland, Sadie L.
Forrest, Sadie J.
Fraser, Corinna C.
Ilsley, Grace B.
Little, Helen E.
Mouat, Jessie.
McColl, Mrs. Bessie.
McGregor, Jean H.
MacIntosh, Jessie M.
Newby, Evelyn B.
Nowlan, Lena M.
Robertson, Mary.
Rylett, Mary E.
Steen, Olive C.
Taylor, Mary E.
Tompkins, Ida.
Traviss, Violet.
Weismiller, Ethel M.
Wood, Ina V.

(b.) Advanced.

Fisher, Elizabeth McK.
Morrow, Maybel.
Pye, Bessie M.
Shaw, Mabel.
Spencer, Norma W.

VOCAL MUSIC AND ELOCUTION COURSE.

Beattie, Elizabeth.
Brydon, Jane D.
Buchanan, Christina.
Cathcart, Isabel.
England, Violet.
Hall, Carrie.
Keast, Ada.
King, Sibyl N.
Morrow, Mary K.
Murray, Charles R.
McKenzie, Mildred.
Nicholles, Clara L.
Robinson, Sarah A.
Service, Marion G.
Severs, Louisa.
Smith, Mabel E. L.
Watson, Violet.
White, Eva E.
Williams, Edith M.

I have, etc.,
J. W. GIBSON,
Director of Elementary Agricultural Education.

TECHNICAL EDUCATION.

REPORT OF THE ORGANIZER.

VICTORIA, B.C., October, 1917.

Alexander Robinson, Esq.,
Superintendent of Education, Victoria, B.C.

SIR,—I beg to submit the following report on night-schools and technical education generally for the year 1916-17:—

NIGHT-SCHOOLS.

Night-schools continue to be held throughout the Province in spite of much opposition from many economical citizens and City Councillors who urge retrenchment in educational work. Yielding to these unworthy importunities, little effort has been made by many School Boards to advertise the opportunities offered and to urge the advantages which would certainly accrue from the establishment of night-schools. It is mainly in consequence of this attitude that the enrolment for 1916-17 shows a regrettable decrease when compared with that of the previous year (1915-16).

In the European countries now at war retrenchment in the outlay for education is looked upon as the last step in economy. The inhabitants are realizing as never before that they are the trustees for posterity; that they are guarding the lines of communication between the present and the future. The generation to come will not discover false play until it is too late; consequently it is the duty of the people of to-day to make sacrifices before betraying posterity. The hope of the Empire depends upon the training of the rising generation in industrial efficiency and upon instilling noble ideas of public service in the minds of those who will be the men and women of the future. It is, therefore, deplorable to see men willing to barter away the educational advantages of the boys and girls in the Province of British Columbia in order to carry out a pitiful policy of retrenchment.

Notwithstanding disadvantageous conditions during 1916-17, night-schools—the university of the workers—were conducted in the following cities:—

Vancouver	1,297	students, with	31	courses provided.
Victoria	649	„	20	„
Vancouver, South	336	„	9	„
New Westminster	161	„	6	„
Nanaimo	78	„	5	„
Nelson	67	„	3	„
Rossland	103	„	3	„
Trail	107	„	3	„

In these classes continuation-school subjects—i.e., English and arithmetic—were well taught, and the increasing number of students who came directly from the day-schools promises well for the future. The necessity of encouraging pupils who are leaving day-school to continue their studies at night-school cannot be impressed too strongly upon school principals. Study comes easier to the adolescent mind, and the night-school habit is thus more likely to be contracted.

Commercial subjects—business English, arithmetic, book-keeping, typewriting, and shorthand—were almost without exception taught in an efficient manner. The commercial course in Vancouver is worthy of special mention, and the businesslike way in which the classes were conducted is commendable. The course might, for commercial reasons, be extended to embrace the Spanish and Russian languages. A class in the latter subject was successfully conducted in Victoria. French was, as in former years, well taught both in Victoria and Vancouver, great attention being paid to pronunciation and conversation.

A three-years' course in electrical engineering was well attended in Vancouver and seems to have found favour with young men engaged in that vocation. Victoria and Nanaimo had each a one-year's course in the same subject, but it is hard to understand why greater numbers are not forthcoming to study such an important branch of science. I hope to be able to report progress in those two places next year.

Classes in the principles and practice of the gasoline-engine and electric ignition for automobiles and motor-boats were well conducted in Victoria. The subject of ignition only was studied

in Vancouver. The addition of the first-mentioned class could be made to the Vancouver course with great advantage.

Dressmaking and millinery are favourite subjects and the classes are usually well attended. In dealing with dressmaking, it would seem advisable to recognize two distinct types of students—viz., the one who wishes to acquire the skill to do the mending, sewing, and dressmaking which are so necessary in the home, and the other whose ambition is to take up dressmaking as a business. For the latter person instruction should be provided in pattern-draughting, in order to secure independence of the commercial or ready-made pattern. This instruction should be supplemented by a course of lessons in colour-harmony and costume-designing. Much might be accomplished in training dressmakers if employers and night-school authorities would co-operate. It is well known that the majority of girls who go to learn dressmaking in the work-room are taught only to sew, the more important side of the training being wholly neglected.

Enthusiasm is usually a distinguishing feature in the cookery classes. The subject is one which is entitled to every encouragement, and it is invariably well treated by the instructors. I was astonished, however, to find the Vancouver class in bread-making and confectionery discontinued. This class was taught by the Inspector of Bakeries, and surely nothing is of greater moment than that a scientific knowledge of bread-making be disseminated among the people.

Vancouver bears the palm for instruction in vocal and instrumental music. At a preparatory class students are trained in reading music and in voice-production, so that they may take part in the work of the advanced class or choral society. Recitals were successfully given during the past winter.

Drawing, painting, and design, both in Victoria and Vancouver, are taught with due regard to their commercial application and use. In Vancouver a Saturday Sketch Club was also organized, at which a study of picture-painting was seriously undertaken.

The class in clay-modelling in Vancouver does work of a high character, and it is to be trusted that this body of workers, though not numerous, will be kept together, as the future of the class is already well assured. It is regrettable that little is done to encourage the kindred art crafts of needlework, metalwork, and wood-carving. These have been dropped from the Vancouver night-school scheme entirely. There is no class for instruction in woodwork and none for the study of chemistry and physics.

Last year a small group of men was enrolled in Nanaimo to study the theory of coal-mining, the Ladysmith class failing to materialize owing to the difficulty of obtaining the services of an instructor. In this connection I may remark that we are out of touch with the young men of from sixteen to twenty years of age in the mining districts referred to. The shift system of work appears to militate against regular attendance at class, and it would seem desirable to have an instructor who is at liberty during the day. His time could be employed in a valuable way as the teacher of a kind of prevocational class for young men who have left school with a meagre education. Now that labour troubles on Vancouver Island seem settled, the present would be an opportune time to encourage such a step. The benefits which would accrue to the community would, I believe, be inestimable.

In the coal districts of Michel and Coal Creek the classes were discontinued owing to labour troubles. In Fernie, Grand Forks, Greenwood, and Phoenix the school trustees still continue to deny the people of their respective cities the additional educational advantages which in these days are so much needed. When these bodies will decide to take the lead in encouraging their youthful fellow-citizens to continue their education at night-schools remains to be seen, but I sincerely hope they will soon come under the quickening influence of the spirit of the times.

In the metalliferous districts of Rossland and Trail much evidence of interest in the work of night-schools has been shown. There are great possibilities in the two cities; men with the required knowledge as instructors have willingly come forward to act in such a capacity.

The men and women who teach in the night-schools of the Province deserve the highest commendation for the way they persist in their good work. An ever-increasing number show a sincere interest in the training of the young workers as well as in the lives of those who come searching for that knowledge, the want of which they have felt in their working experience.

MANUAL TRAINING AND DOMESTIC SCIENCE.

Manual-training and domestic-science centres continue to increase, the following being a list of places where the work was in progress:—

Twelve cities: Armstrong, Chilliwack, Cranbrook, Kelowna, Nanaimo, New Westminster, Nelson, Prince Rupert, Vancouver, North Vancouver, Vernon, and Victoria.

Twelve municipalities Burnaby, Chilliwack, Delta, Esquimalt, Maple Ridge, Mission, Oak Bay, Penticton, Point Grey, Richmond, Saanich, and South Vancouver.

In these places there were the following:—

61 manual-training centres.
46 instructors of manual training.
6,972 students from elementary schools.
836 students from high schools.
45 domestic-science centres.
33 instructors of domestic science.
4,374 students from elementary schools.
1,145 students from high schools.

The manual work taught in the manual-training centres throughout the Province is treated from a sound educational standpoint, and instructors are recognizing more and more that the educational value of a project may be increased by its usefulness. Greater care and attention might be given to the condition of the tools, and the fact that the lead-pencil is one of them should not be lost sight of. The results from the use of the latter should show skill both of hand and eye.

It is to be regretted that models good in proportion and workmanship are not always to be seen on the walls of the manual-training workshops. The aim which some of the instructors have of making a natural-history collection should be universal. The workshop should be an educational centre where the eye will find much of interest and where the boy may absorb knowledge on all sides. I would suggest that the working drawings for the three-year course of manual instruction should always be kept together in one portfolio in order that progress throughout the course may be judged and the amount of improvement noted. This is done in Vancouver and should be followed elsewhere. A retrograde step in the city just named was made when the supervisor of manual training was required to devote his time entirely to teaching. Co-ordination and success in manual work demand the appointment of some one who will have time for supervision.

The suggestion made last year of training intelligent craftsmen to qualify as educational hand-work instructors materialized in the organization of a class at the 1917 summer school held in Victoria. This class proved remarkably successful, and at a course of five weeks' training the educational point of view was emphasized to great advantage in the teaching of wood and metal work. A fear has been expressed by the men who are already qualified as instructors that the Department of Education might by this action flood the schools with a supply of half-trained artisans who would ruin the good work which has already been accomplished in the Province. In order to allay such a fear I may state that only four permanent certificates have been awarded as the result of finishing the summer-school course, and these were given to men who had been engaged in teaching and who had successfully conducted classes for the past two years. The summer-school course must be regarded as the introduction to a more advanced treatment of the subject, a course which most of the candidates will be asked to attend. No permanent certificate will be granted unless the men have scholarship and a natural aptitude for teaching. On the other hand, the professional mannerisms in the use and care of tools and the professional standards of craftmanship which these artisans bring to the manual-training workshops are distinct assets in their favour. It has been urged that a similar course might with advantage be organized for the training of domestic-science teachers, and I am firmly convinced that such an opportunity would meet with favour if conducted on the lines of the training class for manual-training instructors.

Domestic-science subjects are well taught throughout the Province, and great advancement has been made in sewing and knitting. Considerable attention has also been paid to economical cookery, as well as to the canning and preserving of fruit, vegetables, and fish. The necessity for such knowledge has been amply demonstrated by the war. Teachers adopt many different methods of attacking the lessons in domestic-science centres, but they all practise those which are more or less scientific in character and discard those of a purely empirical nature. The appointment of a teacher to give lessons in household science and sewing to the student-teachers attending Normal School in Vancouver would seem necessary in order to prepare class-room

teachers who could conduct the work of sewing without the aid of a specialist, as well as to correlate the theoretical lessons of the class-room with those practical lessons given in the domestic-science centres. This instruction is already given to great advantage in the Normal School at Victoria.

HIGH SCHOOL SCIENCE COURSE.

Before closing my report I should like to touch on a departure from the regular curriculum which has been made in King Edward High School, Vancouver. This encroachment on the province of Mr. DeLong, Inspector of High Schools, is made with his permission, and is alluded to because of its close association with the work of technical education and with the establishment of a technical school in the near future.

In the school above referred to a science course has been introduced for boys. The subjects taught embrace the following: English grammar, composition, and literature; business forms and usages; Latin; practical mathematics; drawing; mechanics and physics; shop-work in wood and metal. The aim of those who originated this course is to begin in the first year of high school the study of those subjects which will be of most service to the boy who is going to work as an artisan or craftsman, thus emphasizing the study of English, practical mathematics, mechanics, physics, drawing, and shopwork experience. Preparation for the University Matriculation Examination, however, necessitates a knowledge of two languages, English being counted as one. The second language which the boys attending the science course have the privilege of studying is Latin, but the time spent on this subject in the first and second years is considerably shorter than that usually required for boys taking the ordinary high-school course. It is expected that in the third year the students who desire to go to the University will put sufficient emphasis on the subject to pass the Matriculation Examination. Those third-year students, however, who have no intention of attending University will throw all their energy on English, science, and workshop experience. In these circumstances it might be wise to give considerably bias during the short lessons of the first two years to the study, *inter alia*, of Latin roots, prefixes, and suffixes.

Physics is well taught in this science course, and the system employed avoids plunging the students at once into a world of abstract symbols and definitions. Text-books are discarded in the first year, thus permitting the precedence of a realistic treatment of the subject. The advantage of this method is expected to be seen in the second and third years, when the students will exhibit a greater zest and increased desire for a continuance of the subject. The fundamental subjects of draughtsmanship, development of surfaces, and practical mathematics, which are so valuable in all industrial work, are well taught. Practical work in wood and metal is undertaken, and the students construct all experimental apparatus required for the study of physics and mechanics. It is intended to balance the technical course, just described, by a household-science course for girls, one which will give a distinct bias towards the science and art of home-making, and will at the same time lay the foundation of those studies required by student-teachers in the Normal School. This course will therefore include the subjects of English, arithmetic, sewing, cooking, art, music, and physical culture.

JUNIOR TECHNICAL CLASSES.

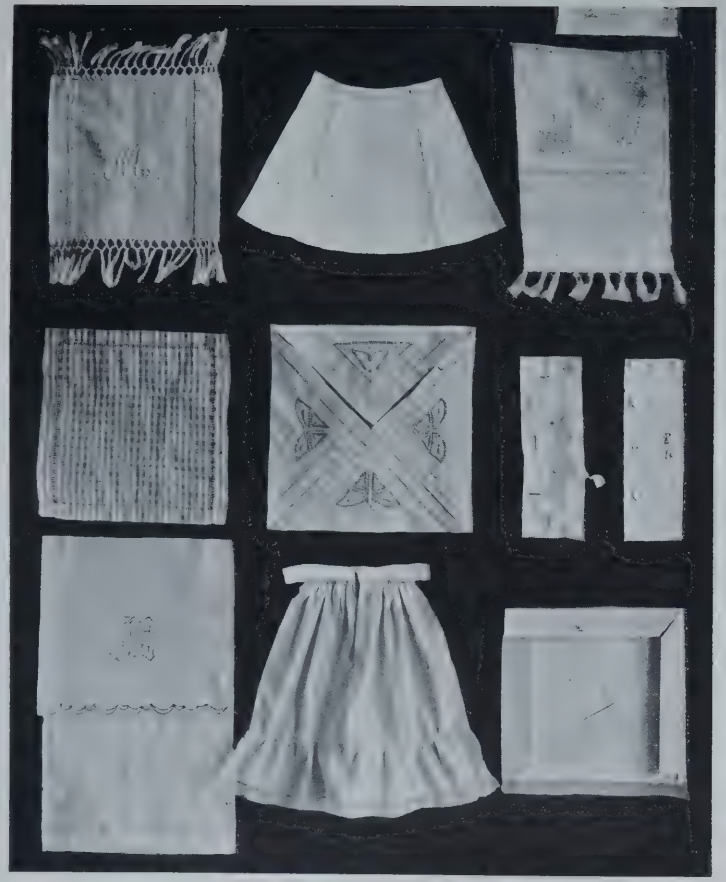
Nothing has been done to meet the demands of a group of boys and girls in the elementary schools who have reached the age of fourteen and over, and yet have not been promoted to the high-school entrance class. As it is for the good of the country that these students receive special attention, it is to be hoped that school trustees in the larger centres will take steps to arrange classes for their benefit. These might be termed "junior technical classes," the name suggesting the first step towards the senior technical school, a goal to which it would be wise to direct the pupils.

To this projected technical school the graduates from the high-school technical course, the household-science course, and the junior technical class would ultimately repair for the advanced study which would doubtless prove inspiring and helpful to them in after-life. The time is thus nearly ripe for making arrangements for the establishing of technical schools. The students will undoubtedly be forthcoming, and the conditions of the times, notwithstanding the financial stringency, make a move in the direction suggested of the utmost importance.

I have, etc.,

JOHN KYLE,

Organizer of Technical Education.



Scheme of work in sewing as carried out in the elementary schools of South Vancouver.

Scheme of work in sewing as carried out in the elementary schools of Point Grey Municipality.

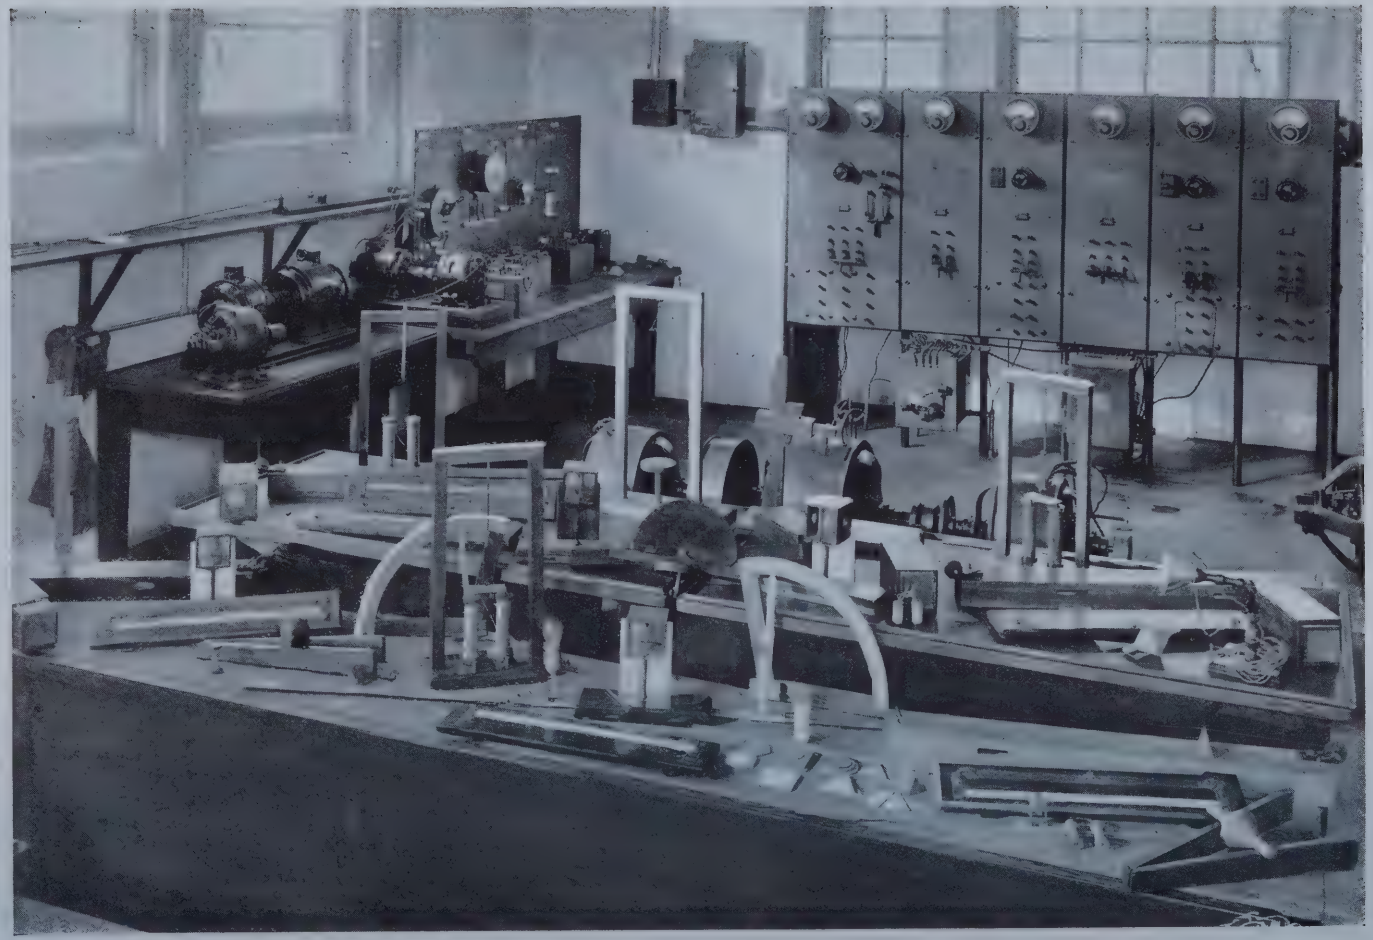
Simple manual-training equipment in use.

Simple domestic-science equipment in use.

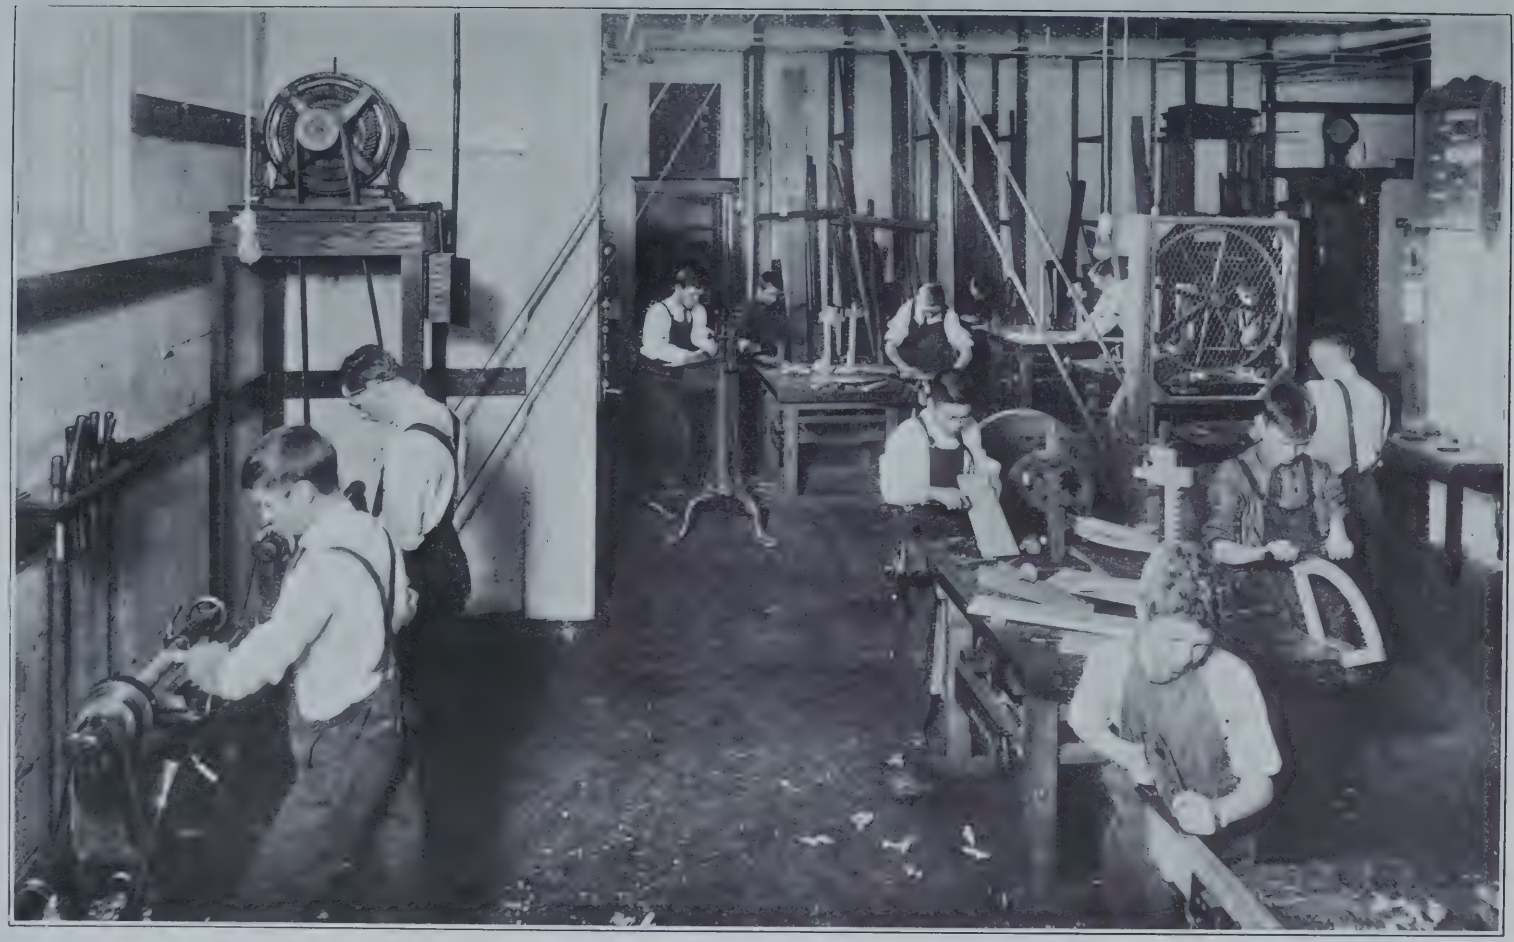
Domestic-science equipment for rural-school work. Cost, $50.

Girls of the Home Economics Course, King Edward High School, Vancouver.

Girls of the Home Economics Course, King Edward High School, Vancouver.



Equipment in foreground made and used by boys of the Science Course, King Edward High School, Vancouver.



King Edward High School. Technical class in wood-working room.

King Edward High School. Technical class in wood-working room.

King Edward High School. Technical class in metal-working room.

King Edward High School. Technical class in electrical laboratory.

Honour Roll, 9 feet 6 inches by 7 feet. Made by the boys of the High School Manual Training class and erected in the City Hall, Armstrong.

FREE TEXT-BOOK BRANCH.

ANNUAL REPORT.

EDUCATION DEPARTMENT, FREE TEXT-BOOK BRANCH,
VICTORIA, B.C., November, 1917.

Alexander Robinson, Esq.,
Superintendent of Education, Victoria, B.C.

SIR,—I beg to submit the following report on the work of the Free Text-book Branch for the school-year ending June 30th, 1917:—

RETURNS FOR 1916-17.

All the annual reports of free text-books for 1916-17, with fifteen exceptions, are now on file. Included in the latter are those of four schools which were closed during the year, those of two which were not reopened in August, 1916 (although supplied with books), and that of one which lost both records and books by fire in January, 1917. The returns on file (859 in number) were prepared in most instances with commendable care, but, on the whole, the standard of 1915-16 was not reached. It has been found that free text-book records also suffer when there has been a change of teacher in any school during the year—and many changes of this kind occurred in 1916-17. It is certainly incumbent upon teachers who resign their positions before the close of the school-year to leave the free text-book records (Stock Account and Pupils' Account) in such a condition that their successors will have no difficulty whatever in determining not only how many books have been received, but to whom they have been issued and when.

Under this head, the attention of teachers and particularly of principals is directed to the matter of library books issued to their schools, such as: Syllabus of Physical Exercises; Canadian Civics; Teaching Writing, Books 1-4; World Relations and the Continents; Children's Story of the War; Supplementary Readers (free text-books); Essentials of Health (retained for the library in common and graded schools); The Rhodes Scholarships; Flora of Southern British Columbia; and Teacher's Handbook to Beginner's Reader. A *complete return* of all such books issued to any school is required to be made in annual report. In many instances this was not done, no account having been taken of the library books in the hands of assistant teachers. At the close of the school-year all books of this kind issued at any time by the principal to his assistants should be brought back by them to the library, so that a *complete return* of *library books* may be made in annual report.

In addition to the number of books given to pupils during the year and duly recorded in Pupils' Account of Teacher's Record as per "giving" plan in operation since 1912, the annual returns state the number sold to the pupils at night-schools or to those pupils who are required to replace lost or destroyed texts, the number missing from the general stock or destroyed for any valid reason, as well as how many of the books in reserve stock are in good condition and fit to be issued this year. The following summaries of (1) "Books Given," (2) "Books Sold to Pupils," (3) "Books Missing or Destroyed," and (4) "Reserve Stock in Good Condition" have been compiled from the 859 annual reports for 1916-17 now on file:—

(1.) *Books Given.*—17,309 Primer (B.C. Beginner's Reader as First Primer and B.C. Phonic Primer as Second Primer); 38,511 Reader (B.C. First Reader, B.C. Second Reader, B.C. Third Reader, N.C. Third Reader, N.C. Fourth Reader, N.C. Fifth Reader); 19,284 Arithmetic (First, Second, Third); 9,197 Spelling Book; 44 Essentials of Health; 5,924 How to be Healthy; 5,793 Elementary Agriculture and Nature Study; 1,896 Latin Lessons; 8,165 First Steps in English; 5,979 History of Canada; 5,923 Public School Grammar; 148 Canadian Civics; 361 World Relations and the Continents; 78 Heart of Oak Books, Book One; 218 Art-Literature, a Primer; 199 Art-Literature, Book One; 234 Art-Literature, Book Two; 209 Progressive Road to Reading, Book 3A; 357 Teacher's Handbook to Beginner's Reader; 77 Teaching Writing, Books 1-4; 76 Syllabus of Physical Exercises.

NOTE.—Canadian Civics, World Relations, Supplementary Readers (Heart of Oak Books, etc.), Handbook to Beginner's Reader, Teaching Writing, and Syllabus of Physical Exercises were given to Normal School students.

(2.) *Books Sold to Pupils.*—17 B.C. Beginner's Reader; 12 B.C. Phonic Primer; 8 B.C. First Reader; 32 B.C. Second Reader; 34 B.C. Third Reader; 4 B.C. Fourth Reader; 30 N.C. Third Reader; 30 N.C. Fourth Reader; 3 First Arithmetic; 9 Second Arithmetic; 21 Third Arithmetic; 14 Universal Spelling Book; 1 Essentials of Health; 3 Latin Lessons; 21 Public School Grammar; 19 Drawing Book; 12 Writing Book.

NOTE.—The sums received on account of sale of these books are partly included in first amount mentioned later on in this report under the head of "Supplies Issued"—viz., $1,271.72. All sums from this source on account of 1916-17 received after July 1st, 1917, will appear in report for current school-year.

(3.) *Books Destroyed.*—41 B.C. Beginner's Reader; 646 B.C. Phonic Primer; 32 B.C. First Reader; 17 B.C. Second Reader; 9 B.C. Third Reader; 15 B.C. Fourth Reader; 36 N.C. Third Reader; 18 N.C. Fourth Reader; 8 Fifth Reader; 18 First Arithmetic; 25 Second Arithmetic; 45 Third Arithmetic; 21 Universal Spelling Book; 43 Essentials of Health; 13 How to be Healthy; 10 Elementary Agriculture and Nature Study; 1 Latin Lessons; 16 First Steps in English; 20 Canadian History; 16 Public School Grammar; 6 Canadian Civics; 21 World Relations and the Continents; 3 Physical Exercises; 1 Rhodes Scholarships; 2 Flora of Southern British Columbia.

NOTE.—No. 3 is necessarily incomplete, as during the year three large school-houses accommodating four schools were burned, with the loss of both records and books. Partial returns only were supplied by three of these schools, while the fourth made no report.

(4.) *Reserve Stock in Good Condition.*—6,284 Primer (B.C. Beginner's Reader and B.C. Phonic Primer); 7,449 Reader (B.C. First Reader, B.C. Second Reader, B.C. Third Reader, N.C. Third Reader, N.C. Fourth Reader, and N.C. Fifth Reader); 6,096 Arithmetic (First, Second, Third); 1,751 Universal Spelling Book; 1,687 How to be Healthy; 1,823 Elementary Agriculture and Nature Study; 524 Latin Lessons; 1,712 First Steps in English; 1,545 Canadian History; 1,765 Public School Grammar.

The reserve stock of bound books for the use of pupils at the various public schools of the Province on June 30th, 1917, summarized under (4) has already been utilized in supplying these schools for the present term (1917-18). The printed form of requisition for free text-books which is required to be used on all occasions (for reasons set forth in Circular of Instructions for preparing free text-book orders) contains a column for the respective numbers of all books in reserve as well as for the respective numbers ordered. There is a third column in requisition form for the respective number of promotions to the various classes—an important return which is only too liable to be overlooked for some unaccountable reason by the makers of requisitions. All the information called for by the printed form of requisition is required to be given. Notwithstanding the full instructions supplied, it was necessary to return for completion or explanation some 163 of the 2,018 public-school requisitions presented during 1916-17. Although this number represents but a little over 8 per cent. of the total number of public-school requisitions dealt with during 1916-17, yet it is not as good a record as that made in 1915-16. Much annoyance as well as unnecessary delay can always be avoided by a little care on the part of the framers of requisitions for free text-books.

SUPPLIES ISSUED.

The number of public schools (common, graded, superior, high, etc.) furnished with supplies of some kind during 1916-17 was 864, or 29 more than in 1915-16. The list is as follows: 2 Provincial Normal Schools (Vancouver and Victoria), Model School (attached to Provincial Normal School, Victoria), Boys' Provincial Industrial School, Girls' Provincial Industrial School, 513 rural schools, 192 rural municipality schools, 95 city schools, 41 high schools, 15 superior schools, and 3 night-schools. Requisitions to the number of 2,018 were required to be filled in order to meet the needs of these schools. This called for the shipment to all parts of the Province of 1,090 cases and 1,520 parcels, the total weight of which was 181,397 lb. During the year's transactions, but one package of books was lost in transit. Duly signed receipts for all these shipments (2,017) are now on file at the Free Text-book Branch. Before this number (2,017) came to hand duly signed, 358 requests for the return of receipts had been addressed to the Secretaries of School Boards, 122 copies of receipts supplied, and 22 receipts returned to Secretaries for signature. Reference was made in last report to like experiences for 1915-16 and preceding years. The year under review has shown but little change in the matter of business promptitude on the part of school officials.

In addition to the 2,018 requisitions which were filled in order to meet the needs of the public schools in 1916-17, the Free Text-book Branch honoured 341 requisitions for departmental purposes and for those who required to purchase school supplies. These orders added 34 cases and 351 parcels (weighing in all some 4,219 lb.) to the list of shipments for the year. The sum of $1,271.72 was received under this head and from month to month paid into the Provincial Treasury. It must be added that the amount just stated also includes in part sums received for "Books Sold to Pupils" during 1916-17.

The total number of free text-books, etc., issued during 1916-17 to the public schools of the Province was as follows: 10,773 B.C. Beginner's Reader; 451 Teacher's Handbook to Beginner's Reader; 5,652 B.C. Phonic Primer; 9,179 B.C. First Reader; 10,704 B.C. Second Reader; 12 N.C. Second Reader; 11,725 B.C. Third Reader; 74 N.C. Third Reader; 7,242 B.C. Fourth Reader; 88 N.C. Fourth Reader; 2,436 N.C. Fifth Reader; 7,785 First Arithmetic; 7,351 Second Arithmetic; 4,674 Third Arithmetic; 14,511 New Method Writing Pad No. 1; 8,458 New Method Writing Pad No. 2; 70,724 Writing Book; 53,322 Drawing Book; 2,120 Supplementary Reader (Heart of Oak Books, Book One; Art-Literature Reader, a Primer; Art-Literature Reader, Book One; Art-Literature Reader, Book Two; Progressive Road to Reading, Book 3A); 9,071 Universal Spelling Book; 115 Essentials of Health; 6,045 How to be Healthy; 5,924 Elementary Agriculture and Nature Study; 2,201 Latin Lessons; 8,202 First Steps in English; 145 Canadian Civics; 120 Syllabus of Physical Exercises; 418 World Relations and the Continents; 6,038 History of Canada; 116 Teaching Writing, Books 1-4; 6,101 Public School Grammar; 7 Girls' Home Manual; 1 Rhodes Scholarships; 58 Flora of Southern British Columbia; 261,030 sheets Drawing Paper; 135 Union Jack; 53 Children's Story of the War, Nos. 1-6; 52 Children's Story of the War, Nos. 7-9; 51 Children's Story of the War, Nos. 10-12; 1,433 Children's Story of the War, Nos. 13-15; 1,548 Children's Story of the War, Nos. 16-18; 1,333 Children's Story of the War, Nos. 19-21; 1,334 Children's Story of the War, Nos. 22-24; 1,988 "Scrap of Paper"; 33 Globe; 36 Map of British Isles; 48 Map of Dominion of Canada; 38 Map of World; 37 Map of North America; 34 Map of British Columbia.

At the prevailing retail prices the books and other supplies issued by the Free Text-book Branch to the 864 common and other schools already mentioned would have cost the large sum of $77,053.58.

Expenditure.

The total expenditure of the Free Text-book Branch for 1916-17 was made up as follows:—

Text-books, etc.	$37,341 59
Freight and drayage	2,721 91
Distribution (freight, boxes, cartage, etc.)	2,449 00
Salaries of staff	5,040 00
Temporary assistance	558 75
	$48,111 25

As already stated, the Free Text-book Branch distributed during the past school-year text-books and other supplies which would have cost parents and School Boards $77,053.58. To purchase and distribute these among the various schools of the Province through the Free Text-book Branch required an expenditure of $57,403.43, the items of which are as follows:—

Text-books, etc. (laid-down cost)	$49,356 18
Distribution (freight, boxes, etc.)	2,449 00
Salaries of staff	5,040 00
Temporary assistance	558 25
	$57,403 43

The profit on the year's transactions is, therefore, $19,650.15.

Free Text-books in Use.

The practice of addressing a printed inquiry to teachers about the free text-book system as applied in their schools was continued in 1916-17. The list of questions was the same as that adopted for 1915-16.

In due time, practically all the replies (some 850) came to hand and proved in the majority of instances to be quite satisfactory. It was necessary, however, in the case of 119 replies (or

14 per cent. of the total number), again to communicate with the makers. As in former years, important questions had been left unanswered; records were not available, or were incorrect, or had been neglected by former teachers; incorrect views were held as to the operation of the "giving" plan, which provides free of charge for each pupil but one copy of the same kind of bound book; and free texts prescribed for Senior Grade only had been issued to Intermediate Grade pupils. Of the last-named error, 22 cases were reported in 1915-16, but 11 only for the year under consideration. All important errors revealed by the various replies were promptly reported, as in former years, to the several School Inspectors concerned.

ACCOMMODATION FOR FREE TEXT-BOOKS.

In each annual report of free text-books a description is required to be given of the book-case or book-cases provided by the School Board (as per agreement with the Education Department) for the accommodation of all free text-books and school supplies furnished by that Department. The circular forwarded with annual report blanks states that by a book-case is meant a suitable receptacle for books which can be locked, and that simple shelves for books should not be described as a book-case. Many of the annual reports for 1916-17 show that School Boards have not yet, according to the definition of book-case given above, fulfilled agreement entered into when they accepted the free text-book system. The Education Department, therefore, directed the Free Text-book Branch in October of the current school-year to request the Inspectors of Schools to make during their tours of inspection a careful examination of the free text-book accommodation, and in case it was not satisfactory in any instance to notify the offending School Board accordingly, and to state that unless agreement already entered into is carried out further supplies of free text-books will be withheld until such time as suitable book-case is provided.

NIGHT-SCHOOLS.

Of the night-schools in operation during the past school-year, 3 were supplied with books of some kind by the Free Text-book Branch.

Although the "giving" plan of dealing with free text-books has been adopted in the day-schools, yet the Education Department found it advisable to continue the "lending" plan in the case of night-schools. The books issued to pupils may, however, be purchased by them at the prices stated in official price-list; otherwise they are not allowed to be taken away from the class-room. Teachers, in order to guard against the loss of free text-books loaned to night-school pupils, have required a deposit at the opening of the term equal to the value of the books supplied. At the close of the term this deposit is returned to the pupil on receipt of all the books issued to him.

It has been found necessary again to direct the attention of night-school principals and teachers to the preceding paragraph, which appeared in the report of 1914-15 as well as in that of 1915-16.

FREE TEXT-BOOKS FOR RETURNED SOLDIERS.

During 1916-17 free text-books were issued by direction of the Education Department for the use of classes conducted at the following institutions for the retraining of returned soldiers: Esquimalt and Resthaven Convalescent Homes, and Sunnyside and Tranquille Sanatoria. The requisitions under which free text-books were issued for this purpose are included in the list of those honoured for departmental purposes, etc., as referred to under "Supplies Issued."

NEW PRICE-LIST.

The attention of all concerned is directed to the new price-list (revised June 1st, 1917). At the prices given therein teachers are authorized as before to supply from the reserve stock (if any) second copies of free text-books to pupils who may require to replace lost or destroyed texts. It must be noted, however, that these prices do not include postage or express charges in case purchases are made directly from the Free Text-book Branch. In some instances the prices of books have been slightly increased, but this has been done only when the publishers' prices have also been advanced. Copies of revised price-lists were on November 8th, 1917, mailed to all teachers and principals throughout the Province.

How and when to order Monthly Report Forms.

Among the activities of the Free Text-book Branch is that of supplying teachers with report forms, both monthly and annual. The latter are issued at stated intervals, but the former chiefly on application. Now monthly report forms are of two kinds—viz., monthly reports of attendance and monthly reports to parents. Of the latter again there are two kinds, those for the summer term (August to December) and those for the winter term (January to June). It is somewhat embarrassing, then, to be confronted from time to time with requests for "some monthly report forms." The applicants must either be requested to state their needs more definitely or a supply of each kind must be issued. As a rule the Free Text-book Branch, though at some inconvenience, has chosen the former course. It is hoped that by thus pointing out the need of a definite order for monthly report forms those concerned will be governed accordingly. Further, the increasing scarcity of paper justifies the request that only a term's supply of monthly reports to parents be ordered by teachers at one time, and then according to the enrolment of the school; that is, so many report cards and not so many pads. In order to effect an additional economy, requests for monthly report forms might well be submitted with or included in free text-book requisitions.

I have, etc.,
DAVID WILSON,
Officer in Charge.

THE STRATHCONA TRUST.

Report of the Secretary, Local Committee, Strathcona Trust, for the Province of British Columbia, for the School-year 1916-17.

VICTORIA, B.C., November 7th, 1917.

INSTRUCTION OF TEACHERS IN PHYSICAL TRAINING, 1916-17.

During the past year 247 physical-training certificates, Grade B (Strathcona Trust Syllabus), were granted to prospective teachers in attendance at the Provincial Normal Schools at Vancouver and Victoria. Since 1910 (the year in which British Columbia accepted the conditions of the Strathcona Trust, and thus pledged itself to include in the regular curriculum of the schools under its control instruction in physical training for all children of both sexes in attendance) about 2,405 teachers and prospective teachers have qualified as physical-training instructors.

PHYSICAL TRAINING, 1916-17.

The list of Strathcona Trust prizes for excellence in physical training for the school-year 1916-17 is as follows:—

High Schools.

(J. B. DeLong, B.A., Inspector.)

1st Prize—H. P. Hope, B.A., 1st Division, Oak Bay High School.
2nd Prize—Miss I. Tompkins, B.A., 2nd Division, Armstrong High School.
3rd Prize—Miss B. Macdonald, B.A., 3rd Division, Nanaimo High School.

1st prize, $24; 2nd prize, $21; 3rd prize, $18; amount expended under this head for 1916-17, $63.

Common and Graded Schools.

Inspectorate No. 1 (W. H. M. May, Inspector)—
1st Prize—Miss N. McKillican, 2nd Division, Victoria Boys' School.
2nd Prize—Miss G. N. Hewlings, B.A., Tillicum Road School.
3rd Prize—Miss S. A. Robinson, 3rd Division, Victoria Girls' School.

Inspectorate No. 2 (G. H. Deane, Acting-Inspector)—
1st Prize—Miss A. W. Johnson, 8th Division, Esquimalt Central School.
2nd Prize—Miss J. E. Robertson, 4th Division, Cumberland Central School.
3rd Prize—Miss M. V. Colbert, Somenos Station School.

Inspectorate No. 3, Division 1 (L. J. Bruce, Inspector)—
1st Prize—Miss E. L. Roberts, 5th Division, Model School, Vancouver.
2nd Prize—Miss A. Spencer, 3rd Division, Model School, Vancouver.
3rd Prize—Miss A. M. Stiven, 4th Division, Lord Tennyson School, Vancouver.

Inspectorate No. 3, Division 2 (J. D. Gillis, Inspector)—
1st Prize—Miss E. C. Matheson, 5th Division, Strathcona School, Vancouver.
2nd Prize—Miss F. Mulloy, 2nd Division, Eburne School, Point Grey.
3rd Prize—Mrs. J. M. H. Harding, 4th Division, Lord Roberts School, Vancouver.

Inspectorate No. 3, Division 3 (J. T. Pollock, Inspector)—
1st Prize—Miss A. R. Rines, 4th Division, Lord Nelson School, Vancouver.
2nd Prize—Miss M. A. Gray, 1st Division, Kingsway East School, Burnaby.
3rd Prize—Mrs. S. Bermingham, B.A., 4th Division, Laura Secord School, Vancouver.

Inspectorate No. 4 (V. L. Denton, B.A., Inspector)—
1st Prize—A. E. C. Martin, B.Sc., 1st Division, Carleton School, South Vancouver.
2nd Prize—Miss L. B. Clarke, 4th Division, Tecumseh School, South Vancouver.
3rd Prize—Miss C. J. Holden, 5th Division, Richard McBride School, South Vancouver.

Inspectorate No. 5 (L. J. Bruce, Acting-Inspector)—
1st Prize—Miss M. N. S. Johnston, 2nd Division, Port Moody Central School.
2nd Prize—Miss E. M. McAdam, 7th Division, Queen Mary School, North Vancouver.
3rd Prize—Miss F. A. Wilkinson, 4th Division, Queen Mary School, North Vancouver.
Inspectorate No. 6 (G. H. Gower, M.A., Inspector)—
1st Prize—W. T. Fennell, 1st Division, Herbert Spencer School, New Westminster.
2nd Prize—W. H. Gray, 2nd Division, John Robson School, New Westminster.
3rd Prize—Miss J. F. Rowan, 1st Division, Lord Kelvin School, New Westminster.
Inspectorate No. 7 (A. E. Miller, Inspector)—
1st Prize—Miss H. McEwen, 5th Division, Grand Forks Central School.
2nd Prize—R. C. Warden, 1st Division, Nakusp School.
3rd Prize—A. Cullen, Deer Park School.
Inspectorate No. 8 (John Martin, Inspector)—
1st Prize—W. E. Graham, 4th Division, Kamloops Central School.
2nd Prize—Miss F. E. Mercer, 2nd Division, Hope School.
3rd Prize—Miss C. Hayes, 2nd Division, Notch Hill School.
Inspectorate No. 9 (A. Anstey, B.A., Inspector)—
1st Prize—J. Gordon, M.A., 1st Division, Kelowna Central School.
2nd Prize—Miss I. R. Hartinger, 3rd Division, Penticton Central School.
3rd Prize—Miss D. Magowen, Mabel Lake School.
Inspectorate No. 10 (A. J. Dove, M.A., Inspector)—
1st Prize—Miss P. Maxwell, 8th Division, Fernie Central School.
2nd Prize—Miss B. M. Pye, 6th Division, Cranbrook Central School.
3rd Prize—Miss P. G. Whitebread, Balfour School.
Inspectorate No. 11 (A. R. Lord, B.A., Inspector)—
1st Prize—Miss B. Brynjolfson, 2nd Division, Prince George School.
2nd Prize—A. A. Todd, Dunster School.
3rd Prize—Miss M. B. Wade, 2nd Division, Fort George School.

1st prize, $12; 2nd prize, $9; 3rd prize, $7; amount expended under this head for 1916-17, $361. As the Tillicum Road School in Inspectorate No. 1 was discontinued on June 30th, 1917, one-third of 2nd prize awarded to it reverted to the general fund of the Local Committee.

Physical Training, 1917-18.

The terms of the competition for physical-training prizes, 1917-18, have already been announced by circular to all the public-school teachers of the Province. They are similar to the terms for 1916-17. For competition among the high and superior schools the sum of $54 has been set aside, while the sum of $360 (or $30 for each inspectorial district) has been made available for prizes in the common and graded schools. As before, the teacher to whom an award is made shall be entitled to two-thirds of the prize, the other third to be expended for a picture or some piece of apparatus (suitably inscribed) for the room in which it was won. Only those teachers who are the holders of physical-training certificates granted under the Strathcona Trust are eligible to compete.

Military Drill, 1916-17.

At the close of the year 1916-17, fifty-one of fifty-six active cadet corps connected with the public schools presented themselves for inspection; the remaining five corps were not inspected owing to the lack of instructors. The total number of cadets present at the annual inspection, 1916-17, was 2,479 (or 229 more than in 1915-16 and 479 more than in 1914-15). The comparative rank then awarded by the Inspecting Officer is as follows:—

Corps.	Marks.
Esquimalt, No. 349	95
Macdonald (Vancouver), 101st Battalion	95
Lord Nelson (Vancouver), 101st Battalion	94
Henry Hudson (Vancouver), 101st Battalion	92
Sir James Douglas (Victoria), No. 632	92
Lord Tennyson (Vancouver), 101st Battalion	90
General Gordon (Vancouver), 101st Battalion	89

Corps.	Marks.
Kaslo, No. 360	88
Duke of Connaught (New Westminster High School), No. 530	88
Cecil Rhodes (Vancouver), 101st Battalion	88
Kitsilano (Vancouver), 101st Battalion	85
George Jay (Victoria), No. 609	83
Simon Fraser (Vancouver), 101st Battalion	82
Franklin (Vancouver), 101st Battalion	82
Britannia High School (Vancouver), 101st Battalion	81
Victoria High School, No. 112	81
Cowichan Valley, No. 429	81
Alexandra (Vancouver), 101st Battalion	81
Model School (Vancouver), 101st Battalion	80
Charles Dickens (Vancouver), 101st Battalion	80
Grandview (Vancouver), 101st Battalion	77
Fairview (Vancouver), 101st Battalion	75
King George High School (Vancouver), 101st Battalion	73
Laura Secord (Vancouver), 101st Battalion	72
Lord Roberts (Vancouver), 101st Battalion	60
Dawson (Vancouver), "B" Company, 101st Battalion	58
Hastings (Vancouver), 101st Battalion	58
Dawson (Vancouver), "C" Company, 101st Battalion	57
Strathcona (Vancouver), 101st Battalion	55
Van Horne (South Vancouver), No. 531	54
Victoria West, No. 608	54
Oak Bay, No. 489	54
Victoria Boys' School, No. 388	53
Fernie, No. 692	52
Prince Rupert, No. 432	52
South Park (Victoria), No. 587	52
North Vancouver, No. 125	52
Nelson, No. 695	50
Nanaimo, No. 372	50
Wake-Siah (Harewood School), No. 693	50
Tolmie (Saanich), No. 569	50
Grand Forks, No. 381	50
Oaklands (Victoria), No. 650	50
North Ward (Victoria), No. 643	50
Tecumseh (South Vancouver), No. 268	50
Carleton (South Vancouver), No. 438	50
General Brock (South Vancouver), No. 513	50
General Wolfe (South Vancouver), No. 514	50
Richard McBride (South Vancouver), No. 604	50
Lord Selkirk (South Vancouver), No. 611	50
MacKenzie (South Vancouver), No. 612	50

Twenty prizes for military drill were provided in accordance with schedule adopted at last meeting of the Local Committee held on 9th October, 1917, one-half of each prize to be paid to the corps, and one-half to the instructor, provided he is a public-school teacher qualified as a cadet instructor. When an instructor is not a public-school teacher, one-half of prize reverts to the general fund of the Local Committee. The expenditure under this head amounted to $262.50, and was made according to the following schedule:—

1st prize	$22	7th prize	$16
2nd „	20	8th „	15
3rd „	20	9th „	15
4th „	18	10th „	14
5th „	18	11th „	14
6th „	16	12th „	13

13th prize	$13	17th prize	$11
14th "	12	18th "	10
15th "	12	19th "	10
16th "	11	20th "	10

Rifle Shooting, 1916-17.

The 1916-17 grant for rifle shooting ($120) was divided equally among the thirty-two qualified cadet corps whose instructors furnished returns before the meeting of the Local Committee on the 9th October, 1917—viz., $3.75 to each; this amount to form cash prizes for the three best shots in each corps: 1st prize, $1.50; 2nd, $1.25; 3rd, $1. The following qualified cadet corps accordingly received grants of $3.75 each for rifle shooting, 1916-17: B.C. Horse (Vernon), No. 368; Cowichan Valley, No. 429; Grand Forks, No. 381; Kaslo, No. 360; Oak Bay, No. 489; Prince Rupert, No. 432; Vancouver, 23 corps attached to 101st Battalion (Alexandra, Britannia High School, King Edward High School, King George High School, Cecil Rhodes, Charles Dickens, Dawson "B" Company, Dawson "C" Company, Fairview, Franklin, General Gordon, Grandview, Hastings, Henry Hudson, Kitsilano, Laura Secord, Model, Macdonald, Lord Nelson, Lord Roberts, Simon Fraser, Strathcona, Lord Tennyson); North Vancouver, No. 125; Van Horne (South Vancouver), No. 531; Victoria High School, No. 112.

In Military District No. 11 there are on issue to cadet corps 1,595 rifles, as follows: 1,130 G.P. Ross, 382 Ross 22's, and 83 Snider carbines.

Financial Statement for 1916-17.

The funds at the disposal of the Local Committee for 1916-17 amounted to $1,265.85, and the expenditure for the year to $806.50, leaving an unexpended balance of $459.35. Of this balance, $414 has already been voted for physical-training prizes, 1917-18.

Receipts.

1916-17.	Balance on hand from 1915-16	$ 445 38
	Interest to November 30th, 1916	13 06
	Allowance to Secretary (added to fund)	10 00
	Grant for 1916-17 (received in May, 1917)	790 29
	Interest to May 31st, 1917	7 12
		$1,265 85

Disbursements.

1916-17.	Prizes for physical training, 1916-17	$ 424 00
	Prizes for military drill, 1916-17	262 50
	Prizes for rifle shooting, 1916-17	120 00
		$ 806 50
	Balance on hand	$ 459 35

David Wilson,
Secretary, Local Committee, Strathcona Trust, for British Columbia.

TEACHERS' EXAMINATION, 1917.

The annual examination of candidates for certificates of qualification to teach in public schools of the Province began on June 25th, 1917, and was held simultaneously in the High School buildings of Agassiz, Armstrong, Bridgeport, Chilliwack, Cranbrook, Cumberland, Duncan, Enderby, Esquimalt, Fernie, Golden, Grand Forks, Greenwood, Kamloops, Kaslo, Kelowna, Ladner, Ladysmith, Matsqui, Mission, Nanaimo, Nelson, New Westminster, Oak Bay, Peachland, Penticton, Point Grey, Port Alberni, Prince Rupert, Revelstoke, Rossland, Salmon Arm, Summerland, Trail, Vancouver (Britannia, King Edward, and King George), North Vancouver, South Vancouver, Vernon, and Victoria, as well as at Abbotsford, Belmont, Cloverdale, Courtenay, Creston, Hedley, Maple Ridge, Merritt, Naramata, Prince George, Quesnel, and Sidney.

The examiners appointed to act with the Superintendent of Education were: W. K. Beech, M.A.; T. A. Brough, B.A.; William Burns, B.A.; H. Chodat, M.A.; J. B. DeLong, B.A.; J. T. Dunning, M.A.; P. H. Elliott, B.Sc.; J. S. Gordon, B.A.; James Henderson, M.A.; J. K. Henry, B.A.; H. P. Hope, B.A.; D. C. Little, B.A.; R. A. Little, B.A.; S. W. Mathews, M.A.; D. L. MacLaurin, B.A.; E. B. Paul, M.A.; Walter Putnam, B.Sc.; E. H. Russell, B.A.; A. G. Smith, M.A.; S. J. Willis, B.A.; David Wilson, B.A.

The following are the successful candidates:—

ACADEMIC CERTIFICATES.

(Names in alphabetical order.)

Anderson, George Renwick, B.A., Mount Allison University, New Brunswick.
Anderson, Jessie J., B.A., University of British Columbia.
Baker, Jacob J., B.A., University of Toronto.
Benger, Irene, B.A., Queen's University, Kingston.
Cameron, Ella G., B.A., University of British Columbia.
Carruthers, Bertha M., B.A., University of British Columbia.
Chapin, Florence B., B.A., University of British Columbia.
Colegrave, Dorothy J., B.A., University of Manitoba.
Denne, Lexa, B.A., University of Toronto.
Dunbar, Robert G., B.A., McMaster University, Toronto.
Dunn, Alexander, B.A., University of Manitoba.
Dunton, Marjorie M., B.A., University of British Columbia.
Elliott, Jessie B., B.A., McGill University, Montreal.
Fallows, Marjorie H.
Gordon, John G., M.A., Queen's University, Kingston.
Gordon, J. Irvine, B.A., University of Toronto.
Greenwood, Bessie, B.A., McGill University, Montreal.
Hedley, Bertha, B.A., University of Oxford, England.
Hildred, Edna L., B.A., University of Toronto.
Hindle, Thomas, B.A., McMaster University, Toronto.
Howard, Edith L.
Howell, Benjamin H.
Jackson, Ella J., B.A., McGill University, Montreal.
Kelly, Mrs. Charlotte, B.A., University of Dublin.
Lambert, Walter H.
Lamond, Jemima, M.A., St. Andrew's University, Scotland.
Lane, Laura M., B.A., University of British Columbia.
Lewis, Vera M.
Miller, Grace W., B.A., University of British Columbia.
Mitchell, Joel M., B.A., University of Toronto.
Munro, Donald H., B.A., University of British Columbia.
Murphy, Francis L., B.A., St. Francis Xavier University, Nova Scotia.
McDonald, George B.A., Queen's University, Kingston.

SCHOOL DISTRICTS.

Since the publication of the School Report for 1915-16, the Honourable the Council of Public Instruction has made changes in the boundaries of the following school districts, and has also created school districts with limits as herein stated:—

CITY SCHOOL DISTRICT.

CUMBERLAND—April 17th, 1890. Boundaries altered and redefined December 17th, 1901, and April 13th, 1917:

All that area embraced within the corporate limits of the City of Cumberland, together with Sections 25, 26, 27, and 28 of Township 10, Comox District, and Lots 20, 21, and 24, Section 3, and Block 144 of Nelson District.

RURAL MUNICIPALITY SCHOOL DISTRICT.

CHILLIWACK—March 6th, 1906. Boundaries altered and redefined February 25th, 1908, and November 26th, 1917:

Commencing at a point where the southern boundary of Section 19, Township 22, Range 1, New Westminster District, intersects the eastern shore-line of Sumas Lake; thence due east to the south-east corner of Section 21 of said township; thence due north three miles; thence due east eleven miles to the eastern boundary of New Westminster District; thence due north to the south bank of the Fraser River; thence in a westerly direction following south bank of said river to the mouth of Sumas River where it flows into the Fraser River; thence along the eastern bank of said river in a southerly direction to Sumas Lake; thence following the eastern shore of said lake in a southerly direction to the point of commencement.

RURAL SCHOOL DISTRICTS.

CAMPBELL CREEK—May 23rd, 1899. Boundaries altered and redefined October 8th, 1901; December 18th, 1905; May 16th, 1907; June 30th, 1913; and November 6th, 1917:

Commencing at the north-east corner of Lot 263, being a point on the south bank of the South Thompson River, Kamloops Division of Yale District; thence due south to the south-east corner of said lot; thence due east to the north-east corner of Section 29, Township 19, Range 15; thence due south to the south-east corner of Section 17 of said township; thence due west half a mile and due south one mile to the middle point of the southern boundary of Section 8; thence due west to the south-west corner of Section 8, Township 19, Range 16; thence due north to the north-west corner of Section 17 of said township; thence due east to the north-east corner of said section; thence due north to the north-west corner of Section 28 of said township; thence due west to the south-west corner of Section 31 of said township; thence due north to the South Thompson River; thence easterly following the meanderings of said river to the point of commencement.

CHERRY CREEK—October 7th, 1913. Boundaries altered and redefined November 7th, 1914, and October 23rd, 1917:

Commencing at the south-west corner of Lot 142, Alberni District; thence due east to the south-east corner of Lot 138; thence due north to the north-east corner of said lot; thence due east to the south-east corner of Lot 136; thence due north to a point where the eastern boundary-line of Lot 136 meets the southern boundary of Block 80; thence due east to the south-east corner of said block; thence due north along the eastern boundary of Block 80 to the E. & N. Railway; thence following the said railway in a north-westerly direction to a point where it would be intersected by the production in a straight line of the western boundary-line of Lots 103 and 234; thence due south to the north-east corner of Lot 194; thence due west to the north-west corner of said Lot 194; thence due south to the south-west corner of Lot 111; thence due east to the south-east corner of said Lot 111; thence due south to the south-west corner of Lot 103; thence due west to the north-west corner of Lot 146; thence due south to the south-west corner of said lot; thence due west to the

north-west corner of Lot 112; thence due south to the south-west corner of said lot; thence east to the south-east corner of said lot; thence due north to the south-west corner of Lot 93; thence east following the southern boundary of Lots 93 and 15 to the north-west corner of Lot 152; thence south following the western boundaries of Lots 152, 143, and 142 to the point of commencement.

CLAYOQUOT—August 24th, 1909. Boundaries altered and redefined February 21st, 1917:

All that portion of the peninsula between Templar Channel and Browning Passage north of the southern boundary-lines of Lots 274, 275, and 276, Clayoquot District, together with Stubbs Island and Jacobson's Island to the north of said peninsula.

DIAMOND CROSSING—March 19th, 1912. Boundaries altered and redefined August 14th, 1917:

Commencing at the north-east corner of Lot 18A, Oyster District, being a point on the west shore of Oyster Harbour; thence due west to the north-west corner of Lot 51, Oyster District; thence due north to the north-east corner of Lot 11, Bright District; thence due west to the north-west corner of Lot 16, Bright District; thence due south to the western projection of the southern boundary-line of Lot 94, Oyster District; thence due east to the south-east corner of said lot; thence due north to the north-east corner of said lot; thence due east to the south-east corner of Lot 75, Oyster District; thence in a straight line to the south-west corner of Lot 84, Oyster District; thence due east to the sea-shore; thence in a north-westerly direction along the shore-line to the point of commencement.

EDITH LAKE—August 1st, 1906. Boundaries altered and redefined, raised to the status of a regularly organized school district; name changed from "Jacko Creek" to "Edith Lake" April 9th, 1910. Boundaries altered and redefined April 15th, 1913; January 19th, 1915; and October 19th, 1917:

Commencing at the north-east corner of Section 30, Township 19, Range 17, Kamloops Division of Yale District; thence due south to a point on the northern boundary of Lot 453, Kamloops Land District; thence east, south, and west following the boundaries of said lot to the point of intersection with the western boundary of Section 29; thence due south to the south-east corner of Section 19 of said township; thence due east to the north-east corner of Section 17 of said township; thence due south to the south-east corner of said section; thence due east to the north-east corner of the North-west Quarter of Section 9 of said township; thence due south to the northern boundary of Lot 441, Kamloops Land District; thence east, south, and west following the boundaries of said lot to the point of intersection with the centre line of Section 9 of said township; thence due south to the northern boundary of Lot 585, Kamloops Land District; thence east, south, and west following the boundaries of said lot to the point of intersection with the eastern boundary of Section 32, Township 18, Range 17; thence due south to the south-east corner of the North-east Quarter of Section 29 of said township; thence due west to the south-west corner of the North-west Quarter of Section 27, Township 18, Range 18; thence due north to the north-east corner of Section 33 of said township; thence due west to the south-east corner of Section 4, Township 19, Range 18; thence due north to the north-east corner of the south-east quarter of said section; thence due west to the north-west corner of said quarter-section; thence due north to the north-west corner of the South-east Quarter of Section 16 of said township; thence due east to the western boundary of Section 14 of said township; thence due north to the north-west corner of Section 26 of said township; thence due east to the point of commencement.

FANNY BAY—March 17th, 1908. Boundaries altered and redefined January 6th, 1909; and August 14th, 1917. Raised to the status of a regularly organized school district December 13th, 1912:

Commencing at the eastern end of the northern boundary-line of Newcastle District, being a point on the sea-shore; thence due west to the north-west corner of Lot 88 of said district; thence due south to the western projection of the extreme southern boundary-line of Lot 87; thence due east to the south-east corner of said Lot 87; thence due east to the south-east corner of said Lot 87; thence due north to the sea-shore; thence following the shore-line in a westerly and northerly direction to the point of commencement. This school district shall also include Lot 44 of Nelson District.

GILL—May 27th, 1901. Boundaries altered and redefined May 30th, 1902; November 15th, 1910; November 7th, 1914; and October 23rd, 1917:

Commencing at the north-east corner of Lot 94, Alberni District; thence due west to the north-west corner of Lot 94; thence due south to the north-east corner of Lot 168; thence west to the north-east corner of Lot 39, being a point on the Somass River; thence following the Somass River westerly to the forks; thence following the Sproat River to Sproat Lake; thence south-westerly following the shore-line of said lake to the western boundary of the E. & N. Railway Belt; thence south along said boundary to the shore of Sterling Arm; thence easterly following said shore-line to the south-west corner of Lot 61; thence due east following the southern boundary-lines of Lots 61, 268, 124, and 6 to the shore-line of Alberni Canal; thence following the meanderings of the said shore-line in an easterly and northerly direction to a point on the southern boundary of Lot 2 where the said shore-line would be intersected by the production in a straight line of the eastern boundary-lines of Lots 21 and 10; thence north on the line so produced to its intersection with the right bank of the Somass River; thence following the right bank of said river in a north-westerly direction to the point where it would be intersected by the eastern boundary-line of Lot 7 produced in a straight line; thence north on the line so produced to the south-east corner of Lot 7; thence due north to the south-west corner of Lot 8; thence east to the south-east corner of said lot; thence due south to the south-west corner of Lot 21; thence due east to the south-east corner of Lot 100; thence north to the north-east corner of said lot; thence east to the south-east corner of Lot 145; thence due north to the north-east corner of Lot 144, being a point also on the boundary of Lot 42; thence following the boundary-line of Lot 42 east and north to its north-east corner; thence due west to the south-east corner of Lot 167; thence due north along the eastern boundary of Lots 167 and 94 to the point of commencement.

GRINDROD—June 23rd, 1911. Raised to the status of a regularly organized school district September 18th, 1913. Boundaries altered and redefined October 28th, 1913; February 13th, 1917; and October 13th, 1917:

Commencing at the point where the northern boundary-line of Section 29, Township 19, Range 8, Kamloops Division of Yale District, intersects the right bank of the Shuswap River; thence due east to the north-east corner of Section 27 of said township; thence due south to the south-east corner of Section 22 of said township; thence due west to the south-west corner of Section 20 of said township; thence due south to the middle point of the eastern boundary-line of Section 18 of said township; thence due west to the left bank of the Shuswap River; thence following said bank in a southerly direction to the point where it intersects the southern boundary-line of Section 11, Township 19, Range 9; thence due west to the south-west corner of Section 10 of said township; thence due north to the north-west corner of Section 15; thence due east to the north-east corner of said section; thence due north to the north-west corner of Section 23; thence due east to the middle point of the north boundary of said Section 23; thence due north to the middle point of Section 26; thence due east to the middle point of the eastern boundary of said section; thence due north to the north-east corner thereof; thence due east to the middle point of the southern boundary of Section 36; thence due north to the northern boundary of said section; thence due east to the right bank of the Shuswap River (crossing said river once only); thence following said bank to the point of commencement.

KELOWNA, NORTH—March 12th, 1912. Boundaries altered and redefined November 27th, 1916:

All that part of Townships 23 and 26, Osoyoos Division of Yale District, contained in Blocks 1 to 9 (inclusive), and in Blocks 16, 17, 20, 21, 22, and 23 of Glenmore Valley Subdivision, as shown on a map or plan deposited in the Registry Office at Kamloops and numbered 896.

KEREMEOS, SOUTH—September 28th, 1915. Raised to the status of a regularly organized school district, and name changed from "Keremeos, South" to "Cawston" October 25th, 1917:

Starting at the north-east corner of Section 17, Township 54, Osoyoos Division of Yale District; thence due west to the Similkameen River; thence in a southerly direction following the meanderings of said river to the north-west corner of Section 9, Township 52; thence

due south to the south-west corner of Section 4 of said township; thence due east to the eastern boundary-line of Section 5, Township 54; thence due north to the point of commencement.

LUMBY—May 27th, 1908. Boundaries altered and redefined August 18th, 1898; December 18th, 1905; February 19th, 1907; September 20th, 1912; and November 27th, 1916:

Commencing at the south-east corner of Section 1, Township 3, Osoyoos Division of Yale District; thence due north following the eastern boundary of Township 3 to the north-east corner of Section 13 of said township; thence due east to the middle point of the western boundary-line of Lot 304; thence due north to the north-west corner of said lot; thence due east to the south-east corner of the North Half of the South-east Quarter of Section 20, Township 41; thence due north to the north-east corner of Section 8 of Township 40; thence due west following the section-lines to the middle point of the northern boundary-line of Section 11, Township 2; thence due south through the centres of Sections 11 and 2 to the middle point of the southern boundary-line of Section 2; thence due west following the section-lines to the north-west corner of Section 31, Township 3; thence due south one mile to the south-west corner of said Section 31; thence due south (following the boundaries of the Coldstream Municipality) 20 chains; thence due east 40 chains; thence north 20 chains; thence east 40 chains to the north-east corner of Section 30, Township 6; thence due south 60 chains to the south-east corner of the North Half of the South-east Quarter of Section 30, Township 3; thence due west to the north-east corner of Lot 87; thence south, west, and south along the easterly boundary of said Lot 87 to the north-east corner of Lot 13; thence south following the easterly boundary of Lot 13 to the south-east corner of Lot 13; thence due west to north-west corner of Section 18, Township 3; thence due south to the middle point of the western boundary-line of Section 18 of said township; thence due east to the middle point of the eastern boundary-line of Section 17 of said township; thence due south to the south-west corner of Section 4 of said township; thence due east to the point of commencement.

MARA—May 27th, 1898. Boundaries altered and redefined December 18th, 1905; June 23rd, 1911; and October 13th, 1917:

Commencing at the point where the southern boundary-line of Section 32, Township 19, Range 8, Kamloops Division of Yale District, intersects the right bank of the Shuswap River; thence due east to the south-east corner of Section 34 of said township; thence due north to the middle point of the eastern boundary-line of Section 27, Township 20, Range 8; thence due west to the middle point of Section 25, Township 20, Range 9; thence due south to the southern boundary-line of said township; thence due east to the right bank of the Shuswap River (crossing said river once only); thence following said bank to the point of commencement.

MARTIN'S PRAIRIE—July 28th, 1909. Raised to the status of a regularly organized school district March 8th, 1912. Boundaries altered and redefined September 10th, 1917, and November 6th, 1917:

Commencing at a point where the western boundary of C.G. 36, Kamloops Division of Yale District, meets the south bank of the South Thompson River; thence due south to the south-east corner of Lot 350, Group 1, Kamloops Land District; thence due west to the western boundary of Section 35, Township 19, Range 14; thence south to the south-west corner of said section; thence due east to the eastern boundary of said township; thence due south to the south-west corner of Section 30, Township 19, Range 13; thence due east to the south-east corner of Section 29 of said township; thence due north to the north-east corner of Section 8, Township 20, Range 13; thence due west to the eastern boundary of Lot 512, Group 1; thence following the boundaries of said lot in a south-westerly and westerly direction to a point on the south bank of the South Thompson River; thence following the south bank of said river in a south-westerly direction to the point of commencement.

MONTE CREEK—June 21st, 1893. Boundaries altered and redefined May 23rd, 1899; December 18th, 1905; May 16th, 1907; July 28th, 1909; October 19th, 1914; and November 6th, 1917. Name changed from "Ducks" to "Monte Creek" August 21st, 1913:

Commencing at the north-east corner of Lot 263, being a point on the south bank of the South Thompson River, Kamloops Division of Yale District; thence due south to the south-east corner of said lot; thence due east to the north-east corner of Section 29, Township 19, Range 15; thence due south three miles; thence due east to the north-west corner of L.S. 15 of Section 12, Township 19, Range 15; thence due south 20 chains and east 20 chains to the south-east corner of said L.S.; thence due south to the south-west corner of L.S. 1 of said section; thence due east to the eastern boundary of Township 19, Range 15; thence due south to the northern boundary of Township 18, Range 15; thence due east to the eastern boundary of Township 18, Range 15; thence due south three miles, east three miles, and north three miles to the southern boundary of Township 19, Range 14; thence due west to the south-west corner of Section 3, Township 19, Range 14; thence due north two miles, due west one mile, and due north to the southern boundary of Lot 288, Group 1; thence due east to the south-west corner of C.G. 1; thence due north to a point on the north bank of the South Thompson River; thence following the said bank in a south-westerly direction to the eastern boundary of Township 19, Range 15; thence due north to the north-east corner of Section 12, Township 20, Range 15; thence due west five miles; thence due south to the northern boundary of Lot 282, Group 1, C.G. 2166; thence following the northern and eastern boundary-lines of said lot in an easterly and southerly direction to the north bank of the South Thompson River; thence in a straight line to the point of commencement.

NARAMATA—December 31st, 1907. Boundaries altered and redefined November 27th, 1916:

Commencing at a point on the east shore of Okanagan Lake where the southern boundary-line of Lot 206, Osoyoos Division of Yale District, intersects the said shore-line; thence due east to the south-east corner of said lot; thence due north to the southern boundary-line of Lot 3315; thence due east to the south-east corner of said lot; thence due north along the eastern boundary of said lot and of Subdivision Lot 19 to the north-east corner of said Subdivision Lot 19; thence due west to the eastern boundary of Lot 3314; thence due north to the north-east corner of said lot; thence due east to the south-east corner of Lot 197 (S.); thence following the east and north boundaries of said lot to the east boundary of Lot 286; thence following the east and north boundaries of said Lot 286 to the lake-shore, following the shore in a southerly direction to the point of commencement.

NORTH BEND—May 27th, 1898. Boundaries altered and redefined June 21st, 1915, and February 20th, 1917:

All that tract of land situated in Yale District comprised within the circumference of a circle whose centre shall be the centre of the plot of land used as a school-site at North Bend and whose radius shall be a distance of four miles from such centre; save and except the following areas, which are hereby excluded:—

1. All the land within the said circumference lying north of a straight line drawn from the south-west corner of Section 30, Township 11, Range 26, Kamloops Division of Yale District, to the south-east corner of Section 25 of said township.

2. All the land within the said circumference lying east of the Fraser River.

OCEAN FALLS—June 27th, 1917. Raised to the status of a regularly organized district June 27th, 1917:

All that tract of land included in Lots 31, 103, Water Lot 104, Range 3, Skeena Land Recording District.

OYSTER, EAST—June 1st, 1908. Boundaries altered and redefined October 19th, 1914; deorganized and boundaries cancelled October 17th, 1917.

OYSTER, NORTH—April 30th, 1891. Boundaries altered and redefined April 23rd, 1906; June 1st, 1908; August 7th, 1908; October 19th, 1914; and October 17th, 1917:

Commencing at the north-west corner of Oyster District; thence due south along the western boundary-line of Oyster District to the eastern projection of the northern boundary-line of Lot 5, Bright District; thence due west to the north-west corner of said Lot 5, Bright District; thence due south to the south-west corner of Lot 12 of said district; thence due east to the southern projection of the western boundary-line of Lot 20, Oyster District;

thence due north to the south-west corner of said Lot 20; thence due east to a point on the sea-shore at Ladysmith Harbour; thence following the shore-line in a south-easterly direction to the south-eastern corner of Section 2; thence due north to the western projection of the southern boundary-line of Lot 11; thence due east to the south-east corner of said Lot 11; thence due north to the south-west corner of Lot 57; thence due east to the south-east corner of Lot 47; thence due north to the south-east corner of Lot 36; thence due west to the south-west corner of said Lot 36; thence due north to the north-west corner of said Lot 36; thence due west to the south-west corner of Lot 113; thence due north to the north-west corner of said Lot 113; thence due west to the point of commencement.

PENDER ISLAND—May 13th, 1896. Boundaries altered and redefined April 23rd, 1906; August 6th, 1915; and June 26th, 1917:

All that tract of land known as North Pender Island, in the Islands Electoral District.

WELLINGTON—May 2nd, 1874. Boundaries altered and redefined June 6th, 1887; April 30th, 1891; December 18th, 1905; and August 14th, 1917:

Commencing at the north-west corner of Lot 47, Wellington District, being a point on the sea-shore; thence due south to the south-west corner of said Lot 47; thence due west to the north-west corner of Lot 48; thence due south to the south-west corner of said Lot 48; thence due west to the north-west corner of Section 12; thence due south to the south-west corner of said Section 12; thence due west to the north-west corner of Lot 34; thence due south to the south-west corner of said Lot 34; thence due west to the western boundary of Wellington District; thence south along the western boundary-lines of Wellington and Mountain Districts to the south-west corner of Section 16, Range 1, Mountain District; thence east along the section-lines to the south-east corner of Section 16, Range 5; thence north along the range-line to the north-east corner of Section 19 of said range; thence due east to the western boundary-line of Departure Bay School District; thence north following said boundary-line to the sea-shore; thence westerly along the shore-line to the point of commencement.

ASSISTED SCHOOLS.

ALICE ARM—May 11th, 1917:

All that tract of land included in Lots 68, 3635, 3643, 1074, 1079, 50, 53, 52, Prince Rupert Land Recording District.

BOSTON BAR—September 10th, 1917:

Commencing at a point where the southern boundary of Section 14, Township 10, Range 26, Yale District, intersects the east bank of the Fraser River; thence due east to the south-east corner of said section; thence due north to the north-east corner of Section 35 of said township; thence due west to the middle point of the southern boundary of Section 1, Township 11, Range 26; thence due north to the north-east corner of the South-west Quarter of Section 24 of said township; thence due west to a point on the east bank of the Fraser River; thence following said bank in a southerly direction to the point of commencement.

BOWSER—August 14th, 1917:

Commencing at the north-east corner of Lot 13, Newcastle District, being a point on the sea-shore at Deep Bay; thence due south to the southern boundary-line of said district; thence due east to the Qualicum River; thence following the left bank of the Qualicum River and the sea-shore to the point of commencement. This school district shall also include Lot 254 of Alberni District and that portion of Lot 84, Newcastle District, which lies in Alberni District.

CANFORD—October 6th, 1917:

Commencing at a point in the Kamloops District formed by the intersection of the eastern boundary of Township 14, Range 23, and the southern boundary of Indian reserve (Lower Nicola Indian Reserve No. 9) so intersected; thence west along the boundary of said Indian reserve to a point due west on the eastern boundary of the Indian reserve lying along Nicola River (being Indian Reserve No. 10); thence in a southerly direction following the eastern boundary of said reserve to its south-east corner; thence following the southern and western boundaries of said reserve to its intersection with the western boundary of Section 10, Town-

ship 14, Range 23; thence south along said western boundary to its intersection with the northern boundary of Lot 779, Kamloops Land District; thence west to the north-west corner of said lot; thence following the western and southern boundaries of said lot to the point of intersection with the western boundary of Section 34, Township 14, Range 23; thence south to the south-west corner of the North-west Quarter of Section 27, Township 13, Range 23; thence due east to the eastern boundary of Township 13, Range 23; thence north along said boundary to its intersection with the southern boundary of the Indian reserve (Lower Nicola Indian Reserve No. 8) so intersected; thence west, north, and east along the boundary of said Indian reserve to the intersection of its northern boundary with the eastern boundary of Township 13, Range 23; thence north to the southern boundary of Lot 1022, Kamloops Land District; thence east, north, and west following the boundaries of said lot to the point of intersection with the eastern boundary of Township 13, Range 23; thence due north to the point of commencement.

CASTLEGAR—September 12th, 1908. Boundaries altered and redefined September 12th, 1917:

Commencing at the point where the western boundary-line, produced, of Lot 7373, District of West Kootenay, meets the right bank of the Columbia River; thence due south to the south-west corner of said lot; thence in a straight line to the north-west corner of Lot 10200; thence due east to the western boundary-line of Lot 8072; thence due south to the south-west corner of said lot; thence due east to the south-east corner of said lot; thence due north to the south-west corner of Lot 7199; thence due east to the right bank of the Columbia River; thence following said bank in a northerly and westerly direction to the point of commencement.

CHILCO—May 25th, 1917:

All that tract of land included in the portion of Township 10, Range 5, Coast District, which lies north of the Nechako River.

CURZON—June 25th, 1912. Boundaries altered and redefined May 6th, 1913; November 29th, 1915; and October 13th, 1917:

Commencing at the north-east corner of Lot 7102, District of East Kootenay; thence due south to the northern boundary-line of the B.C. Southern Railway right-of-way; thence following said boundary-line in a south-easterly and north-easterly direction to a point due north of the north-east corner of Lot 6428; thence due south to the left bank of the Moyie River; thence following said bank in a southerly and easterly direction to the point where it intersects the eastern boundary-line of Lot 7029; thence due south to a point directly east of the south-east corner of Lot 7769; thence due west to the south-west corner of said lot; thence due north to the south-east corner of Lot 10106; thence due west to the right bank of the Moyie River; thence following said bank in a northerly direction to the north-east corner of Lot 10319; thence due west to the north-west corner of said lot; thence due north to the north-east corner of Lot 10099; thence due west to the eastern boundary-line of Lot 11592; thence due north to the north-east corner of Lot 11593; thence due west to the eastern boundary-line of Lot 8435; thence due south to the south-east corner of said lot; thence due west to the south-west corner of said lot; thence due north to the south-east corner of Lot 8436; thence due west to the south-west corner of said lot; thence due north to the north-west corner of said lot; thence in a straight line in a north-easterly direction to the north-west corner of Lot 7102; thence due east to the point of commencement.

DRAGON LAKE—November 29th, 1912. Boundaries altered and redefined February 26th, 1915; and June 6th, 1917:

Commencing at the north-west corner of Lot 4957, being a point on the Fraser River, Cariboo District; thence due east to the north-east corner of said lot; thence due north to the north-west corner of Lot 490; thence due east to the north-east corner of said lot; thence due south to the north-west corner of Lot 3960; thence due east along the northern boundary of Lots 3960, 3961 to the north-east corner of Lot 3961; thence due north to the north-west corner of Lot 193; thence due east four miles; thence due north four miles; thence in a north-westerly direction and in a straight line to the north-east corner of Lot 658; thence due west to the eastern boundary-line of Lot 81; thence due south to the south-east corner of said lot; thence due west to the north-east corner of Lot 222; thence due

south to the south-east corner of said lot; thence due west to the Fraser River; thence in a southerly direction and following the meanderings of the said river to the point of commencement.

EHOLT—November 13th, 1902. Boundaries altered and redefined December 18th, 1905; July 15th, 1908; August 19th, 1908; and February 13th, 1917. Reduced to the status of an assisted school July 1st, 1913:

Commencing at the north-east corner of Township 78, Osoyoos Division of Yale District; thence due south to the south-east corner of Section 13 of said township; thence due west to the south-west corner of Section 18 of said township; thence due north to the north-west corner of said township; thence due east to the point of commencement, save and except the following areas which are included within the above boundaries, but which are not to be considered as in any way forming part of the school district:—

1. Summit Townsite, being a subdivision of Lots 1557 and 2005.
2. The Emma Mineral Claim, being Lot 591.
3. The Mary B. Mineral Claim, being Lot 1568.

FALSE BAY—October 31st, 1917:

All that portion of Lasqueti Island lying west of the eastern boundary-lines of Sections 21, 22, 23, and 24.

FISH LAKE—January 19th, 1915. Boundaries altered and redefined October 19th, 1917:

Commencing at the north-east corner of Section 27, Township 19, Range 18, Kamloops Division of Yale District; thence due south to the south-east corner of the North-east Quarter of Section 15 of said township; thence due west to the north-west corner of the South-east Quarter of Section 16 of said township; thence due south to the centre point of Section 4 of said township; thence due east to the middle point of the eastern boundary of said section; thence due south to the boundary of the Long Lake Forest Reserve; thence following the boundaries of said reserve in a westerly and northerly direction to the western boundary of Township 19, Range 18; thence due north to the north-west corner of Section 31 of said township; thence due east to the north-east corner of said section; thence due south to the south-east corner of said section; thence due east to the point of commencement.

GRANDVIEW BENCH—October 13th, 1917:

Commencing at the north-west corner of Section 34, Township 19, Range 9, Kamloops Division of Yale District; thence due north to the middle point of the western boundary of Section 10, Township 20, Range 9; thence due east to the middle point of Section 12 of said township; thence due south to the middle point of the southern boundary of Section 36, Township 19, Range 9; thence due west to the south-west corner of said section; thence due south to the middle point of the eastern boundary of Section 26 of said township; thence due west to the middle point of said Section 26; thence due south to its southern boundary-line and due west to its south-west corner; thence following the eastern and southern boundaries of Section 22 to the south-west corner thereof; thence due north to the middle point of the western boundary of Section 27; thence west to the middle point of Section 28; thence due north to the middle point of the northern boundary of Section 33; thence due east to the point of commencement.

HARTLEY—November 19th, 1917:

Commencing at the south-west corner of Lot 2425, Fort George Land Recording District; thence due north and following the western boundary of Lots 2425, 2426, 2427, 2428, 2434, 2437, 2438, 1063, 1065 to the north-west corner of Lot 1065; thence due east and following the northern boundary of Lots 1065, 3800, 3801, 3802, 3803, 3807, 3815, 3814, 3819, 3822 to the north-east corner of Lot 3822; thence due south and following the eastern boundary of Lots 3822, 3823, 7706, 7699, 7760, 7701, 797, 804 to the north bank of the Fraser River; thence following the meanderings of the said river and in a southerly direction to the south-east corner of Lot 802; thence due west and following the southern boundary of Lots 802, 803 to the north-east corner of Lot 806; thence due south along the eastern boundary of said Lot 806 to the south-east corner of said lot; thence due west and along the southern boundary of Lots 806, 1513, 4035, 4034, 4031, 4026, 2432, 2425 to the point of commencement.

HILBORN—February 26th, 1917:

Commencing at the point where the Six-mile Creek empties into the Fraser River, Cariboo District; thence in an easterly direction and following the northern bank of said creek to the point where the said creek intersects the western boundary-line of Lot 5055; thence due north to the north-west corner of said lot; thence due east and following the northern boundary-line of said lot to a point directly south of the south-east corner of Lot 5040; thence due north and following the eastern boundary of said lot to the north-east corner of Lot 5035; thence due west to the south-east corner of Lot 5034; thence due north to the north-east corner of Lot 5034; thence due west to the south-east corner of Lot 191; thence due north to the north-east corner of Lot 191; thence due west to the north-west corner of Lot 4523; thence due south to the north-east corner of Lot 6690; thence due west following the northern boundaries of Lots 6690 and 1328 to the east bank of the Fraser River; thence following the meanderings of the Fraser River and in a southerly direction to the point of commencement.

MAPES—May 25th, 1917:

All that tract of land included in Township 8, Range 4, Coast District, in Sections 1, 2, 3, 4, 5, 6, 7, 8, 9, 10, 11, and 12, of Township 1; in Sections 24, 25, and 36, of Township 7; and in Sections 1 and 12 of Township 2.

MCBRIDE—May 11th, 1917:

Commencing at the south-east corner of Lot 5304, being a point on the Fraser River, Fort George Land Recording District; thence due north and following the eastern boundary of Lots 5304, 5305, 5983; thence in a northerly and westerly direction and following the eastern and northern boundaries of Lots 5983, 3307, 3308, 3310, 3311, 3312, 3313, 3314, 3315, 3316, 3317, 3318; thence to the north-east corner of Lot 8933, being a point where the Dore River enters the Fraser River; thence following the south bank of the said river and in a south-westerly direction to the north-west corner of Lot 8946; thence due south along the western boundary of Lot 8946; thence due east along the southern boundary of Lots 8946, 8938, 3331; thence due south along the western boundary of Lots 3331, 3332, 5981; thence due east along the southern boundary of Lot 5981; thence due south along the western boundary of Lots 3333, 5980; thence due east along the southern boundary of Lot 5980; thence due south along the western boundary of Lot 5979; thence due east along the southern boundary of Lots 5979, 3533; thence due south along the western boundary of Lot 3533; thence due east along the southern boundary of Lot 3533; thence due south along the western boundary of Lots 5978, 5977; thence due east along the southern boundary of Lot 5977; thence due south along the western boundary of Lot 5975; thence due east along the southern boundary of Lot 5975; thence due south along the western boundary of Lot 5974; thence due east along the southern boundary of Lots 5974, 5973, 5307, 5303A, 5304, to the point of commencement.

MCGUIRE—October 5th, 1917:

Commencing at the north-east corner of Lot 361, District of East Kootenay; thence due south to the northern boundary-line of Lot 360; thence due east to the north-east corner of said lot; thence due south to the north-west corner of Sub-lot 44; thence due east to the north-east corner of said sub-lot; thence due south to the northern boundary-line of Sub-lot 40; thence due east to the north-east corner of said sub-lot; thence due south to the south-east corner of said sub-lot; thence due east to the north-east corner of Sub-lot 42; thence due south to the south-east corner of Sub-lot 16; thence due west to the eastern boundary-line of Indian Reserve No. 2; thence due north to the south-east corner of Sub-lot 31; thence due west to the south-west corner of Lot 357; thence due north to the south-east corner of Lot 359; thence due west to the south-west corner of said lot; thence due north to the north-west corner of said lot; thence due east to a point directly south of the south-west corner of Lot 7785; thence due north to the north-west corner of said lot; thence due east to the western boundary-line of Lot 361; thence due north to the north-west corner of said lot; thence due east to the point of commencement.

NANOOSE—April 8th, 1891. Boundaries altered and redefined June 8th, 1896; October 2nd, 1903; April 7th, 1914; June 9th, 1914; and August 14th, 1917. Reduced to the status of an assisted school June 7th, 1913:

Commencing at the north-west corner of Lot 51, Nanoose District, being a point on the sea-shore; thence following the western boundary of Lots 51 and 134 to the point where it meets the northern boundary of Lot 39; thence following the northern boundary of Lot 39 to the north-west corner of said lot; thence due south to the south-west corner of said lot; thence due east following the southern boundary of Lot 39 to the point where it meets the western boundary of Lot 135; thence due south following the western boundary of Lots 135, 121, and 55 to the point where it meets the southern boundary of Lot 31; thence due west to the eastern boundary of Lot 32; thence due south to the southern boundary of Nanoose District; thence due east following the southern boundary of said district to a point where it meets the southern projection of the eastern boundary of Lot 91; thence due north to the sea-shore; thence starting westerly and following the shore-line to the point of commencement.

OLSEN—October 31st, 1917:

Commencing at the south-east corner of Lot 4719, New Westminster Land District, being a point on the shore of Powell Lake; thence due north to the eastern projection of the northern boundary-line of Sub-lot 10 of Lot 1527; thence west to the north-west corner of said Sub-lot 10; thence south to the south-west corner of said Sub-lot 10; thence west to the eastern boundary-line of Lot 4722; thence north to the north-east corner of said Lot 4722; thence west to the north-west corner of said Lot 4722; thence south to the north-east corner of Lot 4723; thence west to the north-west corner of said Lot 4723; thence south to the north-east corner of Lot 1341; thence west to the north-west corner of said Lot 1341; thence south to the south-west corner of said Lot 1341; thence east to the north-east corner of Lot 504; thence south to the north-west corner of Lot 1272; thence east to the north-east corner of said Lot 1272; thence southerly, easterly, and southerly following the boundary-lines of said Lot 1272 to its south-east corner; thence due east to the shore of Powell Lake; thence following the shore-line of Powell Lake in a north-easterly direction to the point of commencement.

PEMBERTON RANGE—October 19th, 1914. Boundaries altered and redefined September 10th, 1917:

Commencing at the south-west corner of Township 20, Range 14, Kamloops Division of Yale District; thence due north to the north-west corner of Section 7 of said township; thence due east to the north-east corner of said section; thence due north to the north-west corner of Section 17; thence due east to the north-east corner of Section 17; thence due north to the north-west corner of Section 21; thence due east to the north-east corner of Section 24; thence due south to the northern boundary of Lot 514, Group 1; thence due west to the north-west corner of said lot; thence due south to a point on the north bank of the South Thompson River; thence following said bank in a south-westerly direction to the southern boundary of Township 20, Range 14; thence due west to the point of commencement.

POPCUM—November 26th, 1917:

Commencing at a point where the southern boundary of Section 26, Township 2, Range 29, New Westminster District, intersects the eastern boundary of New Westminster District; thence due east to the south-east corner of said section; thence due east four miles; thence due north to the south bank of the Fraser River; thence following said bank of river in a south-westerly direction to the eastern boundary of New Westminster District; thence due south to the point of commencement.

PORT WASHINGTON—August 6th, 1915. Boundaries cancelled June 26th, 1917, and territory formerly embraced within the boundaries of that district now included in the Pender Island School District.

POUCE COUPE—October 5th, 1917:

All that tract of land included in Sections 1, 2, 3, 4, 5, 6, 7, 8, 9, 10, 11, 12, 13, 14, 15, 16, 17, 18, 19, 20, 21, 22, 23, 24, 27, 28, 29, 30, Township 78, Range 15; Sections 31, 32, 33, 34, 35, 36, Township 77, Range 15; Sections 35, 36, Township 77, Range 16; Sections 1, 2, 11, 12, 13, 14, 23, 24, 25, 26, Township 78, Range 16; all west of the 6th meridian.

POUCE COUPE, CENTRAL—October 5th, 1917:

All that tract of land included in Sections 7, 8, 9, 10, 11, 14, 15, 16, 17, 18, 19, 20, 21, 22, 23, 26, 27, 28, 29, 30, 31, 32, 33, 34, 35, Township 78, Range 14; Sections 2, 3, 4, 5, 6, Township 79, Range 14; Sections 25, 26, 35, 36, Township 78, Range 15; Sections 1, 2, Township 79, Range 15; all west of 6th meridian.

POUCE COUPE, NORTH—October 5th, 1917:

All that tract of land included in Township 80, Range 14, and in Sections 25, 26, 27, 28, 29, 30, 31, 32, 33, 34, 35, 36, Township 79, Range 14; all west of 6th meridian.

QUALICUM, LITTLE—September 24th, 1917:

Commencing at the north-west corner of Lot 17, Newcastle District, being a point on the sea-shore; thence due south to the northern boundary-line of Lot 78; thence due west to the north-west corner of said Lot 78; thence due south to the south-west corner of said Lot 78; thence due west to the north-west corner of Lot 74; thence following the western boundary-line of Lot 74 to the southern boundary-line of Newcastle District; thence due west to the eastern boundary-line of Alberni District; thence due north to the southern boundary-line of Lot 90; thence due west to the eastern boundary-line of Bowser School District; thence following the eastern boundary-line of Bowser School District in a general north-easterly direction to the sea-shore; thence easterly following the shore-line to the point of commencement.

ROBIN'S RANGE—November 6th, 1917:

Commencing at the north-west corner of the North-east Quarter of Section 8, Township 19, Range 15, being a point in the Kamloops Division of Yale District; thence due east to the north-west corner of L.S. 15 of Section 12, Township 19, Range 15; thence due south 20 chains and east 20 chains to the south-east corner of said L.S.; thence due south to the south-west corner of L.S. 1 of said section; thence due east to the eastern boundary of Township 19, Range 15; thence due south to the northern boundary of Township 18, Range 15; thence due east to the eastern boundary of Township 18, Range 15; thence due south three miles, west six miles, and north three miles to the southern boundary of Township 19, Range 15; thence due east to the south-west corner of the South-east Quarter of Section 5, Township 19, Range 15; thence due north to the point of commencement.

ROOSVILLE—June 12th, 1917:

Commencing at the north-west corner of Lot 7012, Kootenay District; thence east to a point due north of the north-east corner of Sub-lot 45; thence south to the south-east corner of said sub-lot; thence south to a point on the International Boundary due south of said south-east corner of Sub-lot 45; thence west along said International Boundary to the south-east corner of Indian Reserve No. 2; thence north, west, and north along the eastern boundary of said Indian reserve to the point of commencement.

SALMON BENCH—November 19th, 1917:

Commencing at the north-west corner of the North-east Quarter of Section 23, Township 18, Range 11, Kamloops Division of Yale District; thence due east to the north-east corner of the North-east Quarter of Section 19, Township 18, Range 10; thence due south half a mile, due west a quarter of a mile, due south half a mile, due west a quarter of a mile, due south half a mile, due east half a mile, due south half a mile, due west half a mile, due south two miles, due west two miles; and thence due north to the point of commencement.

SASKATOON CREEK—October 5th, 1917:

All that tract of land included in Sections 3, 4, 5, 6, 7, 8, 9, 10, 11, 12, 13, 14, 15, 16, 17, 18, 19, 20, 21, 22, 23, 24, 25, 26, 27, 28, 29, 30, 31, 32, 33, 34, 35, 36, Township 79, Range 15; Sections 31, 32, 33, 34, Township 78, Range 15; all west of 6th meridian.

SISTERS CREEK—June 6th, 1917:

Commencing at the north-east corner of Lot 7273, being a point on the Fraser River, Cariboo District; thence due west to the north-west corner of said lot; thence due south and following the western boundaries of Lots 7273, 7272, 7271 to the south-west corner of Lot 7271; thence due east to the north-west corner of Lot 1611; thence due south to the

south-west corner of said lot; thence due east to the north-west corner of Lot 1612; thence due south to the south-west corner of said lot; thence due west to the north-west corner of Lot 7268; thence due south to the south-west corner of said lot; thence due east to the north-west corner of Lot 7269; thence due south and following the western boundary of Lots 7269, 7270 to the northern bank of Deserter's Creek; thence following the northern bank of said creek to a point where it enters the Fraser River; thence following the meanderings of the said river and in a southerly direction to the south-west corner of Lot 4520; thence due east along the southern boundary of Lots 4520, 1919 to the south-east corner of Lot 1919; thence due north to the north-west corner of Lot 4523; thence due east along the northern boundary of Lots 4523, 191 to the north-east corner of Lot 191; thence due south to the south-east corner of said lot; thence east along the southern boundary of Lots 5048, 5041, 5042 to the south-east corner of Lot 5042; thence due north and following the eastern boundary of Lots 5042, 5044 to a point due east of the north-east corner of Lot 193; thence due west to the north-west corner of said lot; thence due south to the north-east corner of Lot 3961; thence due west along the northern boundary of Lots 3961 and 3960 to the north-west corner of Lot 3960; thence due north to the north-east corner of Lot 490; thence due west to the north-west corner of said lot; thence due south to the north-east corner of Lot 4957; thence due west to the Fraser River; thence in a northerly direction and following the east bank of the said river to a point opposite the point of commencement.

SUNNYSIDE No. 2—November 19th, 1917:

Commencing at the north-west corner of Section 20, Township 39, Range 7, west of the Coast meridian; thence south and following the western boundary-line of Section 20 to a point of intersection with the northern boundary-line of Lot 269; thence easterly and following the northern boundary-line of Lot 269 to the north-east corner of Lot 269; thence south and following the eastern boundary-line of Lot 269 to a point of intersection with the southern boundary-line of Section 20; thence easterly and following the southern boundary-line of Section 20 to the south-east corner of Section 20; thence south and following the eastern boundary-line of Section 17 to a point of intersection with the northern boundary-line of Lot 227; thence east and following the northern boundary-line of Lot 227 to the north-east corner of Lot 227; thence south and following the eastern boundary-line of Lot 227 to the south-west corner of Lot 228; thence east and following the southern boundary-line of Lot 228 a distance of 23.45 chains; thence in a northerly direction 34.68 chains to a point of intersection with the northern boundary-line of Lot 228; thence east and following the northern boundary-line of Lot 228 a distance of 8.5 chains; thence due north a distance of 49.02 chains; thence due west to a point of intersection with the eastern boundary-line of Section 20 a distance of 39.99 chains; thence north and following the eastern boundary-line of Section 20 to the north-east corner of Section 20; thence due west and following the northern boundary-line of Section 20 to the point of commencement.

VAVENBY—December 3rd, 1917:

All that tract of land comprised in the following lots of the Kamloops Division of Yale District, namely: Lots 3864, 3865, 3866, 2578, 2643, 753, 2567, 2572, 749L, 748A, 2566, 2569, 2577, 1704, 2574, 2568, 2571, 3868, 1705, 2576, 2575, 2570, 3898, 1706, 2841, 2598, 2597, 750, 3064, 1708, 1709, 2591, 1699, 3897, 1701, 1707, 1699, 2592, 2596, 2595, 1700, 1698, 2590, 2581, 2582, 2583, 2584, 2599, 2586, 2585, 2587, 2588, 2589.

WATMORE—July 28th, 1909. Boundaries altered and redefined September 10th, 1917, and November 6th, 1917:

Commencing at a point where the southern boundary of Lot 512, Group 1, Kamloops Division of Yale District, meets the south bank of the South Thompson River; thence following the boundaries of said lot in an easterly and north-easterly direction to the point of intersection with the northern boundary of Section 12, Township 20, Range 14; thence due east to the middle point of the southern boundary of Section 15, Township 20, Range 13; thence due north to the middle point of the northern boundary of Section 27 of said township; thence due west to the south-eastern boundary of Neskainlith Indian Reserve No. 2; thence following the boundaries of said reserve south-west and north-west to the south bank

of the South Thompson River; thence in a westerly direction to the north-east corner of Lot 524, Group 1, Kamloops Land District; thence following the northern boundaries of said lot to its north-west corner; thence due south to the northern boundary of Section 29, Township 20, Range 13; thence due west to the north-west corner of Section 30; thence due south to the northern boundary of Lot 514, Group 1, Kamloops Land District; thence due west to the north-west corner of said lot; thence due south to the south bank of the South Thompson River; thence following the south bank of said river in a south-westerly direction to the point of commencement.

AMENDMENTS TO THE "PUBLIC SCHOOLS ACT."

Since the publication of the latest edition of the Manual of School Law, the following amendments were made to the "Public Schools Act":—

Section 8 is amended by striking out all the words in clause (*k*) of said section, and inserting in lieu thereof the following:—

"(*k*.) To close schools where the average attendance falls below eight in regularly organized school districts, or below six in assisted schools."

Section 15 is repealed, and the following is substituted therefor:—

"15. (1.) In cases where the attendance at any public school in a municipal school district is made up partly of pupils residing in another municipality, the municipal corporation of the municipality whence such non-resident pupils attend shall contribute to the support of the school a per capita grant for each of such non-resident pupils based upon the proportion which the cost of each pupil in attendance bears to the total cost of maintaining the school; such per capita grant to be paid annually to the municipal corporation of the municipality in which the school is situated.

"(2.) The municipal corporation of any municipality in which adequate school accommodation has been provided for the resident children shall not be liable for any contribution to the support of a school situated in another municipality on account of the attendance of non-resident pupils."

The Act is also amended by inserting therein after section 95 thereof the following section:—

"95A. Whenever the Board of School Trustees of any district municipality school district decide to unite two or more schools in that district for the purpose of establishing a central graded school, with at least two teachers, and of providing for the conveyance to and from such school of the children living at a considerable distance therefrom, there shall be granted from the Provincial Treasury to the Board of School Trustees of that district a sum not exceeding one-half of the total expense incurred on account of such conveyance."

NEW TEXT-BOOKS.

The Council of Public Instruction has been pleased to prescribe the following books for use in the public schools of the Province:—

The "Song Reader," Canadian Edition, published by Ginn and Company.

The following numbers of "The Highroads of Literature" as Supplementary Readers, namely: The Introductory Book and Books One, Two, Three, and Four.

For the use of Commercial classes in the high schools: New Method Arithmetic, published by the Commercial Text Book Co., Toronto; Book-keeping, Single and Double Entry, published by the Commercial Text Book Co., Toronto; Century Edition of Isaac Pitman's Shorthand.

Siepmann's French Course, Part 1, has been added to the list of text-books prescribed for use in the high schools.

An alternative course of study in French for the first and the second years of the High School Course has been authorized.

I have the honour to be,
Sir,
Your obedient servant,

ALEXANDER ROBINSON,
Superintendent of Education.

PART II.

STATISTICAL RETURNS.

TABLE A.—Attendance of Students at *High Schools*, Details of Management, &c., 1916-1917.

HIGH SCHOOLS.	No. of prescribed school days.	No. of days school was in session.	No. of students between 6 and 16 who attended the school during the year.	No. of students of other ages who attended the school during the year.	Total number of students of all ages who attended the school during the year.	Boys.	Girls.	Grand total actual daily attendance made by all the students enrolled.	Average actual daily attendance.	No. of monthly reports sent to parents.	School opened or closed with the Lord's Prayer. (Yes or No.)	No. of visits by the Superintendent of Education, or Inspectors.	No. of visits by Trustees.	No. of visits by others.	Total number of visits to school.

HIGH SCHOOL ENTRANCE EXAMINATION, JUNE, 1917.

Medallists.

In addition to the ten bronze medals which were donated by His Excellency the Governor-General, there were also available this year twenty extra medals kindly donated by His Royal Highness the late Governor-General. Ten of these were awarded to the leading pupils in the ten cities having the greatest number of passes, ten to the leading pupils in the various rural municipalities, five to the leading pupils of the rural and assisted schools, and five to the leading pupils from the Province at large.

The following are the names of the medal-winners:—

Cities—

Helen M. Douglas, Howay School, New Westminster.
Ida Cunliffe, Ridgeway School, North Vancouver.
A. Aileen Aylard, South Park School, Victoria.
Mary A. MacKay, Cecil Rhodes School, Vancouver.
George D. Quail, Fernie.
T. Wilfrid Brown, Grand Forks.
Marjorie Hall, Nelson.
J. Cyril Wallis, Rossland.
I. Doreen Freeman, Selkirk School, Revelstoke.
Allan Little, Nanaimo.

Rural Municipalities—

Mildred L. Gordon, Selkirk School, South Vancouver.
Reta E. Ormiston, Monterey School, Oak Bay.
Fern D. G. James, Model School, Saanich.
V. Marion Telford, Shaughnessy School, Point Grey.
William H. Robertson, Ellis School, Penticton.
Hugh MacIntyre, Summerland.
Bertha W. Dowding, Ladner School, Delta.
Stephen T. Moodie, Edmonds School, Burnaby.
John S. Burton, Glenwood School, Langley.
Leslie W. McKay, Agassiz School, Kent.

Rural and Assisted Districts—

Muriel Battershall, Trout Lake.
Jessie M. Ferguson, Christina Lake.
Enid Garrard, Clayoquot.
G. William Owens, Cowichan.
Edith McL. Grobe, Ymir.

Province at large—

Grace A. Austin, Kamloops.
Margery J. Lee, General Gordon School, Vancouver.
Magdalene F. Aske, Fairview School, Vancouver.
Helen R. Hood, Vernon.
Flora M. Ball, Kelowna.

APPENDIX B.

HIGH SCHOOL ENTRANCE EXAMINATION, 1917.

BRITISH HISTORY. (Time, 1½ hours.)

Value.

20 1. The Coming of the English.

(*a.*) Explain briefly what led up to the coming of the English to Britain.

(*b.*) Describe these English in appearance and character.

(*c.*) Show by sketch-map the original home of the English; also the seven kingdoms which the English formed in Britain.

15 2. Give a brief account of each of the following:—

(*a.*) Henry II.'s reforms.

(*b.*) England's first Parliament.

(*c.*) Results of the War of the Roses.

12 3. What belief did the Stuart sovereigns hold in regard to their right to rule?
What opposition did this cause?
What was the outcome?

13 4. When were the crowns of England and Scotland united? Who was the first king after this union?
When were the parliaments united? Give the most important terms of the union.
When did Ireland come into the union?
Write a note on "Home Rule."

20 5. The Growth of the British Empire.
Explain in a general way how India, Australia, and South Africa came under British Rule.
(In answering this question mention should be made of exploration, colonization, and extension by conquest or otherwise.)

20 6. The Great War.

(*a.*) Write a note about the "Scrap of Paper."

(*b.*) What is meant by unrestricted submarine warfare?

(*c.*) What is the object of the British blockade of German ports?

(*d.*) Locate and write briefly about each of the following: *Jutland, Monastir, Fort Douamont, Somme, Gorizia.*

100

NATURE LESSONS. (Time, 1¼ hours.)

[NOTE.—*Answer the first* three *questions and any* three *of the remaining six questions. Candidates must not attempt more than* six *questions.*]

Value.

16 1. (*a.*) How could you prove that carbon-dioxide is given out in the breath?

(*b.*) What is the effect of breathing dry air continuously? What provision would you suggest for keeping a supply of moisture in the air of a school-room?

17 2. (*a.*) Mention two articles of food that might be substituted for meat. Give reasons.

(*b.*) State briefly the chief precautions to be observed by dairymen in the production of clean milk.

Value.

16 3. (*a.*) Why does blood need to circulate in the body?
(*b.*) Why does running increase heart-beat and also respiration?

17 4. (*a.*) Name in order of development the stages in the life-history of a moth.
(*b.*) In which of these stages is it likely to do most harm to vegetation? Why?
(*c.*) In what stages do insects usually pass the winter?

17 5. (*a.*) How would you prove that soil contains air?
(*b.*) How would you show that this soil-air is necessary for plant-growth?
(*c.*) Some plants live entirely submerged in water. How do they get the necessary oxygen?

17 6. (*a.*) In keeping a weather record, what facts would you record from day to day?
(*b.*) Make drawings of the instruments you would use and describe briefly the working of each.

17 7. (*a.*) In the plant kingdom what are (1) annuals, (2) herbaceous perennials, (3) woody perennials? Give two examples of each.
(*b.*) Describe briefly how each of the above kinds of plant prepares for winter.

17 8. (*a.*) Mention some of the different ways by which birds may be identified.
(*b.*) In what way do birds render valuable service to the country?
(*c.*) What means would you recommend for attracting birds around your home or school?

17 9. (*a.*) Give brief instructions on the following:—
(1.) The covering of garden seeds in planting.
(2.) The thinning-out of young plants.
(3.) The watering of the garden.

100 (*b.*) What does "watering the garden with the garden hoe or rake" mean?

English Literature. (Time, 2 hours.)

Fourth Reader.

Value.

12 1. Quote any *one* of the following:—
(*a.*) The first stanza from Lord Tennyson's "St. Agnes' Eve."
(*b.*) The first three stanzas from Charles Wolfe's "The Burial of Sir John Moore."
(*c.*) The first three stanzas from Whittier's "The Red River Voyageur."
(*d.*) Robert Herrick's "To Daffodils."
(*e.*) Three stanzas of Lord Tennyson's "In Memoriam," beginning, "Now dance the lights on lawn and lea."
(*f.*) William Collins' "The Patriotic Dead."

10 2. (*a.*) What historical event inspired Rudyard Kipling to write the poem "Recessional"?
(*b.*) Give in a few words the main thought of the poem.
(*c.*) Explain the following passages taken from this poem:—
(1.) " . . . . . we hold
Dominion over palm and pine:"

Value.

(2.) "Lo, all our pomp of yesterday
Is one with Nineveh and Tyre!"

(3.) "For heathen heart that puts her trust
In reeking tube and iron shard,
. . . . . .
Thy mercy on Thy people, Lord!"

8 3. "He was inspired, and from the instant when his fingers began to wander along the keys the very tone of the instrument began to grow sweeter and more equal."

(*a.*) Of whom was this said?

(*b.*) What inspired him?

(*c.*) What was the result of the inspiration?

5 4. Select *one* word from each of the following passages that you consider to be most descriptive and most aptly used:—

(*a.*) "On entering here the magnitude of the building breaks fully upon the mind."

(*b.*) ". . . . . unhail'd
The shallop flitteth silken-sail'd
Skimming down to Camelot;"

(*c.*) "Out of the sluggish dark that lay along the ravine as in a trough rose the brawl of a swollen obstructed stream."

(*d.*) "Soon shalt thou find a summer home, and rest,
And scream among thy fellows;"

(*e.*) ". . . the race whom he hated with such burning rancor trample with unceasing footsteps over his forgotten grave."

15 5. Assign to author and selection each of the following quotations and tell to whom the italicized words refer:—

(*a.*) "And now *he* wards a Roundhead's pike, and now he hums a stave,
And now he quotes a stage play, and now he fells a knave."

(*b.*) "It's dull in our town since my playmates left;
I can't forget that I'm bereft
Of all the pleasant sights they see."

(*c.*) "Mark but my fall and that that ruin'd *me*."

(*d.*) "So they proceeded with *him* to his quarters at Corunna, weeping as they went."

(*e.*) "And never earth's philosopher
Traced with his golden pen
On the deathless page truths half so sage
As *he* wrote down for men."

The Lady of the Lake.

7 1. (*a.*) How many days are occupied by the story contained in the "Lady of the Lake"?

(*b.*) Describe the events that happened on the evening of the second day.

15 2. (*a.*) Name in order of importance, placing the most important first, the six leading characters of the story.

(*b.*) State briefly the reason for each of these being present at Stirling Castle on the morning of the last day.

9 3. What purposes are served by introducing Blanche of Devan into the story?

Value.

9 4. Name the speaker in each of the following passages, and state the occasion on which each was spoken:—

(*a.*) "Woe to the clansman who shall view
This symbol of sepulchral yew,
Forgetful that its branches grew
Where weep the heavens their holiest dew
On Alpine's dwelling low!"

(*b.*) "Break off the sports!" he said and frowned,
"And bid our horsemen clear the ground."

(*c.*) "Who fought?——who fled?——Old man, be brief;
Some might,——for they had lost their Chief."

10 5. Quote any *one* of the following:—

(*a.*) Ten lines beginning, "The stag at eve had drunk his fill,"

(*b.*) Ten lines beginning, "Hail to the Chief . . . "

(*c.*) The stanza beginning, "Time rolls his ceaseless course."

(*d.*) Eight lines beginning, "Who o'er the herd would wish to reign,"

100 (*e.*) The stanza beginning, "Harp of the North, farewell!"

ARITHMETIC. (Time, 2 hours.)

Value.

15 1. (*a.*) Find the prime factors of 9702.

(*b.*) 56 is 7/8 per cent. of what number?

(*c.*) What decimal part of a week is 8⅔ hours?

14 2. (*a.*) Find the value of: $\frac{(5.0075 - .0025) \times 500}{.0625 - .062}$

(*b.*) Divide twenty million seventy thousand and five by 769.

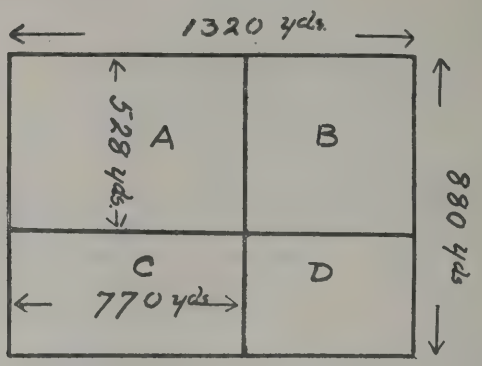
14 3. November 16th, 1916, I borrowed $785, paying interest at the rate of 8 per cent. per annum, and with the money immediately purchased a lot. I sold the lot for $1,000 cash, April 11th, 1917, and repaid the loan. What was my net gain?

14 4. A farmer purchased 275 boards, each 12 feet x 8 inches x 1½ inches, at $25 per M. He gave in payment $35 cash and the balance in oats worth 62½ cents a bushel. How many bushels of oats did he give?

14 5. In twenty-four hours rain fell to a depth of 0.75 inch. How many gallons fell on a rectangular garden plot 70 feet long and 50 feet wide. (1 cubic foot=25 quarts.)

15 6. A commission merchant had shipped to him 500 boxes of apples and 4,000 bushels of wheat. He paid $47.85 freight charges, and for storage 6¼ cents a box for the apples and 3 cents a bushel for the wheat. He sold the apples at $1.62 a box on a commission of 1½ per cent., and the wheat at $2 a bushel on a commission of 4 cents a bushel. What amount should he remit to his employer?

Value.
14 7.



The above plan represents a piece of land divided into four rectangular fields: A, B, C. and D.

(*a.*) What is the perimeter of the field D?

(*b.*) How many bushels of wheat did field A yield if it averaged 30 bushels to the acre?

100

DICTATION AND SPELLING. (Time, 1 hour.)

[NOTE.—*The Presiding Examiner will please notify candidates before he begins to dictate this paper that the quality of writing in the Dictation and Spelling paper decides 50 per cent. of the marks awarded in the subject of Writing.*

The passages (questions 1 and 2) are to be read slowly and distinctly to candidates three times—the first time to enable them to gather the meaning; the second time to enable them to write the words; the third time for review. Candidates are not permitted to rewrite the passages.]

Value.
35 1. (*a.*) On the bank of the St. Lawrence near Quebec stands a monument which was erected to commemorate the death of the British General Wolfe and the French General Montcalm. The former was killed on the field of battle when the city was taken by the British in 1759; the latter died of his wounds a few hours after the battle, but before the capitulation of the fortress. They were both young and heroic men, skilful generals, and true patriots. It is fitting that such chivalrous antagonists should be associated together in the inscription on their common monument, as they always will be on the pages of history.

(*b.*) This would be an easy matter and interfere very little with their civil avocations after the thorough training they had undergone in boyhood; and the discipline and self-control that would thus be inculcated would be of inestimable value, whatever the individual's career might be.

25 2.

Wrathful at such arraignment foul,
Dark lowered the clansman's sable scowl.
A space he paused, then sternly said,
"And heardst thou why he drew his blade?
Heardst thou that shameful word and blow
Brought Roderick's vengeance on his foe?
What recked the Chieftain if he stood
On Highland heath or Holy-Rood?
He rights such wrong where it is given,
If it were in the court of heaven."

Value.

40 3. [NOTE.—*The Presiding Examiner will pronounce each word distinctly, where necessary illustrating its use in a sentence. He will also allow a reasonable time for writing each word before the following one is pronounced.*]

Diameter,	conscientious,	studious,
celery,	sincerely,	physician,
vicious,	deceive,	religious,
battalion,	economy,	politician,
business,	accuracy,	perseverance,
mortgage,	raisins,	journey,
privilege,	accommodate,	handkerchief,
foreign,	Wednesday,	freight,
nuisance,	cemetery,	adieu,
luncheon,	wretched,	bicycle,
guarantee,	suspicion,	Antarctic,
covetous,	poultry,	Mediterranean.
separate,	pursuit,	
100 provincial,	juicy,	

GRAMMAR AND COMPOSITION. (Time, 2 hours.)

Value.

15 1. (*a.*) Classify the following sentence:—

Out and in the river is winding
The links of its long red chain,
Through belts of dusky pine-land
And gusty leagues of plain.

(*b.*) Select the subordinate clauses from the following sentence, and state the kind and relation of each:—

They discovered that the water had risen so rapidly that they could not reach the house where they had stored their provisions.

10 2. State whether each of the verbs, or verb phrases, in the following sentences is transitive or intransitive, and give reasons for your classification:—

(*a.*) Shut the door.

(*b.*) He walked around.

(*c.*) It was given to me by my father.

(*d.*) Now fades the last long streak of snow.

(*e.*) Their furrow oft the stubborn glebe has broke.

16 3. State the grammatical value (i.e., classify) and give the relation of each of the italicized words in the following sentences:—

(*a.*) The bird escaped *through* the opening.

(*b.*) A *twilight* gloom fell over all the land.

(*c.*) You know his *worth*.

(*d.*) He found the book *that* was lost.

(*e.*) I know *that* he did this.

(*f.*) I shall give *whichever* book he chooses.

(*g.*) *Learning* a foreign language requires patience.

(*h.*) *Leaving* the open road we entered the woods.

9 4. Name and illustrate the nine Primary Tenses in the active voice, indicative mood, by using the verb *to teach* with a subject in the first person, plural number.

Value.

15 5. (*a.*) As we rounded a bend in the road there lay before us the overturned and badly smashed wagon, with parts of the harness still attached to the shafts.
Using this as either the opening or closing sentence, write a *one-paragraph* story suggested to you by the sentence.

(*b.*) Write a letter to The Davis Smith Co., Limited, 1200 Government Street, Victoria, B.C., ordering one copy of Sykes' "Elementary English Composition," for which you enclose a postal note for forty cents. Rule a space of the proper size on your paper and in it write the envelope address.

35 6. Write a composition of at least three paragraphs on any *one* of the topics given below. Before writing the composition draw up an outline, or plan, which will show the main heading and contents for each paragraph. Hand this in with your composition.

(*a.*) How to Make Bread.

(*b.*) How to Recognize Common Woods.

(*c.*) A Fishing Trip.

(*d.*) Gathering Wild Flowers.

(*e.*) David and Goliath.

(*f.*) The Passing of Arthur.

(*g.*) The Pied Piper of Hamelin.

(*h.*) The Second Visit of Fitz-James to the Highlands.

100 (*i.*) The Journey of the Fiery Cross.

GEOGRAPHY. (Time, 1½ hours.)

Value.

12 1. Give exact location of each of the following and account for the growth and importance of each: *Winnipeg, Chicago, New Orleans, Buenos Ayres, Marseilles, Vienna.*

10 2. Give the two leading countries producing each of the following: *Coffee, tea, silk, wool, cotton, wheat, rice, sugar, wine, bananas.*

24 3. Describe the general appearance of any *three* of the following: *Alberta, Argentine, Holland, Transvaal, Ganges Valley, New Zealand.* In your description tell what the climate is like; picture the people at work; give their chief sources of wealth.

12 4. Account for differences in climate of the following places:—

(*a.*) *Vancouver Island* and *Newfoundland.*

(*b.*) *Norway* and *Sweden.*

(*c.*) *Madrid* and *Rome.*

12 5. Write a note on each of the following:—

(*a.*) The Cape to Cairo Railway.

(*b.*) The Assuan Dam.

(*c.*) Diamond-mining in South Africa.

30 6. Draw a map of Western Canada—from Hudson Bay and Lake Superior to the Pacific.
Mark the boundaries of the four western provinces and Yukon Territory.
Show the *Mackenzie, Saskatchewan, Nelson, Fraser,* and *Columbia* river systems.
Show the three transcontinental railways (main lines).
Mark exact location of *Victoria, Vancouver, Prince Rupert, Dawson, Port Nelson, Calgary, Edmonton, Saskatoon, Winnipeg, Brandon.*

100

CANADIAN HISTORY. (Time, 1½ hours.)

Value.

19 1. (*a.*) At the commencement of the Seven Years' War, what were the rival claims of the French and the British to the territory between the Mississippi River and the Appalachian Mountains?

(*b.*) What do you consider the most important British victory of that war? Give a reason for your answer.

(*c.*) In what year and by what treaty was the war formally closed? What territory was added to Britain by the treaty?

8 2. (*a.*) Give two terms of the Quebec Act that removed grievances of the French population.

(*b.*) State two important changes that were brought about by the Union Act, 1841.

12 3. Tell briefly how the movement for Confederation was affected by: (*a*) The Fenian Raids, 1866; (*b*) the termination of the Reciprocity Treaty with the United States; (*c*) equal representation for Upper and Lower Canada in the Canadian parliament.

17 4. (*a.*) Define or explain the following: Federal Union, Fathers of Confederation, Dominion Day.

(*b.*) What provinces first formed the Dominion of Canada? Name a statesman in each who took an active part in carrying Confederation.

(*c.*) Give the name of the Act under which the Dominion is governed. When and by what parliament was it passed?

10 5. (*a.*) When and on what conditions did the Dominion Government acquire the North-West from the Hudson's Bay Company?

(*b.*) What provinces have been formed in this territory?

9 6. When did British Columbia enter Confederation? What was the chief condition of its joining the Union? How many members has it in the House of Commons? How is its representation in that body determined?

14 7. What has the Federal Government done in the last fifty years to strengthen the ties that bind the Dominion to the Mother-land?

11 8. (*a.*) State three matters on which the Dominion Government alone can legislate, and three that come under the control of the provincial governments.

(*b.*) What political party is in power in Canada; in British Columbia?

(*c.*) Who is the Governor-General of Canada, the Premier of Canada, the Premier of British Columbia?

100

DRAWING. (Time, 2 hours.)

Value.

10 *(a.) Selection from Drawings.*

Select four examples of work from your drawings, as follows:—

1. Example 9 or 17 from Book IV.
2. The best freehand design—if possible, one based on the flower drawn on page 9 or 17.
3. The best drawing of an object—if possible, not from a plain type model.
4. The best example of a scale-drawing showing the rough sketch which carries the measurements.

Write your name, age, and school neatly on each sheet, fasten them carefully together, and hand them, with other papers, to the Presiding Examiner.

[NOTE.—*The Presiding Examiner will collect books and drawings and return them after the examination is over.*]

Value.
35

(b.) Freehand Drawing.

Make a drawing from this copy, the breadth to be 8 inches. (This distance should be measured with the ruler.)

[NOTE.—*This drawing must not be reproduced, but is given merely to show the application of above design to a piece of wood-carving.*]

Value.

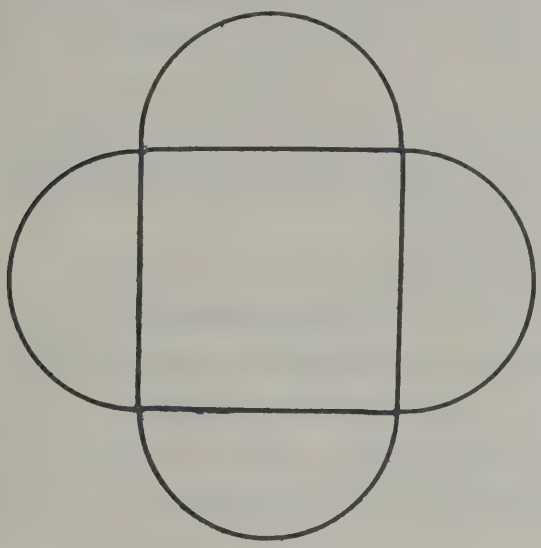
30 *(c.) Freehand Object Drawing from Memory.*

Sketch lightly a pyramid having a total width of not less than 6 inches. Convert this type model into an object and leave the drawing in its sketch state.

25 *(d.) Geometrical Drawing.*

1. Construct a scale to measure feet and inches when 1½ inches represents 1 foot.
2. Draw a line 2 feet long from above scale, and let that line be one side of a square. Construct the square and complete a geometrical figure similar to the one seen in the diagram below. Do not use set-squares, and show all construction lines.

100



APPENDIX C.

HIGH SCHOOL EXAMINATION, 1917.

Full Course, Junior Grade.

DRAWING. (Time, 2 hours.)

[NOTE.—*Students who wish to complete the Junior Course at one examination must take this paper.*]

(a.) Colour.

Select the following from your drawing-books, and write your distinguishing number at the top right-hand corner of each. Before beginning this paper give these to the Examiner.

1. An example of design-work.
2. An example of model drawing.
3. An example of colour-work from nature (not copied work).

(b.) Freehand—Design.

Draw a design suitable for a book-cover, and introduce as printing, "Sketch Book."

(c.) Model and Object.

Draw from memory a supporting surface, a cylinder, and a square prism tilted against the cylinder.

Sketch in with very light lines, and in dark lines suggest objects that the group of models might be changed into.

(d.) Geometrical.

1. (*a.*) Construct a rhombus having a diagonal 3⅜" long and a side 2⅝" long.
   (*b.*) Construct a rhomboid having a side 4⅛" long and a side 2⅜" long, with an included angle of 30 degrees.

2. Construct a hexagon having a side 3" long, and make a simple geometrical design within the hexagon.

3. Give definitions of the following: Diagonal, perimeter, perpendicular, prism, polygon (give five examples).

ARITHMETIC. (Time, 2 hours.)

[NOTE.—*Students who wish to complete the Junior Course at one examination must take this paper.*]

1. The columns of granite in a building weigh 100 tons each, including the shafts and the capitals resting on them. Each shaft weighs 76 tons more than its capital. Find the weight of a shaft; of a capital.

2. Find the specific gravity of mercury if ½ l. weighs 6.799 kg.

3. A floor 16′ x 12′ is to be covered with Axminster carpet 27 inches wide, costing $1.75 per yard. Allowing in all 1¼ yards for matching the pattern, how much carpet will be required if the strips run the long way? Find the cost of the carpet.

4. Find, by aliquot parts, the interest and amount of $2,500 for 1 yr. 7 mo. at 7%. Prove the accuracy of your work by using another method to secure the answers.

5. (*a.*) J. S. Burton sold to Sanford and Williams merchandise for $1,000, terms half cash and half payable in sixty days. Draw the note, making it negotiable.
   (*b.*) The note was sold to J. K. Avery and endorsed in full. Write the endorsement.
   (*c.*) Suppose that Mr. Avery sells the note to Henry Baldwin and endorses it in such a way as to avoid responsibility for its payment. Write the endorsement.
   (*d.*) Explain in what other ways the note might be endorsed.

6. My money in the savings bank was bearing interest at 3½% per annum computed semi-annually. I drew out $2,002 and invested it in railway stock at 125, paying the usual brokerage. The stock yielded a semi-annual dividend of 2½%. Was my semi-annual income increased or diminished? If so, how much?

7. Find the cost of 3% stock when the money invested in it yields 8%.

8. A plank 28 feet long is 1 foot wide at one end and 1½ feet wide at the other end. How many square feet are there in one side of it? If it is 2 inches thick, how many board feet does it contain?

Advanced Course, Junior Grade; and Full Course, Junior Grade.

Latin. (Time, 2 hours.)

1. Write a short description of *one* of the following: *Oppugnatio, Triplex Acies, Navis Longa.*

2. Compare: *superus, magnus, acriter, humilis.*
   Distinguish (by meaning) between: *copia* and *copiae; reddo* and *redeo; vinctus* and *victus.*

3. Conjugate in full:—
   (*a.*) Present indicative of *malo.*
   (*b.*) Present subjunctive of *possum.*
   (*c.*) Imperfect subjunctive of *volo.*
   (*d.*) Future indicative of *eo.*
   (*e.*) Give all tenses of the infinitive mood, active and passive, of *fero.*

4. Give the classification of pronouns. Assign to the correct class and give the meaning of: *hic, meus, tu, qui, quis, is, aliquis, sui.* Decline in full any *two* of these pronouns.

5. Exemplify by giving short and easy sentences in Latin and English:—
   (*a.*) Any *six* uses of the ablative case.
   (*b.*) *Five* methods of expressing purpose.
   (*c.*) *Four* methods of expressing an adverbial clause of time.

6. Express in Latin: I shall inform the boys of the danger. Weeping, he asked me for help. On the top of the mountain. On guard. According to custom. They cannot be conquered. Do not set out at daybreak. He promised to follow me. The unprotected flank. I shall never forget you.

7. Translate into Latin:—
   (1.) He attacked so suddenly that the enemy turned and fled.
   (2.) If they were to send hostages we should make peace immediately.
   (3.) I think that the camp ought to be fortified as soon as possible.
   (4.) Do you not know with what legion I am?
   (5.) He sent the cavalry officers in advance to choose a suitable place for a camp.

8. Translate into English:—

(*a.*) Ubi dē ējus adventū Helvētiī certiōrēs factī sunt, lēgātōs ad eum mittunt; sed Caesar negat sē posse iter ūllī per prōvinciam dare. Relinquēbātur ūna per Sēquanōs via. Mox Caesarī renūntiātur Helvētiōs per agrum Sēquanōrum iter in Santonum fīnēs facere, quī nōn longē ā prōvinciā nostrā absunt. Intellegēbat perīculōsum prōvinciae *fore*, sī hominēs bellicōsī, populī Rōmānī inimīcī, prōvinciae fīnitimī essent.

Parse *fore*.

(*b.*) Hōc proeliō trāns Rhēnum nūntiātō, Suēbī quī ad rīpās Rhēnī vēnerant, *domum* revertī coepērunt. Caesar ūnā aestāte duōbus māximīs bellīs cōnfectīs, mātūrius paulō quam tempus annī postulābat, in hīberna in Sēquanōs exercitum dēdūxit. Hībernīs Labiēnum lēgātum praefēcit; ipse in citeriōrem Galliam profectus est.

Explain the case of *domum*.

(*c.*) Quae cum ita *essent*, nūntiī rē īnfectā ad Ulixem rediērunt. Hīs rēbus cōgnitīs. Ulixēs ipse cum omnibus quī in nāvī relictī sunt ad locum vēnit; et sociōs frūstrā hortātus ut sponte suā redīrent, manibus eōrum post terga vinctīs, invītōs ad nāvem reportāvit. Tum, ancorīs sublātīs, quam celerrimē ē portū nāvem solvit.

Account for the mood of *essent*.

(*d.*) Illī intereā aliquantum prōgressī ad vīllam quandam pervēnērunt, summā māgnificentiā aedificātam; cūjus ad jānuam cum adiissent, ipsa Circē exiit et summā cum benīgnitāte omnēs invitāvit ut introīrent. Eurylochus autem, īnsidiās suspicātus, forīs exspectāre cōnstituit; reliquī reī novitāte adductī intrāvērunt, atque convīvium māgnificum invēnērunt omnibus rēbus īnstrūctum.

Give an account in English of the conclusion of this story.

COMPOSITION. (Time, 2 hours.)

[NOTE.—*Seventy-five per cent. of the value attached to this paper will be apportioned to the essay.*]

1. (*a.*) Having in mind Washington Irving's description of the Bobolink, give an outline for a short composition.

(*b.*) This description possesses artistic qualities of style. Point out what characteristics make it artistic.

2. Explain the difference between *simile* and *metaphor*, giving an example of each.

3. In a concise letter to the Premier of British Columbia give your views on Prohibition. [N.B.—Special attention will be paid to the form of your letter.]

4. Write an essay on *one* of the following subjects:—

(*a.*) Venice. (Byron's Childe Harold.)

(*b.*) She Was a Phantom of Delight. (Wordsworth.)

(*c.*) The Entrance of the United States into the War.

Physiology. (Time, 1½ hours.)

1. Discuss foods under the following headings:—
   (*a.*) Waste and repair.
   (*b.*) Oxidation and energy.
   (*c.*) Classification of foods.

2. State clearly and fully what you have learned of:—
   (*a.*) The composition of the blood.
   (*b.*) The purpose it serves in the body.

3. (*a.*) Why is good ventilation important?
   (*b.*) Write as fully as possible on bathing.

4. Give a short account of the two great divisions of the nervous system.

5. Show the importance of suitable muscular exercise for the maintenance of bodily health.

6. Name and describe our main defences against contagious disease.

Geometry. (Time, 2 hours.)

[Note.—*Draw neat figures, use printed capitals, and give authorities.*]

1. Any two sides of a triangle are together greater than the third side.

2. ABC is a triangle in which the side AB is greater than AC. Prove that the angle ACB is greater than ABC by means of the following construction: From AB cut off AD=AC, bisect the angle BAC by AE meeting the base in E, join DE.

3. The opposite sides and angles of a parallelogram are equal to one another and each diagonal bisects the parallelogram.

4. The medians BE and CF of a triangle ABC intersect at G; GB and GC are bisected at H and K respectively. Prove HKEF is a parallelogram. Hence prove that G is a point of trisection of BE and CF.

5. Construct a triangle, having given the perimeter and the angles at the base.

6. If the square described on one side of a triangle be equal to the sum of the squares described on the other two sides, then the angle contained by these two sides shall be a right angle.

7. DEF is an isosceles triangle; it is required to draw a straight line AB parallel to the base EF, and meeting the equal sides in A and B, so that EA, AB, and BF may be all equal.

Physics and Chemistry. (Time, 1½ hours.)

1. (*a.*) How is a simple mercury thermometer constructed?
   (*b.*) Why is mercury a good liquid to use in a thermometer?

2. (*a.*) How many units of heat are taken in by 100 grams of water in being heated through 18° Fahrenheit?
   (*b.*) State as clearly as possible the distinction between heat and temperature.

3. Show clearly how the density of ice may be determined.

4. What are the principal gases in the air? In what proportion by volume do they occur? Describe the experiments upon which you base your answer.

5. Describe the preparation and properties of carbon-dioxide gas.

6. (*a.*) Tell what you have learned of chemical combustion in the body.
(*b.*) Discuss at least two great purposes that plants serve in nature.

GREEK. (Time, 2 hours.)

1. Decline in agreement: ἡ μικρὰ κώμη; ὁ χρυσοῦς θώραξ; πᾶς πόλις; τρεῖς γέροντες (plural only); εἷς ἡγεμών (singular only).

2. Write the genitive singular, accusative singular, nominative plural and dative plural of: πατήρ, ἄστυ, βασιλεύς, σῶμα, τριήρης, βοῦς, ἀνήρ, γυνή, ναῦς, παῖς.

3. Write the dative singular, genitive plural, and accusative plural (all genders) of: πολύς, ἡδίων, ἀληθής, λύσας, λυθείς, οὗτος.

4. Compare the adjectives: στενός, δεῖνος, ἡδύς, αἰσχρός, ἀληθής.

5. Conjugate:—
(*a.*) The first aorist imperative passive of λύω.
(*b.*) The first aorist subjunctive active of γράφω.
(*c.*) The perfect indicative active of θαυμάζω.
(*d.*) The present optative active of τιμάω.
(*e.*) The present subjunctive middle of φιλέω.
(*f.*) The present indicative passive of δηλόω.

6. Write the active, middle, and passive infinitive forms of ποιέω.

7. Write the principal parts of: πέμπω, λείπω, ἄγω, νικάω, ἀκούω, φεύγω, βούλομαι, ἀφικνέομαι, γίγνομαι.

8. Translate:—
(*a.*) καὶ σὺν αὐτοῖς μὲν εἴην ἂν τίμιος, αὐτῶν δὲ εἰ ἔρημος εἴην, οὐκ ἂν ἱκανὸς εἴην τοὺς φίλους ὠφελεῖν.
(*b.*) οἱ πρόσθεν ἡμῖν βοηθήσαντες τοὺς ὅρκους λελύκασιν.
(*c.*) συμβουλεύω ἐγὼ τὸν ἄνδρα τοῦτον ἐκποδὼν ποιεῖσθαι, ἵνα μηκέτι δέῃ τοῦτον φυλάττεσθαι, ἀλλὰ σχολὴ ᾖ ἡμῖν τοὺς φίλους εὖ ποιεῖν.

9. Translate:—
(*a.*) In these villages the roads were narrow.
(*b.*) We did not send the garrison to the bridge.
(*c.*) But, Cyrus, shall we have supplies?
(*d.*) The enemy will be pursued through the plain by the general.
(*e.*) He would be marching against the king, if he had an army.
(*f.*) Let us besiege the stronghold both by land and by sea.
(*g.*) We do not fear that this man will be made satrap.
(*h.*) If you should do this, we should justly feel grateful.
(*i.*) They destroyed the bridges that the enemy might not follow.
(*j.*) Do not send messengers to the king.
(*k.*) All these barbarians will be more hostile to us than those who are with the king.

Botany. (Time, 1½ hours.)

[Note.—*Answer questions 1 and 2 and any* four *of the rest.*]

1. What are the chief characteristics of—
   (*a.*) The leaves of the Leguminosæ?
   (*b.*) The corollas of the Compositæ?
   (*c.*) The ovary of the Labiatæ *or* the Scrophulariaceæ?
   Illustration sketches are required.

2. Describe the effects of light upon plant-activities.

3. Show with the assistance of examples how to distinguish (*a*) Two closely related genera; (*b*) two closely related species.

4. Describe the four commonest methods of leaf-arrangement, stating in how many vertical rows the leaves are in each case arranged.

5. Show that willow flowers are usually insect-pollinated. Is there any reason why the catkins of the willow should be stiffly erect or nearly so, while those of the hazel or the alder are drooping?

6. Give as complete a classification of stems as possible. Make necessary explanations regarding the stems of onion, carrot, thistles (or fireweed).

7. Discuss and illustrate by sketches the methods of root-development. Name plants that illustrate the different types. Include in your sketch and comment on one other important feature of all roots.

8. (*a.*) What are the functions of the calyx?
   (*b.*) Have gymnosperms stigmas? Give a brief explanation.

French. (Time, 2 hours.)

1. Insert in blank spaces the correct form of the relative or of the interrogative:—
   (1.) C'est ce . . . nous avons besoin. (2.) Nous aimons ceux . . . nous aiment. (3.) La lettre de mon ami . . . est arrivée ce matin. (4.) A . . . sont ces enfants? (5.) Le parc . . . je vais me promener. (6.) De . . . université la Sorbonne fait-elle partie? (7.) Je connais la maison . . . vous avez achetée. (8.) . . . lui avez-vous dit? (9.) Demandez-lui . . . a cassé la boîte. (10.) . . . de ces dames est votre tante?

2. Infinitives in brackets to be put into the mood and tense required by the context:—
   (1.) Nous avons (vendre) toutes nos poires; c'est le même marchand qui les a (acheter). (2.) Les oiseaux chantaient pendant qu'ils (faire) leurs nids. (3.) Il n'y a personne qui (savior) cela. (4.) Bien que j'(être) invité, je ne sais si je (pouvoir) être présent. (5.) Quand êtes-vous (arriver), mes dames? Vous vous êtes (coucher) si tard hier soir! (6.) Il faut que j'(aller) chez la couturière. A quelle heure veux-tu que nous (partier)? (7.) Je doute qu'il y en (avoir) de meilleurs. (8.) Je serais allée au marché si je (pouvoir). (9.) Ce matin j'avais fini mon travail quand le facteur (arriver). (10.) Je voudrais bien que vous (venir) avec moi. (11.) Quand vous (aller) chez l'épicier, apportez-moi une livre de thé.

3. Give the French for:—
   (1.) He refuses to say anything. (2.) I was born in Paris. (3.) Most people believe it. (4.) "Where is your hat?" he asked. (5.) My mother doesn't want me to go. (6.) You ought to have spoken. (7.) Make him read it. (8.) I came very near falling.

4. Substitute personal pronoun for expressions in italics:—

(1.) Je parle *à Marie.* (2.) Le professeur montre *la carte.* (3.) J'ai *du papier.* (4.) Il va *à la ville.* (5.) Je prête *mes plumes à Louise.* (6.) Je ne trouve pas *de pommes dans ce panier.* (7.) Il vous présentera *à sa soeur.* (8.) Expliquez *la leçon aux enfants.* (9.) Ne nous prêtez pas *vos livres.*

5. Put into French (with numerals in full):—

(*a.*) (1.) When I was 21 I set out for America. (2.) My question has been answered. (3.) To-day is the 31st of July. (4.) Dinner will be ready at five minutes to six. (5.) I was the first to see it.

(*b.*) (1.) Have you done anything wrong? Nothing, thank you. (2.) There are many Frenchmen in Canada. (3.) What kind of weather will it be this evening? Is it going to rain? (4.) We always shake hands when we meet. (5.) You pay two cents a pound for them when they are cheap. (6.) He sees old age coming without losing his happiness. (7.) It was not necessary for him to come; he didn't owe me anything. (8.) The dress I got made in Paris doesn't fit me. (9.) He will send for a carriage which will come and get us. (10.) Most people like best to begin by doing something easy.

6. Translate:—

(*a.*) Pendant que l'espèce d'Hercule obéissait, madame de la Grenouillère regarda l'être qu'elle venait de sauver. C'était le véritable type du chat de gouttière, et sa laideur naturelle était augmentée par les accidents d'une course longue et irrégulière. Ses poils ras étaient souillés de boue; on distinguait à peine, à travers des mouchetures variées, sa robe grise zébrée de noir. Il était d'une maigreur presque transparente, si efflanqué qu'on lui comptait les vertèbres, si chétif qu'une souris l'aurait abattu; il n'avait pour lui qu'une seule chose, c'était de la physionomie.

(*b.*) Au bout de quelques jours, Moumouth était méconnaissable: son poil avait été lustré avec soin; une nourriture succulente avait arrondi ses formes; ses yeux brillaient comme des émeraudes. Il devait principalement sa bonne mine à la mère Michel, à laquelle il avait voué une affectueuse reconnaissance; il avait, au contraire, pour le père Lustucru une aversion très prononcée. Comme s'il eût deviné qu'il avait affaire à un ennemi, il refusait les aliments que lui présentait le maître d'hôtel; du reste, il le voyait fort peu.

7. Put into French:—

Several days passed in anxious expectation; but Moumouth the cat did not come back. Generous in misfortune, madame de la Grenouillère did not reproach mother Michel; she on the contrary sought (chercher) to calm the poor woman who was unreservedly yielding (s'abandonner) to her grief. One evening she said to her: "What can you do against irremediable trouble? Human wisdom consists in not rebelling (se regimber) against misfortune, in submitting to the decrees of heaven."

GERMAN. (Time, 2 hours.)

1. Add the correct endings to the adjectives used in the following sentences:—

(1.) Der groß—Baum ſteht an der breit—Straſſe. (2.) Mein älter—Bruder hat oft heftig—Kopfſchmerzen. (3.) Er verſchrieb mir eine bitter—Arznei und ſagte: Kommen Sie nächſt—Mittwoch. (4.) Was fehlt meinem jung—Freund? fragte ein alt—Weib. (5.) Ich Unglücklich—, rief er, wie ſoll ich jetzt Brot für die Meinig—verdienen?

2. Conjugate in full in the present indicative:—

(1.) Sich gut unterhalten. (2.) Sich etwas denken.

3. Give the comparative and superlative forms of the following expressions :—

(1.) Ich ſpiele gut. (2.) Im Winter ſind die Nächte lang. (3.) Dieſer groſſe Fluß heiſſt Rhein. (4.) Man reiſt auf dieſe Weiſe gern.

4. Insert in blanks the correct forms of the relative :—

(1.) Das Beſte, . . . ich habe, will ich dir geben. (2.) O Gott, . . . im Himmel iſt! (3.) . . . andern eine Grube gräbt, fällt ſelbſt hinein. (4.) Er will zur Stadt zurück, in . . . . er geboren wurde. (5.) Ich traf einen Freund, ... ich lange nicht geſehen hatte. (6.) Er will nicht ſtudieren, . . . ſchade iſt. (7.) Ich ſehe ein Haus, ... Dach rot iſt. (8.) Die Federn, mit . . . . wir ſchreiben, ſind Füllfedern.

5. Rewrite the following with the verb (*a*) in the imperfect, (*b*) in the perfect :—

(1.) Was wird aus dem Briefe? (2.) Wir leiden an Zahweh. (3.) Das Kind denkt an ſeine Eltern. (4.) Er vollendet immer, was er anfängt. (5.) Die Zeitungen erzählen uns, was in der Welt geſchieht. (6.) Ich muß den Vater erſt fragen.

6. Complete the following sentences by adding a suitable preposition with the article or possessive adjective :—

(1.) Wir kämpfen——Feind. (2.) Die Arbeit wird oft——ſchlechte Wetter verhindert. (3.) Er wohnt——Onkel. (4.) Die ſchwarze Katze war——Tiſche. (5.) Die Brücke führt——Fluß.

7. Answer in full the following in German :—

(1.) Um welche Zeit wird der Weizen geſät? (2.) Wie viel Uhr iſt es, wenn der Minutenzeiger auf ſechs und der Stundenzeiger zwiſchen eins und zwei ſteht? (3.) Wie grüſſen Sie eine Dame, wenn Sie ihr begegnet? (4.) Was hätten Sie gern getan, wenn Sie Geld genug gehabt hätten?

8. Translate :—

(1.) People should assist not only their friends, but also their enemies. (2.) We should always do what we can to help others. (3.) Charles, please shut the door when you go out. (4.) When one invites guests to dinner, one must purchase what is necessary. (5.) It is to be hoped we shall meet again this evening. (6.) Goethe and Schiller were German poets; the latter died in 1805 and the former in 1832.

9. Translate :—

(*a*.) Hoch in der Luft zog ein Schwarm wilder Schwäne, einer davon ſank mit ermatteten Flügeln tiefer und tiefer, ſeine Augen folgten der luftigen Karawane, die ſich mehr und mehr entfernte; weit ausgebreitet hielt er die Flügel und ſank, wie die Seifenblaſe ſinkt in der ſtillen Luft; er berührte die Waſſerfläche, ſein Kopf bog ſich zurück zwiſchen die Flügel, ruhig lag er da, gleich der weißen Lotos-blume auf dem ſtillen Landſee. Und ein leiſer Wind erhob ſich und kräuſelte die leuchtende Meeresfläche, ſtrahlend erſchien ſie, als ſei es der Äther, der ſich in großen breiten Wogen dahinwälzte; und der Schwan erhob ſeinen Kopf, und das leuchtende Waſſer ſpritzte wie blaues Feuer über ſeine Bruſt und ſeinen Rücken. Die Morgendämmerung beleuchtete die roten Wolken, der Schwan erhob ſich geſtärkt und flog gegen die aufgehende Sonne, gegen die bläuliche Küſte, wo die Karawane hingezogen war, aber er flog allein, mit Sehnſucht in der Bruſt, einſam flog er über die blauen ſchwellenden Wogen.

(*b.*) Die Sängerin bestieg scherzend die Bühne des Altertums und sang. Der Ort begeisterte sie; ich mußte an das wilde Pferd Arabien's denken, wenn es schnaubend die Mähne sträubt und von dannen jagt, es war dieselbe Leichtigkeit und Sicherheit; ich mußte an die schmerzerfüllte Mutter unter Golgatha's Kreuz denken, es war derselbe tief gefühlte Schmerz. Und ringsum ertönte, wie vor tausend Jahren, Beifall und Jubel: „ „Glückliche, vom Himmel Begabte!" " jubelten alle. Fünf Minuten später war die Bühne leer, die Gesellschaft verschwunden, keine Töne wurden mehr gehört,—alle fort, aber die Ruinen standen unverändert, wie sie noch nach Jahrhunderten stehen werden, und niemand weiß dann etwas von dem Beifalle des Augenblicks und von der schönen Sängerin, von ihren Tönen, ihrem Lächeln; alles ist vergessen und vorüber, selbst für mich wird diese Stunde ein entschwundener Moment sein.

Advanced Course, Junior Grade; Full Course, Junior Grade; and Second-year Course, Commercial.

ENGLISH LITERATURE. (Time, 2 hours.)

1. Quote *one* of the following:—
   (*a.*) The sonnet beginning—
   "Two Voices are there; one is of the Sea."
   (*b.*) A stanza on "Freedom," from Childe Harold.
   (*c.*) Two stanzas from Scott's "Outlaw."

2. Name the poem from which each of the following is taken. Explain the passage briefly but carefully.
   (*a.*) "We look before and after,
   And pine for what is not."
   (*b.*) "The kirk was deck'd at morning-tide
   The tapers glimmer'd fair."
   (*c.*) "This City now doth like a garment wear
   The beauty of the morning."
   (*d.*) "Thou wast not born for death, immortal Bird!
   No hungry generations tread thee down."
   (*e.*) "For him no wretches, born to work and weep,
   Explore the mine, or tempt the dang'rous deep."
   (*f.*) "The Niobe of nations! there she stands
   Childless and crownless in her voiceless woe."

3. Sketch vividly city life in England as Goldsmith saw it. What reasons have you for believing that he was a prejudiced observer?

4. Write brief answers to the following:—
   (*a.*) Why does the note of the cuckoo afford Wordsworth so much joy?
   (*b.*) If we may judge by the prescribed selections with what does Scott delight to associate beautiful or striking scenes in Nature?
   (*c.*) Point out several of the most impressive nature descriptions in Childe Harold. What do these suggest to us regarding the poet's taste?
   (*d.*) What are the main thoughts that possess Shelley as he listens to the song of the Skylark?
   (*e.*) In Keats's poem, Autumn, what is characteristic in the poet's manner of presenting the scene?

5. What were Byron's feelings with regard to Austria, France, the United States, and Britain respectively? Could he know these countries at present, do you think his feelings would undergo any change? Give reasons.

6. Yet, Italy, through every other land
Thy wrongs should ring, and shall from side to side;
Mother of Arts! as once of arms; thy hand
Was then our guardian, and is still our guide;
Parent of our religion! whom the wide
Nations have knelt to for the keys of heaven!
Europe, repentant of her parricide,
Shall yet redeem thee, and, all backward driven,
Roll the barbarian tide, and sue to be forgiven.

(*a.*) Scan line 6.

(*b.*) What name is given to this stanza-form? Why?

(*c.*) Paraphrase the stanza in good prose, bringing out its meaning clearly.

ENGLISH GRAMMAR. (Time, 1½ hours.)

A. Waddling over the scarred and pitted ground, which rendered Vimy Ridge *the* more *difficult* to cross, the uncouth tanks, *like* prehistoric *monsters* in appearance, steadily advanced to destroy the strongholds of the machine gun, *while* the brave Canadians, *eager* to close with the enemy, clambered over the tangled debris left by the ceaseless *pounding* of the British guns.

B. *So* live *that*, *when* thy summons comes to join
The innumerable caravan *which* moves
To that mysterious realm *where each* shall take
His chamber in the silent halls of death,
Thou go not *like* the quarry-slave at night
Scourged to his dungeon; but, sustained and soothed
By an unfaltering trust, approach thy grave
Like *one* who wraps the drapery of his couch
About him and lies down to pleasant dreams.

1. Write out in full each dependent clause in A and B, giving its kind and relation.
2. Give the part of speech and the relation of the italicized words in A and B.
3. Write out in full the infinitive phrases in A and B, giving the value and relation of each.
4. Write out in full the participle phrases in A and B, giving the value and relation of each.
5. Define indicative mood, subjunctive mood, and imperative mood, giving examples from B.
6. Select from A examples of the attributive, appositive, and predicative adjectives.
7. In the days of Ivanhoe the English language contained words derived from many sources —Celtic, Roman, Saxon, Danish, and Norman. Give the source of the following: Lincoln, reeve, Avon, pork, by-law, Walton, alderman, claymore, veal, riding.

ALGEBRA. (Time, 2 hours.)

[N.B.—*All work must be shown. It must be neat and accurate.*]

1. (*a.*) Simplify $42\left\{\frac{4x-3y}{6}-\frac{3}{7}(x-\frac{4}{3}y)\right\}-56\left\{\frac{1}{7}(3x-2y)-\frac{3}{8}(\frac{16}{3}x-y)\right\}$.

   (*b.*) Divide $x^4+\frac{9}{4}x^3+\frac{21}{8}x^2+\frac{33}{16}x+\frac{5}{16}$ by $x^2+\frac{3x}{2}+\frac{1}{4}$.

   (*c.*) Solve $4x+2y+z=14$, $3x-y+2z=3$, $x+7y-z=23$.

2. Resolve into factors :—

   (*a.*) $4x^2-25y^2+2x+5y$.

   (*b.*) h^6-k^8.

   (*c.*) $3x^4+2x^2y-56y^2$.

   (*d.*) $x^4+y^4-11x^2y^2$.

   (*e.*) $4ab(ab+1)-15$.

   (*f.*) $1-(m^2+p^2)-2mp$.

   (*g.*) $h+3k+h^3+27k^3$.

   (*h.*) x^4+4y^4.

3. (*a.*) Find the highest common factor of $a(a+c)-b(b+c)$, $b(b+a)-c(c+a)$, and $c(c+b)-a(a+b)$.

   (*b.*) Find the lowest common multiple of $(a-c)^2-(b-c)^2$, $a^2+b^2-2ac-2bc+2ab$, and a^4-b^4.

4. Simplify :—

   (*a.*) $$\frac{\frac{a}{1+a}+\frac{1-a}{a}}{\frac{a}{1+a}-\frac{1-a}{a}}.$$

   (*b.*) $$\frac{1}{x-\frac{1}{x+\frac{1}{x}}}-\frac{1}{x+\frac{1}{x-\frac{1}{x}}}.$$

5. (*a.*) Multiply $a^2-2ax+4x^2-\frac{16x^3}{a+2x}$ by $3-\frac{6x(a+4x)}{a^2+2ax+4x^2}$.

   (*b.*) Divide $\frac{2}{x}-\frac{1}{a+x}+\frac{1}{a-x}$ by $\frac{a+x}{a-x}-\frac{a-x}{a+x}$.

6. (*a.*) Express the following as algebraical equations :—

   (i.) A has x dollars and B has y dollars; after A gives B z dollars B has \$5 less than five-ninths of what A has.

   (ii.) A train runs up grade m miles in h hours; on the return trip it increases its rate of speed 4 miles per hour and makes the run in x hours less time.

   (*b.*) A collection of quarters, ten-cent pieces, and five-cent pieces, containing 32 coins, is worth \$3.60. There being twice as many five-cent pieces as quarters, find the number of each kind of coin.

Advanced Course, Junior Grade, Applied Science; and Full Course, Junior Grade, Applied Science.

Geometry. (Time, 2 hours.)

[Note.—*Draw neat figures, use printed capitals, and give authorities.*]

1. (*a.*) Any two angles of a triangle are together less than two right angles.
   (*b.*) What corollary follows from this proposition?

2. (*a.*) Construct a triangle, having given the base, the difference of the angles at the base, and the difference of the remaining sides.
   (*b.*) When is this problem impossible?

3. A straight rod of given length slides between two straight rulers placed at right angles to one another. Find the locus of its middle point.

4. The angle at the centre of a circle is double of an angle at the circumference, standing on the same arc.

5. Any two parallel tangents to a circle intercept on any third tangent a segment which subtends a right angle at the centre of the circle.

6. If in a circle two chords cut one another, which do not both pass through the centre, they cannot both be bisected at their point of intersection.

7. (*a.*) In an acute-angled triangle the perpendiculars drawn from the vertices to the opposite sides bisect the angles of the pedal triangle through which they pass.
   (*b.*) Enunciate a corollary, which follows from the above theorem, relating to the sides of the pedal triangle.

Algebra. (Time, 2 hours.)

[N.B.—*All work must be shown. It must be neat and accurate.*]

1. (*a.*) If $a=2$, $b=3$, $c=1$, $q=4$, $r=6$, find the value of $5a^bc^r - 3^a2^b + 2^ra^5 - c^bb^q$.
   (*b.*) Solve $\frac{1}{4x}+\frac{1}{3y}=2=2\left\{\frac{1}{y}-\frac{1}{2x}\right\}$.
   (*c.*) Find the cube root of $54 - 27x^3 + \frac{8}{x^6} - \frac{36}{x^3}$.

2. Resolve into factors :—
   (*a.*) $x^4+y^4-7x^2y^2$.
   (*b.*) $51-14a-a^2$.
   (*c.*) $pn(m^2+1)-m(p^2+n^2)$.
   (*d.*) $x^2y+3xy^2-3x^3-y^3$.
   (*e.*) $2(a^4b^2+5)-9a^2b$.
   (*f.*) $a(a-1)x^2+(2a^2-1)x+a(a+1)$.
   (*g.*) $4r^4+81t^2$.
   (*h.*) $4(ab+cd)^2-(a^2+b^2-c^2-d^2)^2$.

3. Simplify :—

(*a.*) $\dfrac{1+8x^3}{(2-x)^2} \times \dfrac{4x-x^3}{1-4x^2} \div \dfrac{(1-2x)^2+2x}{2-5x+2x^2}$.

(*b.*) $\left(x^{\frac{n}{n+1}}\right)^{n^2-1} + \dfrac{\sqrt{x^{2n}}}{x}$.

4. Solve :—

(*a.*) $ax+by=l,\ bx+ay=m.$

(*b.*) $\dfrac{4}{x-1} - \dfrac{5}{x+2} = \dfrac{3}{x}$.

5. Solve :—

(*a.*) $x^3-y^3=56,\ x^2+xy+y^2=28.$

(*b.*) $\dfrac{1}{1-x} + \dfrac{1}{\sqrt{x}+1} + \dfrac{1}{\sqrt{x}-1} = 0.$

6. (*a.*) Find the value of $\dfrac{\sqrt{a}}{\sqrt{a}-\sqrt{x}} \div \dfrac{\sqrt{a}+\sqrt{x}}{\sqrt{x}}$.

(*b.*) What are eggs worth a dozen when three less for 45 cents would increase the price $\frac{1}{2}$ cent each ?

Second-year Course, Commercial.

Spelling. (To be dictated.) (Time, 1 hour.)

[Note.—*The Presiding Examiner, when dictating this paper, will pronounce each word and phrase distinctly. He will also allow a reasonable time for writing each word and phrase before the following one is pronounced.*]

1. Supersede, statistics, precede, arrears, resuscitate, preferred, heinous, anonymous, pseudonym, embarrassment, hemorrhage, tacit, auxiliary, appalling, peritonitis, pecuniary, mayoralty, plumber, chancery, encomium, journeys, subpoena, innuendo, skein, schism, inoculate, hieroglyphics, synthesize, accruing, egregious, mahogany, responsible, psychology, parvenu, fascinate, battalion, chamois, scrutineer, reticent, interpreter, travesty, obloquy, inimical, buffet, despicable, calumny, mitigation, clearance, cyclometer, oppressor, ingenuous, incomparable, dependent, disseminate, bona fide, concurred, itemize, discernible, hosiery, volatile, delinquent, collegiate, inheritance, conscious, formally, opaque, stratagem, impetus, defendant, perpetuity, inevitable, twelfth, celebrity, secede, until, recommend, particle, hybrid, requisition, naphtha, bituminous, prophecy, symptom, valiant, aforesaid, lucre, chiffon, omelet, acetic, realm, eulogy, unique, excise, pristine, shriek, reimburse, technical, utilitarian, subterfuge, hypothesis.

2. Petition the city council; imminent danger; edible fruits; a steep ascent; a partition or dividing wall; an accepted truth or principle; Secretary and Treasurer of the Manufacturers' Association; an eminent politician; audible sounds; a stationary engine; the torn envelope; a serial story; a carton of sugar; books and stationery; ladies' and children's shoes; waive protest; Province of Saskatchewan; wave the flag; emigrate from Canada; the principal clause; the school principal; French accent; lose your way; buy milk at the dairy; tenement house; undefined boundary; a cereal or grain plant; an amusing cartoon; write a diary; the occupant or tenant; an indefinite statement; loose clothing; men of large stature; carrot, a vegetable; the stone quarry; diverse opinions; prefer the latter; a later proffer; massage treatment; gold twenty carats fine; a sedentary occupation; shorthand characters and symbols; the speaker's sentiments; ride in a hansom; telegraphic message; to envelop or entirely surround; confident of victory; sea divers; the assent of the sovereign to bills passed by Parliament; sediment in the liquid; the indited sentence; to accomplish his purpose; cymbals or musical instruments; an associate or accomplice; indebted to his creditors; his confidant and adviser; the learned counsel's advice.

TYPEWRITING.

[NOTE TO PRESIDING EXAMINER.—*Please provide each candidate with plain white letter paper and one sheet of carbon paper.*

[NOTE.—*Candidates are allowed 5 minutes to read over this paper. Time allowed for Section A, 10 minutes. Section B is to be written in full and the time taken by each candidate to be recorded by the Presiding Examiner. Write each part of Section B on a separate sheet of paper, and hand in carbon copies with originals. A carbon copy of Section A is not required.*]

Section A.

And, therefore, first of all, I tell you earnestly and authoritatively (I know I am right in this), you must get into the habit of looking intensely at words, and assuring yourself of their meaning, syllable by syllable—nay, letter by letter. For though it is only by reason of the opposition of letters in the function of signs, to sounds in the function of signs, that the study of books is called "literature," and that a man versed in it is called, by the consent of nations, a man of letters instead of a man of books, or of words, you may yet connect with this accidental nomenclature this real fact—that you might read all the books in the British Museum (if you could live long enough), and remain an utterly "illiterate," uneducated person; but that if you read ten pages of a good book, letter by letter—that is to say, with real accuracy—you are forevermore in some measure an educated person. The entire difference between education and non-education (as regards the merely intellectual part of it) consists in this accuracy. A well-educated gentleman may not know many languages, may not be able to speak any but his own, may have read very few books. But whatever language he knows, he knows precisely; whatever word he pronounces, he pronounces rightly; above all, he is learned in the peerage of words; knows the words of true descent and ancient blood, at a glance, from words of modern canaille; remembers all their ancestry, their intermarriages, distant relationships, and the extent to which they are admitted, and offices they hold, among the national noblesse of words, at any time and in any country. But an uneducated person may know, by memory, many languages, and talk them all, and yet truly know not a word of any—not a word even of his own. An ordinary clever and sensible seaman will be able to make his way ashore at most ports; yet he has only to speak a sentence of any language to be known for an illiterate person; so also the accent, or turn of expression of a single sentence, will at once mark a scholar. And this is so strongly felt, so conclusively admitted, by educated persons, that a false accent, or a mistaken syllable is enough, in the parliament of any civilized nation, to assign to a man a certain degree of inferior standing forever.—John Ruskin: Sesame and Lilies.

(415 words.)

Section B.

1. Vancouver, B.C., June 26, 1917. Mr. Henry W. Wilson, Empress Hotel, Victoria, B.C. Dear Sir: In compliance with your request, we have reserved Lower Berth No. 9, Car 6704, Train No. 93, Vancouver to Montreal, Que., leaving Vancouver 8.20 p.m., June 28. Yours truly.

2. Toronto, Ontario, June 20, 1917. Mr. David L. Price, New Westminster, B.C. Dear Mr. Price: Recently in response to your request for information concerning correspondence instruction, we sent you a bulletin containing a list of the courses offered by this Bureau. We trust that it reached you promptly and gave you the desired information. ¶ Thus far, we do not seem to have heard further from you. I write to ask whether there may be any matters connected with our courses, that are not fully explained in the bulletin, on which you desire further information. If so, I should be pleased to give it, or to answer any questions which you may wish to ask. ¶ You can hardly have given up the idea of self-improvement by the method of correspondence instruction. Home study by this method is not an experiment. Its success has been fully demonstrated. We now have thousands of students and the number is increasing daily. Many of them have done most excellent work —we are proud of what they have accomplished. It is the best evidence of the success of the service that we render. You can do as well as they, and we are glad to offer you the opportunity. ¶ The University Extension Division is trying to render the most useful service to the largest possible number of people. Our work is not on a money-making basis, but is being promoted for the benefit of all persons who desire to avail themselves of it. We should be glad to have you profit by our service. Whether you care to enrol or not, you may have friends to whose attention you might bring the work we are trying to do. If you will speak of our courses to them, we shall be grateful. ¶ I enclose a blank for your use in case you should decide now to enrol. Any communication from you will receive prompt attention. ¶ Hoping to hear from you shortly, I am, Very sincerely yours, Secretary, Bureau of Correspondence Instruction.

3. Toronto, Ontario, Canada, June 25, 1917. Messrs. C. F. Harrison & Co., Limited, Bridgetown, Barbados, B.W.I. Gentlemen: In reply to your favour of the 29th ult., we have much pleasure in enclosing descriptive literature, showing illustrations and specifications of our Export Model Bicycles. ¶ For several years we have done quite a considerable business with both "Massey" and "Red Bird" bicycles in Australasia and New Zealand in competition with British and foreign makes. In fact, the bicycles we have shipped to Australasia were our regular Canadian Models, while the machines illustrated herewith are made to conform more in general appearance to the British machines, and include such points as square cranks, extension mud guards, steel rims, and front rim brakes. ¶ These bicycles must not be confused with what are commonly known abroad as American machines. They are high grade, and for easy running, durability, and finish, will compare with any bicycle built anywhere in the world. Considering the high quality of our machines, we believe you will find the quotations very favourable. ¶ We trust you will send us your trial order which we feel sure will result in leading to considerable business between us. ¶ Awaiting your reply with interest, we are, Yours very truly.

4. Write the following invoice properly centred on the sheet (no vertical ruling required) :—

THE EBY, BLAIN CO., LTD., Toronto, Ont., sell to Messrs. J. A. Hopkins, North Vancouver, B.C.

	Price.	30 dys.	Net Cash.	90 dys.
2 kegs Snowflake Baking Soda	2.25	.....		
5 doz. Corkscrew Can Openers	.85	.....		
4 doz. Imperial Pickles, Mixed	1.00	.....		
4 doz. Shino, 5 cts	.45	.....		
2 cs. Toasted Corn Flakes	2.85	.....		
6 bx. Taylor's Carbolic Soap	.40	.....		
10 cs. King Edward Matches	3.60	.....		
6 dz. Chloride of Lime, 1's	.85	.....		
10 cs. Quaker Puffed Rice	2.90	.....		
2 cs. Cowan's Cocoa, ¼'s	1.30	.....		
4 dz. Cow Brand Baking Soda, 5 cts	.45	.....		
3 cs. Gold Medal Table Syrup, 2's	2.25	.....		
3 dz. Magic Baking Powder, 5 cts	.75			.....
2 dz. Red Cross Baking Powder, 5 cts	.45			.....
2 dz. Nonsuch Stove Polish, 10cts	.90			.....
8 lb. Jumbo Roasted Peanuts	.15		.....	

SHORTHAND THEORY. (Time, 1 hour.)

1. When do you use the circle, and when the stroke in writing *s*? Illustrate your answer with several examples.

2. Name and illustrate the use of :—

   (*a.*) The prefixes.

   (*b.*) The suffixes and terminations.

3. Write outlines for the following words: Courage, carriage, property, propriety, preparation, appropriation, factor, factory, regard, regret, poor, pure, learned (verb), learned (adjective). impatient, impassioned, prosecute, persecute, staid, steady, purpose, propose, petrify, putrefy, favoured, favourite, considerate, considered, provide, pervade.

4. "In order to obtain more facile outlines, certain medial consonants may be omitted." Give three rules with examples to illustrate the above.

5. Write in fully vocalized shorthand the following words: Chagrin, salvationist, elegancies, foundation, pyramid, arisen, amalgam, apportionment, elusive, civilian, blemished, remunerative, shoulders, social, permanency, microscope, incalculable, silverware, aspirer, fairer, coercion, geography, spaniel.

6. Write in your briefest reporting style :—

   A gentleman, who was himself the principal manager of one of the most important railways in this country, once remarked that the secret of good management in any business or trade was to attend strictly to one thing at a time. He never tried to

do two things at once, and we are told that he resisted, too, any attempt on the part of other gentlemen to make him alter his rule. If he had a meeting with one person, whether that person was the chief of a department, a medical doctor, a scripture reader for some religious society, or an advocate for some new work of the Christian religion—it mattered not; he would see no one else until he had done with the business in hand. If others called they had to wait till the first visitor went away, which might be in ten minutes or in half an hour; or they could call again upon a more favourable opportunity. "One at a time, and let each take his turn," was the rule he put down for himself, and by following it steadily he got through an amount of work that I believe would have been altogether above and beyond the powers of most gentlemen. The number of people who interviewed him each week was incredible, and though they did not all go away equally well pleased with themselves and with him, yet they seldom failed to thank him for his courtesy of manner and language, and they never accused him of want of thought. To be sure, he would not always see eye to eye with those who came to meet him, nor could he approve of the methods of all who worked near him. In several instances he was known to send out for an official that he might tell him his duties, and give him a warning if he had done wrong. He never made light of a serious offence, but no man was ever called upon to explain a mere slip, and no one was sent away, however serious his fault might be, till it was impossible to doubt his guilt.

SHORTHAND DICTATION.

[NOTE.—*The Presiding Examiner will read each section twice; first, rapidly, and secondly, at the rate of one hundred words per minute. Candidates will write at the second reading only. When all the dictation has been given, the candidates shall be allowed forty minutes in which to reproduce their work in longhand. Both shorthand and longhand are to be handed in. Candidates may use either pen or pencil in writing their shorthand.*]

1. Gentlemen: We have on hand an oversupply of Stenographers' Note Books. In order to dispose of our surplus stock before our July inventory, we shall (25) quote prices as per the attached list for the next thirty days, or as long as the supply lasts up to that time. We shall (50) be pleased to submit samples, or have our representative call at your request. Yours very truly (66).

2. Dear Mr. Martin: You have doubtless overlooked the matter of your membership dues for 1917, and we take the liberty of bringing it to (25) your attention now. We take it for granted that you expect to continue with us. We believe the Association offers exceptional returns for the small (50) investment, and at the same time, exceptional opportunities for helpfulness through your identification with it.
   If you intend to continue your membership, but find you (75) are unable to pay the dues at once, kindly signify your intention by filling in the enclosed renewal blank, noting thereon when we may expect (100) payment, and return the blank to us in order that there may be no break in our records. Cordially yours (120).

3. Dear Sir: I wish you would look over this booklet, and after reading it, give our representative a few minutes to show you what the *Burroughs* (25) is doing for business schools.
   If he cannot demonstrate to your satisfaction that the Burroughs will not only assist you in taking care of (50) the business you already have, but prove to be an effective business getter for your school, he will not trouble you further.
   Kindly sign the (75) card—there is no expense or obligation. At any rate, please read the booklet. Yours truly (91).

4. Gentlemen: We have completed the audit of the accounts of your Company to the 31st May last, and we now hand you interim and (25) approximate Balance Sheet at that date, which is certified by us so far as clerical accuracy only is concerned. You will notice that the Suspense (50) Account does not represent the final balance received from the old Company, inasmuch as averages amounting to over $1,500 (75) have been collected by the Limited Company on account of the old Company, and against this amount insurance calls have been paid for liabilities incurred (100) prior to the formation of the Company. As soon as all these items have been finally settled, an adjustment of the Suspense Account between the (125) old partnership and the Company will be necessary. Yours faithfully (135).

5. Dear Sir: We invite your examination of the enclosed blotters for advertising purposes. Unlike most printed matter, they are not thrown into the waste basket (25) but will be retained and used for some time.

We shall be pleased to negotiate with you for a yearly supply, to be delivered monthly (50). At our up-town office, which is equipped for the purpose, we can address and mail them for you. At this office, 1308 (75) Arch Street, imitation typewritten letters will be printed, folded, enclosed, addressed, and mailed at reasonable prices.

Catalogues, booklets, circulars, folders, labels, office stationery, etc., (100) can be printed in our modern shop, which has facilities for turning out artistic advertising matter. We have our own bindery, which we equipped with (125) folding machines so as to facilitate our production processes and to effect quicker deliveries.

Orders for designing, engraving, and steel plate printing will be executed (150) in the very best manner. Power presses of recent manufacture have been installed, ensuring the production of high-class stationery. Yours very truly (173).

COMPOSITION. (Time, 2 hours.)

[NOTE TO PRESIDING EXAMINER.—*Please provide candidates with plain white letter paper.*]

1. (*a.*) Having in mind Washington Irving's description of the Bobolink, give an outline for a short composition.

   (*b.*) This description possesses artistic qualities of style. Point out what characteristics make it "artistic."

2. Explain the difference between *simile* and *metaphor*, giving an example of each.

3. In a concise letter to the Premier of British Columbia, give your views on Prohibition.

   [N.B.—Special attention will be paid to the form of your letter. Use the letter paper provided.]

4. Write an essay on *one* of the following subjects:—

   (*a.*) Venice. (Byron's Childe Harold.)

   (*b.*) She Was a Phantom of Delight. (Wordsworth.)

   (*c.*) The Entrance of the United States into the War.

BOOK-KEEPING. (Time, 2½ hours.)

[NOTE.—*The attention of candidates is called to the importance of neat as well as accurate work.*]

1. At the close of the year Interest and Discount Account in your ledger appears as follows:—

Dr. INTEREST AND DISCOUNT. *Cr.*

1916.		1916.	
Feb. 3. To J. Simpson & Co.	$17.60	May 11. By Cash	$12.90
„ 17. „ Bills Receivable	9.20	July 5. „ Bills Payable	5.10
Oct. 12. „ Cash	15.00		

There is interest accumulated on notes to the amount of $22.10 in your favour. Close the account, leaving it ready for next year. What other accounts are affected? How?

2. The account of the Review Printing Co. for the past month has been rendered to you. You have picked out the items, and, having added them under their respective heads, have found the summary to be as follows:—

Expense items	$ 8.30
Advertising items	56.50
Mdse. items	190.10
Your personal items	2.00
	$256.90

Make the journal entry for this.

3. Your note in favour of The Morris Electrical Construction Co. for $500 is due to-day, but you cannot pay it. There is also the sum of $40.50 to their credit in your ledger. You pay them $100, and give them a new note to cover the balance due them, $440.50.

Give: (*a.*) Your journal entry.

(*b.*) The journal entry of The Morris Electrical Construction Co.

4. John Hardy of Victoria drew a draft for $250 at 60 days' date on Charles Young of Vancouver in favour of Robert Smith of Vancouver. Young duly accepted the draft. In the course of business Smith transferred the acceptance to you.

Give: (*a.*) Hardy's entry when he drew the draft.

(*b.*) Smith's entry when he received the draft.

(*c.*) Young's entry when he accepted the draft.

(*d.*) Smith's entry when he transferred the acceptance to you.

(*e.*) Your entry when you received the acceptance.

5. When taking charge of the books of the partnership firm of Stone and Mason you found the ledger in confusion, and you concluded it best to open a new set of accounts. You waited till the regular stock-taking time, and then prepared the following statement of assets and liabilities:—

Assets—

Cash	$ 175
Merchandise, as per inventory	9,300
Bank, on deposit	3,700
Plant, as per valuation	7,200
Bills Receivable, on hand	2,800
Office Furniture, inventory	500
Real Estate, valuation	7,400
Accounts Receivable, conservative valuation	4,000
	$35,075

Liabilities—

Mortgage Payable	$ 2,800
Bills Payable	5,700
Accounts Payable	2,420
	$10,920

The partners had equal interests in the business. Show the new set of ledger accounts.
After the ledger was opened you found that an invoice of goods amounting to $560, bought from John Fraser and Co., on account, had not been entered at the time of purchase. Enter this now in your ledger.

6. Manning and Morrison are partners, sharing profits and losses—Manning, two-thirds; Morrison, one-third. They have failed and the following is their position as taken from their ledger:—

Assets	$11,100

Liabilities—

Due creditors on Bills Payable and open account	$ 6,000
Manning, capital account	3,500
Morrison, capital account	1,600
	$11,100

At a sale their assets realize only $6,000.
Show the partners' capital accounts in their final form.

7. "Cut down the ledger by making subsidiary books do the work." Name six of the more common of these books and state accurately their use and their relation to the ledger. Of what importance are these books when you are taking a trial balance and preparing a financial statement for the year?

8. From the following ledger totals and other information prepare: (*a*) A Profit and Loss Statement; (*b*) a Statement of Assets and Liabilities.

	Dr.	*Cr.*
Capital	$ 750	$ 5,600
Cash	16,259	15,900
Bank	15,500	13,760
Merchandise	13,740	16,410
Accounts Receivable	14,975	11,995
Real Estate	4,000	
Bills Payable	2,500	5,170
Accounts Payable	10,495	11,800
Horse, Vehicles, etc.	850	
Office Furniture	350	
Expense	1,216	
	$80,635	$80,635

Merchandise inventory	$3,260
Value of Real Estate	3,500
Horse, Vehicles, etc., value	900

Write 5% off Accounts Receivable.
Write 10% off Office Furniture.

9. A Joint Stock Company has a paid-up capital of $100,000. The net profits for the year are $8,962.60. A dividend of 7% is declared, and the same is paid by cheque. The sum of $1,000 is passed to Reserve Account.
Journalize this, *or* show it entered in the ledger.

PENMANSHIP. (Time, 1 hour.)

1. Write the following:—

In a turquoise twilight, crisp and chill,
A kafila camped at the foot of the hill.
Then blue smoke-haze of the cooking rose,
And tent-peg answered to hammer-nose;
And the picketed ponies, shag and wild,
Strained at their ropes as the feed was piled;
And the bubbling camels beside the load
Sprawled for a furlong adown the road;
And the Persian pussy-cats, brought for sale,
Spat at the dogs from the camel-bale;
And the tribesmen bellowed to hasten the food;
And the camp-fires twinkled by Fort Jumrood;
And there fled on the wings of the gathering dusk
A savour of camels and carpets and musk,
A murmur of voices, a reek of smoke,
To tell us the trade of the Khyber woke.

2. (*a.*) Group the capital letters as well as you can according to the similarity of their formation, and write two lines of each group.
(*b.*) Treat the small letters in the same way.

3. Write the following rapidly six times:—
The young man who wants to succeed in business keeps before him this question: "What am I doing day by day, week by week, month by month, year by year, to build up my personal assets, my business knowledge, my producing ability?"

4. Write the following addresses:—
F. Z. Thompson, 2678 East 49th St., New York.
Delphoritz, Winch & Londres, 345 Main St. West, Chicago, Ill.
Mrs. G. J. Yonge, Calgary, Alta.
The Illuminated Watch and Clock Co., 190 Sparks St., Ottawa, Ont.

ARITHMETIC. (Time, 30 minutes.)

A. Rapid Calculation.

[NOTE.—*The time allowance for Arithmetic, Second-year Course, Commercial, is 2 hours; after the expiration of 30 minutes, answers to Section A (Rapid Calculation) will be collected, and Section B (General) will then be distributed to candidates.*]

1. Customs revenue from the Port of Vancouver, B.C., for the government fiscal years of 1915-16 and 1916-17 is as follows:—

	1916-17	1915-16
April	$466,816 20	$297,515 50
May	531,784 64	356,946 45
June	451,063 71	323,716 03
July	478,087 66	337,846 52
August	610,068 69	379,450 36
September	582,750 67	363,319 55
October	574,991 48	518,537 99
November	554,490 12	463,402 24
December	429,383 57	312,695 41
January	395,822 13	506,525 39
February	542,980 47	444,126 26
March	695,576 48	462,592 69
Totals		

(*a.*) Find the total revenue for the year 1916-17.

(*b.*) Find the total revenue for the year 1915-16.

(*c.*) How much more revenue was collected during the fiscal year 1916-17 than during the fiscal year 1915-16?

(Answers only are required.)

2. A commission agent charges 5% for selling apples. During the months of January and February he sold 2,198 boxes at $1.84 per box. Find his commission.

3. (*a.*) Multiply 356.9875 by 31.02

(*b.*) Divide 6.0008976 by 601.765.

4. Find the total amount of the following bill, less 3% for cash:—

16	lb. Dairy Butter	@38½c.
8	lb. Rice	@ 6¾c.
17.5	lb. B. Sugar	@ 9c.
13	lb. Coffee	@43½c.

5. At $25.80 per thousand board feet, what will it cost to cover with 2" plank a yard 167 feet long and 86 feet wide?

6. A fruit-dealer buys oranges at $4.50 per crate of 200 and sells them at 40 cents a dozen. Find his gain per cent.

7. From $1,440 take: (*a*) 20% of itself; (*b*) 12½% of itself; (*c*) 33⅓% of itself; (*d*) 11$^{1}/_{9}$% of itself; (*e*) 16⅔% of itself.

8. Find the compound interest on $1,600 for two years three months at 5% per annum, compounded yearly.

ARITHMETIC. (Time, 1½ hours.)

B. General.

[NOTE.—*The time allowance for Arithmetic, Second-year Course, Commercial, is 2 hours; after the expiration of 30 minutes, answers to Section A (Rapid Calculation) will be collected, and Section B (General) will then be distributed to candidates.*]

1. Find, true to three places of decimals, the value of:—

(*a.*) The square root of 5.

(*b.*) The cube of the square root of 5.

(*c.*) The decimal equivalent of $^{3}/_{32}$.

2. Give a connection between:—

(*a.*) Capacity, Canadian and Cubical Contents, Canadian.

(*b.*) Weight, Canadian and Capacity, Canadian.

(*c.*) Weight, Metric and Weight, Canadian.

(*d.*) Length, Metric and Length, Canadian.

(*e.*) Capacity, Metric and Weight, Metric.

3. Express as percentages:—

(*a.*) A leakage of 3 pints from a 10-gallon cask.

(*b.*) A tax of 9d. in the £.

(*c.*) The wastage when a shaft 1" diameter, 10" long, is turned from a shaft 1¼" diameter, 12" long.

4. The bank will to-day allow me $653.85 for a note for $660, which has 34 days yet to run. What rate of discount is the bank charging?

5. (*a.*) What sum, invested at the beginning of each year for 3 years at 6% compound interest, will at the end of the 3 years amount to $5,000?

(*b.*) What is the cash surrender value of a perpetuity of $300, if money is worth 5%?

6. Fill in the respective amounts and find the total of the following bill:—

		List Price.	Net Price.	Discount.	Amount.
2½ lb.	1 Pc. 12″ x 8″ Hard Sheet Brass 3/32″ thick.	....	.82 lb.	....	
1 gross.	¾″ No. 8 F.H. Brass Screws	2.00 gr.	....	25 %	
⅔ lin. yd.	30″, 3″ Mesh, Galv. Wire Cloth.....	....	.66 lin. yd.	....	
10 lb.	1½″ Galv. Boat Nails.....	....	16.30 per 100 lb.	....	
⅙ doz.	6/32″ No. 109 Bit Stock Drills.....	3.10 doz.	....	35 %	
⅓ dz. pr.	2″ No. 330 Galv. Rowlocks.....	....	4.50 doz. pr.	....	
1 only.	⅜″ No. 224 Brass Tap, inside.....	.75 each.	....	35 %	
2 "	½″ 45° Brass Elbows	.20 "	....	40 %	
1 "	⅜″ Rough Brass Tee	.28 "	....	40 %	

Laws of Business. (Time, 2 hours.)

1. (*a.*) Name six classes of contracts that must be in writing to be binding.
(*b.*) Give three illustrations of oral contracts that are binding.
(*c.*) What is meant by the *consideration* in a contract?
(*d.*) What is a *penalty clause* in a contract?

2. On June 22, 1917, Geo. H. Benson bought a second-hand delivery automobile from James Hudson for $500, giving his cheque on the Royal Bank of Canada for $250, a draft at 30 days' sight on J. T. Stevens for $50, and his note at 6 months with interest at 8% for $200. Write, in proper form and size, the cheque, the draft, and the note.

3. (*a.*) What are the departments of the business of a bank? Explain each.
(*b.*) What is a Canadian bank prohibited from doing?
(*c.*) What funds has a bank at its disposal?
(*d.*) What provision is made for the security of (i) note-holders, (ii) depositors?
(*e.*) What is the difference between a *current account* and a *savings account?*

4. What is an endorsement? For what purposes are endorsements made? Give the more common forms of endorsement and explain the value of each. Is an endorsement ever used on a non-negotiable note?

5. "A minor is more or less under legal incapacity to contract." What is a minor? To what extent is he under legal incapacity? To what extent is he not? To what extent are parents liable for a minor's actions? For what actions of a minor are the parents not responsible?

6. What is an agent? How is he appointed? How are his duties and powers determined? What precaution should one take when dealing with an agent? Write an agent's receipt for rent collected, supplying names, date, etc.

7. Explain: Affidavit, collateral, innocent holder, equity of redemption, letter of credit, compromise, statute of limitations, power of attorney, unwritten law, accommodation note.

Third-year Course, Commercial.

SHORTHAND DICTATION.

[NOTE.—*The Examiner will read each section twice; first, rapidly, and secondly, at the rate of one hundred and thirty words per minute. Candidates will write at the second reading only. When all the dictation has been given, the candidates will be allowed fifty-five minutes in which to reproduce their work in longhand. Both shorthand and longhand are to be handed in. Candidates may use either pen or pencil in writing their shorthand.*]

1. Dear Sir: We thank you for your order for one copy of Graves' "Students' History of Education." This is being referred to the order department for prompt attention.

   Munroe's "Textbook in the (32) History of Education" lists at $1.90, and Munroe's "Source Book in the History of Education," at $2.25. From the list price, we quote you our regular (65) discount of 20%, carriage being charged for extra.

   We have a complete list of educational works, comprising many subjects, and recommend it for consideration when you are in need of additional books (97). Very truly yours (100).

2. Dear Madam: It is but two years since I introduced the "Dorothy Dodd" shoe. Even in that short time it has achieved a truly phenomenal success, a success that its greater than (32) I had dared to hope for.

   The fact that it was instantaneously so successful, and the fact that its popularity and its sales are increasing at so wonderful a rate, are the best (65) evidence I need offer that if you are not already a wearer of the "Dorothy Dodd" shoe, you should now become one.

   The little "service book" enclosed portrays the leading styles for (97) the spring and summer. It is designed to assist women in deciding just what style of shoe to select for each particular occasion or service. I hope it may prove of interest to (130) you.

   The sale of "Dorothy Dodd" shoes is confined to a single high-grade store in each city, and I ask the favour of your inspection of the new styles which are (162) now on display. Sincerely yours (167).

3. Toronto Business Institute, Toronto, Ontario, Canada. Gentlemen: Dictionaries are all-important in every school. Business schools are no exception, and they, more than any other type of school, demand dictionaries in the (32) handiest form, containing the words of everyday business usage and the new words that the progress of the world has brought into use.

   Webster's New Standard Dictionaries are kept strictly up to date (65). The system of diacritical markings is uniform, and the definitions are concise and clear. They should appeal to every teacher and every pupil in a business school.

   Your attention is invited to (97) the enclosed descriptive circulars of these dictionaries. May we inquire what dictionary is used in your school? Is a change desired? If so, would you like us to submit samples of the Webster's (130) New Standard? Yours very truly (135).

4. Dear Sir: We are pleased to announce that on June first we took formal possession of the Model Garage located at 467-469 Brown Street, where we (32) are fully equipped to give efficient service to all who favour us with their patronage.

   Our repair shop will occupy the spacious well-lighted second floor of the building. Its equipment will be (65) second to none, and it will be managed by one who has for many years enjoyed an enviable position among the best automobile engineers in this city.

   You are most cordially invited (97) to inspect our plant at your convenience. Respectfully yours (106).

5. A few days will give you an understanding of your employer's wants. It is your business to conform to his ideas as nearly as possible, regardless of whether they coincide with your (32) own opinion of how the work should be done. Do not indulge in any controversies over grammar or spelling, even though you know you are right. After expressing your opinion, if the man (65) stubbornly insists that you are wrong, make the change

as requested. The letter will not bear your signature, and even though the recipient pronounce it a "stenographer's mistake" (which he undoubtedly will) (97) this will not harm you. Your recommendations will come from the firms who have employed you, not from their correspondents. As the days go by, and you begin to feel more at ease (130) in your new work, you will naturally become better acquainted with your fellow employees. Be courteous to all, but do not become too friendly with any. It is a safe rule "not (162) to mix business and social interests" (168).

Accountancy Practice. (Time, 2 hours.)

1. From the following particulars of the business of Gordon and Brown, General Merchants, prepare Departmental Accounts, showing the gross profit on groceries, dry goods, boots and shoes, and Profit and Loss Account for the year:—

	Groceries.	Dry Goods.	Boots and Shoes.
Stock in hand 1st January	$ 3,500	$2,000	$3,000
Stock in hand 31st December	4,500	2,500	2,500
Purchases	7,500	5,000	2,900
Sales	10,620	9,500	4,750
Duty and Charges	1,500	1,000	1,000

The following additional payments and allowances have been made during the year:—

Carriage	$ 250
Wages and Salaries	1,500
Stationery and Stamps	50
Rent	250
Rates and Taxes	90
Discounts allowed to customers	500
Trade Discounts received	750
Advertising	1,876
Exchange on cheques	4

2. On May 23, Henry Williams deposited with his broker $1,200 as margin with instructions to purchase 50 shares of Dominion Metals, Limited, at 96¾. The stock was sold on June 26, at 103½. The broker allowed Williams 7% on deposit and charged him 7% on purchase price and ⅛% brokerage each way. Show Henry Williams' account in the broker's books.

3. Alton and Barrs engaged as equal partners in a stock-raising enterprise with a capital of $10,000, each contributing one-half. Alton received a salary of $200 a month for managing the ranch, and Barrs $100 a month for keeping the books and conducting the business. At the end of three years they decided to terminate the business, and Barrs reported the following receipts and payments:—

Receipts.

Alton's investment	$ 5,000
Barrs' investment	5,000
Sales of cattle	83,687
Loans	15,000

Payments.

Purchase of cattle	$57,000
Loans repaid	14,000
Alton's salary	4,200
Barrs' salary	3,600
Interest	1,000
Expenses, including rent	9,000
Alton's withdrawals	1,800
Barrs' withdrawals	1,200

A round-up and branding of the herd showed the following inventory: 30 head @ $24, 38 head @ $30, 75 head @ $43, 10 head @ $60, 75 head @ $12, 100 head @ $8. There remained with the bankers a balance of $16,887, and other assets were as follows: Horses: $900, tools etc. $200, supplies $250, accounts receivable $1,750, notes receivable $600, accrued interest on notes receivable $25. The firm owed the following bills: Branding irons $67, salt $180, loan $1,000, unpaid wages $980, bills payable $340, accrued interest on bills payable $18.

(*a.*) Prepare such statements as are necessary to show: (1) The financial condition of the copartnership at its termination; (2) the results of the three years' operations.

(*b.*) Write up the partners' accounts.

4. The firm of Ross and Carr, furniture dealers, of which William Ross and Andrew Carr, sharing profits equally, are the sole proprietors, is converted into a joint stock company. The new company takes over the whole assets and liabilities of the old firm as at the 1st of January, 1917. The following is the balance sheet of the old firm:—

ROSS & CARR.

Balance Sheet as at 31st December, 1916.

Assets.		*Liabilities.*	
Customers' Accounts	$ 8,000	Creditors' Accounts	$ 7,000
Goods	14,000	Bills payable	2,000
Warehouse	3,000		$9,000
Bank of Montreal	1,000	Partners' Capital—	
		W. Ross $11,000	
		A. Carr 6,000	
			17,000
	$26,000		$26,000

The new company is to have a capital of $50,000 divided into 500 shares of $100 each. It is proposed to issue at present only $30,000. The amount payable to the vendors is $20,000, of which $5,000 is payable in cash and $15,000 in 150 shares of $100 each, to be held as fully paid. The remainder of the capital issued, $15,000, is fully subscribed and paid.

Give the necessary journal entries to open the books of the new company.

STATUTE LAW. (Time, 2 hours.)

1. Interpret the following terms as used in the Bills of Exchange Act: Acceptance, action, bank, bearer, bill, note, delivery, holder, issue, value, defence, non-business days, endorsement.

2. In writing a cheque on your bank, how would you fill out the line:

Pay to the order of .....

if you wished: (*a*) to draw cash for your own use; (*b*) to pay a note at your own bank; (*c*) to pay the weekly wages of a number of regular employees; (*d*) to pay for a draft on a Seattle Bank; (*e*) to transfer your account from your bank to another bank?

3. Explain the terms: "Acceptance for honour *supra* protest"; "Payment for honour *supra* protest." What liability does a person incur by accepting for honour supra protest, and under what conditions does he incur such liability?

4. How may a bill that is:—
   (*a.*) Negotiable by endorsement be made negotiable without endorsement?
   (*b.*) Negotiable without endorsement be made negotiable by endorsement?
   (*c.*) Negotiable by endorsement be made non-negotiable?

5. "It shall be the duty of the company to make a return to the Secretary of State whenever a written request shall be by him made therefor, containing the following particulars:" Dominion Companies Act, Sec. 106. What "particulars" must be given in such a "return"?

6. In the case of a company incorporated under the Dominion Companies Act: (*a*) How many directors are necessary; (*b*) what qualifications must each director have; (*c*) how and for what length of term are directors elected; (*d*) what are the powers and liabilities of directors?

7. State the various ways in which a company may borrow money. What procedure is necessary in each case? May a company use its funds to purchase stock in another company? If so, on what conditions?

8. What is the meaning of the term "private company" under the British Columbia Companies Act? How may a private company turn itself into a public company?

9. What provisions are made in the British Columbia Companies Act for the incorporation of mining companies with specially limited liability on shares? What are the general powers of such non-personal liability mining companies?

Arithmetic. (Time, 30 minutes.)

A. Rapid Calculation.

[Note.—*The time allowance for Arithmetic, Third-year Course, Commercial, is 2½ hours; after the expiration of 30 minutes, answers to Section A (Rapid Calculation) will be collected, and Section B (General) will then be distributed to candidates.*]

1. During the month of March, 1917, there were 22 school days, and in a class of 36 pupils the aggregate attendance was 768. Find (*a*) the average daily attendance to two decimal places, (*b*) the percentage to two decimal places of the possible attendance.

2. During the year 1916 a firm sold goods at a uniform profit of 25% on cost. On January 1, 1916, their stock amounted to $8,000, and their purchases during the year were $24,000. If their sales during the year were $28,750, find (*a*) the value of goods on hand December 31, 1916, (*b*) the gross profit on merchandise.

3. If a cubic foot of water weighs 62½ lb., and an imperial gallon contains 277.274 cubic inches, what is the weight (in ounces) of a pint of water?

4. A city is assessed at $226,000,000.
   (*a.*) If the tax rate is 18 mills, find the amount of taxes.
   (*b.*) If they wish to raise an additional $100,000, by what decimal of a mill must the tax rate be increased?

5. Square the following numbers and add results: 75, 85, 125, 275, 355, 1005, 10105.

6. Find the value of 144 loads of lumber, each containing 275 pieces, the dimensions of which average 17′ x 3″ x 2½″, at $22.50 per thousand board feet. (Work by cancellation.)

7. (*a.*) Find the simple interest on $48.60 for 292 days at 5%.
   (*b.*) What principal will give $27 simple interest in 2½ years at 6%?
   (*c.*) If $340 yields $5.44 interest in 73 days, what is the rate per cent.?
   (*d.*) In what time will $320 amount to $360 at 5% simple interest?

8. Simplify:—

$$\frac{(25-6)\times(52\div13)}{(3\times13)-37}$$

9. Find the amount of the following:—

7,208 lb. @ 12½c. =
552 „ „ 16⅔c. =
294 „ „ 14²/₇c. =
1,125 „ „ 11¹/₉c. =
915 „ „ 33⅓c. =

Total .....

10. Find the present worth of an annuity of $315 payable at the end of each year for the next three years, if money is worth 5%, compounded yearly.

ARITHMETIC. (Time, 2 hours.)

B. General.

[NOTE.—*The time allowance for Arithmetic, Third-year Course, Commercial, is 2½ hours; after the expiration of 30 minutes, answers to Section A (Rapid Calculation) will be collected, and Section B (General) will then be distributed to candidates.*]

1. Parker invests $50,000 in the more profitable of the two following: 6% stock at 105, 5% stock at 98; brokerage, ⅛%.
   (*a*.) How much must he add to his investment to buy an exact number of shares?
   (*b*.) How much stock does he get?
   (*c*.) What rate per cent. does he make on his investment after paying an income tax of 20 mills, $600 being exempted?

2. A book-keeper is engaged at a salary of $2,500 per annum for four years and is promised an annual increase of $100 each year. His living expenses are $1,000 during the first year and increase 10% each year. If he invests his surplus at the end of each year at 5% per annum compounded yearly, what will he be worth at the end of the four years?

3. Find the cash surrender value of a perpetuity of $750, deferred 15 years, money being worth 6% compounded yearly. ($1.06^{15} = 2.39655819$.)

4. Downs & Morrison fail and make an assignment, assets $82,798.50, liabilities $89,367.10. By consent of all the creditors Henry Brown's claim of $3,500 is made preferential. The assignee's expenses and fees amount to $1,325.70. How much should be paid to a creditor whose admitted claim is $7,500?

5. Find the cost of making a roadway one mile long and 18 feet wide. It is first excavated to a depth of 18 inches at a cost of 12½ cents per cubic yard. Crushed stone is then put in to a depth of 1 foot at a cost of 30 cents per cubic yard; gravel is then placed on top to a depth of 6 inches at a cost of 40 cents per cubic yard.

6. A mortgage of $4,000, due June 30, 1920, is offered for sale June 30, 1917. It carries interest at 6% per annum payable half-yearly, on June 30 and December 31. If the interest due June 30, 1917, has already been paid, and the investor wishes his money to earn 8%, what should he offer for the mortgage?

7. Find (*a*) the cubic contents of the cement walls, and (*b*) the exterior area of the walls, the roof, and the surface under the eaves of a hexagonal silo with pyramidal top, side of hexagon 8 feet, height of walls 40 feet, thickness of walls 1 foot, height of pyramidal roof above the walls 6 feet, extension of eaves over the walls 1 foot.

8. A Vancouver fruit dealer sent his San Francisco agent $1,946.70, and instructed him to buy oranges at $1.40 a box. The agent charged 3% for buying, and shipped the oranges to his principal in five lots. How many boxes were in each lot, if each contained an equal number of boxes?

9. Anderson and Brown form a partnership, investing respectively $9,700 and $8,300. They agree to share gains and losses according to average net investment, and to allow interest on all investments and charge interest on all withdrawals at the rate of 6% per annum. At the end of 4 months Anderson invests $4,000 more and Brown $1,000. At the end of the year no settlement of interest is made until after the net gain of $6,400 has been divided and entered up. The interest is then adjusted. Show the partners' accounts after such adjustment, properly closed, with the balances brought down for next year's business. (Calculate time in months.)

10. A city made an appropriation of $265,200 for its schools. The assessed value of real estate was $88,400,000. Find the tax rate for school purposes. How much was a taxpayer's school tax if he was assessed $12,500?

BUSINESS CORRESPONDENCE. (Time, 2 hours.)

[NOTE TO PRESIDING EXAMINER.—*Please provide candidates with plain white letter paper.*]

1. Explain the following commercial and legal abbreviations: L.S., i.e., fig., Ltd., viz., vs., prox., N.B., MS., MSS., do., Inc., P.S., Mfg., f.o.b., et al., Co., c/o, E. & O. E., C. O. D., pro tem., Mlle., Mme., e.g., hhd., via, cwt.

2. Make an application by letter for *one* of the following positions:—

WANTED—Young man or woman to take charge of the amanuensis work in a commercial office. Address, stating age, education, experience and salary, AMANUENSIS, TRIBUNE OFFICE.

Local Wholesale Lumber Company desires to secure the services of a young man or woman as assistant book-keeper. High School graduate who can do typewriting preferred. Apply in own handwriting, stating age, qualifications, experience, and initial salary. Box 234, Mail Office.

3. You are employed by Messrs. J. L. McDonald & Co., Vancouver, as a travelling salesman. Your relations with the firm have always been pleasant, but you are offered a greatly increased salary by the Rat Portage Lumber Co., Limited.

(*a.*) Write to the former company, resigning your position. Thank them for many past favours, and give your reasons for resigning.

(*b.*) Write to the latter company, accepting their offer.

4. A retailer sends an order on June 24 and claims $1.20 for breakage of mantle globes to apply on his bill of June 3. He suggests that you file a claim with the railroad. Notify him that the order has been shipped under invoice No. 67876, grant the claim, enclose a credit memorandum, and say the amount is too small to warrant claim proceedings.

5. As a member of the credit department of a wholesale house, you have received a first order from an unknown customer and have written him for references, asking in the meantime for a payment of $100 to allow the order to go forward. The customer replies that he has formerly traded with the Calgary branch of the house, and encloses the $100. Acknowledge the remittance, give notice of shipping the order, and say you will confer with the Calgary branch.

6. Prepare for the local newspapers a letter containing about 500 words, on *one* of the following subjects:—
   (*a.*) The causes for the high cost of living.
   (*b.*) The future of British Columbia.
   (*c.*) The railroad situation in Canada.
   (*d.*) Modern business office methods and equipment.

ECONOMICS AND CIVICS. (Time, 2 hours.)

1. (*a.*) Why is the federal system of government suitable for Canada?
   (*b.*) What is meant by the "Constitution"? What is a *precedent?*
   (*c.*) How can the Dominion control the legislation of the Provinces? How can Great Britain control Dominion legislation?

2. (*a.*) Distinguish clearly *direct* and *indirect* taxation.
   (*b.*) Explain how our Dominion obtains its revenue; how our Provinces; and how a city of British Columbia.
   (*c.*) On what classes of goods would a country levy (i) an import duty; (ii) an export duty; (iii) an excise duty?
   (*d.*) Give the principles of Free Trade and of Protective Tariff. How do you think they should be applied in reference to Canada?

3. "The powers of government are divided into what are known as the *legislative, executive,* and *judicial* departments." Explain the function of each of these. How are these powers provided for in Canada?

4. Mention some important questions that have arisen from time to time in Canada.

5. "British Columbia has unparalleled advantages in trade and commerce, and its resources are equal to those of many a great empire." State what these advantages and resources are, and estimate their importance.

6. (*a.*) What are the chief causes of unemployment? How do these causes operate?
   (*b.*) Suggest remedies for reducing unemployment.

7. What do you consider are the relative merits and demerits of *granted monopoly* and *municipal ownership* as applied to the street-car system of a city?

8. If the value of a man's work is $17.50 per week when he works 8 hours per day, what will be the value of his work when he works 14 hours per day? Explain your conclusions.

9. Name some of the chief factors in *cost reduction* and explain how they are made to operate.

10. Enumerate as fully as you can the causes which may help to determine (*a*) the wages paid for a certain class of labour, (*b*) the price of potatoes in Vancouver.

Typewriting.

[Note to Presiding Examiner.—*Please provide each candidate with plain white letter paper and one sheet of carbon paper.*]

[Note.—*Candidates are allowed 5 minutes to read over this paper. Time allowed for Section A, 10 minutes. Section B is to be written in full and the time taken by each candidate to be recorded by the Presiding Examiner. Write each part of Section B on a separate sheet of paper, and hand in carbon copies with originals. A carbon copy of Section A is not required.*]

Section A.

It is not accident that helps a man in the world, but purpose and persistent industry. These make a man sharp to discern opportunities, and turn them to account. To the feeble, the sluggish, and purposeless, the happiest opportunities avail nothing—they pass them by, seeing no meaning in them. But if we are prompt to seize and improve even the shortest intervals of possible action and effort, it is astonishing how much can be accomplished. Watt taught himself chemistry and mechanics while working at his trade of a mathematical instrument-maker; and he availed himself of every opportunity to extend his knowledge of languages, literature, and the principles of science. Stephenson taught himself arithmetic and mensuration while working as an engineman during the night shifts, and he studied mechanics during his spare hours at home, thus preparing himself for his great work—the invention of the passenger locomotive. Dalton's industry was the habit of his life. He began from his boyhood, for he taught a little village-school when he was only about twelve years old; keeping the school in winter, and working upon his father's farm in summer. He would sometimes urge himself and companions to study by the stimulus of a bet, though bred a Quaker; and on one occasion, by his satisfactory solution of a problem, he in this way won as much as enabled him to buy a winter's store of candles. He went on indefatigably, making his meteorological observations until a day or two before he died—having made and recorded upwards of 200,000 in the course of his life.

With perseverance, the very odds and ends of time may be worked up into results of the greatest value. An hour in every day withdrawn from frivolous pursuits would, if profitably employed, enable a person of ordinary capacity to go far towards mastering a complete science. It would make an ignorant man a well-informed man in ten years. We must not allow the time to pass without yielding fruits, in the form of something learnt worthy of being known, some good principle cultivated, or some good habit strengthened. Dr. Mason Good translated Lucretius while riding in his carriage in the streets of London, going his rounds among his patients. Dr. Darwin composed nearly all his works in the same way while driving about in his "sulky" from house to house in the country—writing down his thoughts on little scraps of paper, which he carried about with him for the purpose. Hale wrote his *Contemplations* while travelling on circuit. Dr. Burney learnt French and Italian while travelling on horseback from one musical pupil to another in the course of his profession. Kirke White learnt Greek while walking to and from a lawyer's office; and we personally know a man of eminent position in a northern manufacturing town, who learnt Latin and French while going messages as an errand boy in the streets of Manchester.

Elihu Burritt attributed his first success in self-improvement, not to Genius, which he disclaimed, but simply to the careful employment of those invaluable fragments of time, called "odd moments." While working and earning his living as a blacksmith, he mastered some eighteen ancient and modern languages, and twenty-two European dialects. Withal, he was exceedingly modest, and thought his achievements nothing extraordinary. Like another learned and wise man, of whom it was said that he could be silent in ten languages, Elihu Burritt could do the same in forty. "Those who have been acquainted with my character from my youth up," said he, writing to a friend, "will give me credit for sincerity when I say, that it never entered into my head to brazen forth any acquisition of my own. All that I have accomplished, or expect, or hope to accomplish, has been and will be by that plodding, patient, persevering process of accretion which builds the ant-heap—particle by particle, thought by thought, fact by fact. And if ever I was actuated by ambition, its highest and warmest aspiration reached no further than the hope to set before the young men of my country an example in employing those invaluable fragments of time called 'odd moments.'" (703 words.)

Section B.

1. Victoria, B.C., June 28, 1917. Mr. J. M. Morse, 238 Princeton Ave., Vancouver, B.C. Dear Sir: In connection with our correspondence in which we have explained our method and terms for handling savings accounts by mail, we think you will be interested in reading the enclosed booklet. It tells how, by handling only what are termed by banks "inactive" accounts, our institution is able to give you a better rate of profit than we could do if we were transacting a general banking business. ¶ While most banks pay 3% and then only credit the depositor for interest on his lowest monthly balances, our company throughout its nineteen years' experience has never paid less than 5%, and we credit earnings for the full number of days on each deposit. ¶ Your business can be transacted by mail very conveniently, as we are satisfactorily meeting the requirements of our patrons in all parts of the country. When you also consider that the money you invest is not "tied up" but may be withdrawn upon thirty days' notice, if not over $5,000, we are confident that you will find it to your advantage to place at least a portion of your business with us. In your dealings you will be protected by one of the largest and strongest of savings institutions, our company's assets now amounting to over $14,000,000. Our nineteen years' record is always open to public inspection in the files of the Inspector of Trust and Loan Companies. ¶ We enclose a remittance blank and hope to hear from you by early mail. Yours respectfully.

2. Gentlemen: In compliance with the request contained in your letter of the 22nd, we are mailing under another cover our special pamphlet No. 18, and refer you to page 8, figure 456, for our peanut fryer. The outside jacket is made of seamless steel with steel-bound screen, or basket, all heavily tinned and arranged so that the grease will drain into the vat. This fryer has a capacity of 25 lb. We can furnish it for the sum of $10, less 10% discount. ¶ We could also furnish an extra large fryer, having a capacity of 50 lb., for the sum of $15 net. Yours very truly.

3. Nelson, B.C., May 31, 1917. Mr. J. H. Stone, 647 Winston St., City. Dear Sir: We are enclosing a sample Liability Policy to cover your Peerless Car. If it is a 1917 runabout or touring car, 20 horse-power, the premium will be $47; if of 30 horse-power, $63.75. An extra premium of 15% will be charged if a second name is added to the policy. Respectfully yours.

4. Copy the following statement (no vertical ruling required) :—

Date.		Deposits.		With-drawals.	Balances.		Dys.	Products.

Laws of Business. (Time, 2 hours.)

1. State briefly the effect of the Statute of Limitations on debts of various kinds.

2. What is an assignment? What provision is made for making an assignment known to all concerned? How should a creditor file his claim against one who has made an assignment? Give in order of priority the claims of the creditors against the assets of an insolvent debtor.

3. Explain fully the purpose and nature of a mortgage. When does a mortgage become binding? Why should a mortgage be registered? What is the object of foreclosure of a mortgage? How is it effected? How may a mortgage be transferred?

4. What is a conditional sale? Write the promissory note form used in the agreement. How are the interests of the unpaid seller and of innocent third parties protected?

5. What is a lease? What is the landlord's covenant? What are some of the tenant's covenants? What are some of the tenant's privileges? Discuss the responsibility of the landlord and the tenant in respect to repairs and taxes. What is meant by tenancy by implication?

6. What is meant by saying that the legal rate of interest in Canada is now 5%? If a note is made to bear interest at 10% per annum, can the interest be collected? Explain your answer. If such a note is not paid until six months after maturity, what interest can be collected? What is the legal position of endorsers on overdue notes? Under what conditions and at what rate can interest be collected on book accounts?

7. What is an *Agreement for Sale?* Who should sign it? Give a synopsis of what it contains.

8. What is the Mechanics and Wage-earners' Lien Act? When and how must a lien claim be recorded? How is a lien enforced? What is the advantage of a lien? When does a lien cease to exist?

9. Explain the meaning of: Subpoena, summons, warrant, proxy, debenture, collateral, fee-simple, probate, legal remedy, garnishment.

ACCOUNTANCY THEORY. (Time, 2 hours.)

1. State briefly the chief points of difference between the book-keeping of a Joint Stock Company and that of a Partnership.

2. A company leases for a term of 50 years certain unimproved property for factory purposes, paying a ground rent therefor of $1,500 a year. The company erects certain buildings at a cost of $50,000, which are to pass to the owner of the real estate at the termination of the lease. Without going into the mathematics of the matter, state how you would treat this proposition in the books of account.

3. What course would you pursue in order to open a current account at a bank? Show how you would make your first deposit, consisting of silver coin $6.95, bank bills $235, a bank cheque for $167.84. Show deposit slip properly filled out. What evidence of this deposit would you receive?

4. In closing the books of a Company whose accounts are made up to the 30th of June in each year, you find the following:—

   (*a.*) Rent $4,800 per year. payable quarterly. Last rent paid up to the 30th of April.

   (*b.*) Insurance costs $1,440 per year and is paid in advance on the 30th of September each year.

   (*c.*) An invoice of merchandise amounting to $800, delivered on the 28th of June. The merchandise is included in the inventory, but the invoice has not passed through the books.

   (*d.*) An expenditure of $4,500 in advertising a new line of goods, which are not to be placed on the market until after July 15th.

   How would you deal with the above-mentioned items in the annual statements?

5. The Vancouver Shipbuilding Company, Limited, was incorporated in 1913. The Authorized Capital of the Company consisted of 960,000 6% preference shares of $1 each and 960,000 ordinary shares of $1 each. During the years 1913 and 1914 the whole of the preference shares and 480,000 of the ordinary shares were issued to the public and fully paid up with the exception of $480 calls in arrear on the ordinary shares. The arrears were withheld from dividends paid in 1915. The Company was very successful and during the year 1916 offered the balance of the ordinary shares to the public at a premium of 50 cents per share. All the stock was taken up and duly allotted, payable as follows: The premium of 50 cents per share and 75% of the face value on application and 25% of the face value one month after allotment. The call of 25% was not made.

   Journalize the above, and set out the Capital Stock of the Company as it would appear in the Company's Balance Sheet, December 31, 1916.

6. Rockwell, Brice & Co., of Victoria, B.C., consign goods to Loudon & Martin, Hong Kong, rendering with each shipment a *pro forma* invoice in which the goods are charged at prices in excess of the cost, the cost of freight, insurance, etc., being added. Account sales are received from time to time, the net proceeds being remitted by demand drafts on the Canadian Bank of Commerce.

Show how the following transactions would appear in Rockwell, Brice & Co.'s ledger:—

(*a.*) Shipment of goods, November 8, 1916, and invoice rendered to Loudon & Martin, for $9,850, as follows:—

Merchandise	$9,000
Freight	700
Insurance	150
Total	$9,850

The cost of these goods was $8,700.

(*b.*) Account sales received April 18, 1917, for part of the consignment, showed gross proceeds $5,400, less dock and other expenses, including commission, $150. This account was accompanied by a draft for $5,250.

(*c.*) Account sales received June 14, 1917, for balance of the consignment, showed gross proceeds $5,660, less dock and other expenses, including commission, $175, and was accompanied by a draft for $5,485.

7. Explain clearly the following commercial terms: Credit note, debit note, deed of assignment, convertible securities, liquidation, antedate, bonus, watered stock, royalty, rolling stock, salvage.

PENMANSHIP. (Time, 1 hour.)

1. Write once:—

Wherever there is difficulty, the individual man must come out for better or for worse. Encounter with it will train his strength and discipline his skill; heartening him for future effort, as the racer, by being trained to run against the hill, at length courses with facility. The road to success may be steep to climb, but it puts to the proof the energies of him who would reach the summit. By experience a man soon learns how obstacles are to be overcome by grappling with them—how soft as silk the nettle becomes when it is boldly grasped—and how powerful a principle of realizing the object proposed, is the moral conviction that we can find and will accomplish it. Thus difficulties often fall away of themselves, before the determination to overcome them. In nine cases out of ten, if marched boldly up to they will flee away. Like thieves, they often disappear at a glance. What looked like insuperable obstacles, like some great mountain chain in our way, frowning danger and trial, are found to become practicable when approached, and paths formerly unseen, though they may be narrow, rugged, and difficult, open a way for us through the hills.

2. Write the alphabet in capital letters.

3. Copy the following business letter:—

VANCOUVER, B.C., June 28, 1917.

Mrs. S. T. Frederick,
1235 N. Charter Ave.,
Vancouver, B.C.

DEAR MADAM: Nearly everybody has had trouble with floors. Without doubt, you have had your share and are on the look-out for something that will relieve you of further worry; something which has been proved to possess real merit.

Try "Elastica" floor finish. Others have found it to be just what they were looking for. It gives a handsome finish, tough and durable.

"Elastica" is on sale at this store, and any orders will be given prompt attention.

Yours very truly.

4. Make a copy of the following columnar balance sheet:—

	Debits.	Credits.	Resources.	Liabilities.	Losses.	Gains.
Cash	$ 8,318.55	$ 3,991.84	$ 4,326.71			
Real estate	5,000.00	500.00	4,500.00			
Merchandise	6,311.03	3,724.25	3,231.67			$644.89
Z. Bowes	2,030.00	1,505.00	525.00			
Y. Crowe	1,608.00	1,214.25	393.75

ENGLISH LITERATURE. (Time, 2 hours.)

POEMS OF THE ROMANTIC REVIVAL.

1. Give the title of the poem from which each of the following quotations is taken:—

(*a.*) "The sounding cataract
Haunted me like a passion."

(*b.*) "The prison unto which we doom
Ourselves no prison is."

(*c.*) "The world's great age begins anew
The golden years return."

(*d.*) "O world, as God has made it! All is beauty:
And knowing this is love, and love is duty."

(*e.*) "To strive, to seek, to find, and not to yield."

2. Make notes upon the following, referring where necessary to the context:—

(*a.*) "The winged glory
On Philippi half alighted
Like an eagle on a promontory."

(*b.*) "For all the past of time reveals
A bridal dawn of thunder-peals
Wherever Thought has wedded Fact."

(*c.*) "Thou best Philosopher, who yet dost keep
Thy heritage, thou eye among the blind."

(*d.*) "Ah, but a man's reach should exceed his grasp,
Or what's a heaven for?"

3. What, briefly, is the main idea of:—

(*a.*) The Epilogue to the Two Poets of Croisic?

(*b.*) Three Years She Grew in Sun and Shower?

4. Write at least a page on two characteristics of Shelley's poetry.

THE MERCHANT OF VENICE.

5. Assign the following quotations to speaker and context:—

(*a.*) "The man that hath no music in himself."

(*b.*) "Thou art too wild, too rude, and bold of voice."

(*c.*) "So is Alcides beaten by his page."

(*d.*) "If a throstle sing, he falls straight a-capering; he will fence with his own shadow."

(*e.*) "I never knew so young a body with so old a head."

6. Explain, where necessary, the meaning of *words* in the following passages:—

(*a.*)
"See to my horse left in the fearful guard
Of an unthrifty knave, and presently
I will be with you."

(*b.*) "There are some shrewd contents in yon same paper."

(*c.*) "Engaged my friend to his mere enemy."

(*d.*) "Upon more advice."

(*e.*) "A noble and a true conceit."

(*f.*)
"I do wonder,
Thou naughty gailer, that thou art so fond
To come abroad."

7. Write about a page on each of the following:—

(*a.*) Launcelot Gobbo.

(*b.*) How Shakespeare has, to some extent at least, ennobled the character of Shylock.

Intermediate Grade.

BRITISH HISTORY. (Time, 1½ hours.)

[NOTE.—*Any* five *questions constitute a full paper.*]

1. Discuss the effect of the Norman Conquest of England under the following heads:—
   (*a.*) Land tenure.
   (*b.*) Language and learning.
   (*c.*) Trade.
2. Give an account of the Reformation in England from the time of Henry VIII. to the Commonwealth.
3. Name and discuss four great landmarks in the Development of British Constitutional Government.
4. William of Orange forced Britain from that position of isolation from interference in Continental affairs which she had occupied from the reign of the Tudors. Explain the necessity of this change of policy and the direct results that came from it.
5. Discuss the causes that led to the revolt of the American Colonies.
6. Write a short essay on the Industrial Development of England in the first quarter of the 19th Century.
7. Write notes on: The Domesday Book, Guilds, The Test Act, Catholic Emancipation Bill, The Toleration Act.
8. Make notes on: Thomas à Beckett, Thomas Cromwell, Laud, Milton, Wilberforce, Sir Robert Peel, Mr. Asquith, Parnell.

GRECIAN HISTORY. (Time, 2 hours.)

[NOTE.—*Any* five *questions constitute a full paper.*]

1. Describe the organization of the Greek Colonial system, and write on two of the colonizing expeditions.
2. Describe the Constitution of Cleisthenes, pointing out important differences between it and that of Solon.
3. Write an account of the Persian invasion of Greece under Xerxes.
4. Give an account of the Periclean Democracy, pointing out its weaknesses.
5. Describe the expedition of Alexander the Great against Persia from the beginning up to the battle of Arbela.
6. Make short notes on: Miltiades, Alcibiades, Themistocles, Demosthenes, Dionysius.
7. Give an account of the Greek National games so as to show their aims and results.

Composition. (Time, 2 hours.)

Write an essay on *one* of the following subjects:—

(*a.*) Milton as the Champion of Liberty.

(*b.*) An Imaginary Walk with Sir Roger de Coverley in my Neighbourhood.

(*c.*) Should Canada introduce Compulsory Military Service?

English Literature. (Time, 3 hours.)

1. Write a page or so on Macaulay's admiration of Milton; *or* on Milton, the champion of Liberty.

2. In what ways do you find the prose of Addison and Macaulay helpful in endeavouring to form your prose style?

3. (*a.*) Examine "Il Penseroso" in order to display the spirit in which Milton writes about night.
(*b.*) How does Dryden in "The Hymn to St. Cecelia's Day" impress upon the reader the power of music?

4. In what ways is the "Eve of St. Agnes" characteristic of Keats?

5. Quote three of the following:—
(*a.*) A stanza from "The Hymn on the Nativity."
(*b.*) A passage of about six lines from "Lycidas."
(*c.*) "Nor Second he that rode sublime" (twelve lines).
(*d.*) "But let my due feet never fail" (twelve lines).
(*e.*) A stanza from "The Eve of St. Agnes."

6. Show the full bearing or meaning of the following by suitable reference to the context:—
(*a.*) "Full many a gem of purest ray serene
The dark unfathomed caves of ocean bear";
(*b.*) "Visions of glory, spare my aching sight," (Gray's "Bard");
(*c.*) "St. Agnes' charmed maid
Rose like a missioned spirit unaware";
(*d.*) "With a view to the same great object, he [Milton] attacked the licensing system, in that sublime treatise which every statesman should wear as a sign upon his hand and as frontlets between his eyes."

7. Write suitable explanatory notes on the following:—
(*a.*) Hebe.
(*b.*) Cynthia.
(*c.*) "Peor and Baälim
Forsake their temples dim,
With that twice battened god of Palestine."
(*d.*) "Heywood and Shirley were but types of thee,
Thou last great prophet of tautology."

CHEMISTRY. (Time, 2 hours.)

1. Name the oxides of Carbon. How would you prepare, collect, and identify the lower oxide?

2. What are the principal products of:—

   (*a.*) The destructive distillation of wood?

   (*b.*) The combustion of wood in air?

   Account for the difference.

3. Write equations representing the reactions when dilute sulphuric acid is added to:—

   (*a.*) Zinc.

   (*b.*) Marble.

   (*c.*) Common salt.

   In (*c*) explain why two different results may be got.

4. Name the Halogens and the Oxides of Nitrogen, writing opposite each its chemical formula.

5. Outline the principal steps in the making of *one* of the following: Hydrochloric Acid, Sodium Carbonate, Bleaching Powder.

6. What is "hard water"? Name the different kinds of hardness, and say how caused, distinguished, and removed in each case.

7. Write the formulæ of Methane, Ethelene, and Acetylene, and describe the preparation and properties of *one* of them.

8. Write brief notes on the occurrence, metallurgy, and properties of copper, *or* of lead.

GEOGRAPHY. (Time, 1½ hours.)

1. Trace for the continent of America, the isothermals (*a*) of 60° for July, and (*b* of 40° for January. (Both of these approximately pass through Victoria, B.C.)

2. (*a.*) "The housewife knows that some days are better drying days than others." Explain briefly the causes upon which this fact depends.

   (*b.*) "The air receives its warmth in an indirect way." Discuss this statement.

3. Explain fully:—

   Land and Sea Breezes.
   Trade-winds.
   Chinooks.
   Hurricanes.

4. Discuss the chief causes which lead to a variation of plant and animal life on land.

GEOMETRY. (Time, 2 hours.)

1. If from a point without a circle a tangent and a secant be drawn, then the rectangle contained by the whole secant and the part of it without the circle shall be equal to the square on the tangent.

2. A and B are two fixed points on the circumference of a circle and PQ is any diameter. Find the locus of the intersection of PA and QB.

3. (*a.*) The opposite angles of any quadrilateral inscribed in a circle are together equal to two right angles.

   (*b.*) State and prove the converse.

4. Two tangents AP and AQ are drawn to a circle and B is the middle point of the arc PQ convex to A. Show that PB bisects the angle APQ.

5. Given the feet of the perpendiculars drawn from the vertices on the opposite sides, construct the triangle.

6. (*a.*) $(a+b)^2 = a^2+2ab+b^2$.

   (*b.*) $(a-b)^2 = a^2-2ab+b^2$.

   (*c.*) $(a+b)(a-b) = a^2-b^2$.

   Give the enunciations of the propositions corresponding to these algebraical formulas and demonstrate the second.

7. If a straight line be divided in medial section and from the greater segment a part be taken equal to the less, show that the greater segment is also divided in medial section.

ALGEBRA. (Time, 2 hours.)

1. Find the value of $\dfrac{x^3-y^3}{x^3+y^3}$ when $x=a+3$ and $y=a-3$.

2. Express in the simplest form :—

   (*a.*) $\left\{(16)^{-\frac{3}{4}}-(81)^{-\frac{3}{4}}\right\} \div \left\{(16)^{-\frac{1}{4}}+(81)^{-\frac{1}{4}}\right\}$.

   (*b.*) $8^{\frac{4}{3}}+\sqrt[3]{2\times 4^{-5}}-\dfrac{\sqrt[7]{2}}{(4)^{-\frac{3}{7}}}-(32)^{-\frac{3}{5}}$.

3. Solve $\left\{\begin{matrix} 8xy-13y^2=3 \\ 13x^2-21xy=10 \end{matrix}\right\}$.

4. Factor :—

   (*a.*) $36x^4-97x^2+36$.

   (*b.*) $112x^2+138xy-135y^2$.

5. Solve $3\sqrt{x^2+xy+x+y}=3x+y+2=4$.

6. Simplify $\left(1+\dfrac{35}{x-7}-\dfrac{15}{x-3}\right)\left(\dfrac{1}{5}-\dfrac{7}{x+7}+\dfrac{3}{x+3}\right)$.

7. Find the square root of $57+12\sqrt{15}$.

8. The number of sergeants in a company is twice the number of officers and is equal to the number of companies in a battalion; there is an officer or a sergeant to every 10 men, and the whole battalion (including 6 on the staff) numbers 600. How many companies are there?

GREEK. (Time, 3 hours.)

1. Give the comparative and superlative degrees of καλός, μέγας, μικρός, ὀλίγος, πολύς, ῥᾳδιος.

2. Write the accusative singular and dative plural of πόλις, ἀνήρ, ἀσπίς, βασιλεύς, ναῦς, and the dative singular and accusative plural of ἀληθής (masc.), ἡδίων (masc.), μέγας (in the neuter), ὅστις (masc.), οὗτος (in the feminine).

3. Write the first aorist indicative middle of φαίνω, second aorist subjunctive active of λείπω, pluperfect indicative passive of ἄγω, perfect indicative passive of πείθω, second aorist optative passive of στέλλω, a synopsis of the present system of δίδωμι in the active, a synopsis of the second aorist system of τίθημι in the middle, and a synopsis of the second perfect system of οἶδα in the active.

4. Write the principal parts of βάλλω, κρίνω, ἀποθνήσκω, πάσχω, τιτρώσκω, λανθάνω, ἁλίσκομαι, πλέω, βαίνω, ἵημι.

5. Translate into Greek :—

   (*a.*) The satrap said that Cyrus had plotted against the king.

   (*b.*) We should be worth more, if we should have our arms.

   (*c.*) Most gladly would I hear the herald's name.

   (*d.*) He proceeded thence three stages, fifteen parasangs to the river Euphrates, which is four stades in width.

   (*e.*) He promised them not to stop until he brought them back home.

   (*f.*) He went off unnoticed by Cyrus.

   (*g.*) After him another rose up pointing out what must be done.

   (*h.*) They feared that the Greeks would attack them during the night.

6. Translate into English :—

   (*a.*) ἐὰν δὲ ὑμεῖς ἄνδρες ἦτε καὶ εὖ τὰ ἐμὰ γένηται, ἐγὼ ὑμῶν τὸν μὲν οἴκαδε βουλόμενον ἀπελθεῖν ζηλωτὸν ποιήσω τοῖς οἴκοι, πολλοὺς δὲ οἶμαι βουλήσεσθαι παρ' ἐμοὶ μένειν.

   What kind of a conditional sentence is this? Explain the genitive ὑμῶν. What other cases does παρά take?

   (*b.*) ταῦτα δὲ τῷ Ξενοφῶντι λέγων θορύβου ἤκουσε, καὶ ἤρετο τίς ὁ θόρυβος εἴη. ὁ δὲ Κλέαρχος εἶπεν ὅτι σύνθημα παρέρχεται δεύτερον ἤδη διὰ τῶν τάξεων. καὶ ἐθαύμασε Κῦρος τίς παραγγέλλει, καὶ ἤρετο ὅ τι εἴη τὸ σύνθημα. ὁ δὲ ἀπεκρίνατο, "Ζεὺς Σωτὴρ καὶ Νίκη." ὁ δὲ Κῦρος ἀκούσας, "Ἀλλὰ δέχομαί τε," ἔφη, "καὶ τοῦτο ἔστω." ταῦτα δ' εἰπὼν εἰς τὴν αὑτοῦ χώραν ἀπήλαυνεν.

   Explain the construction of θορύβου, εἴη. Parse ἔστω, αὑτοῦ.

Latin. (Time, 3 hours.)

A. (*a.*) Translate:—

Qua consuetudine cognita Caesar, ne graviori bello occurreret, maturius, quam consuerat, ad exercitum profiscitur. *Eo* cum venisset, *ea, quae* fore suspicatus erat, facta cognovit: missas legationes a nonnullis civitatibus ad Germanos invitatosque eos, uti ab Rheno discederent, omniaque, quae postulassent, ab se fore parata.

1. What part of speech is *eo?* Explain case of *ea* and *quae.*
2. Rewrite "*omniaque, quae postulassent ab se fore parata*" in Oratio Recta.
3. Give the principal parts of *suspicatus erat, consuerat, cognovit.*

(*b.*) Translate:—

Dum in his locis Caesar navium parandarum causā *moratur,* ex magna parte Morinorum ad eum legati venerunt, qui se de superioris *temporis* consilio excusarent, quod homines barbari et nostrae *consuetudinis* imperiti bellum populo Romano fecissent, seque ea, quae imperasset, facturos *pollicerentur.*

1. *navium parandarum causa.* Write the equivalent by using *ad* with gerundive.
2. Explain tense of *moratur,* mood of *pollicerentur,* case of *temporis* and *consuetudinis.*
3. Principal parts of *pollicerentur* and *venerunt.*

(*c.*) Translate:—

Nostri acriter in eos impetu facto repulerunt neque finem sequendi fecerunt, quoad *subsidio* confisi equites, cum post se legiones viderent, praecipites hostes egerunt, magnoque eorum numero interfecto neque *sui colligendi* neque consistendi aut ex essedis desiliendi facultatem dederunt. Ex hac fuga protinus, *quae* undique convenerant auxilia discesserunt, neque post id tempus unquam summis nobiscum copiis hostes contenderunt.

1. Is *subsidio* dative or ablative? Give principal parts of *confisi* and *viderent.*
2. Explain syntax of *sui colligendi.* What is the antecedent of *quae?*

B. Translate into Latin:—

1. They earnestly prayed him to bring aid to them because they were attacked by their enemies.
2. They did not know whether they should defend the camp or seek safety by flight.
3. Do not move your camp nearer our lines.
4. After proceeding a journey of many days, they were informed that you had crossed the river.
5. So many of the Germans were killed that the rest threw down their arms and surrendered.

C. (*a.*) Translate:—

Constitit hic, arcumque manu celerisque sagittas
Corripuit, fidus quae tela gerebat Achates,
Ductoresque ipsos primum, capita alta ferentis
Cornibus arboreis, sternit, tum volgus, et omnem
Miscet agens telis nemora inter frondea turbam;
Nec prius absistit, quam septem ingentia victor
Corpora fundat humi et numerum cum navibus aequet.

1. Account for the case of *humi;* the mood of *fundat.*
2. Scan the last two lines.

(*b.*) Translate:—

Sis felix, nostrumque leves, quaecumque, laborem,
Et, quo sub caelo tandem, quibus orbis in oris
Iactemur, doceas: ignari hominumque locorumque
Erramus, vento huc et vastis fluctibus acti:
Multa tibi ante aras nostra cadet hostia dextra.

1. Account for the case of *quaecumque, hominum, tibi;* the mood of *sis, iactemur.*

(*c.*) Translate:—

Non nos aut ferro Libycos populare Penatis
Venimus, aut raptas ad litora vertere praedas;
Non ea vis animo, nec tanta superbia victis.
Est locus, Hesperiam Graii cognomine dicunt,
Terra antiqua, potens armis atque ubere glaebae;
Oenotri coluere viri; nunc fama, minores
Italiam dixisse ducis de nomine gentem.

1. Account for the case of *fama, minores;* the mood of *vertere.*

(*d.*) Translate:—

Munera praeterea, Iliacis erepta ruinis,
Ferre iubet, pallam signis auroque rigentem,
Et circumtextum croceo velamen acantho,
Ornatus Argivae Helenae, quos illa Mycenis,
Pergama cum peteret inconcessosque Hymenaeos,
Extulerat, matris Ledae mirabile donum:
Praeterea sceptrum, Ilione quod gesserat olim,
Maxuma natarum Priami, colloque monile
Bacatum, et duplicem gemmis auroque coronam.

1. Write notes on *Argivae, Mycenis, Pergama, Priami.*

FRENCH. (Time, 3 hours.)

1. Rewrite the following, turning the verbs into the past indefinite:—

(1.) Quand sortez-vous, mes amis? (2.) Quels livres achetez-vous? (3.) Ils se couchent toujours de bonne heure. (4.) Quelquefois il arrive des accidents. (5.) Quelle est la dame que j'entends chanter? (6.) Voilà de belles poires; en achetez-vous? (7.) Nous nous lavons les mains. (8.) Les morceaux que nous entendous jouer sont ravissants. (9.) Il nous prie d'aller à la ville. (10.) La belle journée qu'il fait!

2. Change each infinitive into the appropriate mood and tense:—

(1.) Si je ne l'avais pas saisi, il (tomber) du train. (2.) Combien de temps y a-t-il que vous (attendre) son arrivée? (3.) Je regrette que vous ne (pouvoir) venir. (4.) Il me le (dire) que je ne le croirais pas. (5.) Je ne pense pas qu'il (venir). (6.) Où (aller)-vous quand je suis entré. (7.) Où que vous (être) je penserez à vous. (8.) Quand vous (venir) je vous presenterai à eux. (9.) Pouvez-vous me montrer une grammaire qui (avoir) toutes les règles? (10.) Après qu'il (dîner) il partit.

3. Translate the following, paying particular attention to the prepositions:—

(1.) He didn't obey his father. (2.) What do you think of this book? (3.) Ask your friend for some money. (4.) I have borrowed some from him already. (5.) Think of your friends. (6.) Can your sister play the piano? (7.) No, but she can play cards. (8.) Pardon me for this fault. (9.) Pay the tailor for your cloth. (10.) It is very cold; draw near the fire.

4. Translate:—

(1.) When you have finished and have time, come, that I may see you. (2.) People invent new processes in proportion as civilization advances. (3.) After looking at the two books I asked him which one he wanted. (4.) You ought to know how that is done. (5.) What is the matter with you? I have a terrible toothache. (6.) Take off your gloves and sit down. (7.) They say that he died a few days ago, but few people believe it. (8.) We have no more paper, we cannot write any more. (9.) When it is warm, horses and men are thirsty. (10.) This was the question which people were asking of one another almost every day.

5. Translate:—

(*a.*) Marguerite de Waldemar, la Sémiramis du Nord, reine de Danemark et de Norvège, conquit la Suède par force et par adresse, et fit un seul royaume de ses trois vastes États. Après sa mort, la Suède fut déchirée par des guerres civiles; elle secoua le joug des Danois, elle le reprit, elle eut des rois, elle eut des administrateurs. Deux tyrans l'opprimèrent d'une manière horrible vers l'an 1520. L'un était Christian II, roi de Danemark, monstre formé de vices sans aucune vertu: l'autre, un archevêque d'Upsal, primat du royaume, aussi barbare que Christian. Tous deux de concert firent saisir un jour les consuls, les magistrats de Stockholm, avec quatre-vingt-quatorze sénateurs, et les firent massacrer par des bourreaux, sous prétexte qu'ils étaient excommuniés par le pape pour avoir défendu les droits de l'État contre l'archevêque.

(*b.*) L'archevêque d'Upsal est en possession de faire la cérémonie du sacre et du couronnement; c'est, de tant de droits que ses prédécesseurs s'étaient arrogés, presque le seul qui lui reste. Après avoir, selon l'usage, donné l'onction au prince, il tenait entre ses mains la couronne pour la lui remettre sur la tête: Charles l'arracha des mains de l'achevêque, et se couronna lui-même, en regardant fièrement le prélat. La multitude, à qui tout air de grandeur impose toujours, applaudit à l'action du roi; ceux même qui avaient le plus gémi sous le despotisme du père se laissèrent entraîner à louer dans le fils cette fierté qui était l'augure de leur servitude.

(*c.*) Le roi paraissait abîmé dans une réverie profonde. "Puis-je prendre la liberté, lui dit Piper, de demander à Votre Majesté à quoi elle songe si sérieusement?"—"Je songe, répondit le prince, que je me sens digne de commander à ces braves gens; et je voudrais que ni eux ni moi ne reçussions l'ordre d'une femme." Piper saisit dans le moment l'occasion de faire une grande fortune. Il n'avait pas assez de crédit pour oser se charger lui-même de l'entreprise dangereuse d'ôter la régence à la reine et d'avancer la majorité du roi; il proposa cette négociation au comte Axel Sparre, homme ardent, et qui cherchait à se donner de la considération: il le flatta de la confiance du roi. Sparre le crut, se chargea de tout, et ne travailla que pour Piper. Les conseillers de la régence furent bientôt persuadés: c'était à qui précipiterait l'éxécution de ce dessein, pour s'en faire un mérite auprès du roi.

6. Translate freely:—

Born in 1694, François Marie Arouet at an early date (i.e., early) made himself famous by the publication of numerous pamphlets, a dangerous way of gaining fame (célébrité) in those palmy (beau) days of the ancient régime. Suspected (soupçonner) of being the author of an attack on the Regent, of which he this time was really innocent, the young man found himself one fine morning inside (enfermé à) the Bastille, where he remained until it pleased his custodians (gardien) to find out (discover) his innocence.

GERMAN. (Time, 3 hours.)

1. Turn the second clause of each of the following sentences into a relative clause:—

(1.) Der Schüler iſt fleißig; der Lehrer lobt ihn. (2.) Der Herr iſt unſer Gaſt; ich habe ſein Haus gekauft. (3.) Die Dame iſt heute abgereiſt; wir ſind ihr begegnet. (4.) Unſere Freunde ſind lange krank geweſen; wir ſchicken ihnen Blumen. (5.) Wir haben geſtern das Schauſpiel geleſen; ich erzählte ihnen davon.

2. Illustrate the use of the following prepositions by means of short but well-constructed German sentences: auf; um; nach; wegen.

Write also short sentences illustrating the difference between hin— and her—, and between aber, ſondern, and allein.

3. Turn the second clause of each of the following sentences into indirect statements or questions:—

(1.) Man ſagte: Der Offizier wird die Einladung annehmen. (2.) Man fragte: Sind ſie müde? (3.) Man ſagt: Er hat den Revolvir geholt. (4.) Der Scheik fragt: Hatte er den Löwen getötet? (5.) Der Diener antwortete: Es iſt uns gelungen, das Tier zu töten.

4. Change the following sentences into sentences expressing unreal conditions and results:—

(1.) Ich werde morgen ein Haus kaufen, wenn ich geld habe. (2.) Er wird kommen, wenn er kann. (3.) Das mag ich wohl, wenn ich darf. (4.) Wir müſſen uns am Bahnhof trennen, wenn Sie nicht kommen können. (5.) Wir laſſen ihn gehen, wenn er nichts davon weiß.

5. Translate:—

(1.) As a child I didn't like to go to school, but I had to. (2.) At what time can you come to-morrow morning? At a quarter to ten. (3.) He saved the one who could swim, and let the other drown. (4.) When I said that, I was not believed. (5.) I suppose he isn't in town. Yes, he is. (6.) At one time it seemed as if he would succeed. (7.) The teacher is satisfied with the exercises written by his pupils. (8.) As long as he needed my help he flattered my vanity. (9.) I am sorry not to have heard him when he was here. (10.) Instead of my helping you always, you must learn to help yourselves.

6. (*a.*) Als er geſtorben war und ſich eben auf den Weg nach dem Himmel machen wollte, kam ein Englein geflogen, brachte einen goldenen Schlüſſel und ſagte: „Einen ſchönen Gruß vom heiligen Petrus, und er hätte gerade heute auswärts zu thun; darum möchtet ihr nur ſelbſt das Himmelsthor aufſchließen und ohne Umſtände eintreten."

Der alte Jürgen dankte und ſteckte den Himmelsſchlüſſel in ſein Wams, dann lud er das ſchwere Netz auf die Schultern und begann die breite Wolkenſtraße hinanfzuſteigen. Auf dem Wege ſchaute er immer um und ſprach bei ſich: „Meine Alte wird gewiß bald nachkommen, denn ſie überlebt meinen Tod nicht lange."

(*b.*) Aus der großen Weltreiſe konnte natürlich vor der Hand nichts werden, aber aufgeſchoben iſt ja nicht aufgehoben. Der Geſell mußte ſein Meiſterſtück machen und dann kam die Hochzeit. Wer denkt da ans Reiſen?

Später ſprach auch die Sorge in der Schuſterwerkſtatt vor. Die Zahl der Köpfe wuchs mit jedem Jahr, und Criſpin mußte vom Morgen bis Abend die Hände rühren. Aber wenn er endlich ſein Schurzfell abgelegt hatte, nahm er die Landkarte vor oder eine Reiſebeſchreibung. Die Siebenmeilenſtiefel hütete er ſorgfältig und erhielt das Leder durch fleißiges Salben geſchmeidig.

(*c.*) Die Köfferchen waren ſo leicht, daß ſie von ſelbſt in die Höhe zu ſpringen ſchienen, als er ſie mit ſeinen geſunden Armen auf die Schulter hob; nichtsdeſtoweniger ging er ſchwer und keuchend, als wenn eine Bergeslaſt auf ihm ruhte. Seufzend zeigte er dem fröhlichen Paare den Weg zwiſchen den Vignenmauern aufwärts und ſchritt traurig hinter ihnen her. Alle paar Minuten ſtand er ſtill und lehnte ſich an die Mauer in einer Stellung, als ob er eben im Begriff wäre, entkräftet zuſammenzubrechen. Der fremde Herr wollte dann wohl zornig werden und ihn mit harten Worten an die rüſtigere Erfüllung der übernommenen Pflicht mahnen, doch das zierliche Frauchen kam ihm jedes Mal zuvor und hieß ihn den Augenblick zum Genuß der herrlichen Landſchaft benutzen. Trotz der ſich immer häufiger wiederholenden Schwächezufälle des überbürdeten Trägers kamen die Reiſenden doch endlich, wenn auch als die letzten von allen Caprifahrern dieſes Tages, am wackeren Hotel Pagano an.

Senior Grade.

Composition. (Time, 2 hours.)

Write an essay on one of the following subjects:—

(1.) Great Books and Wise Readers. (Sesame and Lilies.)

(2.) The Supernatural Element in the Ancient Mariner.

(3.) The Revolution in Russia.

Geography. (Time, 1½ hours.)

1. What are the conditions which produce weather changes on the Coast of British Columbia?

2. Account for the formation of igneous rocks, sedimentary rocks, fertile soil.

3. Discuss causes leading to the formation of flood-plains, deltas, waterfalls.

4. What are moraines? Show how they have affected the drainage of North America.

5. What are the chief causes of Volcanoes and Earthquakes? Explain their action.

Geometry. (Time, 3 hours.)

1. To draw a rectilineal figure which shall be equal to one and similar to another rectilineal figure.

2. Given the base, the vertical angle, and the radius of the inscribed circle, construct the triangle.

3. Similar triangles are to one another in the duplicate ratio of their homologous sides.

4. To bisect a triangle by a line drawn parallel to one of its sides.

5. About a given circle to circumscribe a triangle equiangular to a given triangle.

6. On a given straight line as base, describe an isosceles triangle equal to a given triangle whose sides are each unequal to the given line.

7. To divide a given straight line internally and externally so that its segments may be in a given ratio.

8. ABC is an isosceles triangle in which each of the angles B and C is double the angle A. Show that the square on AB is equal to the rectangle AB.BC with the square on BC.

FRENCH. (Time, 3 hours.)

1. Put in the correct tenses the infinitives in brackets:—

Jean Valjean (être) d'une pauvre famille de paysans. Il (avoir) perdu en bas âge son père et sa mère. Il ne lui (rester) qu'une soeur qui avait sept enfants. Mais un jour le mari (mourir). Jean le (remplacer) auprès des enfants. Sa soeur et lui en travaillant dur (joindre) les deux bouts avec difficulté. Mais il (arriver) qu'un hiver (être) rude. Jean (n'avoir) pas d'ouvrage. Les enfants n'(avoir) pas de pain. Un dimanche soir un boulanger du village se (disposer) à se coucher lorsqu'il (entendre) un coup violent dans la devanture de sa boutique. Il (arriver) à temps pour voir un bras passé à travers le trou fait dans la devanture. Le bras (saisir) un pain et l'(emporter). Le boulanger (sortir) en hâte, (courir) après le voleur et l'(arrêter). C'(être) Jean Valjean.

2. Put in the proper mood and tense each of the infinitives in brackets:—

Paul veut des meubles pour sa chambre. Il croit qu'il lui (falloir) un lit neuf.—"Mais, crois-tu, dit sa mère, que cela te (être) nécessaire?—Oui, maman; il me semble aussi que j'(avoir) besoin d'un fauteuil.—Moi, je ne pense pas que tu en (avoir) besoin. Nous mettrons quelques chaises dans la chambre, afin que les camarades (pouvoir) s'asseoir.—J'espère au moins que j'(avoir) une table de travail.—Oui, il est clair que tu en (avoir) besoin et je crois qu'il te (falloir) aussi une commode, mais je ne crois pas qu'il te (falloir) une toilette, mais il faut que nous (garnir) ta chambre de quelques gravures.

3. Translate:—

(1.) All the old people are more serious. (2.) We didn't have any of the cheese we had bought. (3.) I shall make them write their exercises. (4.) Get the tailor to come. (5.) I made them pay for it. (6.) If he happened to see the book. (7.) My mother doesn't want me to touch them. (8.) He ought to have come sooner. (9.) John has been punished for losing his books. (10.) These pears look ripe, and they smell so sweet!

4. Translate:—

(*a.*) J'allais éperdument, les bras collés au corps, sans sentir les pierres qui roulaient sur mes talons, et sans regarder où je posais mes pieds. L'espace fuyait sous moi; rochers et buissons samblaient courir en sens inverse aux deux côtés de la route; j'étais léger, j'étais rapide, mon corps ne pesait rien: j'avais des ailes. Mais ce bruit de quatre pieds fatiguait mes oreilles. Tout à coup ils s'arrêtent, je n'entends plus rien. Seraient-ils las de me poursuivre? Un petit nuage de poussière s'élève à dix pas devant moi. Un peu plus loin, une tache blanche s'applique brusquement sur un rocher gris. Deux détonations retentissent en même temps. Les brigands venaient de décharger leurs pistolets, j'avais essuyé le feu de l'ennemi et je courais toujours. La poursuite recommence; j'entends deux voix haletantes qui me crient: "Arrête! arrête!" Je n'arrête pas. Je perds le chemin, et je cours toujours, sans savoir où je vais. Un fossé se présente, large comme une rivière; mais j'étais trop bien lancé pour mesurer les distances. Je saute: je suis sauvé. Mes bretelles cassent, je suis perdu!

(*b.*) The king charged the Corfiote to attend to us. He had orders to sleep near my tent, which consisted of a strip of felt. In the night a dreadful fusilade awoke us with a start, and, rising suddenly, I knocked my head against the dog of a Corfiote. I thought it was the gendarmes, but he said that they did not travel on the 1st of May, which was a holiday. He invited us to see the festivities, and we followed him to the robber camp, where we heard rifle shots going off in all directions.

5. (*a.*) Translate:—

"Pauvre père Jouve! Il s'était sans doute imaginé qu'on voulait l'empêcher d'assister à ce défilé de nos troupes, pour lui éviter une trop grande émotion.

Aussi se garda-t-il bien de parler à personne; mais le lendemain, à l'heure même où les bataillons prussiens s'engageaient timidement sur la longue voie qui mène de la porte Maillot aux Tuileries, la fenêtre de là-haut s'ouvrit doucement, et le colonel parut sur le balcon avec son casque, sa grande latte, toute sa vieille défroque glorieuse d'ancien cuirassier de Milhaud. Je me demande encore quel effort de volonté, quel sursaut de vie l'avait ainsi mis sur pied et harnaché. Ce qu'il y a de sûr, c'est qu'il était là, debout derrière la rampe, s'étonnant de trouver les avenues si larges, si muettes, les persiennes des maisons fermées, Paris sinistre comme un grand lazaret, partout des drapeaux, mais si singuliers, tout blancs avec des croix rouges, et personne pour aller au-devant de nos soldats.

(*b.*) Racontez en français l'histoire du siège de Berlin et montrez l'intérêt de ce conte dans les circonstances présentes.

6. (*a.*) Translate:—

Le soldat, à qui l'on avait promis l'appui de Grouchy et qui n'a vu arriver que Bülow et Blücher, se croit trahi, perd la tête et n'écoute plus la voix de ses chefs. La nuit d'ailleurs est venue compléter le désastre; il est plus de neuf heures. L'armée débandée, poursuivie par la cavalerie ennemie, ne sait plus si l'empereur est vivant ou mort, et court affolée vers la route de France. Les carrés de la garde, au milieu desquels se trouve Napoléon, noyés dans les flots de l'ennemi, reculent en combattant sans cesse. Avec un courage non moins admirable, on vit, après que nos régiments eurent été rompus, des groupes d'officiers et de soldats d'élite, serrés autour des aigles, se frayer un passage à travers l'ennemi. Pas un drapeau ne fut perdu dans cette immense déroute. Soixante-douze mille hommes avaient succombé sous l'effort de cent trente mille, après dix heures d'une lutte acharnée. La victoire coûtait à l'ennemi plus de vingt-deux mille hommes, dont les deux tiers aux Anglais.

(*b.*) Racontez brièvement l'entrée de Napoléon à Paris à son retour de l'île d'Elbe, ou bien, faites une courte description de ses occupations journalières à Sainte-Hélène.

PHYSICAL SCIENCE. (Time, 1½ hours.)

1. (*a.*) How is Boyle's Law proved by experiment?

(*b.*) A given mass of air has a volume of 120 c.c. when the pressure is 740 m.m. of mercury. At what pressure will its volume be 100 c.c., the temperature remaining constant?

2. (*a.*) State Newton's Laws of Motion.

(*b.*) Discuss at least one example of the operation of each law.

3. A certain brass rod is 10 feet long at 20° C. What will be its length at 100° C., the coefficient of expansion of brass being 0.000019?

4. Give a short statement of the physical meaning of the absolute zero.

5. If a voltaic cell of E.M.F. 2 volts maintains a current of 1.5 amperes through an external resistance of 1 ohm, what is the internal resistance of the cell?

6. (*a.*) How is an electro-magnet constructed?

(*b.*) Given the direction of the current in a solenoid, show, in a drawing, how to predict the polarity of the coil.

7. How would you proceed to show that there are two kinds of electrification?

ENGLISH LITERATURE. (Time, 3 hours.)

1. Quote three of the following:—
   (*a.*) A stanza from the "Cotter's Saturday Night."
   (*b.*) A passage of about ten lines from "The Vanity of Human Wishes."
   (*c.*) A stanza from "Adonais."
   (*d.*) A passage from "Sesame and Lilies."

2. Write a page or so on each of the following topics:—
   (*a.*) The relations of crime, punishment, and forgiveness in "The Ancient Mariner."
   (*b.*) The originality and the basis in truth of "Intimations of Immortality."
   (*c.*) Ruskin's dictum, "Shakespeare has no heroes, only heroines."
   (*d.*) Ruskin's moral earnestness.

3. How is the Pretender connected with the plot of "Henry Esmond"? Criticize the plot in one important particular. Contrast this novel in two ways with the work of Scott.

4. Write on each of the following:—
   (*a.*) Pope's wit and humour in "The Rape of the Lock."
   (*b.*) The references Spenser makes to his own life in "Prothalamion."
   (*c.*) The lessons George Eliot evidently teaches in her sketch of Godfrey Cass.

5. In what ways is "Adonais" characteristic of Shelley?

6. (*a.*) "When Shakespeare arrived in London, only two theatres existed." (*S. Brooke.*) Name these theatres. When did Shakespeare arrive in London?
   (*b.*) "The Second Stage of the drama ranges from 1580-1596." (*S. Brooke.*) Give an account of this stage. What plays had Shakespeare written before 1596?

ALGEBRA. (Time, 3 hours.)

1. Divide $6xy^{\frac{1}{2}}(x-y) - x^{\frac{3}{2}}y\sqrt{6}$ by $2x\sqrt{3} - 3x^{\frac{1}{2}}y^{\frac{1}{2}}\sqrt{2}$.

2. The sum of five numbers of an Arithmetical Progression is 10 and the sum of their squares is 60. Find the numbers.

3. Prove by the Binomial Theorem that $1 + \frac{3}{4} + \frac{3.5}{4.8} + \frac{3.5.7}{4.8.12} + \ldots$ ad inf. $= \sqrt{8}$.

4. (*a.*) Find the term independent of x in the expansion of $\left(3x^2 - \frac{a}{3x^3}\right)^{10}$.
   (*b.*) Expand to four terms $\left(x^{2n} + na^{2n}\right)^{\frac{5}{n}}$.

5. Insert seven harmonic means between $\frac{1}{4}$ and $\frac{1}{18}$ and find the sum of their reciprocals.

6. (*a.*) Form the quadratic equation whose roots are $5 \pm \sqrt{6}$.
   (*b.*) If the roots of $x^2 - px + q = 0$ are two consecutive integers, prove that $p^2 - 4q - 1 = 0$.

7. (*a.*) If $p:q$ be the duplicate ratio of $p-r:q-r$, prove that r is a mean proportional between p and q.
   (*b.*) Solve $\frac{\sqrt{x}+a}{\sqrt{x}-b} = \frac{\sqrt{x}-a}{\sqrt{x}}$.

8. (*a.*) Given log 2 = .3010300, log 3 = .4771213, log 7 = .8450980, find the logarithms of .005, 6.3, $\left(\frac{49}{216}\right)^{\frac{1}{3}}$.

(*b.*) Find x from the equation $18^{8-4x} = (54\sqrt{2})^{3x-2}$.

9. (*a.*) If the number of combinations of n things when taken 5 at a time is equal to the number when taken 10 at a time, find the number of combinations 2 at a time.

(*b.*) There are 8 white billiard balls exactly alike, and 4 red ones also alike; in how many ways can an arrangement be made containing 3 of each colour?

Roman History. (Time, 2 hours.)

[Note.—*Write on question 1 and any* four *of the other topics.*]

1. Write notes on: Comitia Centuriata; Tribunes of the Plebs; Censor; Zama; Constitutional Changes of Sulla; Philippi; Pretorian Guard; Colosseum; Edict of Milan.

2. The prominent characteristics of early Roman character and the changes effected thereon by foreign conquests.

3. The condition and disabilities of the Plebs at the beginning of the Republic 509 B.C., and an account of their struggle with the Patricians from 509 B.C. to 367 B.C., inclusive.

4. The career of Gaius Marius, noting the social and political condition of Rome at this period.

5. Contrast Rome with Carthage, and write an account of the final struggle between these two states.

6. The reign of Justinian.

7. The final location within the Empire of the barbarian races that invaded it, with the history of *one* of these races.

8. The reign of Charlemagne.

Latin. (Time, 3 hours.)

A. (*a.*) Translate:—

Deinde, quod nos eadem Asia atque idem iste Mithridates initio belli Asiastici docuit, id quidem certe calamitate docti memoria retinere debemus. Nam tum, cum in Asia res magnas permulti *amiserant*, scimus Romae solutione impedita fidem concidisse. Non enim possunt una in civitate multi rem ac fortunas amittere, ut non plures secum in eandem *trahant* calamitatem.

1. To what is Cicero referring in the first sentence?
2. Explain tense of *amiserant* and mood of *trahant*.

(*b.*) Translate:—

Hic miramur hunc hominem tantum excellere ceteris, cuius legiones sic in Asiam pervenerint, ut non modo manus tanti exercitus, sed ne vestigium quidem cuiquam pacato nocuisse dicatur? Iam vero quem ad modum milites *hibernent*, cotidie sermones ac litterae perferuntur. Non modo ut sumptum faciat in militem nemini vis adfertur sed ne cupienti quidem cuiquam permittitur. *Hiemis* enim, non *avaritiae* perfugium maiores nostri in sociorum atque amicorum tectis esse voluerunt.

1. *Hiemis enim, non avaritiae perfugium.* Explain the double use of the genitive.
2. Explain the mood of *hibernent* and case of *cupienti*.

(*c.*) Translate:—

Hoc si *vos* temere fecistis et rei publicae parum consuluistis, recte *isti* studia vestra suis consiliis regere conantur: sin autem vos plus tum in re publica vidistis, vos his *repugnantibus* per vosmet ipsos dignitatem huic imperio, salutem orbi terrarum attulistis, aliquando isti principes et *sibi* et ceteris populi Romani universi *auctoritati* parendum esse fateantur.

1. *Principes et sibi . . . fateantur.* Explain the datives *sibi* and *auctoritati.* When is the use of the double dative a legitimate construction?
2. *Rei publicae consuluistis. Consulo* does not always take a dative. Explain.
3. Who are meant by *vos, isti?* Case of *repugnantibus.*

(*d.*) What are the three main sections into which Cicero divides his argument? In which of these does he show the greatest ability? What is the weakest part of the whole speech?

B. Translate into Latin:—

Can you not, fellow-citizens, defend the great reputation of your sovereignty handed down to you by your ancestors, who were not indifferent to the infringement of their liberties but, when the right of ambassadors was violated merely by a word, desired to destroy Corinth, the ornament of entire Greece? How long will you permit this king to go unpunished, who has slaughtered thousands of our citizens and allies and has punished an ambassador of the Roman people with every kind of torture? Now all the states in all Asia and Greece cherish this same desire; namely, that you dispatch the one man by whom the attacks of the enemy can be stayed.

C. (*a.*) Translate:—

Quisquis es, amissos hinc iam obliviscere Graios;
Noster eris, mihique haec edissere vera roganti:
Quo molem hanc inmanis equi statuere? quis auctor?
Quidve petunt? quae religio? aut quae machina belli?

1. Parse *obliviscere, roganti, statuere.*
2. What is the literal meaning of *quo?*

(*b.*) Translate:—

Hanc tamen inmensam Calchas attollere molem
Roboribus textis caeloque educere iussit,
Ne recipi portis, aut duci in moenia posset,
Neu populum antiqua sub religione tueri.
Nam si vestra manus violasset dona Minervae,
Tum magnum exitium—quod di prius omen in ipsum
Convertant!—Priami inperio Phrygibusque futurum.

1. Account for the case of *violasset, convertant, futurum.*
2. Scan the last two lines.

(*c.*) Translate:—

Qualis ubi in lucem coluber mala gramina pastus,
Frigida sub terra tumidum quem bruma tegebat,
Nunc, positis novus exuviis nitidusque iuventa,
Lubrica convolvit sublato pectore terga
Arduus ad solem, et linguis micat ore trisulcis.

(*d.*) Translate:—

Forsitan et, Priami fuerint quae fata, requiras.

1. Account for the mood of *fuerint, requiras.*

(*e.*) Translate:—

Namque etsi nullum memorabile nomen
Feminea in poena est nec habet victoria laudem,
Exstinxisse nefas tamen et sumpsisse merentis
Laudabor poenas, animumque explesse iuvabit
Ultricis flammae, et cineres satiasse meorum.

1. Account for the case of *merentis, flammae.*
2. What is the subject of *iuvabit?*

(*f.*) Translate:—

Est urbe egressis tumulus templumque vetustum
Desertae Cereris, iuxtaque antiqua cupressus
Religione patrum multos servata per annos.

1. Account for the case of *egressis.*

D. (*a.*) Translate:—

heu quoties fidem
mutatosque deos flebit et aspera
nigris aequora ventis
emirabitur insolens,
qui nunc te fruitur credulus aurea;
qui semper vacuam, semper amabilem
sperat nescius aurae
fallacis. miseri, quibus
intentata nites! me tabula sacer
votiva paries indicat uvida
suspendisse potenti
vestimenta maris deo.

1. Account for the case of *aurea, aurae, intentata, me, tabula.*

(*b.*) Translate:—

Romulum post hos prius, an quietum
Pompili regnum memorem, an superbos
Tarquini fasces, dubito, an Catnois
nobile letum.
Regulum et Scauros animaeque magnae
prodigum Paullum superante Poeno
gratus insigni referam Camena
Fabriciumque.
hunc et incomptis Curium capillis
utilem bello tulit et Camillum
saeva paupertas et avitus apto
cum lare fundus.

1. Account for the mood of *memorem;* the case of *animae.*
2. Write historical notes.
3. What metre is this?

(*c.*) Translate:—

Nullam, Vare, sacra vite prius severis arborem
circa mite solum Tiburis et moenia Catili.
siccis omnia nam dura deus proposuit, neque
mordaces aliter diffugiunt sollicitudines.

1. Account for the case of *siccis;* the mood of *severis.*

(*d.*) Translate:—

quod si Threïcio blandius Orpheo
auditam moderere arboribus fidem,
non vanae redeat sanguis imagini,
quam virga semel horrida,
non lenis precibus fata recludere,
nigro compulerit Mercurius gregi.
durum: sed levius fit patientia,
quidquid corrigere est nefas.

1. Account for the case of *gregi;* the mood of *moderere.*

GREEK. (Time, 3 hours.)

A. (*a.*) Translate:—

εἰς δὲ δὴ εἶπε, προσποιούμενος σπεύδειν ὡς τάχιστα πορεύεσθοι εἰς τὴν Ἑλλάδα, στρατηγοὺς μὲν ἑλέσθαι ἄλλους ὡς τάχιστα, εἰ μὴ βούλεται Κλέαρχος ἀπάγειν· τὰ δ' ἐπιτήδεια ἀγοράζεσθαι (ἡ δ' ἀγορὰ ἦν ἐν τῷ βαρβαρικῷ στρατεύματι), καὶ συσκευάζεσθαι· ἐλθόντας δὲ Κῦρον αἰτεῖν πλοῖα, ὡς ἀποπλέοιεν· ἐάν δὲ μὴ διδῷ ταῦτα, ἡγεμόνα αἰτεῖν Κῦρον, ὅστις διὰ φιλίας τῆς χώρας ἀπάξει. ἐὰν δὲ μηδὲ ἡγεμόνα διδῷ, συντάττεσθαι τὴν ταχίστην, πέμψαι δὲ καὶ προκαταληψομένους τὰ ἄκρα, ὅπως μὴ φθάσωσι μήτε Κῦρος μήτε οἱ Κίλικες καταλαβόντες, ὧν πολλοὺς καὶ πολλὰ χρήματα ἔχομεν ἀνηρπακότες. οὗτος μὲν δὴ τοιαῦτα εἶπε. μετὰ δὲ τοῦτον Κλέαρχος εἶπε τοσοῦτον.

1. Explain fully the case of ἐλθόντας, πλοῖα, τὴν ταχίστην; mood of ἀποπλέοιεν, διδῷ.
2. What is the difference in meaning between διὰ φιλίας τῆς χώρας and διὰ τῆς φιλίας χώρας?
3. Parse φθάσωσι, ἀνηρπακότες, προκαταληψομένους.

(*b.*) Translate:—

Φίλους γε μὴν ὅσους ποιήσαιτο, καὶ εὔνους γνοίη ὄντας, καὶ ἱκανοὺς κρίνειε συνεργοὺς εἶναι ὅ τι τυγχάνοι βουλόμενος κατεργάζεσθαι, ὁμολογεῖται πρὸς πάντων κράτιστος δὴ γενέσθαι θεραπεύειν. καὶ γὰρ αὐτὸ τοῦτο, οὗπερ αὐτὸς ἕνεκα φίλων ᾕετο δεῖσθαι, ὡς συνεργοὺς ἕξοι, καὶ αὐτὸς ἐπειρᾶτο συνεργὸς τοῖς φίλοις κράτιστος εἶναι τούτου ὅτου ἕκαστον αἰσθάνοιτο ἐπιθυμοῦντα.

1. Explain syntax of γνοίη, ὄντας, οὗπερ, φίλων, ὅτου.
2. Parse ἐπειρᾶτο, αἰσθάνοιτο. What is the positive degree of κράτιστος?
3. Give the principal parts of κρίνειε, τυγχάνοι, γνοίη.

(*c.*) Translate:—

Ἐπεὶ δὲ καὶ ἐνταῦθ' ἐχώρουν οἱ Ἕλληνες, λείπουσι δὴ καὶ τὸν λόφον οἱ ἱππεῖς· οὐ μὴν ἔτι ἀθρόοι, ἀλλ' ἄλλοι ἄλλοθεν· ἐψιλοῦτο δ' ὁ λόφος τῶν ἱππέων· τέλος δὲ καὶ πάντες ἀπεχώρησαν. ὁ οὖν Κλέαρχος οὐκ ἀνεβίβαζεν ἐπὶ τὸν λόφον, ἀλλ' ὑπ' αὐτὸν στήσας τὸ στράτευμα πέμπει Λύκιον τὸν Συρακόσιον καὶ ἄλλον ἐπὶ τὸν λόφον, καὶ κελεύει κατιδόντας τὰ ὑπὲρ τοῦ λόφου τί ἐστιν ἀπαγγεῖλαι.

1. Account for the genitive ἱππέων. Parse τέλος, στήσας.

B. (*a.*) Translate :—

Μετὰ τοῦτον Θεόπομπος Ἀθηναῖος εἶπεν· "Ὦ Φαλῖνε, νῦν, ὡς σὺ ὁρᾷς, ἡμῖν οὐδὲν ἔστιν ἀγαθὸν ἄλλο εἰ μὴ ὅπλα καὶ ἀρετή. ὅπλα μὲν οὖν ἔχοντες οἰόμεθα ἂν καὶ τῇ ἀρετῇ χρῆσθαι, παραδόντες δ' ἂν ταῦτα καὶ τῶν σωμάτων στερηθῆναι. μὴ οὖν οἷον τὰ μόνα ἡμῖν ἀγαθὰ ὄντα ὑμῖν παραδώσειν· ἀλλὰ σὺν τούτοις καὶ περὶ τῶν ὑμετέρων ἀγαθῶν μαχούμεθα." ἀκούσας δὲ ταῦτα ὁ Φαλῖνος ἐγέλασε καὶ εἶπεν· "Ἀλλὰ φιλοσόφῳ μὲν ἔοικας, ὦ νεανίσκε, καὶ λέγεις οὐκ ἀχάριτα· ἴσθι μέντοι ἀνόητος ὤν, εἰ οἴει ἂν τὴν ὑμετέραν ἀρετὴν περιγενέσθαι τῆς βασιλέως δυνάμεως." ἄλλους δέ τινας ἔφασαν λέγειν ὑπομαλακιζομένους ὡς καὶ Κύρῳ πιστοὶ ἐγένοντο καὶ βασιλεῖ ἂν πολλοῦ ἄξιοι γένοιντο, εἰ βούλοιτο φίλος γενέσθαι· καὶ εἴτε ἄλλο τι θέλοι χρῆσθαι εἴτ' ἐπ' Αἴγυπτον στρατεύειν, συγκαταστρέψαιντ' ἂν αὐτῷ.

1. Express *παραδόντες* in the form of a conditional clause.
2. Rewrite *ἂν στερηθῆναι* in Oratio Recta.
3. Explain case of *σωμάτων*; parse *στερηθῆναι*; give derivation of *ἀνόητος*.
4. Explain syntax of *ὤν*, *πολλοῦ*, *ἄλλο τι*.

(*b.*) Translate :—

Ἀκούσας δὲ ὁ Κλέαρχος ταῦτα ἤρετο τὸν ἄγγελον πόση τις εἴη χώρα ἡ ἐν μέσῳ τοῦ Τίγρητος καὶ τῆς διώρυχος. ὁ δὲ εἶπεν ὅτι πολλή, καὶ κῶμαι ἔνεισι καὶ πόλεις πολλαὶ καὶ μεγάλαι. τότε δὴ καὶ ἐγνώσθη ὅτι οἱ βάρβαροι τὸν ἄνθρωπον ὑποπέμψαιεν, ὀκνοῦντες μὴ οἱ Ἕλληνες διελόντες τὴν γέφυραν μένοιεν ἐν τῇ νήσῳ, ἐρύματα ἔχοντες ἔνθεν μὲν τὸν Τίγρητα, ἔνθεν δὲ τὴν διώρυχα· τὰ δ' ἐπιτήδεια ἔχοιεν ἐκ τῆς ἐν μέσῳ χώρας πολλῆς καὶ ἀγαθῆς οὔσης, καὶ τῶν ἐργασομένων ἐνόντων· εἶτα δὲ καὶ ἀποστροφὴ γένοιτο, εἴ τις βούλοιτο βασιλέα κακῶς ποιεῖν.

1. Explain syntax of *εἴη*, *ἐνόντων*, *γένοιτο*.
2. Parse *ἐγνώσθη*, *διελόντες*.

C. Translate into Greek :—

1. Upon this there arose great terror among the rest of the barbarians; the Cilician queen fled from her car and the people in the market deserted their goods and took to their heels, while the Greeks marched up to the tents with laughter.
2. Here Cyrus and the army remained twenty days; for the soldiers refused to proceed farther as they now began to suspect that they were marching against the king and said they had not been hired for that purpose.

TRIGONOMETRY. (Time, 3 hours.)

1. (*a.*) Show that no root of $5 \sin \theta + 4 = 0$ can be an angle of a triangle.
   (*b.*) Prove geometrically that $\sin (270° + A) = -\cos A$.
2. (*a.*) Prove $\sin (A - B) = \sin A \cos B - \cos A \sin B$.
   (*b.*) ABC is a triangle, $B = 90°$, $BA = 2$, $BC = 3$, CD is the median joining C to the middle point of AB. Prove that $\tan ACD = \frac{3}{11}$.

3. (*a.*) Prove $\cos A + \cos B = 2 \cos \frac{A+B}{2} \cos \frac{A-B}{2}$.

(*b.*) Prove $\cos \frac{A}{2} = \sqrt{\frac{s(s-a)}{bc}}$.

(*c.*) Prove $\tan \frac{A-B}{2} = \frac{a-b}{a+b} \cot \frac{C}{2}$.

4. Find B and C, having given $A = 50°$, $b = 119$, $a = 97$, log 1.19 = .0755470, L sin 70° = 9.9729858, log 9.7 = .9867717, L sin 70° 1′ = 9.9730318, L sin 50° = 9.8842540.

5. (*a.*) The moon's distance from the earth is 240,000 miles, and its diameter subtends an angle of 31′. Find its diameter.

(*b.*) Find the number of radians in each of the angles of a triangle which are in Arithmetic Progression, the least angle being 36°.

6. Solve :—

(*a.*) $\sin 7\theta = \sin 4\theta - \sin \theta$.

(*b.*) $\tan x - \sqrt{3} \cot x + 1 = \sqrt{3}$.

7. (*a.*) If $\log \frac{1025}{1024} = p$, and $\log 2 = q$, prove $\log 4100 = p + 12q$.

(*b.*) Prove that the rectangle contained by the diameters of the circumscribed and inscribed circles of a triangle is equal to $\frac{2abc}{a+b+c}$.

8. Prove :—

(*a.*) $\sin 33° + \cos 63° = \cos 3°$.

(*b.*) $\cos \delta + \cos 3\delta + \cos 5\delta + \cos 7\delta = \frac{1}{2} \sin 8\delta \operatorname{cosec} \delta$.

GERMAN. (Time, 3 hours.)

1. (*a.*) Complete the following sentences by choosing the correct word from among those given in brackets :—

(1.) Er war in der Stube, dann ging er zur Tür (hin—, her—) aus. (2.) Er hat das Land (durchgereiſt, durchreiſt). (3.) Ich habe ihn nicht geſehen (ſeit, ſeitdem) er angekommen iſt. (4.) Frage ihn (wenn, wann, ob) er müde iſt. (5.) (Nach, nachdem, nachher) er fort war, mußte ich noch einen Brief ſchreiben.

(*b.*) Translate with special attention to prepositions :—

(1.) I am going away for a week. (2.) He is studying at the university. (3.) He complains of the heat. (4.) There is a lack of men. (5.) Pay attention to my words.

(*c.*) Put infinitives into the correct mood and tense :—

(1.) Er eilte, daß er nicht zu ſpät (kommen). (2.) Er fragte, ob er das tun (dürfen). (3.) Der gaſt antwortete, er (gedenken) den Löwen zu töten. (4.) Ich dächte das (ſein) gut. (5.) So gern ich (gehen), ſo unmöglich iſt es.

(*d.*) Put into German :—

(1.) That can easily be done. (2.) I need your help. (3.) Being honest, he can be trusted. (4.) That sort of thing often happens here. (5.) I should be allowed to do it.

2. (*a.*) Translate :—

Kaum hatte er dies ausgeſprochen, ſo fing es an Thaler zu regnen, harte, blanke Thaler, als wenn es mit Mulden göſſe, und die Thaler ſchlugen ihm auf Kopf, Schultern und Arme. Er fing an kläglich zu ſchreien und wollte zur Thüre ſpringen, doch ehe er ſie erreichen und aufriegeln konnte, ſtürzte er, am ganzen Leibe blutend, zu Boden. Aber das Thalerregnen nahm kein Ende, und bald brach von der Laſt die Diele zuſammen, und der Goldſchmied mitſammt dem Gelde ſtürzte in den tiefen Keller. Darauf regnete es immer weiter, bis die Hunderttauſend voll waren, und zuletzt lag der Goldſchmied tot im Keller und auf ihm das viele Geld. Von dem Lärm kamen die Nachbarn herbeigeeilt, und als ſie den Goldſchmied tot unter dem Gelde liegen fanden, ſprachen ſie : „Es iſt doch ein großes Unglük, wenn der Segen ſo knüppeldick kommt." Darauf kamen auch die Erben und theilten.

(*b.*) Put into German :—

She did not despair (verzweifeln), however, but determined to hold out to the end, knowing that she would redeem her husband.

Now when the knight learned (erfahren) that his wife had left him, he knew that she had found-out (merken) all.

The hermit, of whom he asked advice, told him to do good to the poor and go into all the churches, and he would find his wife again.

So the knight rode out into the world, giving money to the poor, and going into all the churches to pray.

After he had been travelling about for a whole year to-no-purpose, he came into the town where his wife sat begging at the church-door.

3. (*a.*) Translate :—

Bolz. Da faßt mich eine Menſchenhand am Genick, ein Seil wird mir unter die Arme geſchlungen und eine kräftige Fauſt hebt mich vom Boden. Im Augenblick darauf war ich auf der Leiter, halb gezogen, halb getragen, mit brennendem Hemd und ohne Bewußtſein kam ich auf dem Steinpflaſter an.— Ich erwachte in dem Zimmer des jungen Gelehrten. Außer einigen kleinen Brandwunden hatte ich nichts in die neue Wohnung herübergebracht. Alle meine Habe war verbrannt. Der fremde Mann pflegte mich und ſorgte für mich, wie ein Bruder für den andern.—Erſt als ich wieder ausgehen konnte, erfuhr ich, daß dieſer Gelehrte, der mich bei ſich aufgenommen hatte, derſelbe Mann war, der mir in jener Nacht auf der Leiter ſeinen Beſuch gemacht hatte.— Sehen Sie, der Mann hat das Herz auf dem rechten Fleck, und deshalb wünſche ich ihm, daß er jetzt Deputirter werde, und deshalb könnte ich für ihn thun, was ich für mich ſelbſt nicht thäte; ich könnte für ihn werben, intriguiren und ehrliche Leute zum Beſten haben.—Dieſer Mann iſt der Profeſſor Oldendorf.

(*b.*) Beſchreiben Sie abgekürzt die Weiſe, worauf der Oberſt und der Profeſſor ſich endlich verſöhnen.

(*c.*) Render freely into English :—

Herein mit der Dame; was ſoll das alles ? nun, das wäre ja recht ſchön; reinen Mund gehalten; was macht der Coriolan ?; das war überliſtet; das mag der Kuckuck wiſſen; nichts über kaltes Blut; ich ſchreibe friſch drauf los, ſolange es geht; oho ! das wäre mir was !

4. (*a.*) Translate :—

„Da hat man ja recht," erwiderte Dr. Kühl. „Die Engländer sind später dem Bunde beigetreten. Man darf das Verdienst der Preußen in der letzten Schlacht Napoleons nur nicht unterschätzen. Das tun die Engländer sehr gern. Sie schreiben Wellington den Sieg fast ausschließlich zu. Aber nach einem langen, erschöpfenden Tage des Kampfes rief dieser, wie die Geschichte erzählt, in seiner Verzweiflung aus: ‚Ich wünschte, es wäre Nacht, oder die Preußen kämen!' Und im entscheidenden Augenblick erschien der preußische Feldherr Blücher, der, um sein Wort zu halten, seine Soldaten zu fast übermenschlichen Anstrengungen angespornt hatte. Er griff Napoleons rechten Flügel an, und nach kurzer Zeit befand sich dessen letztes Heer in wilder Flucht. Die Weltherrschaft der Franzosen war zu Ende. Unser Preußen hatte ihnen zuerst den Krieg erklärt und hatte ihn auch zu glücklichem Ausgang geführt. Preußen war es, das den Bund zwischen Rußland, Österreich, England und Holland zustande brachte und eine wichtige Rolle in diesem Bunde spielte."

(*b.*) Beantworten Sie folgende Fragen auf Deutsch :—

(1.) Weshalb ist Weimar berühmt? (2.) Was verherrlicht Schiller in seinen Dramen? (3.) Beschreiben Sie die Siegesallee. (4.) Auf welche Weise sorgt die deutsche Regierung für den Forst? (5.) Welche Länder grenzen an Deutschland.

(*c.*) Put into German :—

(1.) Go and take this pair of shoes with you. (2.) But I brought them only yesterday. (3.) That is too bad, but leave the other pair here and come back very quickly. (4.) Please begin the poem and hold your hands still. (5.) According to the old custom he called her Liesbeth. (6.) The child knew the poem this morning. (7.) The lieutenant has never known me. (8.) He does not know how many horses he has. (9.) They always called one another comrades. (10.) His expression became more and more serious.

Senior Academic Grade.

English Literature. (Time, 3 hours.)

1. Discuss the criticism that both in "Julius Caesar" and "Macbeth" there is weakness in the fourth act.

2. (*a.*) Quote a passage of at least 15 lines from each of the above plays and comment upon the dramatic significance of each quotation.
   (*b.*) Quote ten short passages (2–6 lines) from Pope's "Essay on Man."
   (*c.*) Quote three striking sentences from "Crown of Wild Olive," *or* "Heroes and Hero-worship.

3. (*a.*) Can one apply to Brutus and Macbeth the criticism—

> "These men
> Carrying, I say, the stamp of one defect, ...
> Shall in the general censure take corruption
> From that particular fault."

   (*b.*) Where is this quotation found? What is the probable origin of this view?

4. (*a.*) Discuss the conception of history that underlies Carlyle's "Heroes and Hero-worship."
   (*b.*) Which one of the Heroes do you feel most inclined to rule out? Why?

5. Examine Goldsmith's literary work, keeping the tendencies of his day in mind.

6. About what date was "The Crown of Wild Olive" written? How was it received by the reading public? Why?

7. (*a.*) Explain Brooke's remark that the spirit of the age repressed Gray.
   (*b.*) Sketch the character of Chaucer.

Education. (Time, 2 hours.)

1. Outline the duties of a teacher in regard to:—
   (*a.*) Contagious diseases.
   (*b.*) Recesses.
   (*c.*) School property.
   (*d.*) Home lessons.
   (*e.*) Time-tables.

2. (*a.*) What provision is made for the financial support of schools?
   (*b.*) Under what conditions are Government grants given?

3. What qualifications entitle a person to vote at School Elections in:—
   (*a.*) A Municipal School District?
   (*b.*) A Rural School District?
   (*c.*) An Assisted School District?

4. State the provisions regarding school accommodation. How should the work of the teachers be divided in a two-teacher and in a three-teacher school?

5. Give outline of a lesson to an intermediate class on the physical features of British Columbia.

6. What is the chief value of Nature Study? Show how this aim can be carried out by creating an interest in school gardens.

7. (*a.*) What are the psychological values of questioning and answering to the teacher and to the pupil?

(*b.*) Distinguish between a *teaching* and a *testing* lesson. Give an illustration.

8. Explain:—

(*a.*) "Ideas not words should be taught."

(*b.*) "The Aim of the School is to produce Social Efficiency."

A. (*a.*) Translate:—

Καὶ δὴ λαβόντες ἀμφορέας τινὰς καὶ ὑδρευσάμενοί τε ἅμα καὶ ἐκ τοῦ ποταμοῦ οἰνισάμενοι, καὶ αὐτοῦ πλησίον ἐπὶ τῆς ἠϊόνος αὐλισάμενοι, ἕωθεν ἀνήχθημεν οὐ σφόδρα βιαίῳ πνεύματι. περὶ μεσημβρίαν δέ, οὐκέτι τῆς νήσου φαινομένης, ἄφνω τυφὼν ἐπιγενόμενος καὶ περιδινήσας τὴν ναῦν, καὶ μετεωρίσας ὅσον ἐπὶ σταδίους τρισχιλίους, οὐκέτι καθῆκεν εἰς τὸ πέλαγος, ἀλλ' ἄνω μετέωρον ἐξηρτημένην. ἄνεμος ἐμπεσὼν τοῖς ἱστίοις ἔφερε κολπώσας τὴν ὀθόνην.

1. Explain syntax of *αὐτοῦ, νήσου, ὅσον, ἱστίοις.*
2. Parse *ἀνήχθημεν* and *ἐξηρτημένην.*

(*b.*) Translate:—

Ἐσθὴς δὲ τοῖς μὲν πλουσίοις ὑαλίνη, μαλθακή· τοῖς πένησι δὲ χαλκῆ ὑφαντή· πολυχαλκα γὰρ τὰ ἐκεῖ χωρία, καὶ ἐργάζονται τὸν χαλκὸν ὕδατι ὑποβρέξαντες, ὥσπερ τὰ ἔρια. περὶ μέντοι τῶν ὀφθαλμῶν, οἵους ἔχουσιν, ὀκνῶ μὲν εἰπεῖν, μή τίς με νομίσῃ ψεύδεσθαι διὰ τὸ ἄπιστον τοῦ λόγου· ὅμως δὲ καὶ τοῦτο ἐρῶ. τοὺς ὀφθαλμοὺς περιαιρετοὺς ἔχουσι· καὶ ὁ βουλόμενος ἐξελὼν τοὺς αὑτοῦ φυλάττει, ἔστ' ἂν δεηθῇ ἰδεῖν· οὕτω δὲ ἐνθέμενος ὁρᾷ. καὶ πολλοὶ τοὺς σφετέρους ἀπολέσαντες παρ' ἄλλων χρησάμενοι ὁρῶσιν. εἰσὶ δ' οἳ καὶ πολλοὺς ἀποθέτους ἔχουσιν, οἱ πλούσιοι. τὰ ὦτα δὲ πλατάνων φύλλα ἐστὶν αὐτοῖς· εἰσὶ δ' οἳ καὶ ξύλινα ἔχουσιν. ἐπειδὰν δὲ γηράσῃ ὁ ἄνθρωπος, οὐκ ἀποθνήσκει, ἀλλ' ὥσπερ ὁ καπνὸς διαλυόμενος ἀὴρ γίγνεται.

1. Explain the mood of *νομίσῃ* and *δεηθῇ.*
2. What is the usual meaning of *χρησάμενοι*? What case does it usually take? What is its object here?
3. Parse *ἐνθέμενος* and *ἀπολέσαντες.*

(*c.*) Translate:—

Βούλομαι δὲ εἰπεῖν καὶ τῶν ἐπισήμων οὕστινας παρ' αὐτοῖς ἐθεασάμην· πάντας μὲν τοὺς ἡμιθέους καὶ τοὺς ἐπὶ Ἴλιον στρατεύσαντας, πλήν γε δὴ τοῦ Λοκροῦ Αἴαντος. ἐκεῖνον δὲ μόνον ἔφασκον ἐν τῷ τῶν ἀσεβῶν χώρῳ κολάζεσθαι. βαρβάρων δὲ Κύρους τε ἀμφοτέρους καὶ τὸν Σκύθην Ἀνάχαρσιν καὶ τὸν Θρᾷκα Ζάμολξιν καὶ Νουμᾶν τὸν Ἰταλιώτην, καὶ μὴν καὶ Λυκοῦργον τὸν Λακεδαιμόνιον καὶ Φωκίωνα καὶ Τέλλον, τοὺς Ἀθηναίους, καὶ τοὺς σοφούς, ἄνευ Περιάνδρου. εἶδον δὲ καὶ Σωκράτην τὸν Σωφρονίσκου ἀδολεσχοῦντα μετὰ Νέστορος καὶ Παλαμήδους· περὶ δὲ αὐτὸν ἦσαν Ὑάκινθός τε ὁ Λακεδαιμόνιος καὶ ὁ Θεσπιεὺς Νάρκισσος καὶ Ὕλας καὶ ἄλλοι καλοί. καί μοι ἐδόκει ἐρᾶν τοῦ Ὑακίνθου· τὰ πολλὰ γοῦν ἐκεῖνον διήλεγχεν. ἐλέγετο δὲ χαλεπαίνειν αὐτῷ ὁ Ῥαδάμανθυς, καὶ ἠπειληκέναι πολλάκις ἐκβαλεῖν αὐτὸν ἐκ τῆς νήσου, ἢν φλυαρῇ καὶ μὴ θέλῃ ἀφεὶς τὴν εἰρωνείαν εὐωχεῖσθαι.

1. Why was Plato not found among the famous men inhabiting the Island of the Blessed? Who were the most popular of the inhabitants of the Island?

2. Show how Lucian's gift of satire is used in referring to Diogenes, the Stoics, and the Academics.

(*d.*) Translate:—

Ἡμέρας μὲν οὖν τριάκοντα καὶ ἴσας νύκτας παρ' αὐτοῖς ἐμείναμεν, καθεύδοντες καὶ εὐωχούμενοι. ἔπειτα δὲ ἄφνω βροντῆς μεγάλης καταραγείσης, ἀνεγρόμενοι καὶ ἀναθορόντες, ἀνήχθημεν ἐπισιτισάμενοι. τριταῖοι δ' ἐκεῖθεν τῇ Ὠγυγίᾳ νήσῳ προσσχόντες ἀποβαίνομεν. πρότερον δ' ἐγὼ λύσας τὴν ἐπιστολὴν ἀνεγίγνωσκον τὰ γεγραμμένα. ἦν δὲ τοιάδε. "ΟΔΥΣΣΕΥΣ ΚΑΛΥΨΟΙ χαίρειν. ἴσθι με, ὡς τὰ πρῶτα ἐξέπλευσα παρὰ σοῦ τὴν σχεδίαν κατασκευασάμενος, ναυαγίᾳ χρησάμενον καὶ μόλις ὑπὸ Λευκοθέας διασωθέντα εἰς τὴν τῶν Φαιάκων χώραν, ὑφ' ὧν ἐς τὴν οἰκείαν ἀποπεμφθεὶς κατέλαβον πολλοὺς τῆς γυναικὸς μνηστῆρας ἐν τοῖς ἡμετέροις τρυφῶντας. ἀποκτείνας δὲ ἅπαντας ὕστερον ὑπὸ Τηλεγόνου τοῦ ἐκ Κίρκης μοι γενομένου ἀνῃρέθην. καὶ νῦν εἰμι ἐν τῇ Μακάρων νήσῳ, πάνυ μετανοῶν ἐπὶ τῷ καταλιπεῖν τὴν παρὰ σοὶ δίαιταν, καὶ τὴν ὑπὸ σοῦ προτεινομένην ἀθανασίαν. ἦν οὖν καιροῦ λάβωμαι, ἀποδρὰς ἀφίξομαι πρὸς σέ."

1. Explain construction of τριταῖοι, χρησάμενον, ἡμετέροις, καιροῦ, λάβωμαι, ἀποδρὰς.

2. Taking his description of the City of Dreams as an example, show Lucian's great power of inventing consistent details.

B. Translate into Greek:—

"And if I am victorious," he added, "in the campaign which I am now commencing against the inhabitants of the Sun, I promise you an exceedingly pleasant life at my court." We asked about the enemy and the quarrel. "Phaethon," he replied, "king of the Sun has long been at war with us. The occasion was this: I wished at one time to collect the poorest of my subjects and send them as a colony to Lucifer which is uninhabited. Phaethon took umbrage at this, met the emigrants half way with a troop of Horse-ants and forbade them to proceed."

C. (*a.*) Translate:—

ἀλλὰ σοὶ, ὦ μέγ' ἀναιδές, ἅμ' ἑσπόμεθ', ὄφρα σὺ χαίρῃς,
τιμὴν ἀρνύμενοι Μενελάῳ σοί τε, κυνῶπα,
πρὸς Τρώων· τῶν οὔ τι μετατρέπῃ οὐδ' ἀλεγίζεις·
καὶ δή μοι γέρας αὐτὸς ἀφαιρήσεσθαι ἀπειλεῖς,
ᾧ ἔπι πόλλ' ἐμόγησα, δόσαν δέ μοι υἷες Ἀχαιῶν.
οὐ μὲν σοί ποτε ἶσον ἔχω γέρας, ὁππότ' Ἀχαιοὶ
Τρώων ἐκπέρσωσ' εὖ ναιόμενον πτολίεθρον·
ἀλλὰ τὸ μὲν πλεῖον πολυάϊκος πολέμοιο
χεῖρες ἐμαὶ διέπουσ'· ἀτὰρ ἤν ποτε δασμὸς ἵκηται,
σοὶ τὸ γέρας πολὺ μείζον, ἐγὼ δ' ὀλίγον τε φίλον τε
ἔρχομ' ἔχων ἐπὶ νῆας, ἐπεὶ κε κάμω πολεμίζων.
νῦν δ' εἶμι Φθίηνδ', ἐπεὶ πολὺ φέρτερόν ἐστιν
οἴκαδ' ἴμεν σὺν νηυσὶ κορωνίσιν, οὐδέ σ' ὀΐω
ἐνθάδ' ἄτιμος ἐὼν ἄφενος καὶ πλοῦτον ἀφύξειν.

1. Give the Attic equivalents of δόσαν, πολέμοιο, ἴμεν.

2. Explain the case of σοί and mood of κάμω.

(*b.*) Translate:—

Ὣς φάτο, Πάτροκλος δὲ φίλῳ ἐπεπείθεθ' ἑταίρῳ,

(*e.*) What metres does Horace use most frequently? Why are they so called? Point out examples in the passages set.

(*f.*) Horace describes himself as "Epicuri de grege porcum." Discuss the justice of the phrase.

FRENCH. (Time, 3 hours.)

(Les réponses doivent se faire en français.)

1. (*a.*) Traduisez:—

C'était un homme de cinquante ans qui avait *l'air préoccupé* et qui était bon. Voilà tout ce qu'on en pouvait dire. Grâce aux progrès rapides de cette industrie qu'il avait si admirablement remaniée, Montreuil-sur-Mer était devenu un centre d'affaires considérable...Les bénéfices du père Madeleine étaient tels que, dès la deuxième année, il avait pu bâtir une grande fabrique...Quiconque avait faim pouvait s'y présenter, et était sûr de trouver là de l'emploi et du pain...Une forte circulation échauffait tout et pénétrait partout. Le chômage et la misère

étaient inconnus. Il n'y avait pas de poche si obscure où il n'y *eût* un peu d'argent, pas de logis si pauvre où il n'y *eût* un peu de joie. Le père Madeleine employait tout le monde. Il n'exigeait qu'une chose: *Soyez honnête homme! Soyez honnête fille!* Comme nous l'avons dit, au milieu de cette activité, le père Madeleine faisait sa fortune; mais, *chose* assez singulière dans un simple homme de commerce, il ne paraissait point que ce *fût* là son principal soucis. Il semblait qu'il *songeât* beaucoup aux autres et peu à lui.

(*b.*) Expliquez les règles de syntaxe dont sont des exemples les expressions en italiques dans le passage précédent.

(*c.*) Racontez quelques incidents de la vie de Jean Valjean, montrant quels obstacles il ent à vaincre pour recouvrer sa place d'honnête homme dans la société;

ou,

racontez la mort de Jean Valjean.

2. (*a.*) Traduisez:—

Har. Lui avez-vous déclaré votre passion, et le dessein où vous étiez de l'épouser?

Clé. Sans doute; et même j'en avais fait à sa mère quelque peu d'ouverture.

Har. A-t-elle écouté, pour sa fille, votre proposition?

Clé. Oui, fort civilement.

Har. Et la fille correspond-elle fort à votre amour?

Clé. Si j'en dois croire les apparences, je me persuade, mon père, qu'elle a quelque bonté pour moi.

Har., bas, à part. Je suis bien aise d'avoir appris un tel secret; et voilà justement ce que je demandais. (*Haut.*) Or sus, mon fils, savez-vous ce qu'il y a? C'est qu'il faut songer, s'il vous plaît, à vous défaire de votre amour, à cesser toutes vos poursuites auprès d'une personne que je prétends pour moi, et à vous marier dans peu avec celle qu'on vous destine.

Clé. Oui, mon père; c'est ainsi que vous me jouez! Hé bien! puisque les choses en sont venues là, je vous déclare, moi, que je ne quitterai point la passion que j'ai pour Mariane; qu'il n'y a point d'extrémité où je ne m'abandonne pour vous disputer sa conquête; et que, si vous avez pour vous le consentement d'une mère, j'aurai d'autres secours, peut-être, qui combattront pour moi.

Har. Comment, pendard! tu as l'audace d'aller sur mes brisées?

Clé. C'est vous qui allez sur les miennes, et je suis le premier en date.

(*b.*) Traduisez, et expliquez, au besoin, les expressions suivantes:—

Il me tient le poignard sur la gorge; mauvaise herbe croît toujours; je sais tirer mon épingle du jeu; ils sont sur la litière; il a le diable au corps.

(*c.*) Montrez par quels moyens Molière rend le caractère de l'avare Harpagon odieux et ridicule;

ou,

que peut-on conclure quant à la vie de famille au XVIIe. siècle, aprés avoir lu l'Avare?

3. (*a.*) Traduisez:—

Le canon tirait sur eux à cartouche: mais le roi, qui se découvrait davantage, était le plus exposé: à quelques pas derrière était le comte Schwerin, qui commandait la tranchée; le comte Posse, capitaine aux gardes, et un aide de camp, nommé Kulbert [Kaulbars], recevaient des ordres de lui. Siquier et Mégret virent dans ce moment le roi de Suède qui tombait sur le parapet en poussant un grand soupir; ils s'approchèrent, il était déjà mort: une balle pesant une demi-livre l'avait atteint à la tempe droite, et avait fait un trou dans lequel on pouvait enfoncer trois doigts; sa tête était renversée sur le parapet, l'œil gauche était enfoncé, et le droit entièrement hors de son orbite. L'instant de sa blessure avait été celui de sa mort; cependant il avait eu la force, en expirant d'une manière si subite, de mettre, par un mouvement naturel, la main sur la garde de son épée, et était encore dans cette attitude. A ce spectacle, Mégret, homme singulier et indifférent, ne dit autre chose sinon: "Voilà la pièce finie, allons souper." Siquier, court sur-le-champ avertir le comte Schwerin. Ils résolurent

ensemble de dérober la connaissance de cette mort aux soldats jusqu'à ce que le prince de Hesse en pût être informé. On enveloppa le corps d'un manteau gris: Siquier mit sa perruque et son chapeau sur la tête du roi; en cet état on transporta Charles, sous le nom du capitaine Carlsberg, au travers des troupes, qui voyaient passer leur roi mort sans se douter que ce fût lui.

(*b.*) Décrivez quelques incidents de la carrière de Charles XII. qui mettent en lumière le caractère de ce roi.

(*c.*) Put into French:—

The moment the king found himself taken prisoner, the violence of his temper, and the fury which such a long and desperate fight had naturally inspired, gave place at once to a mild and gentle behaviour. He dropped not a word of impatience, nor was an angry look to be seen in his face. He regarded the janizaries with a smiling countenance; and they carried him off with an indignation mixed with respect.

4. Traduisez:—

A soldier in the army of Charles XII. was condemned to death by the king, because he had stolen a chicken from a peasant. The condemned man was very angry at this sentence, and in a voice full of rage, accused the king of having also committed a theft, and declared that as he had taken a kingdom instead of merely a chicken, he was much more guilty. The king was very much confused at first by the soldier's accusation, but quietly explained to him that there was a difference between the two cases, inasmuch as he had taken possession of Poland for the sake of his people, while the soldier had taken the chicken from the peasant only for his own use.

GERMAN. (Time, 3 hours.)

1. (*a.*) Ins Engliſche zu überſetzen:—

Der König kam, mit ihm das ganze große Hauptquartier, als ich in Lagny ganz allein vor dem kleinen Hotel Sybille ſaß. Geheimrat Bork, der Korreſpondenz-Sekretär des Königs, an deſſen Wagen ich trat, ſagte mir: „Es geht nach Ferrières! Jules Favre ſucht als Vermittler den König!" So hatte man mir in der Etappe ſchon geſagt; ich ſchloß mich alſo an. Bismarck ritt, den Baron von Keudell zur Seite, auf der hohen Wegesböſchung und ſchaute auf die Straße zurück, als erwarte er jemand. Zu ihm tretend, richtete ich die Frage an ihn, ob man Wichtiges erwarte. Er ſchüttelte den Kopf und reichte mir die Hand, „Will nur von hier oben unſre Kolonne überſchauen!" Kaum hatte er's geſagt, da fuhr ſchon ein geſchloſſener Wagen mit Herren in weißer Krawatte vorüber. Ich erkannte Jules Favre, den Bismarck ſich nach Ferrières, dem Muſtergute Rothſchilds, beſtellt hatte. Alſo wieder eine Friedensſchalmei!

(*b.*) Translate:—

1. He returned this week from Africa.
2. You must make haste, if you wish to see it.
3. You may be sure that he is well informed.
4. France declared war against Germany.
5. Standing at the window I saw how the crowd assembled in the square.
6. We were all in that solemn moment mindful of those that are nearest to us.

7. Heaven knows who of all those that are now going out to war will return.
8. Many a mother stifled her tears.
9. Nothing can efface the remembrance of so solemn a moment from the memory of him who has gone through it.
10. We accompanied them to the station.

(*c.*) Put into German :—

On the next morning our outposts occupied the scene of the battle. Not a Frenchman let himself be seen on the walls. There was a truce for the burial of the dead. The second army had already crossed the Moselle near Pont-à-Mousson. It was attacked on the 16th at Vionville, and we drove the enemy to Rezonville. General von Wedell had to yield to superior strength at Mars-la-Tour, but the Dragoon Guards made a frightful attack on the enemy's infantry, and at last the victory was won.

2. (*a.*) Überſetzen Sie ins Engliſche :—

Die aufgeregte Geſellſchaft wurde durch dieſen Zwiſchenfall noch aufgeregter. Die Damen eilten zu der Ohnmächtigen, es wurde nach Waſſer, nach Eſſig gerufen, und als alle in der höchſten Beſtürzung kopflos durch einander liefen, that es auf einmal drunten im Garten einen fürchterlichen Knall, und eine wahre Kanonade von weißen, roten und blauen Feuerſtrahlen praſſelte in die Luft, während das verborgene Stadtmuſikantencorps den Tannhäuſermarſch anſtimmte.

Die Verwirrung im Geſellſchaftszimmer war fürchterlich. Während die Frauen um Marie beſchäftigt waren, ſuchten die Männer ihre Hüte und drängten dem Ausgang zu. Unter den Erſten, die das geſtörte Feſt verließen, war die Eckart'ſche Familie ; der letzte Gaſt auf dem Schauplatz war der Major, und dieſem war es vorbehalten, den ahnungsloſen Kanzleirat, der, froh über das gelungene Feuerwerk, aus dem Garten zurückkam, um nunmehr die Verlobung zu proklamieren, ſchonungsvoll mitzuteilen, was geſchehen war.

(*b.*) Render freely into English, and comment if necessary :—

Du wirſt Augen machen ; der blanc Montag ; Galgenhumor ; auf den Händen tragen ; es geht mir im Kopfe herum ; einen in den Harniſch bringen ; Ziegenböcke malen ſie an die Wandtafel ; ſein ſchöner Henriquatre ; Fuchſtaufe ; Menſur.

(*c.*) Translate :—

The son, Dr. Eckart, is a well-built young man, of about twenty-five years, with a fresh complexion. He has not long been a teacher and yet he stoops somewhat. His custom is to make his parents a visit and then to withdraw to his room. This time, as he enters the room, his father calls out in a loud voice, "Good morning, Dr. Billygoat." The son's lips tremble when he hears the nickname the silly schoolboys have given him. "What do you mean, father?" he asks. "Oh," replies his father, "I only wanted to see if you were sensible enough not to get annoyed at that name. People have always made light of tailors, and I confess that I often cried about it when I was a young fellow. Sometimes, too, I even fought, but later I became wiser."

3. (*a.*) Ins Englische zu übersetzen :—

Marsland. Aber Herr Robert—das hätte schlecht ablaufen können.

Lothair. Ich bitte tausendmal um Vergebung—ich ging im Park spazieren—als ich ein Pferd auf mich zukommen sah—das augenscheinlich seinen Reiter abgeworfen hatte—ich konnte der Versuchung nicht widerstehen es zu besteigen, es ging so gut, daß ich es wagte, einige kleine Hindernisse zu nehmen—das ist alles.

Eva. Sie haben Edith sehr erschreckt.

Lothair. Hätte ich davon eine Ahnung gehabt—würde ich nicht so übermütig gewesen sein. Verzeihen Sie mir.

Edith. Ich glaubte nicht, daß Sie reiten könnten.

Macdonald. Wo haben Sie das gelernt, junger Freund—wie, was ?—

Lothair. O—ich—ich hatte einen Onkel, der war Pferdehändler.

Macdonald. Sie haben kuriose Onkels.

Lothair. Ja—die habe ich, aber dafür kann man doch nicht.

Harry (leise zu Lothair). Das war unbesonnen, Lothair.

Lothair (erfreut). Du—ich glaube, ich fange an zu toben.

Harry. Wo ist Gibson ?

Lothair. Ich sah seine Kleider wie ein Paar Windmühlenflügel in der Luft—weiter weiß ich nichts.

Harry (lachend). O weh !—

(*b.*) Übertragen Sie folgende Ausdrücke ins Englische :—

Ich rede ihm ins Gewissen ; bis das Halali im Schuldgefängnis stattfindet ; soll das getobt sein ? lassen Sie die Heulerei, alte Schraube ; Schulden ? er steckt bis daher d'rin ; die alte ist ganz verdreht ; wären wir ihn nur erst los ; da habe ich mir etwas Schönes eingebrockt ; da liegt der Hund begraben ; ein paar ordentliche Bären aufbinden.

(*c.*) Schreiben Sie einen Aufsatz von etwa 250 Wörtern über den Gegenstand von Mosers Lustspiel.

Calves and colts under one year old, per head	15 "	25
Freight, perishable, per 100 lb.	1 00 per ton	10 per 100 lb.
Freight, unperishable	1 00 "	10 "

Above offers were not accepted, but a free ferry was installed. Subsidy, $3,500.

Ferry, Fraser River at Hope.

Previous year's charter renewed for three months only.

FERRY, SUMMERLAND-NARAMATA.

	Tenderer: Okanagan Lake Boat Co.
Passenger (adult)	$ 0 25
Child (not in arms) under thirteen years	15
Head of cattle, horse, mule, donkey, etc	75
Calf, sheep, goat, or swine	50
Vehicle with one horse and driver	1 25
Cart or wagon with one horse and driver, loaded	1 50
Vehicle with two horses and driver, unloaded	2 00
Vehicle with two horses and driver, loaded	2 50
Auto and driver	2 00
Parcels of 25 lb. and under	25
Freight of 100 lb. and under, non-perishable	10
Freight of 100 lb. and under, perishable	15

Subsidy, $1,000 per annum. Tender accepted.

KELOWNA-WESTBANK.

	Tenderer: J. J. Campbell.
Passenger (adult), return	$ 0 25
Child (not in arms) under thirteen years	10
Head of cattle, horse, mule, or donkey	75
Calf, sheep, goat, or swine	50
Calf, sheep, goat, or swine, per scow-load	5 00
Vehicle with one horse and driver	1 50
Cart or wagon with one horse and driver, empty	1 50
Cart or wagon with one horse and driver, loaded	1 50
Vehicle with two horses and driver, empty	2 25
Vehicle with two horses and driver, loaded	2 25
Parcel of 25 lb. and under	Free.
Freight per 100 lb. and under, non-perishable	10
Freight per 100 lb. and under, perishable	10
Motor-cars with passengers and driver	2 00
Children travelling to and from school	Free.

Subsidy, $1,000 per annum. Tender accepted.

REPORT OF INSPECTOR OF DYKES.

Office of Inspector of Dykes,
Victoria, B.C., December 17th, 1917.

Hon. J. H. King,
Minister of Public Works, Victoria, B.C.

Sir,—I have the honour to submit herewith the following annual report relative to the maintenance and management of the Chilliwack, Matsqui, Maple Ridge, Coquitlam, and Pitt Meadows Dyking Districts for the year 1917:—

According to records extending over a period of eighteen years, the freshet in the Fraser River this year was slightly above the average. The sluice-gates at Matsqui closed on May 13th, the reading of the river-gauge being 9.20, and that of the gauge in the ditch, inside the dyke, 8.50.

The river continued to rise steadily until June 12th, when it reached 19.90 on the gauge, the highest point recorded during the season. The second rise occurred on June 21st, when the gauge registered 19.30. The water remained at a high stage until July 10th, when the gauge-reading was again 19.30; the lowest point recorded between the two last-mentioned dates was 17.60 on July 1st. From July 10th the water fell gradually until August 9th, when the sluice-gates opened.

The following table shows the maximum freshet heights in the Fraser for the years mentioned as recorded by gauges established at Chilliwack, Matsqui, and Pitt River. Zero for these readings is low-water level in Pitt River near its mouth, the elevation of which is, approximately, 6.80 feet above that of low water at the Sand-heads:—

Year.	Chilliwack.		Matsqui.		Pitt River.	
	Date.	H.W.	Date.	H.W.	Date.	H.W.
1894	June 5	36.80	June 6	26.37	June 6	14.75

As there was no sale of lands held for delinquent dyking assessments during the years 1915 and 1916, a considerable amount of arrears had accumulated. In order to reduce this accumulation to some extent, and at the same time taking into consideration the existing financial stringency, it was decided to hold a sale of those lands only (with the exception of streets in municipalities) the assessments on which were delinquent for 1914 and subsequent years, subject, however, to the provisions of the "Military Relief Act."

The following statement shows the net amount of arrears outstanding in each of the different dyking districts for the years 1916, 1915, and 1914 respectively:—

	Chilliwack.	Matsqui.	Maple Ridge.	Coquitlam.	Pitt No. 1.	Pitt No. 2.
Net amount arrears for 1916..	$1,996 20	$1,448 34	$5,913 94	$4,426 53	$28 40	$2,443 17
Net amount arrears for 1915..	605 57	500 66	4,150 87	2,682 88	.....	1,449 86
Net amount arrears for 1914..	78 17	.....	86 73	917 70	.....	.....
Total net amt. outstanding	$ 2,679 94	$1,949 00	$10,151 54	$8,027 11	$28 40	$3,893 03

Pumps.

Although the length of the pumping season this year was not greater than the average, yet on account of the heavy rainfall in the month of June—viz., 8.02 inches—as recorded at the Meteorological Station at Coquitlam, the amount of work required to be performed by the pumps and the consumption of electric power were unusually heavy. During June 1st and 2nd the rainfall in thirty-six hours amounted to 3.19 inches, equal to 86,750 gallons per acre, which rate, extended over the whole of the area tributary to the pumps, would aggregate an enormous quantity for them to dispose of, even after deducting a large percentage for evaporation and absorption by the soil.

As a result of this exceptionally heavy rainfall some of the low-lying areas in the dyked districts were more or less flooded, although the pumps were working to their full capacity until the water was reduced to its normal level.

RIVER-PROTECTION WORKS.

On account of the recently increased dimensions of the gravel-bar near the upper end of the Chilliwack Dyke, effected through the lodgment of snags in the channel of the river, the direction of the current during the freshet of 1916 was deflected with increased force against the river-bank, and caused a considerable amount of damage to the mattressing placed along the foot of the bank, which under ordinary conditions afforded protection against erosion.

As it was a matter of urgency that temporary repairs at least be made before the approaching high-water season in order to prevent serious erosion of the bank in vicinity of the dyke, and as no funds for the purpose were obtainable from the Dominion Government, the necessary work of repairs was performed by the Provincial Government at a cost of $633.90.

Although the work referred to, which is of a temporary nature only, answered the purpose for which it was intended, it will be necessary, in order to safeguard the dyke, that steps be taken as soon as practicable, either to remove the obstructions in the channel, and thereby relieve the pressure against the bank, or else construct protection-work along the exposed portions of the river-bank sufficiently substantial to withstand the force of the current.

If conditions as existing are allowed to continue for a few years longer, there is every probability that encroachment by the river will extend to the present site of the dyke, as once the bank is exposed to the strong force of the current it will soon wash away the margin of less than 300 feet of alluvial soil between the river and the dyke.

Some necessary repairs will require to be made to the protection-work at Matsqui, where a mattress weighted with rock was placed by the Dominion Government about three years ago to protect the bank at the end of the upper wing-dam. This mattress has apparently slid out of position or sunk into the quicksand; as a result the bank has caved in at that point, which is in close proximity to the dyke.

The attention of the Resident Engineer of the Dominion Public Works Department has been directed to the matter, and as the repairs required are for the securing of work undertaken by that Department, it may reasonably be expected that they will receive the required attention. In any case, it will be necessary, in order to prevent the dyke from being undermined, that the repairs in question be carried out before the advent of the next high water.

Referring to the menace to the safety of the dyke in the Maple Ridge District through the encroachment of the Lillooet River, mentioned in the annual report of the Inspector of Dykes for the year 1915, the writer is now in a position to state that the threatened danger has been permanently removed by the diversion of the river, as suggested in the report above referred to. This work was carried out by the Dominion Government during the past summer, and consisted of dredging a new channel, which, by cutting out a sharp bend in the river, improves the navigation and also diverts the flow of the current from the bank of the old channel in the vicinity of the dyke.

Respectfully submitted.

E. A. WILMOT,
Inspector of Dykes.

REPORT OF INSPECTOR OF FACTORIES.

Inspector of Factories,
Vancouver, B.C., February, 1917.

Hon. J. H. King,
Minister of Public Works, Victoria, B.C.

Sir,—I have the honour to submit to you the report of the Factory Inspection Department for the year 1916.

Before taking up in detail the work of the Department, I think it would be well to explain our present administrative machinery. The Department has two Inspectors. During the year we have tried to visit all the places coming under our jurisdiction. The territory, being large, cannot be covered thoroughly in the time at our disposal owing to the rapidly increasing correspondence, as well as to the number of interviews.

To properly inspect the increasing number of factories additional help is much needed. From the standpoint of efficiency our inspection-work should be divided into classes—either of establishments or of kinds of work to be done. The ideal way is to have a Safety Inspector for safety work, a Sanitary Inspector for sanitary work, an expert on ventilation to handle those problems, and the same for lighting, heating, etc. The safety, health, and general welfare of every employee depends to a certain extent on all conditions, and therefore the most logical method of classifying inspections is according to the nature of the problem presented. This, however, is utterly impossible with two Inspectors. Each Inspector has to know something of everything instead of everything of something, and inspects all kinds of establishments for all sorts of conditions.

All the large manufacturing establishments and industrial centres have received attention. For various reasons it was necessary to visit some of these places several times, to the exclusion of some of the small industries. The enforcement of the law regarding elevators in shops and hotels has entailed a large amount of work.

Appended is a list of factories in British Columbia.

I have met with some opposition to orders and the enforcement of the law, but such opposition has been the exception and not the rule. The modern manufacturer is always glad to receive suggestions that will improve the conditions or secure the safety of the workmen in his employ. While we have had some differences of opinion with engineers as to the practicability of the Inspector's instructions, I am pleased to say that only in a very few instances was it necessary to change the instructions. In most instances the order issued was found to be entirely practicable, and this where the engineers in question were safety experts engaged by some of the large corporations for the purpose of reducing hazards. It is not an exceptional occurrence that the trained Factory Inspector has been of valuable assistance to the superintendent of concerns in pointing out the weakness in their equipment for the prevention of accidents. There is a cause for this, and the explanation is simple: While the head of the department of any particular plant is kept busy devising ways and means for the reduction of the hazard of his concern, the Inspectors cover many plants of like kind and therefore are enabled to garner the information of the combined thoughts of many. An Inspector, in the course of his duties, visits every available kind of establishment and examines every make of machine, modern or ancient, and his eye is by dint of service trained to look for little things—for he knows the danger of the big ones.

Safety is the slogan that is now making itself felt around the world, and the question which arises is not means, but ways to produce the desired results of keeping the employees well, happy, and free from injury. About a year ago some of the large corporations started the safety-first movement in their plants. Large expenditures have been made for safety appliances and in safeguarding and improving working conditions. Beginning with the movement, Safety Inspectors have been appointed. Many people busied themselves laughing at the safety crusade; they said

it was a fad. The proposition of safety first does not mean futile investigation after an accident or catastrophe, but the adoption of well-known measures before the accident.

It is of the greatest importance that an Inspector should enforce the law for safeguarding machinery and other dangerous appliances. Devices are on the market for guarding all sorts of machinery, so there is no reason why any machine or its attachments should be left unprotected.

Section 32 (*a*) provides that all dangerous parts of mill-gearing, machinery, and shafting shall be, as far as practicable, securely guarded. The words "or other appliances" should be inserted in this section.

Mr. W. Sydney Smith, H.M. Inspector for Dangerous Trades, in his report on fencing and safety precautions for transmission machinery ("Factory and Workshop Acts," 1901 to 1911), has to say: "By 'transmission machinery' is meant the whole of the mechanical appliances which serve as connecting-links for transmitting the motion of the prime mover to an individual machine."

The term used in the "Factory Act" is not "transmission machinery," but "mill-gearing," which is defined as comprehending every shaft, whether upright, oblique, or horizontal, and every wheel, drum, or pulley by which the motion of the first moving power is communicated to any machine appertaining to a manufacturing process. The words "or other appliances" were first introduced into the definition of mill-gearing by the "Factory and Workshop Act, 1901." This amendment considerably widened the scope of the expression, which now includes not only couplings, flexible shafts, clutches, parts of clutches connected with drums, pulleys, and other similar devices, but also all driving bands, belts, chains, ropes, and straps forming connecting transmission-links between the prime mover, line-shafting, counter-shafting, and the operative wheel or pulley which directly affects the manufacturing process.

It is reported to me that employees remove guards. No person should remove or make ineffective any safeguards required by the Act during the active use or operation of the guarded machine or device, except for the purpose of immediately making repairs thereto, and all such safeguards so removed should be promptly replaced. Orders have frequently to be issued to see that the men use the guards provided, as these are sometimes removed and employers are a little lax about insisting on their use, feeling perhaps that they have done their part in having the guards installed.

ACCIDENTS.

Appended is a list of accidents and their causes. One hundred and eighty-six were reported, of which twenty were fatal.

A number of accidents have been caused by employees cleaning and adjusting machinery while in motion. Section 32 (*b*) says: "No machinery, other than steam-engines, shall be cleaned while in motion, if the Inspector so directs by written notice."

Obstructions in connection with any machine should not be removed under any circumstances until such machine has been stopped.

Machine operators should exercise the utmost care in adjusting machinery, and never do so while in motion. All machinery when in operation is dangerous and should be considered so by the operator. When belts become loose or disabled the engine or motor should be started up slowly when putting belt in place. When belt is not in use it should be hung up in a place where it cannot be caught by the pulley or shaft.

The one remedy to prevent accidents is a law prohibiting any person from operating or assisting in the operation of any machine until the foreman is satisfied that the person understands enough about machinery to enable him to be instructed in the dangers attending his occupation.

Appended is a partial set of rules covering the more important points of danger common to all industries, which have been forwarded to most manufacturers. These rules have been adopted as general orders, and are supplemented from time to time by other orders which the Department may deem necessary after further investigation.

RE "FACTORIES ACT," SECTION 32.

Belts—Guards.—All belts, ropes, or chains driving machinery or shafting, and all secondary belts, ropes, or chains—in short, all belts, ropes, or chains exposed to contact, except belts which are so small or those which move so slowly that there is no possibility of danger, must be guarded.

In all cases the point where the belt, rope, or chain runs on to the pulley, sheave, or sprocket must be guarded.

All horizontal belts, ropes, or chains driving machinery or shafting 6½ feet or less from the floor where exposed to contact must be guarded.

Note.—In guarding overhead belts or rope-drives, unless so guarded that persons cannot pass under them, the width of the guard should not be less than the width of the belt or rope-drive, and the length should not be less than the distance between the outer faces of the two pulleys. It should cover the outer faces of the two pulleys or sheaves and extend upward to such a point and be attached in such a way that in case the belt breaks it will withstand the whipping force of the belt.

Belts running through floors should be boxed or railed to a height of 5 feet.

Note.—In rooms or parts of rooms used exclusively for transmission machinery, such as the ground floor of sawmill and the basement of paper or flour mills, it has been found practical to define certain passage-ways for the use of oilers and millwrights, and to guard the pulleys, belts, and shafts along these passage-ways.

Pulleys—Guards.—All pulleys over 18 inches in diameter which are exposed to contact must be guarded.

Loose Pulleys.—All machines not individually motor-driven must be equipped with a loose pulley or a clutch, or some other adequate means of stopping the machine quickly.

Belt-shifters.—All loose pulleys must be furnished with a permanent belt-shifter, so located as to be within easy reach of the operator. The belt-shifter must be so constructed as to make it impossible for the belt to creep from the loose pulley back to the tight pulley.

All belt-shifters must be equipped with a lock or some other efficient device which will prevent the shifter from being accidentally shifted.

Pulley near Shaft-hanger.—Pulleys must be so placed as to allow the width of the belt between two pulleys or between the pulley and the shaft-hanger, or a hook must be provided or a guard placed adjacent to the pulley to prevent the belt from leaving the pulley.

Clutches.—All clutches must be guarded.

Note.—Practically all clutches have protruding parts or screws which make them as dangerous as set-screws on shafts.

Emery-wheels—Hoods and Guards.—Emery-wheels used for grinding purposes must be equipped with a hood connected with an exhaust-fan or water system. A guard must be provided as a part of the hood construction, or in addition to the hood, which shall be strong enough to withstand the shock of a bursting wheel. This guard must be adjusted close to the wheel and extend over the top of the wheel to a point 30 degrees beyond a vertical line drawn through the centre of the wheel. The exhaust or water system is not required on emery-wheels which are in general use by all employees in common to touch up castings or tools.

Fly-wheels.—All sections of fly-wheels with spokes which are 6 feet or less from the floor and which are exposed to contact must be guarded. Fly-wheels which run in pits must be provided with toe-board around the pit.

Exception.—Where an engine is isolated in a room used exclusively as an engine-room, the fly-wheel of such engine may be guarded with a railing. This railing must be constructed with two rails, the bottom of which must be not less than 18 inches from the floor.

Friction Drives.—The contact faces of all friction drives when exposed to contact must be enclosed.

All friction drives with projecting bolts where exposed to contact must be guarded.

Gears.—All gears where exposed to contact must be entirely enclosed or equipped with a flange-guard which must enclose the teeth of the gears. All arm or spoke gears and all web gears with holes in the web, which are over 18 inches in diameter, where exposed to contact must be entirely enclosed.

Keys and Key-seats.—All projecting keys in shafting where exposed to contact must be cut off or guarded, and all key-seats and projecting ends of shafts where exposed to contact must be guarded.

Ladders with Steel Points.—All portable ladders must be equipped with steel points or steel feet on the bottom, or other effective means of preventing slipping.

Where the platform system is not used in connection with overhead shafting, or the oiling is not done automatically, a safety-ladder should be used, having hooks at one end to hold it on the shaft and sharp metal points at the other to make it secure on the floor.

On cement floors, where metal points are not applicable or permissible, the shoes are made of basswood blocks, which do not readily slip on cement or other smooth floors.

Passage-ways—Keep Clear.—All passage-ways and gangways must be kept smooth and in good repair and free from nails or obstruction over which persons may stumble and fall.

Platforms with Stairways or Stationary Ladders.—All permanent elevated platforms in frequent use must be equipped with a permanent stairway or stationary ladder.

Runways and Platforms—Rails and Toe-boards.—All elevated walks, runways, or platforms, except on loading or unloading side of platforms, must be provided with a guard-rail. A toe-board must be provided to prevent parts from falling off.

Set-screws.—All set-screws on moving parts where exposed to contact must be countersunk or protected by a solid collar, or a headless set-screw must be used. No part of the set-screws must project above the surface.

Shafting.—All transmission shafting in work-room or in passage-ways leading to work-rooms, and located less than 6½ feet from the floor, where exposed to contact must be guarded.

Vertical shafts must be surrounded by a metal or wooden casing.

Counter-shafts set on floor and every other point where belt and pulley meet at a place where a workman may ever have occasion to go must be guarded.

Chains.—All hoist-chains should be periodically tested and examined and annealed at least once in every twelve months.

Sprockets.—All sprockets exposed to contact must be guarded.

Stairways—Handrails.—All stairways must be equipped with handrails, and the rails must be kept smooth and free from nails and splinters. Where the stairway is not built next to a wall or partition, rails must be provided for both sides.

Oiling, Cleaning, and Repairs.—Clause (*b*): No machinery other than steam-engines shall be cleaned while in motion. Clause (*e*): Notice of Inspector as to precautions against accidents.

Workmen shall not undertake to oil, inspect, clean, or repair machines in motion or moving parts of machinery unless previously authorized to do so by the foreman or overseer.

Clothing.—The clothing of employees having to work around moving parts of machinery, and particularly those whose duty it is to oil up and repair machines, must be buttoned and close fitting.

Gloves and Mittens.—It is forbidden to wear gloves or mittens when working at saws or handling belts.

Handling Belts.—It is strictly forbidden to connect by hand a belt more than 3 inches wide unless the power has been slowed.

When a belt is not in use, it must be hung up in a place where it cannot be caught by the pulleys of shafts.

All workmen in a plant must be taught how to make use of the system of signal by which all the machines can be stopped in case of accident.

Children.—Owing to the number of accidents, fatal and otherwise, in allowing children around plants, I beg to draw your attention to this very dangerous practice. Children are naturally mischievous, and if allowed to play or loiter around factories their curiosity will tempt them to meddle with machinery or belting, sometimes with serious results.

Inspector to proceed against Actual Offender.—No person shall remove or make ineffective any safeguard required by the Act during the active use or operation of the guarded machine or device, except for the purpose of immediately making repairs thereto, and all such safeguards so removed shall be promptly replaced.

The term "guarded," when used in these orders, shall mean so covered, fenced, or enclosed that a person in the course of his employment is not liable to come in contact with the point of danger and be injured.

The term "exposed to contact," when used in these orders, shall mean that the location of a thing is such that a person, while in the course of his employment, is able to come into contact with it and be injured.

Wood-working.

Jointers.—All hand-jointers must be equipped with guard or safety cylinder-head.

NOTE.—It has been found from experience that the safety cylinder-head practically eliminates the possibility of serious injury to the hands.

Mats to prevent Slipping.—The floors where operators stand in operating dangerous machines used in manufacturing, such as wood-shapers, jointers, and circular saws, must be provided with rubber mats, gravel roofing-paper, or other effective means of preventing slipping.

Band-saws.—On all band-saws the upper and lower wheels and the saw must be guarded, except the part of the saw below the saw-guide.

NOTE.—The wheels of a band-saw should be treated the same as fly-wheels, and should be so guarded that a person will not be caught if he should stumble and fall against the wheels. It is necessary to guard the upper as well as the lower wheel, because the operator is liable to get up on the machine to oil or adjust it while in motion, and there is always danger of his making a misstep and being caught.

Circular Saws.—All circular saws must be guarded, and all such saws used for ripping, other than self-feed saws, must be equipped with a splitter. All other saws where possible must be equipped with a splitter.

Exception.—On saws while specific work is being done where it is impossible to do the work when the saw is guarded.

Machines with Knife-heads.—All knife-heads of wood-shapers and similar heads of other machines not automatically fed must be guarded, or forms must be used in which the part operated on is securely fastened.

All knife-heads of stickers, planers, etc., where exposed to contact must be guarded.

CHILD-LABOUR.

I am pleased to report that child-labour is something almost unknown in British Columbia. One case was found this year—a boy under the age of fourteen years employed in a machine-shop. However, when the matter was brought to the company's notice, the boy was sent to school.

CANNING-FACTORIES AND EVAPORATORS.

Evaporators are a new industry in the Province. To report on these industries may be of general interest to the public, and it is safe to say that the owners of canning-factories and evaporators fully realize this fact. In the preparation of food products every effort must be made to maintain cleanliness. Modern facilities have been provided in order to accomplish this. Some drawbacks, however, exist where these industries are located in a district where there are no sewerage systems, and in consequence it is most difficult to dispose of the refuse. But there should be no trouble in seeing that proper sanitary accommodations, wash-rooms, and an ample supply of clean towels and soap are provided for the employees. Condensation can also be removed. Floors can be kept clean and dry and in good repair and machinery safeguarded. Where wet processes are used the floors should be so drained that there is no measurable depth of water in which the operators must stand while working. Machines, benches, vessels, and other things in the room should be kept clean and sanitary as the nature of the industry will permit. Water-proof aprons and gum boots should be provided.

Dressing-rooms.—Where the labour performed by the operator is of such a character that it becomes desirable or necessary to change the clothing, wholly or in part, before leaving the building at the close of the day's work, separate dressing-rooms should be provided.

I find that there are several cases where municipal by-laws are violated. As the municipalities have their own by-laws drafted and in force, covering sanitary conditions, I believe it to be the duty of officers of such municipalities to enforce the rules and regulations as embodied in their by-laws. The enforcement of those by-laws by municipal officials would materially assist this Department in obtaining sanitary conditions.

FIRE-ESCAPES.

The question of providing adequate and safe egress from factories and workshops in case of fire is a matter of great importance and one that should receive serious attention. Under section 36, it is the duty of this Department to see that the lives of the workers are protected in every possible way against danger of fire. It is true that the various factories and workshop buildings throughout the Province have been generally equipped with outside fire-escapes, but this protection is far from being the best. The ordinary type of fire-escape has been not inappropriately termed "the human gridiron," because it can be easily put out of commission by

flames or smoke pouring out of the windows opening upon the escape or directly under it. High-grade fire-proof doors and windows wherever they open upon or directly underneath the escape should be so designed and constructed and glazed with wire glass to resist fire. The fact that for many years we have been spared the experience of a serious fire with loss of life is not a guarantee of immunity.

EYE-INJURIES.

Employees should always wear goggles when engaged in operations in which particles are likely to fly into the air. Goggles afford an excellent protection to the eye. The eye-injuries reported could have been prevented if employees had used the goggles supplied them. The foreman in charge of workers who use goggles should be careful to advise them that the face, and not the pocket, work-bench, or wall-nail, is the sensible place for the goggles—that an eye once lost can never be replaced.

HOURS OF FEMALES.

Although the Department has been unable to inspect every establishment employing females, the knowledge that the law is being enforced and that complaints will be followed up has resulted in the general observance of the law. The unusual conditions brought about by the war and demands of the Federal Government furnished reasons for overtime permits being issued. A complaint looked into regarding overtime showed that circumstances were such that it could not very well be avoided. When it is realized that this Department devotes a large part of its time to other duties, I do not feel that we should be criticized too severely for the few petty failures to enforce the law that have been found.

ELEVATORS.

Elevators and hoists are always a source of great danger, but with those that are protected according to law the danger is minimized. The accidents from this source have been greatly reduced in number since the passing and enforcing of the law governing them. Too much care cannot be given to the machinery and inspection of cables. The managing of an elevator is very important. Precautions for the prevention of accidents are not complete unless an alert and vigilant operator is in charge. No elevator operator should allow his car to become overcrowded. It not only interferes with his management of the car, but puts extra strain upon the equipment, which should not be permitted. Four hundred square inches should be allowed each occupant. The operation of a passenger-elevator is a man's job. Eighteen is the minimum age prescribed in most instances. Passenger-elevators should not be operated except by licensed operators. When a person takes up the duties of an operator he should be thoroughly instructed and required to pass an examination and be impressed with the responsibility of his position.

Below is the number of elevators inspected and orders to protect same since the Act was amended:—

	Passenger.	Freight.

Accidents caused by Elevators.

February 25th. Boy, aged seventeen, employed as regular operator on elevator which is used for the carriage of passengers and freight. He was in the act of bringing down two passengers from the fourth floor, and he pulled the shipper-rope the wrong way, causing the elevator to go up instead of down. He held on to the cable, and when the elevator had reached the fifth floor he was knocked off and fell down the shaft to the pit. Deceased had only been employed at this work a week, and had two days' instructions in operating.

March 27th. Employee, aged fifty years, employed in shop, was running at noon hour to get elevator. He stumbled and fell as elevator was moving upward. His leg was caught between car-platform and gate, and he suffered injuries which proved fatal.

August 12th. Operator, aged nineteen years, employed in hotel, was fatally injured when his head was caught between the car-platform and the door-lintel of the basement floor. Deceased had been employed about three weeks and at time of accident was off duty. He and another operator of about the same age were riding up and down on elevator. They had made three trips from the main floor to the sixth. Operator claims that deceased pinioned his hands on controller, which caused the elevator to go to the basement. Deceased jumped out of the car, and the operator, thinking to play a joke by making him walk from the basement to the main floor, started elevator. Deceased endeavoured to board the car while it was in motion. Owing to the position of the operator and the basement door being about three parts closed, he did not notice deceased attempting to board the car. The first he knew of anything being wrong was when the power went off car, caused by deceased's head and shoulders being wedged between car-platform and the underside of main floor.

May 15th. Operator, hydraulic elevator, hotel annex, had legs badly crushed. He left elevator and same started to creep. He jumped into car, stumbled, and must have caught the

controller with his hand, reversing it, allowing elevator to ascend, catching him between floor projecting and car-platform.

A number of accidents, fatal and otherwise, have occurred in buildings over which this Department has no jurisdiction. After a fatal accident the Coroner's jury added a rider: "We would suggest that the attention of the proper authorities governing public elevators be drawn to this matter, giving them jurisdiction over rooming-houses and apartment buildings."

I would recommend that the Act take in apartment-houses, rooming-houses, office and public buildings, as there are many lives at stake, and as a rule the elevators are not in the best of condition. At present the proportion of accidents is not excessive, when it is considered that this means of transportation carries possibly more people than any other.

"SHOPS REGULATION ACT."

It is the duty of the Inspector of Factories to enforce the provisions of this Act in all portions of the Province not situate in any municipality.

The inspection of bake-shops received the attention of the Inspectors, and results, in so far as they relate to the factory bake-shops, are quite satisfactory. Special effort has been made to keep the small bake-shop up to the requirements of the Act.

RECOMMENDATIONS.

That plans be submitted to the Department before erecting any building or altering any existing building which is intended to be used as a factory. The owner shall submit the plans of such building or the proposed alterations, and the Inspector shall examine the same, and if he finds that the plans provide for the fulfilment of the requirements of the Act as to the construction of factories he shall certify his approval. This would be of great assistance to this Department. Although it would in no way conflict with the "Municipal Act," empowering Councils to pass building by-laws, yet these local by-laws seem to be framed in certain cases in such a way that they have caused more or less overlapping of our duties. In some cases plans have been approved by local officials allowing a manufacturer to cover all the ground with his building, and making no provision for the extra safeguarding of elevator-shafts or adequate fire-protection, lavatory accommodation, opening of employees' doors outwardly, etc. And it might be well to consider taking away from municipalities such powers as now permit them to object to fire-protection, etc., that is imperative to safeguarding life and limb of employees in factories and shops.

That a book be supplied manufacturers to note list of alterations and improvements ordered; such book to be kept in factory.

Also that a book of defaulters be kept in which to enter the dates of cautions administered to operators who fail to use guards provided.

CONCLUSION.

I hope that the efforts in the accomplishment of our duties as Inspectors will receive your approval.

I have, etc.,

C. R. GORDON,

Inspector of Factories.

APPENDIX.

LIST OF FACTORIES.

Abattoirs	2	Planing-mills	101
Bag and sack factories	3	Potteries	1
Baking-powder factories	1	Printing and publishing establishments	75
Biscuit-factories	3	Sail and tent factories	3

Picture-frame works	4	Wooden-pulley factories	1

FATAL ACCIDENTS.

January 18th. Mill-hand, employed about ten years in mill, five years as log-haul man, distributing logs on log-deck to sawyer. Deceased had gone to place his gloves near the kicker-cylinder to dry. He had his head just over the cylinder when sawyer, who did not notice him, used the kickers to turn over cant on saw-carriage. When kickers are used, cylinder comes up. A log was on the deck and deceased's head was crushed between cylinder and log.

March 15th. Superintendent, shingle-mill. Suffered injuries to the extent of having his stomach ruptured and bowels and liver torn, dying shortly afterwards. Deceased went to place a loose belt on a pulley with the aid of a piece of 1 x 2 cedar about 4 feet long. The belt, being one which runs with a tightener, had to be placed directly around the pulley before putting the tightener down. He endeavoured to do this by putting the end of the stick in the inside of the belt to put it over the face of the pulley. The stick, slipping off the belt, struck the inside lower half of pulley which was running towards him, driving the stick back, striking him.

March 18th. Smelter employee. Killed by electric shock of 550 volts. He received shock while throwing in switch to start head-pumps.

April 5th. Edgerman was putting a piece of 2 x 6 through edger, and started another piece. He lifted rolls, allowing plank in the act of going through edger to fly back, striking him in the stomach.

May 30th. Concentrator employee, employed as mechanic's helper. He was working with other employees in making repairs to bucket elevator used to raise ore. Deceased was leaning over end of projecting shaft which had a collar with two projecting set-screws. While the elevator was being turned over by hand, his jumper, evidently near his throat, caught on the projecting set-screws, which resulted in death by suffocation. His fellow-workmen did not hear him shout or know he was near shafting. Death was practically instantaneous. Previous to accident, safety-collar was removed and collar with projecting set-screw placed on.

June 2nd. Oiler, planing-mill. Employed as oiler for a number of years. Suffered injuries to the extent of having his left leg above knee badly torn. Cause of death, blood-poisoning. Deceased came by his injuries by his overalls being caught on a set-screw projecting ⅜ inch above ring of the one-flange safety type of collar. He had made some repairs to a bearing near this collar the previous evening and was watching the results while the machinery was being started.

July 8th. Employee. Electrocuted. Was employed by Smelting Company, but had been loaned to Power Company to remove some insulators from their auxiliary line. He met his death while doing this work.

July 8th. Labourer employed at sawmill. Was working at the end of jack or log-chute; lost his balance and was drowned.

July 28th. Sawyer in sawmill. He stepped in front of saw-carriage. Either neglected to lock lever or locked it loosely. Carriage ran away and pushed him through saw, cutting him to pieces.

August 14th. Smelter employee. Was working on crane-track erecting a scaffold. Deceased was crushed between crane and wall.

August 15th. Sawmill employee, at time of accident employed as carpenter. He and two other carpenters were constructing a platform about 20 feet beneath transfer-rolls. A slab was sawn from log. Owing to the nature of slab, it could not be sawn into slab-lengths by cut-off saw so as to go by conveyor into burner. Cut-off-saw employee placed slab on board so that he could transfer it along rolls. Slabs of this nature are used for filling-in purposes and are seldom encountered. They are dumped on west side of rolls. Workmen were working on east side. Employee lost control of slab, allowing it to fall, striking deceased on the head.

September 3rd. Night engineer, planing-mill. Suffocated. At time of the fatality he was relieving the day engineer. His duties consisted of keeping steam up in boilers for the use of dry-kiln. Fuel for boilers is supplied from a large fuel-bin with chutes connected to Dutch oven. Bin was equipped with a cyclone which is used to convey the sawdust and shaving from the factory. The day of the fatality being Sunday, and the factory not operating, the cyclone was out of commission. The supposition is that deceased entered the fuel-bin and was engaged in shovelling the sawdust and shaving, which, through dampness and pressure, clogged the opening leading to chute. While engaged in this operation the bin from some unknown cause took fire.

September 29th. Sawmill employee. Fractured skull, dying shortly afterwards. Cause of injury, electric platform-car. Deceased was operating the car and had taken car with lumber to south end of platform, where part of the load was discharged. Was returning with the balance of the load towards the north end of the platform. In passing a certain point, the lumber on the car which was projecting over the end of the car came in contact with one of the rollers placed on the edge of the platform, causing the lumber to swing around. Deceased reversed the controller, which started the car going backward in the opposite direction, with

the result that the lumber knocked him off the car and several pieces fell on top of him. When he fell the back of his head struck the plank covering the trolly-wire.

October 5th. Shingle-mill boom-man. Drowned.

October 9th. Shingle-mill employee. Employed as cut-off man on bolt-saw. Shortly after the regular night shift had commenced work the belt driving conveyor broke. The engineer had just finished lacing the belt and had gathered up his tools and was on his way to engine-room when he heard a cry. Before the engine could be stopped the deceased's arm had been torn from its socket and he had fallen to the floor. Shafting is situated 10 feet 6 inches from the floor. It is supposed the belt left pulley and deceased went up on ladder nailed to post to adjust the belt.

November 5th. Smelter employee. Fractured skull. Was working on construction-work. Fell 25 feet, striking concrete floor.

November 11th. Lineman, employed by smelter. He was working on top of the tower-car. Locomotive ran into car, throwing him to track and run over by locomotive.

November 12th. Oiler in sawmill. Deceased was oiling the bearings on conveyor which carries refuse to the mill-burner. In some unaccountable manner he fell a distance of 60 feet, in his fall striking a cement pillar. He was rushed to the hospital, but died without regaining consciousness.

November 15th. Employee, flour-mill, machine operator, known as smutman. Was instantly killed by being caught on friction-clutch in the basement of mill.

September 26th. Foreman millwright, shingle-mill. Conveyor-chain came off sprocket and wedged, causing the top machinery to stop. Quarter-twist belt on lower pulley became wedged between pulley and bridge-tree. Lower pulley kept revolving, causing belt to burn. The oiler went up to the top side to height of about 20 feet to see what was wrong. Deceased in the meantime came along and tried to remove the belt. This was impossible and contrary to the rules of the mill. He turned his back to the shafting and looked up to speak to the oiler, and was then caught by a projecting set-screw in a safety-collar.

LIST OF ACCIDENTS.

January, 1916.

January 1st. Paper-mill employee. Contused wound, left forefinger. Hit by piece of concrete.

January 3rd. Lumber-mill employee. Thumb of left hand torn out at second joint. Mill foreman and millwright. A stick had gotten into conveyor in such a manner as to cause chain to come off sprocket. In putting this chain on sprocket, thumb was accidentally caught in chain. To save being drawn around shaft he had to pull thumb off. This accident would have been prevented if machinery had been slowed down when putting chain on sprocket.

January 6th. Shingle-mill employee. First joint of third finger cut off and inner side of second finger lacerated. While sawing shingles at his machine he claims that ice or snow from the blocks got on the floor, causing him to slip and strike the jointer-saw with his hand. Jointer-saw equipped with guard over top.

January 8th. Smelter employee. Bruised shoulder and hips and torn ankle. Hit by auxiliary hook, Niles crane.

January 11th. Paper-mill employee. Crushed foot. While untying a rope which was holding a timber for a small roof he was erecting over a scale, he stepped on a cross-timber when the elevator was being lowered, and caught his foot between elevator and timber. Injured was cautioned by employee working with him to watch that elevator did not catch him.

January 15th. Engineering-works employee. Three fingers of right hand amputated. Employed as sweeper. Tripped over a shovel, causing him to fall towards lathe. In an effort to save himself, his right hand was caught in the change gears of turret-lathe, such gears crushing the boy's fingers. The gears in question have always been covered with a guard, such guard being provided with two sliding panels to allow of access to gears. On examination of this accident the bottom panel was found missing, thereby exposing a live gear. The panel in question had undoubtedly been removed during the past few days, and probably taken by some

person to light a fire close by. "Salamander stoves used throughout this shop." The guard was quite intact ten days before, as the foreman and my father had occasion to examine the gears on the lathe.

January 28th. Paper-mill employee. Cut fingers and back of hand burned. Hand caught between shaft and drum.

January 22nd. Smelter employee. Leg bruised. Got his leg caught by stern-line of barge which was being moved along wharf.

FEBRUARY, 1916.

February 10th. Smelter employee. Broken leg. Fell off platform.

February 10th. Smelter employee. Burns on neck and body. While moving pot of matte, pot turned over.

February 15th. Smelter employee. Badly bruised knee, necessitating amputation. Locomotive backed up, causing his leg to get jammed between car and projecting plank.

February 19th. Oil Company employee. Burned on face and hands. While starting pump was burned by acid.

February 21st. Smelter employee. Third finger of left hand bruised and bone fractured. While about to blast some frozen rock in the bins a rock fell on his left hand, causing bruises and fracture.

February 22nd. Can Company employee. Nail torn loose from finger. Caught in curling-machine. Absent from work seven days.

February 22nd. Soap-works employee. Three fingers more or less lacerated. Caught hand in crank action, cutting and creasing press. Doctor reports no permanent injury.

MARCH, 1916.

March 3rd. Can Company employee. Three fingers of left hand amputated. Had his fingers under die when press was tripped.

March 3rd. Can Company employee. Lacerated wound of right ring-finger; five stitches.

March 3rd. Lumber-mill employee. Slight injury to eye. Struck by pieces of saw in machine-shop.

March 4th. Oil Company employee. Foot cut and swollen. Ran nail into left foot.

March 8th. Shingle-mill employee. First and second fingers amputated. Injured was facing shingle spalt and his hand was caught by jointer-saw on an upright shingle-machine.

March 10th. Oil Company employee. Finger-nail taken off second finger and third finger severed at first joint. Caught on cable while unloading gravel.

March 13th. Shingle-mill employee. Flesh-wound, forearm. Cut on cut-off saw housed to centre of arbor.

March . Shingle-mill employee. Third and little finger cut. Had to amputate third finger at first joint. While picking out some pieces of checked and broken shingles his fingers came in contact with saw.

March 17th. Lumber-mill employee. Foot injured. Straightening edgings and slabs on slasher-table.

March 17th. Lumber-mill employee. Splinter through back of hand. Feeding rip-saw, sliver flew back and pierced hand.

March 18th. Lumber-mill employee. Loss of eye. Hit in the eye with cable on log-haul.

March 18th. Shingle-mill employee. Index finger cut. While waiting for blocks was jointing shingles, and cut finger on saw.

March . Box Company employee. Terminal phalanx of second finger of left hand and also index finger of left hand slightly injured. Tips of index finger and second finger of right hand slightly injured. Fingers caught in ending-machine.

March 27th. Shingle-mill employee. While placing a 24-inch shingle to joint the shingle was checked and split, catching the jointer-saw and flying back, striking his left wrist. The force of the blow caused his arm to be knocked against the shingle-saw, causing a deep bruise and severing the skin.

March 28th. Oil Company employee. Bruised thumb, right hand. Working on punching-machine in boiler-shop.

March 29th. Planer-feeder. Index finger cut. While machine was in operation injured man put his hand in side-head to remove sliver.

March 30th. Oil Company employee. Jammed right limb between track and sleigh.

April, 1916.

April 4th. Paper-mill employee. Lacerated wound, right thumb, with compound fracture, necessitating amputation at terminal joint. Wound on outside of right foot. Injured was coming down by cut-up saw to slasher-deck and walked across saw just as it was coming up to cut off some lumber. He tripped on saw, and in trying to save himself cut off his thumb and bruised his foot.

April 4th. Shingle-mill employee. Hand cut. Was using wrench on spur-roll clamp-bolt and his knuckle came in contact with the saw.

April 14th. Shingle-mill employee. Cut fleshy part of hand at base of thumb. Doctor, on examination of the cut, found that it was only a flesh cut and that neither bone nor cord of thumb had been touched.

April 15th. Paper-mill employee. Cut wrist. Slipping, stuck hand through window.

April 17th. Lumber-mill employee. Two fingers cut off. Injured was cutting shingle bands 1 x 2 x 20 inches. Saw equipped with splitter and wooden guard over saw. Slide-table with hand-hold which would keep his hand 6 inches away from saw. Must have put his hand on splitter at back of saw.

April 24th. Paper-mill employee. Fracture of right forearm and wound of same. Injured was foreman and millwright. He came down from cutting-up floor, as he had been told by one of the men that one of the conveyor-chains to chipper had come off the idler. When he got up on the platform to adjust it he was leaning over to see it, when the transfer to edger started, hitting him on the chest, causing him to overbalance, and to save himself he thrust out his hand to catch hold of something. Hand caught in chain and dragged it around sprocket. It also threw him off the platform on to concrete floor.

April 25th. Shingle-mill employee. Toe of right foot cut. Toe of foot came in contact with jointer-saw, causing a deep cut through the nail.

April 29th. Shingle-mill employee. Cut first finger of right hand about second joint.

April 25th. Lumber-mill employee. Little finger jammed. Handling timbers in planing-mill.

April 27th. Lumber-mill employee. Arm broken and spine injured. Injured man was pulling lumber from chains; clothes caught in or on live roll.

May, 1916.

May 1st. Smelter employee. Compound facture of right arm. While unloading coke from barge with clam-shell which had already dug down about 8 feet in main hatch of vessel, engineer suspended unloading operations to examine his engine, which had been running too fast. While he was doing this injured thought he would have time enough to screw down grease-cups inside clam-shell, which was open in readiness for digging. This he did without notifying the engineer, and left a green man to notify engineer not to start digging. When engineer returned this man gave him the go-ahead signal instead of stop signal. Engineer started up slowly, allowing the clam-shell to partly close on injured's arm, causing a compound fracture.

May 8th. Shingle-mill employee. Slight jam, third finger of right hand. He started to treat finger himself, and in doing so used electric tape for wrapping finger. He wrapped it so tight that it must have stopped circulation, which left finger in bad condition.

May 10th. Lumber-mill employee. Two toes crushed. Caught in slasher-chains.

May 13th. Shingle-mill employee. Left clavicle broken. He was taking blocking from front of wheel-truck to allow truck-load of shingles to enter kiln. Was caught between truck-load already ahead and the one he was working with behind.

May 18th. Shingle-mill employee. Flesh-wound on second and third finger of left hand.

May 19th. Shingle-mill employee. First finger of left hand amputated between first and second joint. Slightly cut second finger. While sawing shingles allowed hand to come in contact with saw.

May 19th. Smelter employee. Badly cut hands. Injured was up guy-pole to place tin shim to protect pole from wire. Bark was left on pole. The bark broke out from his spurs and to save himself he grabbed the shim.

May 26th. Lumber-mill employee. Bone in foot broken and knee injured. Foot caught in bull-chain.

May 30th. Oil Company employee. Scalp-wound on head. Wooden block fell on injured person's head.

May 31st. Rolling-mill employee. Slight skin-burns. Injured employed as rougher in rolling-mills.

JUNE, 1916.

June 1st Lumber-mill employee. Back bruised.

June 3rd. Smelter employee. Badly bruised left forearm. Injured and partner were felling a tree. Partner went to get another wedge. While away a gust of wind took tree down; it hit another tree, bending it over. When it sprang back it threw broken limbs in the air, one striking injured.

June 3rd. Oil Company employee. Bruised left arm and right knee. Fell during fire-drill.

June 5th. Oil Company employee. Burned left leg. Slipped into condensor at crude stills.

June 5th. Oil Company employee. Eyes injured. Got acid in eyes whilst blowing out an air-line.

June 6th. Oil Company employee. Sprained left ankle. Fell from fire-wall.

June 7th. Pulp-mill employee. Face and hands burned. Injured was in act of starting a fire under one of the oil-boilers. It appears he had not the fan going at the time and there was an accumulation of escaped gas, which exploded outward when he applied the torch, causing severe burns to face and hands.

June 9th. Planing-mill employee. Three fingers on left hand stripped from first joint to finger-tips

June 15th. Lumber-mill employee. Fingers cut. Carriage was not running and injured man was cleaning around saw.

June 16th. Lumber-mill employee. Cut fingers while cleaning sawdust-chute under resaw.

June 18th. Smelter employee. Fractured pelvis. Fell between two joists.

June 19th. Smelter employee. Fractured skull. Caught between cars he was coupling.

June 19th. Lumber-mill employee. Leg bruised and cut. Jumped from saw-carriage when sawyer lost control of same.

June 19th. Lumber-mill employee. Injured wrist. Saw-carriage got out of control.

June 20th. Cannery Company employee. Flesh-wound, three fingers of left hand. Received injury on a piece of tin while operating a press. Six days absent from work to allow wound healing.

June 21st. Smelter employee. Infected hand. Was unloading bricks and scratched hand on one. He did not go to see the doctor or report the injury until hand got painful on July 2nd. The doctor ordered him to the hospital.

June . Shingle-mill employee. Cut second finger at root of nail. Flesh-wound and slightly touched first and third fingers on points. While jointing shingles he must have gotten fingers under the guard and allowed them to come in contact with jointer-saw.

June 26th. Planing-mill employee. Two fingers stripped. Fingers caught by trimmer-saw.

June 28th. Lumber-mill employee. Crushed in abdomen. Was employed as helper to edgerman. A slab coming down live rolls was caught at end by saw-carriage, which threw it off rolls. Slab caught injured, jamming him against live rolls of runway.

JULY, 1916.

July 2nd. Smelter employee. Bruised leg. Were fighting a bush fire, and to protect railroad had to fell some trees that were on fire. In felling them, one fell back on railroad trestle and broke off an electric trolly-pole. The line crew were getting the broken pole off the track when it slewed, and one of the cross-arms hit McPhee on the head, knocking him off the track.

July 3rd. Lumber Company employee. Broken arm. Caught in belt. Lath contractor. Trying to place belt on pulley while same was in motion.

July 5th. Lumber-mill employee. Part of fingers taken off. Caught in slab-chains.

July 10th. Lumber Company employee. Loss of first finger, right hand. Cut on knee bolter-saw.

July 11th. Shingle Company employee. Small bone in left wrist broken. Block rolled off conveyor.

July 13th. Shingle Company employee. Injured hip and foot. Was lifting up log to pull chain out when bar slipped and log rolled on his right foot and hip.

July 13th. Planing-mill employee. Lost third finger below first joint. Caught finger on planer-knife.

July 15th. Structural-iron employee. Thigh crushed. Was tightening up truss-rod. Jammed between post and travelling crane. Had been working as labourer three days.

July 20th. Shingle Company employee. Second finger of left hand severed between first and second joint. Block fell off shingle-block table, striking his arm, and his fingers came in contact with the saw.

July 21st. Engineering Company employee. Finger severed above second joint. Injured was attempting to wipe off some oil from drill-spindle when rag caught in gears and drew in finger. To do this he was standing on box to reach up. It was against orders. Gears were out of reach under working conditions.

July 24th. Cannery Company employee. Flesh-wound, left hand. Received injury on piece of tin while shearing same on slitters. Off work six days.

July 25th. Lumber Company employee. Broken leg. In cleaning out gondola car, plank was thrown over side of car and hit injured, who was passing along the wrong side of car to get in and help.

July 27th. Lumber Company employee. Fracture of left femur; compound fracture of right arm; lacerated wound on right arm. Was painting post about 3 feet away from a shaft, and in some unaccountable manner his clothes caught on the collar at the end of shaft revolving at 25 R.P.M.

July 27th. Lumber-mill employee. Cut on elbow while operating cut-off saw.

July 28th. Paper-mill employee. Laceration of right knee; stump of little finger of right hand lacerated, requiring amputation; scalp-wound on back of head. In sawing a spruce boom-stick, saw ran into a drift-bolt.

July 28th. Lumber-mill employee. Bruised. Dogger on carriage was thrown from the carriage when it struck the bumper.

July 31st. Shingle-mill employee. Body bruised. While pulling down ventilator-box in kiln the bolt holding weight pulled through the wood, allowing ventilator-box to fall.

August, 1916.

August 5th. Shingle-mill employee. Lost two-thirds of forefinger and one-third of middle finger of left hand. Injured was employed as block-piler, which constitutes the piling of blocks as they cut by slasher-saws from receiving-table on to sawyer's table. He persuaded the regular sawyer to allow him to try to saw shingles, the result being the above injuries.

August 5th. Shingle-mill employee. Right arm bruised; not serious. Clothing caught in saw-arbor.

August 5th. Planer-feeder. Lost index finger and middle finger cut. Was cleaning chips from planer while machine was in operation.

August 6th. Shingle-mill employee. Strained back. Lifting on fly-wheel engine.

August 10th. Lumber-mill employee. Cut in abdomen. Injured was operating a swing-saw. The saw jammed in a piece of lumber. Boss gave it an extra-hard pull, which snapped the leather with the weight used to swing the saw back.

August 15th. Cannery Company employee. Flesh-wound, second finger of left hand. Injured, while inserting plugs in friction-rings on a press, put his hand under the punch to straighten a plug that had slipped loose from the friction-ring. At the same time the punch came down, injuring his finger.

August 19th. Paper-mill employee. Smashed fingers. Caught in calenders on paper-machine.

August 20th. Smelter employee. Simple fracture of first, second, and third metacarpels. While placing furnace buckstay beam with crane anchor eye-bolt in wall with snatch-block attached broke, causing beam to fall, hitting a bar which fell on injured's foot.

August 25th. Mattress-manufacturing employee. Finger cut while machining piece of wood.

August 25th. Lumber-mill employee. Elbow caught in cog gear of printing-press in box-factory.

August 26th. Smelter employee. Fracture of right ulna and radius. Munro put his hand in close to a pulley to take a small rock out. Glove got caught and his hand was taken around pulley.

August 29th. Edgerman. Foot crushed. Was repairing edger and plank fell on foot.

August 30th. Oil Company employee. Piece of steel lodged in eyelid. Backing-out punch broke and piece of steel struck eye. Employees are furnished with safety-goggles, but refuse to wear same.

SEPTEMBER, 1916.

September 6th. Smelter employee. Fracture of third finger of right hand. Injured was swinging a hammer in boiler-shop when the crane went by with a load. His finger was crushed between handle of hammer and the load the crane was carrying.

September 8th. Tail-sawyer. Fractured leg. Board caught in block of carriage, which struck injured man.

September 11th. Mattress-manufacturing employee. Finger cut open. While machining piece of wood, same broke.

September 11th. Ship-building employee. Rupture of ligament of right ankle. Stepping off lumber into a hole. Probable disablement four weeks; no permanent injury.

September 12th. Mattress-manufacturing employee. Collar-bone broken. Timber slipping while putting baling-machine in order.

September 12th. Paper-mill employee. Wound on under-surface of big toe, with enucleation of nails of big and second toes.

September 13th. Log-deckman. Bruised leg. Got in way of steam kicker, which struck leg.

September . Mattress-manufacturing employee. Back wrenched. Turning fly-wheel of baling-machine.

September 19th. Smelter employee. Small toe of left foot amputated. Injured was operating air-hoist on Dock No. 2, loading copper from pile to car to transfer to Dock No. 1 to load on boat. When lifting one sling-load he must have been taking a side-pull at it, as the load swung around and hit another pile, knocking a bar from same, which fell on his foot.

September 20th. Lumber-mill employee. Bruised thumb while tailing edger.

September 21st. Smelter employee. Burns on face, neck, and body. Was helping to dump a car of hot flue-dust, and must have failed to place the dumping-tackle securely around rail, as it slipped off when they dumped car over, allowing dust to come out all at once.

September 22nd. Ship-building employee. Hæmorrhage of right ear; partial deafness at present. Struck by steel plate. NOTE.—After recommendation of this Department, the company is now supplying safety-clamps for lifting boiler-plates. The plates cannot slip through the clamps, thus preventing similar accidents.

September 25th. Lumber-mill employee. End of finger severed. While pulling sliver off side-head of moulder one of the knives caught the end of his finger.

September 26th. Sugar-refinery employee. Bruised head and legs. While loading sugar on trucks the bags slid down the pile from a height of 12 feet, striking him on head and hips.

September 27th. Ship-building employee. Fractured great toe of right foot. Dropped pipe on foot. Probable disablement, three weeks.

September 28th. Ship-building employee. Laceration of right wrist. Put his hand on circular saw. Probable disablement, two weeks.

OCTOBER, 1916.

October 2nd. Planerman. Grinding knife when piece of steel flew up and struck eye. Slight.

October 3rd. Sawmill employee. Forearm badly torn and flesh-wound back of fingers. Injured was pushing sawdust down in conveyor with scraper-handle when conveyor-chain caught handle and threw him off his balance and against the circular head-saw.

October 3rd. Lumber-mill employee. Slight injury to leg. Fell on slasher-chains.

October 7th. Smelter employee. Broken tibia of fibula of left leg. Was brakesman on steam-shovel train. Standing close to cars when craneman put a big stump on car with shovel-dipper, and it toppled over side of car and hit injured man on the leg.

October 8th. Lumber-mill employee. Injured back, bruised ribs, broken finger, and scalp-wound. Was tightening up bolts under log-deck. Wrench slipped, causing him to lose balance; falling over backward, he struck on line-shafting and from there he fell to floor about 8 feet.

October 9th. Lumber-mill employee. Assisting to adjust at planer, injury to finger.

October 13th. Smelter employee. Acute hernia. Operation necessary. In unloading quartz from scow, bucket struck him in abdomen.

October 14th. Paper-mill employee. Cut forearm. Slipped and put arm through window.

October 18th. Lumber-mill employee. Fracture of left leg above ankle. Was unloading truck 2 x 6 on solid pile about 3 feet high, and pile upset on him.

October 20th. Box-manufacturing employee. Left arm severed about 4 inches from shoulder. Jumper caught in gear, drawing arm and injuring it so badly it had to be amputated. Planer in good working condition. All disengaging devices installed, which injured failed to use.

October 21st. Paper-mill employee. Right ankle sprained. Slipped on cement floor. Horseplay caused this accident.

October 21st. Paper-mill employee. Severe laceration of index and second finger of right hand. Caught in calenders.

October 21st. Smelter employee. Lacerated foot. Crane-bale fell on foot.

October 23rd. Laundry employee. Fingers burned. One had to be amputated. Index finger caught in mangle.

October 23rd. Shingle-mill employee. Lost first three fingers of left hand. Was splitting a shingle on jointer-saw. Put his fingers too far over guard, or the saw pulled shingle farther than he expected.

October 25th. Planing-mill employee. Was tailing behind rip-saw and cleaning underneath with a stick when elbow struck saw.

October 28th. Car-shop employee. Right knee crushed and lacerated. Was taking out king-pin from underneath car. When king-pin was released car slipped sideways and jack tipped over, allowing car to settle down, catching leg between draft timber and wheel-flange. Injuries not of permanent character.

October 28th. Oil Company employee. Scalp-wound on head. Struck on head with a piece of coke.

October 30th. Box-manufacturing employee. Loss of thumb on left hand below first joint. Circular rip-saw equipped with guard. Hand followed board underneath guard.

November, 1916.

November 3rd. Cannery Company employee. First and second fingers of left hand badly cut. While inserting plugs in friction-rings on press, put hand under punch to straighten a plug. The punch coming down injured hand.

November 4th. Ship-building employee. Badly cut on head, cheek, ear, and knocked senseless. Was putting crown on stanchions of ship. Stanchion was being raised by hydraulic jack. The foot of jack sank into keelson and caused the jack to press against side of stanchion, breaking off a large piece. Stanchion sprang from under beam, striking injured.

November 8th. Smelter employee. Rupture of iris of right eye. While standing at side of furnace debris was shot out of tuyere-hole and hit him in eye. His vision will probably be about 60 per cent. normal in right eye.

November 8th. Ship-building employee. Cut at back of head and bruised shoulder and leg. Fell from ladder leading into hold. Ladder in good condition.

November 9th. Shingle-manufacturing employee. Slight flesh-wound on first finger of right hand.

November 9th. Smelter employee. Both eyes burnt. Cornea of left one-third burnt. Matte exploded while injured was claying same. Goggles were supplied for this work, but injured failed to use same.

November . Oil Company employee. Cut palm of left hand. Slipped off ladder and cut hand on piece of corrugated iron.

November 14th. Sawmill employee. Fracture of jaw-bone. Loss of sight of right eye. Emery-wheel burst.

November 14th. Ship-building employee. Left thumb nearly amputated. Slight cut on forehead and face. A clamp broke when being used to force piece of planking into place. Clamp struck thumb and injured was knocked off staging, about 10 feet high. An edge fell with him, cutting his forehead.

November 15th. Shingle-mill employee. Loss of third finger of right hand at first joint. Was clipping shingles in absence of sawyer. Not his work.

November 15th. Paper-mill employee. Severe laceration of three fingers of left hand. Was putting paper into calenders and caught fingers in same.

November 16th. Paper-mill employee. Laceration of right instep; contusion of right ankle; swelling of dorsum of foot. Caught foot under car-wheel.

November 18th. Ship-building employee. Face cut. Pneumatic wood-borer struck injured man under the left eye.

November 20th. Smelter employee. Broken ankle. Sacks of cement fell on him.

November 20th. Ship-building employee. Cut over left eye about 1 inch long. Struck by piston of pneumatic hammer, used in driving tree-nails.

November 21st. Lumber-mill employee. Scalp-wound 2½ inches long. Cause of wound unknown.

November 21st. Paper-mill employee. Broken rib, left side. Overbalanced and fell on edge of sluice.

November 22nd. Cannery Company employee. First finger of right hand badly bruised. While perforating top of spice-can injured put her hand under punch to catch a top that had slipped loose. As punch came down it injured her finger.

DECEMBER, 1916.

December 4th. Cannery Company employee. First finger, second, and ring fingers amputated. While cutting frictions out of No. 2½ sanitary fruit-ends put her hand under punch to guide end to place, instead of using stick provided.

December 5th. Shingle-mill employee. Left arm cut off below elbow. While injured was splitting and barking shingle-blocks one piece of a block, which was evidently covered with ice or frost, slipped out of his hand, and as he reached across the saw to pick up the block his arm came too close to the saw and was thus injured.

December 7th. Shingle-mill employee. Side injured. Fell on his left side when foot went through a hole.

December 7th. Lumber-mill employee. Fingers crushed. In turning a 6-inch cant for the gang-saw, he dropped same on his fingers.

December 13th. Lumber-mill employee. Loss of index finger of right hand. Sawyer was cleaning away with stick a piece of wood which had become wedged between saw and guide. Stick caught saw, drawing hand to saw. This accident would have been prevented if injured had complied with foreman's instructions. No obstructions in connection with any machinery to be removed while same is in motion.

December 14th. Lumber-mill employee. Finger and thumb cut. Examining board coming through machine. Put hand too close to knives on cylinder.

December 16th. Smelter employee. Fracture of left radius and right femur. Injured man and a helper were painting the roof-braces of bullion-room. They placed a plank in the V formed by one of the knee-braces. When they got on the plank it tipped sideways. Injured man fell about 12 feet.

December 17th. Oil Company employee. Face and hands badly burned. Caused by one of the oil-burners back-firing.

December 21st. Ship-building employee. Two ribs and collar-bone fractured. Injured was taking out the turns in a coil of rope when he stepped back over the edge of the platform, falling about 15 feet.

December 26th. Lumber-mill employee. Fracture of jaw. While doing millwright-work a plank he was standing on broke, and he fell about 12 feet.

December 26th. Cannery Company employee. Crushed ring-finger of left hand. Injured was helping the foreman lift biscuit-can body folding die from the press to the floor. In some way die slipped just as they had it nearly on the floor, crushing the end of his finger.

December 26th. Lumber-mill employee. Employed as mill-cleaner. Was sweeping sawdust from beam when he fell.

Serious Accident of Employee, Sawmill Paper Company.

Injuries received were: Laceration inside of right knee, involving internal condyle of fernum; stump of little finger of right hand lacerated, requiring amputation; scalp-wound, back of head.

The accident was due to some one driving a spike in log. They were in the act of sawing a spruce boom-stick and ran into a drift-bolt. The saw broke in the bridge and came out on the carriage straight for the set-works, where injured stood. He tried to get behind the set-works, but tripped and fell out on to the runway and was then injured. The drift-bolt had been hammered into the log clear out of sight, and it was impossible to see it was there until the saw hit it.

I have received a number of complaints from millmen regarding drift-bolts and spikes being driven into merchantable timber. While making an inspection of mill in the Interior, the managing director of the company produced eight railroad-spikes, minus heads, which were driven into a boom of logs. This caused a loss to the company of about $1,200 for saws. Fortunately, no one was injured.

I would suggest that this matter be taken up with the proper authorities, as this practice should be discontinued.

SUPPLEMENTARY

REPORT OF THE CHIEF INSPECTOR OF MACHINERY.

NEW WESTMINSTER, B.C., January 2nd, 1918.

The Honourable the Minister of Public Works,
Victoria, B.C.

SIR,—In accordance with the provisions of the "Boilers Inspection Act," I have the honour to submit to you the following tabulated reports of the work of the Inspectors for the months of January, February, and March, 1917, to be added to the twelve months' work previously reported on, ending December 31st, 1916, in order to make our inspection years coincide with the fiscal years.

I have, etc.,
JOHN PECK,
Chief Inspector.

TOTAL SUMMARY FOR ALL DISTRICTS.

ENGINEERS' EXAMINATIONS.

Number of applications for examinations (in addition to 114, balance on hand December 31st, 1916)	221
Number of applications for re-examination	13
Number of applications approved	147
Examination fees	$742.50

RESULTS OF EXAMINATIONS.

Class.	No. examined.	Passed.	Failed.
Second	9	5	4
Third	43	27	16
Fourth	66	44	22
Temporary	30	30	...
Special logging-donkey	27	17	10
Special logging-locomotive	3	3	...
Special heating	4	4	...
Special Doukhobor	9	9	...
Totals	191	139	52

SUMMARY OF TOTAL WORK DONE BY DISTRICT INSPECTORS FOR THE MONTHS OF JANUARY, FEBRUARY, AND MARCH, 1917.

Number of drawings and specifications calculated for new boilers	46
„ boiler-plates inspected	81
„ boiler-plates rejected	2
„ boilers built under inspection in British Columbia	12
„ boilers built under inspection in Eastern Canada	2
„ boilers built in Eastern Canada not under inspection	2
„ new boilers inspected built in United States	9
„ new boilers inspected built in British Columbia	6
„ new boilers inspected (total)	18
„ boilers imported from Eastern Canada (second-hand)	1
„ boilers imported from United States (second-hand)	3
„ boilers unclassified	4

Summary of Total Work done by District Inspectors—*Concluded*

Number of first inspections	27
„ inspections, external and internal	430
„ external inspections only	20
„ special inspections after repairs	17
„ visits in addition to inspections	292
„ boilers subjected to hydrostatic test	425
„ boilers on which pressure was reduced	13
„ boilers unsafe without extensive repairs	14
„ boilers repaired under Inspector's directions	22
„ boilers considered unfit for further use	2
„ accidents to engines and boilers	7
„ investigations	5
„ inspections completed	436
Total horse-power of boilers inspected	28,862
Number of defects observed as per summary	403
Number of defects considered dangerous	43
Inspection fees earned	$4,847.14
Inspection fees collected	$4,678.91
Miles travelled by the Inspector	10,532
Letters inward	1,307
Letters outward	1,675
Telegrams inward	11
Telegrams outward	8
Boilers taken out of service	11

Summary of Total Defects observed.

Nature of Defects.	Number.	Dangerous.
Boilers without safety-valves	1	1
Boilers with safety-valves overloaded	1	..
Boilers with safety-valves defective in construction	5	1
Boilers without pressure-gauges	1	1
Pressure-gauges inoperative	5	3
Pressure-gauges defective	45	2
Cases of broken rivets	1	..
Cases of defective riveting	4	4
Cases of broken stays or braces	8	2
Cases of loose stays or braces	1	..
Defective settings	19	3
Boilers with fractured plates	3	..
Boilers with laminated plates	1	1
Boilers with burned plates	3	1
Boilers with blistered plates	4	..
Cases of sediment on fire-sheets	27	1
Cases of internal corrosion	18	..
Cases of scale or encrustation	38	5
Cases of external corrosion	29	..
Cases of defective tubes	20	2
Cases of defective feed-water arrangement	4	..
Cases of broken feed-valves	1	..
Serious leakage around tube-ends	25	4
Serious leakage in rivet-joints	3	..
Defective blow-off pipes or cocks	29	4
Defective water-gauges	1	1
Broken blow-off pipes or cocks	4	1
Water-columns without blow-outs	1	1

SUMMARY OF TOTAL DEFECTS OBSERVED—*Concluded.*

Nature of Defects.	Number.	Dangerous.
Cases of broken test-cocks	31	..
Connections to water-columns without valves	1	1
Boilers without fusible plugs	4	1
Boilers low at front end	12	..
Cases of serious leakage of fittings	9	1
Defects in engines	2	1
Boilers without stop-valves	1	..
Cases of defective steam-pipes	2	1
Unclassified defects	39	..
Totals	403	43

JOHN PECK,
Chief Inspector of Steam-boilers.

Inspector's Report, District A.
